Many of the storage tank provisions now contained in Subtitle I, including section 9003(g), had their origins in a bill introduced by Senator Durenberger on February 29, 1984 as an amendment to the Safe Drinking Water Act, 130 Cong. Rec. S2023 (Feb. 29, 1984). Among these provisions was a requirement that EPA promulgate new tank standards within nine months of the date of enactment of the proposed amendments. Such standards were to include a prohibition on bare steel tanks. *Id.* at S2026. The provisions established an exception from the bare steel tank ban "where the Administrator finds there is minimal danger of corrosion." *Id.* In describing that provision, Senator Durenberger stated that "installation of common but less adequate tanks—those made of bare steel—would be prohibited unless the hydrogeology of the area is such that there is a minimal danger of corrosion." *Id.* at S2027.

On July 25, 1984, Senator Durenberger offered a modified version of his storage tank provisions as an amendment to RCRA. 130 Cong. Rec. S9164 (July 25, 1984). This amendment was passed by the Senate. *Id.* at S9201. In this modified version, the deadline for—new tank standards was extended and the bare steel ban was converted into an interim requirement that new tanks be installed in accordance with enforced national consensus code." This requirement was to go into effect ninety days after the bill was passed and remain effective until EPA promulgated new tank standards. *Id.* at S9163–64.

On the House of Representatives side, amendments to RCRA were passed but did not contain provisions for the regulation of underground storage tanks. 130 Cong. Rec. H9184 (November 3, 1983). On August 10, 1984, however, the House passed an underground storage tank bill as an amendment to CERCLA. 130 Cong. Rec. H8938, H9027 (August 10, 1984). The House bill contained an interim prohibition that provided as follows:

> Until the effective date of the regulations promulgated by the Administrator under subsection (a) and after 180 days after the date of the enactment of this title, no person may install or begin using an underground storage tank for the purpose of storing hazardous substances unless such tank, of either single or double wall construction, is cathodically protected against corrosion, constructed of noncorrosive material, steel clad with a noncorrosive material which would prevent corrosion for the operational life of the tank, or contained in a manner designed to prevent the release or threatened release of any stored hazardous substance and unless in all cases the material used in the construction or lining of the tank is compatible with the substance to be stored. *Id.* at H8950.

Subsequently, a Conference Committee was formed to consider the RCRA amendments passed by the Senate and the House. Although the House CERCLA bill was not officially under consideration by the RCRA Conference Committee, the conferees adopted the language of that bill's interim prohibition with several significant modifications. 130 Cong. Rec. H11121 (Oct. 3, 1984). These modifications included the requirement that every new tank prevent releases due to "Structural failure" for its "operational life" (section 9003(g)(A)) and the exception from corrosion protection requirements for tanks located in soil with a resistivity of 12,000 ohm/cm or more. The Conference Report described the reported provision as follows:

> Following enactment, the installation of bare steel tanks, i.e. those which provide little or no protection against corrosion, will be prohibited until the Administrator promulgates regulations establishing the conditions for installation. Bare steel tanks may be installed (pending promulgation of EPA regulations) only where properly conducted soil tests show resistivity at 12,000 ohms/cm or more. This provision replaces the provision in the Senate amendment which prohibits installation of bare steel tanks except in states that enforce a national consensus code.

130 Cong. Rec. 11139 (Oct. 3, 1984).

The bill, as reported by the Conference Committee, ultimately passed both houses and was signed by the President on November 8, 1984.

The legislative history of section 9003(g) reveals that, as originally introduced in the Senate, the section was aimed at preventing the installation of steel tank systems without corrosion protection. Ultimately, however, section 9003(g) was expanded not only to prohibit installation of bare steel tanks, but also to include requirements pertaining to the structural integrity of all newly installed tanks and the compatibility of the substances stored with the materials used in the construction and lining of such tanks.

V. EPA's Interpretation of Section 9003(g)

EPA reviewed the statutory language of section 9003(g) and its legislative history. Based upon this review, EPA's conclusions are set forth below.

Section 9003(g) (codified as 40 CFR 280.2) establishes three requirements that must be satisfied by all underground storage tanks (including underground pipes connected to the tanks) installed between May 7, 1985 and the effective date of new tank standards promulgated under RCRA section 9003(e), with the exception of tanks qualifying for the exemption from corrosion protection requirements under section 9003(g)(2). There requirements are: (1) That the tank and underground piping be designed, constructed, and installed to prevent releases due to corrosion for the operational life of the tank and the piping; (2) that the tank and underground piping be designed, constructed, and installed to prevent releases due to structural failure for the operational life of the tank and the piping; and (3) that the materials used in the construction or lining of the tank and its underground piping be compatible with the substance to be stored in the tank.

The first two of the above requirements are established by section 9003(g)(1)(A), which provides that tanks must "prevent releases due to corrosion or structural failure for the operational life of the tank." The third requirement is established by section 9003(g)(1)(C). In addition, section 9003(g)(1)(B) sets forth minimum requirements for tank design and construction. Under section 9003(g)(1)(B), tanks must be either cathodically protected against corrosion, constructed of noncorrosive material, steel clad with a noncorrosive material or designed in a manner to prevent the release or threatened release of any stored substance.

In addition to cathodically protected tanks and tanks constructed or clad with non-corrosive materials, section 9003(g)(1)(B) would permit the use of other types of tanks and protective measures if they are "designed in a manner to prevent the release or threatened release of any stored substance." Interested parties may consult with EPA on a case-by-case basis concerning the effectiveness of particular technologies for preventing releases.

There are several examples of tanks that do not satisfy the requirement of section 9003(g)(1)(A) that they prevent releases due to corrosion for the operational life of the tank. A steel tank whose only corrosion protection is a coating of noncorrosive materials that is applied in such a way that it will not prevent releases due to corrosion for the operational life of the tank is not adequate. Similarly, a cathodically protected tank whose cathodic protection is not designed to prevent releases for the operational life of the

tank will not be deemed to have satisfied this requirement.

Paint and asphalt coatings are not adequate for cathodic protection. Asphalt paints are soluble in a number of regulated substances that are normally stored in tanks, including solvents and hydrocarbons, such as gasoline. Applications of both asphalt paints and lead paints are thin, easily damaged during installation and easily worn away during use. They do not provide a complete seal for the tank. such paint or asphalt coatings do not provide corrosion resistance for the operational life of the tank and, therefore, do not comply with the interim prohibition.

Tanks that satisfy the requirement of section 9003(g)(1)(A) to prevent releases due to corrosion must still satisfy the requirements that they prevent releases due to "structural failure" and that the materials used in the construction of the tank be compatible with the substances to be stored. For example, a tank constructed of noncorrosive material that is subject to structural failure because of its design or installation would not satisfy the requirements of section 9003(g)(1). Similarly, a tank whose construction materials are not compatible with the product to be stored would not satisfy the requirements of section 9003(g)(1) because, although it satisfies the corrosion protection requirement of section 9003(g)(1)(A), it does not satisfy the compatibility requirement of section 9003(g)(1)(C).

Section 9003(g)(1) provides that "no person may install an underground storage tank" unless such tank satisfies the requirements of sections 9003(g)(1)(A), (B), and (C). EPA interprets the term "no person may install an underground storage tank" to encompass any persons responsible for having a tank installed, including among others owners, operators and installers. EPA also interprets section 9003(g) as applying to all new installations, including installation of previously used tanks and to any new installation of underground piping associated with underground tanks subject to the prohibition. When the new installation is only piping, only the new piping would be subject to the standards in section 9003(g).

With respect to the exemption from corrosion protection requirements provided by section 9003(g)(2), EPA interprets this provision as permitting the installation of a tank without corrosion protection if a person, prior to installation, demonstrates by means of soil testing conducted in accordance with ASTM Standard G57–58 that the soil at the location where the tank is to be installed does not have a resistivity of less than 12,000 ohm-cm.

A tank exempted from corrosion protection requirements under this section, however, must still satisfy the requirement that the tank be designed, constructed, and installed to prevent releases due to the structural failure of the tank and that the materials used in the construction or lining of the tank be compatible with the substances to be stored in the tank. Thus, for example, a steel tank without any type of corrosion protection may be installed at a location where the soil continues to have a resistivity of 12,000 ohm-cm during the operational life of the tank. However, if the tank is constructed or installed so that it suffers structural failure or is not compatible with the stored product and releases its contents, the tank would not be in compliance with section 9003(g).

VI. Summary of Supporting Analyses

1. Executive Order 12291

Executive Order 12291 [46 FR 13193, February 9, 1981] requires that a regulatory agency determine whether a new regulation will be "major" regulation and, if so, that a Regulatory Impact Analysis be conducted. A major rule is defined as regulation which is likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, and local government agencies, or geographic regions;

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule does not have any of the impacts listed above. The Agency did conduct an economic impact analysis of the interim prohibition as part of the Hazardous Waste Management System; Final Codification Rule published in the Federal Register July 15, 1985. The Regulatory Impact Analysis concludes that upper bound cost estimates for the Interim Prohibition are under $10 million per year.

The interpretive rule has been submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

2. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, whenever an agency publishes a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the impact of the rule on small entities (i.e., small businesses, small organizations, small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

The Regulatory Impact Analysis for the Final Codification Rule also addresses the impact of the Interim Prohibition on small entities and concludes that the Interim Prohibition will not have a significant economic impact on a substantial number of small entities. This interpretive rule does not, therefore, require a regulatory flexibility analysis.

Dated: May 21, 1986.

Lee M. Thomas,

Administrator.

Part V

Department of Education

34 CFR Parts 682 and 690
Guaranteed Student Loan Program and Pell Grant Program; Schedules of Expected Family Contributions; Final Regulations

BEST COPY AVAILABLE

DEPARTMENT OF EDUCATION

34 CFR Parts 682 and 690

Guaranteed Student Loan Program and Pell Grant Program; Schedules of Expected Family Contributions

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the final regulations for the Schedule of Expected Family Contributions for the Guaranteed Student Loan (GSL) and Pell Grant programs. These amended regulations are required by section 16031 of the Consolidated Omnibus Budget Reconciliation Act of 1985, Pub. L. 99-272. The expected family contribution schedules for these two programs are amended to exclude from family income the income realized from the proceeds of a sale of farm or business assets if the sale results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy.

EFFECTIVE DATES: These regulations take effect either 45 days after publication in the Federal Register or later, if Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

When effective, for the GSL program, the regulations will apply to any loan made for a period of instruction which begins on or after July 1, 1985.

When effective, for the Pell Grant Program, the regulations will apply to a Pell Grant made for any award year which begins on or after July 1, 1985.

FOR FURTHER INFORMATION CONTACT: Deborah Cohen, U.S. Department of Education, Office of Student Financial Assistance, 400 Maryland Avenue, SW. [Regional Office Building 3, Room 4318] Washington, DC 20202. Telephone number (202) 472-4300.

SUPPLEMENTARY INFORMATION:

Background

Effect of Amendment on the Pell Grant and GSL Programs

Section 16031 of the Consolidated Omnibus Budget Reconciliation Act of 1985, Pub. L. 99-272, requires the Secretary to amend the 1985-86 and 1986-87 Schedules of Expected Family Contributions for the GSL and Pell Grant programs to exclude from the computation of an expected family contribution (EFC) any income realized from the proceeds of a sale of farm or business assets if the sale of assets results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy.

Additional Effect of Amendment on the GSL Program

Section 16031 does not affect the GSL requirement set forth in the GSL program regulations, 34 CFR 682.301, that an institution must calculate a student's EFC to determine whether the student is eligible for interest benefits if the student's adjusted gross family income (AGFI) exceeds $30,000. In addition, section 16031 does not authorize the exclusion of such income when the institution determines whether a student's AGFI is over $30,000.

If the institution uses Appendix B to the GSL program regulations to calculate the student's EFC, it must adjust the student's AGFI to exclude the taxable portion of the income realized from the proceeds of a sale of farm or business assets if the sale results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy. However, if that adjustment reduces the student's AGFI to $30,000 or less, the institution may not use Appendix B to the GSL program regulations to calculate the student's EFC but must, instead, use a need analysis system approved by the Secretary under the campus-based programs.

If the institution calculates the student's EFC using a system of need analysis approved by the Secretary for use in the campus-based programs, (National Direct Student Loan, College Work-Study, and Supplemental Educational Opportunity Grant), the EFC calculated for that student under that system must be adjusted to exclude from family income the taxable and nontaxable income realized from the proceeds of the sale of farm or business assets as described above.

Waiver of Notice of Proposed Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)), and the Administrative Procedure Act, 5 U.S.C. 553, it is the practice of the Secretary of offer interested parties the opportunity to comment on proposed regulations. However, section 16031 of Pub. L. 99-272 requires the Secretary to publish regulations to exclude, in the computation of an expected family contribution for the GSL program and Pell Grant program, the income realized from the proceeds of a sale of farm or business assets if the sale of assets results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy. Since these regulations merely implement statutory amendments and do not establish substantive policy, the Secretary finds that publication of a proposed rule is unnecessary and contrary to the public interest under 5 U.S.C. 553(b)(B).

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291 and are classified as nonmajor because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. These regulations revise the schedules of expected family contributions for the GSL and Pell Grant programs and do not affect small entities.

Assessment of Educational Impact

The Secretary has determined that the regulations in this document would not require transmission of information that is being gathered by, or is available from, any other agency or authority of the United States.

List of Subjects

34 CFR Part 682

Administative practice and procedure, Colleges and universities, Education, Loan programs—education, Student aid, Vocational education.

34 CFR Part 690

Administrative practice and procedure, Education, Education of disadvantaged, Grant programs—education and Student aid.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these regulations.

(Catalog of Federal Domestic Assistance Numbers: 84.032, Guaranteed Student Loan Program and 84.063, Pell Grant Program)

Dated: May 30, 1986.

William J. Bennett,

Secretary of Education.

The Secretary amends Parts 682 and 690 of Title 34 of the Code of Federal Regulations as follows:

PART 682—GUARANTEED STUDENT LOAN PROGRAM

1. The authority for Part 682 is revised to read as follows:

Authority: 20 U.S.C. 1071-1087-2, unless otherwise noted.

2. In § 682.301, paragraph (f)(2)(ii) is revised and paragraph (g) is added to read as follows:

§ 682.301 Eligibility for interest benefits on a GSLP loan.

* * * * *

(f) * * *

(2) * * *

(ii) The tables found in Appendix B if the adjusted gross income of the student and his or her family, after taking the provisions of paragraph (g) of this section into account, is more than $30,000 and less than $75,000.

(g) In calculating a student's expected family contribution under paragraph (f) of this section—

(1) The institution shall exclude any taxable and nontaxable income realized from the proceeds of a sale of farm or business assets if—

(i) The sale of the farm or business assets results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy; and

(ii) The institution uses a need analysis system approved by the Secretary for the campus-based programs to calculate the student's expected family contribution; and

(2) The institution shall exclude any taxable income realized from the proceeds of a sale of farm or business assets if—

(i) The sale of the farm or business assets results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy; and

(ii) The institution uses the tables set forth in Appendix B to calculate the student's expected family contribution.

(20 U.S.C. 1078, 1082, and 1089)

PART 690—PELL GRANT PROGRAM

1. The authority for Part 690 is revised to read as follows:

Authority: 20 U.S.C. 1070a, unless otherwise noted.

2. In § 690.33, paragraph (g) is revised to read as follows:

§ 690.33 Effective family income.

* * * * *

(g) The annual adjusted family income does not include any—

(1) Student financial assistance except those veteran's benefits cited in paragraph (b)(2) of this section; and

(2) Income realized from the proceeds of a sale of farm or business assets if the sale of assets results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy.

(Sec. 5 of Pub. L. 97-301 as amended by Sec. 4 of Pub. L. 98-79 and Sec. 707 of Pub. L. 98-511; and 20 U.S.C. 1089)

3. In § 690.43, paragraph (e) is revised to read as follows:

§ 690.43 Effective family income.

* * * * *

(e) The annual adjusted family income does not include any—

(1) Student financial assistance except those veteran's benefits cited in paragraph (b)(2) of this section; and

(2) Income realized from the proceeds of a sale of farm or business assets if the sale of assets results from a voluntary or involuntary foreclosure, forfeiture, or bankruptcy.

(Sec. 5 of Pub. L. 97-301 as amended by Sec. 4 of Pub. L. 98-79 and Sec. 707 of Pub. L. 98-511; and 20 U.S.C. 1089)

Part VI

Environmental Protection Agency

40 CFR Parts 122 and 403
Water Pollution; General Pretreatment Regulations for Existing and New Sources; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 122 and 403

[FRL-3025-8]

Water Pollution; General Pretreatment Regulations for Existing and New Sources

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) today is making technical amendments to 40 CFR Part 403. This action is necessary to correct typographical errors, erroneous cross-references, and inadvertent omissions in the General Pretreatment Regulations. This final rule also makes several other minor revisions that clarify the regulations, remove inconsistencies, and update certain provisions in response to developments that have occurred since their promulgation.

DATE: The effective date of this regulation is July 7, 1986.

In accordance with 40 CFR Part 23, these regulations shall be considered final agency action for purposes of judicial review at 1:00 p.m. eastern time on June 18, 1986.

Under section 509(b)(1) of the Clean Water Act (CWA), judicial review of this regulation can be obtained only by filing a petition for review in the United States Court of Appeals within 90 days after the regulation is considered issued for purposes of judicial review. Under section 509(b)(2) of the CWA, the requirements in this regulation may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

FOR FURTHER INFORMATION CONTACT: Hans I.E. Bjornson, Permits Division (EN-336), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 475-9530.

ADDRESS: The supporting information for this rule will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2402, 401 M Street SW., Washington, D.C. 20460.

SUPPLEMENTARY INFORMATION: EPA promulgated the General Pretreatment Regulations on June 26, 1978 (40 CFR Part 403; 43 FR 27736). These regulations established mechanisms and procedures for controlling the introduction of wastes from industry and other non-domestic sources into publicly owned treatment works (POTWs). On January 28, 1981, the Agency promulgated amendments to the regulations pursuant to a settlement agreement with parties that had challenged the regulations in Federal court (46 FR 9404). The Agency has subsequently made several other amendments to the regulations, including revisions to the removal credits provision (40 CFR 403.7) on August 3, 1984 (49 FR 31212). (The revised removal credits provision was recently struck down by the United States Court of Appeals for the Third Circuit in *Natural Resources Defense Council, Inc.* v. *EPA*, No. 85-3012 (3d Cir. 1986). EPA is reviewing this decision to determine the appropriate response.) Today's notice corrects inadvertent omissions, erroneous internal cross-references, and typographical errors in the regulations. The Agency is also revising cross-references to the NPDES permit regulations to account for the deconsolidation of, and other changes to, those regulations (see 48 FR 14146, April 1, 1983; 47 FR 53666, November 26, 1982). Several other minor revisions are being made to clarify the regulations, remove inconsistencies, and update certain provisions to account for developments that have occurred since their promulgation.

Today's final rule has not been the subject of a previous notice of proposed rulemaking. Under the Administrative Procedure Act (APA), the requirement of providing prior notice and an opportunity for comment does not apply "when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest." 5 U.S.C. 553(b)(B). By this exception, "Congress has recognized that there is no need for giving the public an opportunity to participate in minor amendments to rules. . . ." *Texaco, Inc.* v. *Federal Power Commission*, 412 F.2d 740, 743 (3d Cir. 1969), quoting Administrative Procedure Act: Analysis Of Its Requirements As To Rule-Making, 33 A.B.A.J. 315, 318 (1947). "Unnecessary" means "unnecessary so far as the public is concerned, as would be the case if a minor or merely technical amendment in which the public is not particularly interested were involved." S. Doc. No. 248, 79th Cong., 2d Sess. at 200, 258 (1946). See also, *National Nutritional Foods Association* v. *Kennedy*, 572 F.2d 377, 385 (2d Cir. 1978); U.S. Dept. of Justice, Attorney General's Manual on the Administrative Procedure Act 31 (1947). Because today's action consists only of technical corrections or other minor amendments that conform the General Pretreatment Regulations to other actions already taken, and because of the reasons stated below, EPA finds that prior notice and opportunity for comment are not necessary.

Final Regulations

1. *Definition of POTW Pretreatment Program.* Section 403.3(d), which defines the term "POTW Pretreatment Program," states that a POTW program must meet the criteria of §§ 403.3 and 403.9 of the pretreatment regulations. However, § 403.3 does not contain criteria for local programs. These are contained in § 403.8, which delineates the specific substantive requirements for an approvable local POTW Pretreatment Program, and § 403.9, which sets out approval procedures and submission requirements. Therefore, § 403.3(d) is revised to remove the reference to § 403.3 and substitute § 403.8 in its place.

2. *Definition of NPDES State.* The definition of "NPDES State" in § 403.3(m) references the definition of "State" in the NPDES regulations at 40 CFR 122.3. However, as a result of deconsolidation of the permit regulations, § 122.3 was redesignated as § 122.2 (48 FR 14146, April 1, 1983). Section 403.3(m) of the pretreatment regulations is revised to reflect this change.

3. *Change from "Enforcement Division Director" to "Water Management Division Director".* At several places in the General Pretreatment Regulations, reference is made to the "Enforcement Division Director." As a result of an internal Agency reorganization, this position no longer exists; its pretreatment program responsibilities have been assumed by the Water Management Divison Director. Accordingly, EPA is replacing all references to "Enforcement Division Director" with "Water Management Division Director," and is also replacing the definition of the former term in § 403.3(e) with a new defintion of the latter.

4. *Category Determination Request.* Section 403.6(a)(1) requires new sources to request a category determination prior to commencement of discharge. However, the existing regulation does not specifically address the parallel situation in which a cateogry determination is requested by an existing industrial user that adds a new process or changes an operation such that it might be included under a different subcategory. (Many of these changes might result in a new source and are thus already covered under the current requirement for new sources.) Consistent with § 403.6(a)(1), EPA is today clarifying that an existing

industrial user who wishes to receive a category determination on an added or changed process must submit a category determination request prior to commencing its discharge from the added or changed process.

Section 403.6(a)(2)(ii) requires that the statement in a category determination application "contain an oath stating that the facts contained therein are true on the basis of the applicant's personal knowledge or to the best of his information and belief." That section also previously required that "[t]he oath shall be that set forth in § 403.7(b)(2)(ii), except that the phrase '§ 403.7(d)' shall be replaced with "§ 403.6(a).' " When the removal credits provisions in § 403.7 were amended on August 3, 1984 (49 FR 31212), the certification in § 403.7(b)(2)(ii) was removed and the reference to § 403.7(b)(2)(ii) was removed from § 403.6(a)(2)(ii). No substitute oath was provided for category determinations. However, in making these revisions, EPA did not intend to leave § 403.6(a)(2)(ii) without a reference to specific certification language, but merely to change the removal credits provisions. Therefore, the Agency is today correcting § 403.6(a)(2)(ii) by reinserting the original certification statement.

5. *Compliance Deadline for Categorical Standards.* Section 307(b) of the Clean Water Act states that each categorical Pretreatment Standard "shall specify a time for compliance not to exceed three years from the date of promulgation [of such Standard]. . . ." The pretreatment regulations (§ 403.6(b)) require existing sources to comply with categorical Pretreatment Standards "within 3 years of the date the standard is effective unless a shorter compliance time is specified in the appropriate [Standard] *but in no case later than July 1, 1984.*" (emphasis added). This outside deadline of July 1, 1984 was added to the regulations in 1981 to reflect provisions in the EPA–NRDC Consent Decree. The Consent Decree between EPA and several environmental groups was originally entered in 1976, in the case of *Natural Resources Defense Council, Inc.* v. *Train*, 8 ERC 2120 (D.D.C. 1976). The Consent Decree required EPA to, among other things, promulgate effluent limitation guidelines and standards (including pretreatment standards for indirect dischargers) for 21 industrial categories, with special emphasis on 65 toxic pollutants, by prescribed dates. Paragraph 10(b) of the Decree provided that the Agency would require compliance with pretreatment standards by June 30, 1983. This date was later changed to June 30, 1984. *Natural Resources Defense Council, Inc.* v. *Costle*, 12 ERC 1833, 1843 (D.D.C. 1979). However, on August 2, 1983, the United States District Court for the District of Columbia modified paragraph 10(b) of the decree at EPA's request, and with the consent of NRDC, to give the Agency greater flexibility in establishing compliance deadlines for pretreatment standards consistent with section 307(b) of the Act. Consistent with this order, EPA has been routinely establishing compliance deadlines for recently promulgated pretreatment standards beyond July 1, 1984. See, e.g., 48 FR 49149 (October 24, 1983) (Aluminum Forming); 49 FR 9134 (March 9, 1984) (Battery Manufacturing). Moreover, EPA has modified certain categorical pretreatment standards to reflect the change in the consent decree (49 FR 41408, September 15, 1983).

Consistent with the above developments, EPA is modifying § 403.6(b) to delete the reference to the July 1, 1984 deadline. That section now states that compliance will be required within 3 years of the date the Standard is effective unless a shorter compliance time is specified in the appropriate subpart of 40 CFR Chapter I, Subchapter N.

6. *Combined Wastestream Formula.* In its present form, the combined wastestream formula (§ 403.6(e)) requires calculation of both "an alternative daily maximum value using the daily maximum value specified in the appropriate categorical Pretreatment Standard(s) and an alternative consecutive sampling day average value using the *long-term* average value(s) specified in the appropriate categorical Pretreatment Standard(s)" (emphasis added). Categorical pretreatment standards are expressed in terms of daily maximum, and monthly or 30-day average values. The term "long-term average value(s)" refers to these latter values. To avoid confusion, the Agency is changing the language of § 403.6(e), replacing "long-term average value(s)" with the more accurate term "monthly average value(s)." This revision will not affect the electroplating regulations, 40 CFR Part 413. Electroplating pretreatment standards are expressed as daily maximum and 4-day average values. However, § 413.04 of those regulations requires that 30-day values, rather than 4-day values, be used in calculating alternative pretreatment standards for a combined wastestream if one of the non-electroplating streams, with which an electroplating stream is combined, is regulated by 30-day average values. Section 413.04 includes a table that converts the 4-day number to a 30-day number.

7. *Deadline for Program Approval.* Section 403.8(b) requires all POTWs whose permits are modified pursuant to section 301(h) of the Clean Water Act to receive approval of local pretreatment programs within 3 years, as provided in 40 CFR Part 125, Subpart G (citing the 1979 regulation). EPA promulgated final regulations to administer section 301(h) on November 28, 1982 (47 FR 53666). Therefore, the reference to the 301(h) regulations in § 403.8(b) is amended to reference the current version of the Subpart G regulations.

8. *POTW NPDES Permit Modifications.* When a POTW pretreatment program is approved, the POTW's NPDES permit is reissued or modified to incorporate the approved program conditions as enforceable conditions of the permit. See § 403.8(c). Modifications to NPDES permits are normally processed in accordance with the procedures in 40 CFR Part 124, including public notice and comment. Section 122.63 sets out the exceptions to this rule by identifying certain types of modifications to NPDES permits as "minor." Minor modifications do not require public notice and comment.

The Part 124 public participation requirements currently used to modify NPDES permits are very similar to those EPA and States must follow in approving local pretreatment programs (§ 403.11). The public notice at the permit modification stage is thus duplicative since there is ample opportunity for public participation during the program approval process. In many cases, approval authorities avoid the unnecessary second notice by processing the two actions together, thus combining the public notice. Because two notice and comment periods are equally unnecessary where the approval and permit modification are not processed together, EPA is revising §§ 122.62, 122.63, and 403.8(c) to allow the insertion of enforceable conditions establishing an approved pretreatment program into a POTW's NPDES permit to be processed as a minor modification. The minor modification can only be used where the local program was approved in accordance with the public participation procedures in § 403.11. This provides all interested parties opportunity to comment on whether the program should be approved, making the second notice and comment unnecessary.

EPA believes it is appropriate to make this change as part of today's final rulemaking for several reasons. First, the change will not have any substantive

effect on the interested public's opportunity to participate in the pretreatment program approval process. Interested parties have a full opportunity to comment on the program when it is approved. Second, it is in the public interest to incorporate approved programs into the POTW's permit as early as possible; the sooner the program is incorporated into the permit, the sooner any failure to implement the program can be enforced as a permit violation against the POTW. Finally, further delay in making this change would render it moot. Of the approximately 1460 required POTW pretreatment programs, about 100 have yet to be approved. The Agency anticipates that these remaining programs will be approved (or referred for judicial action) by the end of the current fiscal year. Today's revision is thus necessary to avoid the delay and duplication of effort that would result if, after approval, these programs were required to undergo a second round of public notice and comment before being incorporated into the POTW's permit.

9. *Development and Submission of NPDES State Pretreatment Programs.* Several provisions in § 403.10 cross-reference various sections of the NPDES State Program regulations in 40 CFR Part 123. These references are to the May 19, 1980 version of Part 123 (Consolidated Permit Regulations). However, the Agency "deconsolidated" those regulations on April 1, 1983 (48 FR 14146), so that all the cross-referenced sections were renumbered in the NPDES permit regulations. Section 403.10 is being amended to reflect these changes.

10. *Removal Credit Approval Procedures.* In § 403.11(a) and (b), reference is made to § 403.7(d) which specified the contents for a removal credits application. As a result of the revisions to the removal credit provision, published on August 3, 1984 (49 FR 31212), the required contents of a removal credit application are now found in § 403.7(e). Therefore, EPA is deleting the references to § 403.7(d) and replacing them with "§ 403.7(e)."

11. *Self-Monitoring Requirements.* Section 403.12(g) states that monitoring frequency requirements for industrial users are found in the appropriate categorical pretreatment standards and that all users must monitor in accordance with such frequencies. In fact, the categorical standards do not specify monitoring requirements. Therefore, we are revising § 403.12(g) to delete this reference. (EPA will soon be publishing in the Federal Register a proposal to amend § 403.12(g) to clarify that the bi-annual reports submitted by industrial users in accordance with § 403.12(e) must be based on representative sampling and analysis data for the reporting period.)

12. *Reporting Requirements.* Paragraphs (j) and (k) of § 403.12 contain references to paragraph (i) and (j) of that section. However, on August 3, 1984 (49 FR 31212), EPA deleted paragraphs (i) and (j) and redesignated paragraphs (k)–(n) as (i)–(l). Accordingly, the references to paragraphs (i) and (j) in § 403.12 (j) and (k) are deleted.

13. *Net/Gross.* In 1981, EPA promulgated § 403.15, which provides for net/gross decisions. The preamble to those regulations states that "several commenters objected to the 60-day deadline for requesting a net/gross credit, noting that the Consolidated Permit Regulations do not impose a similar constraint. These commenters pointed out that in many cases treatment technology would need to be installed before a user could satisfy the demonstrations needed to receive a credit. EPA agrees with this comment and accordingly has deleted the time limitation on applying for a net/gross credit." 46 FR 9437 (January 28, 1981). However, § 403.15(a) states that applications for credit for intake pollutants must be made within 60 days after the effective date of the applicable categorical pretreatment standard. To correct this inadvertent mistake, EPA is deleting the 60-day deadline from §403.15(a).

14. *Appendices B and C.* The Pretreatment Implementation Review Task Force (PIRT), was established by the Administrator in February, 1984, to develop recommendations on how to improve implementation of the national pretreatment program. In its Final Report to the Administrator (1985), PIRT noted that Appendices B, C and D were out of date and recommended that they be updated. A proposed updated version of Appendix D was published in the Federal Register on May 9, 1985 (50 FR 19004). Today EPA is issuing final updated versions of Appendices B and C.

Appendix B lists the toxic pollutants designated pursuant to section 307(a)(1) of the Clean Water Act. This list also appears at 40 CFR 401.15. Since Appendix B was first published, EPA has deleted the following pollutants from the toxic pollutant list in 40 CFR 401.15: Dichlorofluoromethane and trichlorofluoromethane, 46 FR 76062 (January 8, 1981), and bis [chloromethyl] ether, 46 FR 10723 (February 4, 1981). The updated list issued today reflects these changes.

Appendix C is a list of the industrial categories for which national categorical pretreatment standards either have been or are planned to be issued. Several changes have been made to the previous categorization scheme since the list's initial publication:

(1) "Electroplating" (40 CFR Part 413) has been combined with the "Metal Finishing" category (40 CFR Part 433).

(Note.—Pretreatment standards are still in effect as previously identified under Part 413 for job shop electroplaters and printed circuit board manufacturers.)

(2) "Foundries" (40 CFR Part 464) is now the "Metal Molding and Casting" category.

(3) "Mechanical Products" is now covered by the "Metal Finishing" category (40 CFR Part 433) for those facilities containing one of the six core operations identified.

(4) "Organic Chemicals and Manufacturing" (40 CFR Part 414) has been combined with the "Plastics and Synthetics" category (40 CFR Part 416). The new category is called "Organic Chemicals and Plastics and Synthetic Fibers Manufacturing" (40 CFR Part 414).

(Note.—Pretreatment standards for new sources are still in effect as previously identified under 40 CFR Part 414, Subpart B.)

(5) "Paint and Ink Formulating" has been divided into two separate categories: "Paint Formulating" (40 CFR Part 446) and "Ink Formulating" (40 CFR Part 447).

(6) "Plastics Processing" is now the "Plastics Molding and Forming" category (40 CFR Part 463).

Two additional categories originally listed in Appendix C do not have pretreatment standards because there are no known existing indirect dischargers within these categories, and, to the Agency's knowledge, none are planned for the future. These are:

Coal Mining (40 CFR Part 434)
Ore Mining (40 CFR Part 440).

Six other categories have also been removed from the previous list since they have been exempted from national categorical pretreatment standards under provisions of Paragraph 8 of the NRDC–EPA Consent Decree, as modified. These are:

Adhesives and Sealants (40 CFR Part 456),
Auto and Other Laundries (40 CFR Part 444),
Explosives (40 CFR Part 457),
Gum and Wood Manufacturing (40 CFR Part 454),
Photographic Equipment and Supplies (40 CFR Part 459),

§ 403.8 POTW Pretreatment programs: development by POTW.

* * * * *

(c) *Incorporation of approved programs in permits.* A POTW may develop an appropriate POTW Pretreatment Program any time before the time limit set forth in paragraph (b) of this section. If (1) the POTW is located in a State which has an approved State permit program under section 402 of the Act and an approved State pretreatment program in accordance with § 403.10, or (2) the POTW is located in a State which does not have an approved permit program under section 402 of the Act, the POTW's NPDES Permit will be reissued or modified by the NPDES State or EPA, respectively, to incorporate the approved Program conditions as enforceable conditions of the Permit. If the POTW is located in an NPDES State which does not have an approved State Pretreatment program, the approved POTW Pretreatment Program shall be incorporated into the POTW's NPDES Permit as provided for in § 403.10(d). The modification of a POTW's NPDES Permit for the purposes of incorporating a POTW Pretreatment Program approved in accordance with the procedures in § 403.11 shall be deemed a minor Permit modification subject to the procedures in 40 CFR 122.63.

* * * * *

§ 403.8 [Amended]

15. In the first sentence of § 403.8(a), the first "of" is changed to read "or".

16. In the second sentence of § 403.8(c), "NPDEs State" is changed to read "NPDES State".

17. In the second sentence of § 403.8(f)(1)(vi)(A), "injuctive" is changed to read "injunctive".

18. In § 403.8(f)(2)(vii), § 403.8(f)(1)(iv)(B)" is changed to read "§ 403.8(f)(1)(vi)(B)."

§ 403.10 [Amended]

19. Section 403.10 is amended by revising the reference to "40 CFR 123.9" in paragraph (f)(1) to read "40 CFR 123.27", by revising the reference to "40 CFR 123.6" in paragraph (g)(3) to read "40 CFR 123.24", and by revising the reference to "40 CFR 123.13" in paragraph (h)(2) to read "40 CFR 123.62".

20. In § 403.10(f)(1)(iii), "incorportated" is changed to read "incorporated".

21. In § 403.10(g)(3), "Momorandum" is changed to read "Memorandum".

§ 403.11 [Amended]

22. Section 403.11 is amended by revising the references to "§ 403.7(d)" in paragraphs (a) and (b) to read "§ 403.7(e)".

§ 403.12 [Amended]

23. Section 403.12 is amended by removing from paragraph (g) the following sentence: "The frequency of monitoring shall be prescribed in the applicable Pretreatment Standard."

24. Section 403.12 is amended by revising paragraphs (j) and (k) to read as follows:

§ 403.12 Reporting requirements for POTW's and industrial users.

* * * * *

(j) *Signatory requirements for POTW reports.* Reports submitted to the Approval Authority by the POTW in accordance with paragraph (h) of this section must be signed by a principal executive officer, ranking elected official or other duly authorized employee if such employee is responsible for overall operation of the POTW.

(k) *Provisions governing fraud and false statements.* The reports required by paragraphs (b), (d), (e) and (h) of this section are subject to the provisons of 18 U.S.C. 1001 relating to fraud and false statements and the provisions of section 309(c)(2) of the Act governing false statements, representations or certifications in reports required under the Act.

* * * * *

§ 403.15 [Amended]

25. Section 403.15 is amended by revising the introductory paragraph of paragraph (a) to read as follows:

§ 403.15 Net/Gross calculation.

* * * * *

(a) *Application deadline and contents.* Any Industrial User wishing to obtain a credit for intake pollutants must make application therefor to the appropriate Water Management Division Director. Upon request of the Industrial User, the applicable Standard will be calculated on a "net" basis, i.e., adjusted to reflect credit for pollutants in the intake water, if the User demonstrates that:

* * * * *

26. Part 403 is amended by revising Appendix B to read as follows:

Appendix B—65 Toxic Pollutants

Acenaphthene
Acrolein
Acrylonitrile
Aldrin/Dieldrin
Antimony and compounds
Arsenic and compounds
Asbestos
Benzene
Benzidine
Beryllium and compounds
Cadmium and compounds
Carbon tetrachloride
Chlordane (technical mixture and metabolites)
Chlorinated benzenes (other than dichlorobenzenes)
Chlorinated ethanes (including 1,2-dichloroethane, 1,1,1-trichloroethane, and hexachloroethane)
Chloroalkyl ethers (chloroethyl and mixed ethers)
Chlorinated napthalene
Chlorinated phenols (other than those listed elsewhere; includes trichlorophenols and chlorinated cresols)
Chloroform
2-chlorophenol
Chromium and compounds
Copper and compounds
Cyanides
DDT and metabolites
Dichlorobenzenes (1,2-, 1,3-, and 1,4-dichlorobenzenes)
Dichlorobenzidine
Dichloroethylenes (1,1- and 1,2-dichloroethylene)
2,4-dichlorophenol
Dichloropropane and dichloropropene 2,4-dimethylphenol
Dinitrotoluene
Diphenylhydrazine
Endosulfan and metabolites
Endrin and metabolites
Ethylbenzene
Fluoranthene
Haloethers (other than those listed elsewhere; includes chlorophenylphenyl ethers, bromophenylphenyl ether, bis-(dichloroisopropyl) ether, bis-(chloroethoxy) methane and polychlorinated diphenyl ethers)
Halomethanes (other than those listed elsewhere; includes methylene chloride, methylchloride, methylbromide, bromoform, dichlorobromomethane)
Heptachlor and metabolites
Hexachlorobutadiene
Hexachlorocyclohexane
Hexachlorocyclopentadiene
Isophorone
Lead and compounds
Mercury and compounds
Napthalene
Nickel and compounds
Nitrophenols (including 2,4-dinitrophenol, dinitrocresol)
Nitrosamines
Pentachlorophenol
Phenol
Phthalate esters
Polychlorinated biphenyls (PCBs)
Polynuclear aromatic hydrocarbons (including benzanthracenes, benzopyrenes, benzofluoranthene, chrysenes, dibenzanthracenes, and indenopyrenes)
Selenium and compounds
Silver and compounds
2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD)
Tetrachloroethylene
Thallium and compounds
Toluene
Toxaphene
Trichloroethylene
Vinyl chloride
Zinc and compounds.

27. Part 403 is amended by revising Appendix C to read as follows:

Printing and Publishing (40 CFR Part 448).

(Note.—Portions of these exempted categories may be regulated in the future as technical studies update information on discharges from facilities in these industries.)

The updated Appendix C published today reflects these changes.

15. *Typographical Errors.* EPA today is also correcting various typographical errors in the general pretreatment regulations.

Executive Order 12291

This regulation is not major because it will not result in an annual effect on the economy of $100 million or more, nor will it result in an increase in costs or prices to industry. There will be no adverse impact on the ability of the U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. The regulation merely makes several technical corrections and other minor changes to the General Pretreatment Regulations.

Regulatory Flexibility Act

Today's promulgation makes technical corrections and other minor changes to the General Pretreatment Regulations.

Accordingly, I hereby certify that this regulation will not have significant economic impact on a substantial number of small entities.

List of Subjects in 40 CFR Parts 122 and 403

Confidential business information, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control.

Dated: May 27, 1986.

Lee M. Thomas,

Administrator.

Accordingly, Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

PART 403—GENERAL PRETREATMENT REGULATIONS FOR EXISTING AND NEW SOURCES

1. The authority citation for Part 403 continues to read as follows:

Authority: Sec. 54(c)(2) of the Clean Water Act of 1977 (Pub. L. 95–217), Sections 204(b)(1)(C), 208(b)(2)(C)(iii), 301(b)(1)(A)(ii), 301(b)(2)(A)(ii), 301(b)(2)(C), 301(b)(5), 301(i)(2), 304(e), 304(g), 307, 308, 309, 402(b), 405, and 501(a) of the Federal Water Pollution Control Act (Pub. L. 92–500), as amended by the Clean Water Act of 1977.

2. Part 403 is amended by removing the term "Enforcement Division Director" each place it appears and inserting in lieu thereof the term "Water Management Division Director."

§ 403.3 [Amended]

3. Section 403.3 is amended by revising the reference to "§ 403.3" in paragraph (d) to read "§ 403.5", revising paragraph (e) to read as follows, and revising the reference to "40 CFR 122.3" in paragraph (n) to read "40 CFR 122.2":

§ 403.3 Definitions.

* * * * *

(e) The term "Water Management Division Director" means one of the Directors of the Water Management Divisions within the Regional offices of the Environmental Protection Agency or this person's delegated representative.

* * * * *

§ 403.5 [Amended]

6. In the first sentence of § 403.5(a), "an" is changed to read "a".

7. In § 403.5(b)(1), "creat" is changed to read "create".

8. In § 403.5(c)(2), "Facilities" is changed to read "facilities".

§ 403.6 [Amended]

9. Section 403.6 is amended by revising paragraphs (a)(1), (a)(2) and (b), to read as follows:

§ 403.6 National Pretreatment Standards: Categorical standards.

* * * * *

(a) *Category Determination Request*

(1) *Application Deadline.* Within 60 days after the effective date of a Pretreatment Standard for a subcategory under which an Industrial User may be included, the Industrial User or POTW may request that the Water Management Division Director or Director, as appropriate, provide written certification on whether the Industrial User falls within that particular subcategory. If an existing Industrial User adds or changes a process or operation which may be included in a subcategory, the existing Industrial User must request this certification prior to commencing discharge from the added or changed processes or operation. A New Source must request this certification prior to commencing discharge. Where a request for certification is submitted by a POTW, the POTW shall notify any affected Industrial User of such submission. The Industrial User may provide written comments on the POTW submission to the Water Management Division Director or Director, as appropriate, within 30 days of notification.

(2) *Contents of Application.* Each request shall contain a statement:

(i) Describing which subcategories might be applicable; and

(ii) Citing evidence and reasons why a particular subcategory is applicable and why others are not applicable. Any person signing the application statement submitted pursuant to this section shall make the following certification:

I have personally examined and am familiar with the information submitted in the attached document, and I hereby certify under penalty of law that this information was obtained in accordance with the requirements of § 403.6(a). Moreover, based upon my inquiry of those individuals immediately responsible for obtaining the information reported herein, I believe that the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

* * * * *

(b) *Deadline for Compliance With Categorical Standards.* Compliance by existing sources with categorical Pretreatment Standards shall be within 3 years of the date the Standard is effective unless a shorter compliance time is specified in the appropriate subpart of 40 CFR Chapter I, Subchapter N. Direct Dischargers with NPDES permits modified or reissued to provide a variance pursuant to section 301(i)(2) of the Act shall be required to meet compliance dates set forth in any applicable categorical Pretreatment Standard. Existing sources which become Industrial Users subsequent to promulgation of an applicable categorical Pretreatment Standard shall be considered existing Industrial Users except where such sources meet the definition of a New Source as defined in § 403.3(k). Compliance with categorical Pretreatment Standards for New Sources will be required upon promulgation.

* * * * *

10. Section 403.6 is amended by removing the words "long-term average value(s)" from paragraph (e) each place they appear and inserting, in their place, the words "average monthly value(s)."

§ 403.7 [Amended]

11. In the second sentence of § 403.7(d)(1), "editional" is changed to read "additional".

12. In § 403.7(d)(2), "in not case later than July 1, 1983" is corrected to read "in no case later than July 1, 1983".

§ 403.8 [Amended]

13. Section 403.8 is amended by revising the reference to "[44 FR 34783 (1979)]" in paragraph (b) to read "(47 FR 53666 (November 26, 1982))".

14. Section 403.8 is amended by revising paragraph (c) to read as follows:

Appendix C—Industrial Categories Subject to National Categorical Pretreatment Standards

Aluminum Forming
Asbestos Manufacturing
Battery Manufacturing
Builder's Paper
Carbon Black
Cement Manufacturing
Coil Coating
Copper Forming
Dairy Products Processing
Electrical and Electronic Components
Electroplating
Feedlots
Ferroalloy Manufacturing
Fertilizer Manufacturing
Fruits and Vegetables Processing
Manufacturing
Glass Manufacturing
Grain Mills Manufacturing
Ink Formulating
Inorganic Chemicals
Iron and Steel Manufacturing
Leather Tanning and Finishing
Meat Processing
Metal Finishing
Metal Molding and Casting
Nonferrous Metals Forming
Nonferrous Metals Manufacturing
Paint Formulating
Paving and Roofing (Tars and Asphalt)
Pesticides
Petroleum Refining
Pharmaceuticals
Phosphate Manufacturing
Porcelain Enameling
Pulp and Paper
Rubber Processing
Seafood Processing
Soaps and Detergents Manufacturing
Steam Electric
Sugar Processing
Timber Products Manufacturing
Plastics Molding and Forming
Textile Mills.

PART 122—[AMENDED]

28. The authority citation for Part 122 continues to read as follows:

Authority: The Clean Water Act, 33 U.S.C. 1251 *et seq.*

29. 40 CFR 122.62 is amended by revising paragraph (a)(7) to read as follows:

§ 122.62 Modification or revocation and reissuance of permits (applicable to State programs, see § 123.25).

* * * * *

(a) * * *.

(7) *Reopener.* When required by the "reopener" conditions in a permit, which are established in the permit under § 122.44(b) (for CWA toxic effluent limitations) or 40 CFR 403.10(d) (pretreatment program), except that when a modification clause established under 40 CFR 403.10(d) relates to the incorporation in a POTW's permit of a pretreatment program approved in accordance with the procedures in 40 CFR 403.11, such modification shall be deemed a minor modification subject to the procedures in § 122.63.

* * * * *

30. 40 CFR 122.63 is amended by adding a new paragraph (g) to read as follows:

§ 122.63 Minor modifications of permits.

* * * * *

(g) Incorporate conditions of a POTW pretreatment program that has been approved in accordance with the procedures in 40 CFR 403.11 as enforceable conditions of the POTW's permit.

* * * * *

Health Care Financing Administration

42 CFR Parts 405 and 412

[BERC-353-CN]

Medicare Program; Changes to the Inpatient Hospital Prospective Payment System and FY 1987 Rates; Correction

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects the proposed rule, published on June 3, 1986, that would amend the Medicare regulations governing the inpatient hospital prospective payment system (51 FR 19970). We inadvertently failed to discuss in the preamble of the proposed rule an option concerning treatment of capital payments under the prospective payment system.

FOR FURTHER INFORMATION CONTACT: Linda Magno, (301) 594-9343.

SUPPLEMENTARY INFORMATION: We are making this correction to add an option that we inadvertently failed to include in our proposals for payment of capital-related costs under the prospective payment system as described in the preamble to the June 3, 1986 notice of proposed rulemaking (NPRM). In section II.C. of that document, we discuss our proposed changes for the phase-in of payment of capital under the prospective payment system. In determining the capital-related hospital-specific rate, we proposed to update that rate by the prospective payment update factor, that is, the applicable percentage change under section 42 CFR 412.63(e) of the regulations.

In section II.D. of the preamble to the June 3, 1986 NPRM, we listed for public consideration a number of options for treatment of capital payments under the prospective payment system, in addition to our specific proposal. We listed these options because we wish to ensure that the capital payment method we use is fair and appropriate. We recognize that the capital payment transition period will be a critical time for hospitals to adjust their operations and plans in preparation for a single comprehensive payment mechanism.

However, in this section, we inadvertently omitted an important option which had been discussed in our March 14, 1986 Report to Congress ("Hospital Capital Expenses: A Medicare Payment Strategy for the Future"). Therefore, in the June 3, 1986 proposed rule (the public comment period for which ends on July 3, 1986, as specified in that rule) Federal Register Doc. 86-12287, make the following addition. Following section II.D.6. of the preamble, add section II.D.7. as follows:

II.D.7. Update of the Capital-Related Hospital-Specific Rate

Rather than updating the capital-related hospital-specific rate by the overall prospective payment update factor (Section 412.63(e)), we would alternatively update that rate by the amount of change in the capital component of the hospital market basket. The capital component of the hospital market basket represents the change from year to year of hospitals' cost of making capital investments.

This option has the advantage of using an inflation factor that is associated specifically with hospital investment. If the costs of capital investments increase, the capital component of the hospital market basket would increase in a similar fashion. Likewise, if the capital cost of investments decreases, the capital component of the hospital market basket would decrease.

If this option is adopted in the final rule, we would expect to forecast the changes in the capital component of the hospital market basket by hospital cost reporting period. We would provide for corrections for forecast errors in the capital component of the hospital market basket.

We note that this option could not be used in conjunction with the rolling base-year option, because the rolling base-year option would use actual capital costs for each year rather than updating a fixed base-year amount.

(Catalog of Federal Domestic Assistance Programs No. 13.773, Medicare—Hospital Insurance Program)

Authority: Secs. 1102, 1122, 1871, and 1886 of the Social Security Act, as amended (42 U.S.C. 1302, 1320a-1(d), 1395hh, and 1395ww).

Dated: June 2, 1986.

William L. Roper,

Administrator, Health Care Financing Administration.

Approved: June 3, 1986.

Otis R. Bowen, M.D.,

Secretary.

Briefings on How To Use the Federal Register—
For information on briefings in Seattle, WA, and San Francisco, CA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium, Fourth Floor, Federal Building, 915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:

Seattle 206-442-0570
Tacoma 206-383-5230
Portland 503-221-2222

Rules and Regulations

Federal Register
Vol. 51, No. 108
Thursday, June 5, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 52

Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products [1] Regulations Governing Inspection and Certification

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this final rule is to revise the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables and Certain Other Products. This rule will (1) revise the sampling plans for lot inspection by restricting the lot size; (2) revise and readjust the schedule of fees and charges for inspection of processed fruits, vegetables, and certain other products; (3) provide for control of labels bearing approved grade or inspection marks when a contract is cancelled; (4) revise the approved identification section which allows for the use of the official sample marks; and (5) amend the definitions section and make editorial and other changes for clarification. This revision will adjust the fees to cover costs, provide for greater utilization of inspection services, and facilitate identification of products that will be officially sampled. Effective Date: June 5, 1986, 12:01 a.m.

FOR FURTHER INFORMATION CONTACT: Raymondo O'Neal, Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, Telephone (202) 447-5021.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated as a "nonmajor" rule. It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in cost or prices to consumers; individual industries; Federal, State, or local government agencies; or geographic regions. It will not result in significant effects on competition, employment, investments, productivity, innovations, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act, Pub. L. 96-354 (5 U.S.C. 601), because it reflects current marketing practices.

The Agricultural Marketing Act of 1946 authorizes the official inspection, grading, and certification of processed food products including processed fruits, vegetables, and processed products thereof. The Agricultural Marketing Service (AMS) makes available an impartial, official inspection service for processed fruits and vegetables. Applicants may make use of this service to obtain inspection of agricultural products. The service is voluntary and self-supporting and is offered on a fee-for-service basis.

The regulations set forth sampling plans as the basis for assigning quality levels to lots of processed fruits and vegetables and related products. The sampling plans are designed to allow for acceptance or rejection of the lot being sampled based on the sample results: The sampling plans for determining lot compliance now allow for a lot size with a representative maximum sample size of 60 sample units.

The final rule will limit the lot size to correspond to a sample size with a maximum of 29 sample units except where the Administrator has determined that the lot size may be increased. The following could cause an increase in sample size: (a) Numerous codes may make it necessary to exceed 29 sample units, or (b) appeal inspections or reinspections may be conducted where a sampling rate in excess of 29 sample units is required.

Inspection documents from preceding years indicate the sample size taken on a majority of lots was 29 sample units or less. By eliminating large lot sizes, submitted lots with non-uniform quality are reduced thereby increasing the reliability of the inspection results.

The schedule for fees and charges for services rendered to the processed fruit and vegetable industry will be amended to reflect the costs associated with the program. Such services are authorized under the Agricultural Marketing Act (AMA) of 1946, sec. 203(h), which requires that fees be reasonable, and as nearly as possible, cover the cost of rendering the services.

Each fiscal year, the fees for services are reviewed and a cost analysis is performed to determine if such fees are adequate to recover the cost of providing the services. These analyses also help assure that Department costs are kept to a minimum and any fee increases are those necessary to carry out an effective program. Since the last fee increase on May 11, 1982, there have been two government-wide salary increases. These increased costs have been associated with providing the services.

No appropriated funds are provided to the Agency to offset costs of rendering the services. Therefore, the Agency must recover all expenses in full through user fees charged to the applicants who request the services. Accordingly, it is found that good cause exists for making this final rule effective June 1, 1986, 12:01 a.m. because the present fees are not adequate to recover the costs of providing the service.

The revision will provide a uniform charge for inspection to applicants, regardless of the expenses (transportation and subsistence costs) incurred by the inspection activity. These travel expenses are incorporated into the hourly rate. The time required to travel to the applicant's location will continue to be charged at the set hourly rate. This revision will provide an hourly rate for analyses and other applicable services where no travel expenses are incurred. It will also increase the hourly rate and overtime payments to more closely reflect costs.

Editorial changes and clarifications have been made in the definitions and other sections to more closely reflect

[1] May include the following: Honey; molasses, except for stockfeed; nuts and nut products, except oil; sugar (cane, beet, and maple); sirups (blended), sirups, except from grain; tea, cocoa, coffee, spices, condiments.

current practices and procedures. One such change states that after an appeal inspection, a lot cannot be further appealed without authorization from the Administrator. Another change allows certificates of loading to be issued in lieu of official certificates. The revision also permits oral requests for inspection service without requiring confirmation in writing. New definitions include the deletion of "subordinate inspector" and the addition of "in-plant sampler". The addition of the subdefinition "approved plant lot inspection" is included as a further characterization of inspection services.

The regulations set forth official grade and inspection marks of the United States Department of Agriculture (USDA) for use by fruit and vegetable processors. These processors contract for the fee-for-service grading programs of the Department and, as permitted, may use various types of approved identification marks for processed fruits and vegetables and other related products.

Presently, the regulations do not specifically provide for control of approved grade or inspection marks when a contract between the inspection service and an applicant is cancelled. Therefore, this rule will provide for Agency control of cancellation and disposition of such approved grade or inspection marks. This provision will aid in eliminating possible misuse of such labels and marks.

Processed products which have been sampled for inspection, at the option of the Department, are identified by an authorized representative of the Department. The products are identified by stamping the shipping containers covering such lot(s) with official "sample marks." Revision of the "sample marks" will increase utilization of the official marks by affixing a non-permanent field office designation. These "sample marks" will identify products officially sampled by a particular field office using a field office number in place of geographic location.

A notice of proposed rulemaking was published in the Federal Register (51 FR 11043–11053) on April, 1, 1986, with a thirty day comment period. This comment period closed on May 1, 1986. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Agricultural Marketing Service. No comments were received regarding this proposed rule.

List of Subjects in 7 CFR Part 52

Processed fruits and vegetables, Food grades, Standards.

PART 7—[AMENDED]

Accordingly, the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products (7 CFR 52.2, 52.7, 52.9, 52.24, 52.28, 52.37, 52.38, 52.39, 52.41, 52.42, 52.47, 52.48, 52.49, 52.50, 52.51, 52.52, 52.53) are amended to read as follows:

1. The authority citation for Part 52 continues to read as follows:

Authority: Agricultural Marketing Act of 1946, Secs. 203, 205, 60 Stat. 1087, 1090 as amended (7 U.S.C. 1622, 1624).

2. Section 52.2 is amended as follows:

a. The definitions "Certificate of loading" and Inspection Service; types of" are revised.

b. The definitions "In-plant sampler" and "Unofficial sample" are added.

c. The definition "Lot" is amended by revising the text preceding (a) and revising (b).

d. The definition "Unofficially drawn sample" is removed.

§ 52.2 Terms defined.

* * * * *

Certificate of loading. Certificate of loading means a statement, either written or printed, issued pursuant to the regulations in this part, relative to checkloading of a processed product subsequent to inspection thereof. The certificate of loading may be issued in lieu of an official inspection certificate when the same inspection procedures are applied and when authorized by the Administrator.

* * * * *

In-plant sampler. In-plant sampler means any employee of the Department authorized by the Administrator to draw samples of processed products and perform a limited number of miscellaneous duties in a plant operating under contract.

* * * * *

Inspection Service; types of. (a) Lot inspection means the inspection and grading of specific lots of processed fruits and vegetables which are located in plant warehouses, commercial storage, railway cars, trucks, or any other conveyance or storage facility.

(b) Approved plant-lot inspection means the inspection and grading of specific lots of processed fruits and vegetables which are located in plant warehouses, commercial storage, railway cars, trucks, or any other conveyance or storage facility. However, under "approved plant-lot inspection", the inspection service has knowledge that the products were processed or packaged in plants meeting the "plant approved" definition. This means that the plant facilities, sanitation, and methods of operation have been surveyed and approved for specific product(s) by the Administrator as suitable and adequate for inspection or grading service in accordance with § 52.81 through § 52.83 of this part.

(c) Continuous inspection is the conduct of inspection and grading services in an approved plant whereby one or more inspector(s) are present at all times the plant is in operation to make in-process checks on the preparation, processing, packing, and warehousing of all products under contract and to assure compliance with sanitary requirements.

(d) Pack certification is the conduct of inspection and grading services in an approvement plant whereby one or more inspector(s) may make inspection of the preparation and processing of products under contract, but are not required to be present at all times the plant is in operation.

(1) Under a Designated Lot-contract, inspector(s) will grade and certify only those lots designated by the applicant.

(2) Under a Quality Assurance contract, inspector(s) will use information available from the applicant's quality control records to certify lots, as requested, and will grade lots at random as often as necessary to verify the reliability of the applicant's quality control system.

* * * * *

Lot. Lot means any number of containers of the same size and type which contain a processed product of the same type and style located in the same warehouse or conveyance, and which is available for inspection service at any time: Provided, that the number of containers comprising lot may not exceed the maximum number specified in the sampling plans in § 52.38 of this Subpart: And further provided that:

* * * * *

(b) Under in-plant (in-process) inspection, the inspector is authorized to limit the number of containers of a processed product that may be included in a lot to a period of consecutive production equivalent to one production shift with a maximum of 24 hours of consecutive production.

* * * * *

Unofficial sample. Unofficial sample means any sample that has been selected by any person other than an inspector or licensed sampler, or by any other person not authorized by the Administrator pursuant to the regulations in this part.

3. Section 52.7 is revised to read as follows:

§ 52.7 Information required in connection with application.

(a) Application for inspection service shall be made in the English language and may be made orally (in person or by telephone), in writing, or by telegraph. If an application for inspection service is made orally, written confirmation may be required by the inspection service involved.

(b) In connection with each application for inspection service, there shall be furnished such information as may be necessary to perform an inspection on the processed product(s), including but not limited to, the name of the product, name and address of the packer or plant where such product was packed, the location of the product, its lot or car number, codes or other identification marks, the number of containers, the type and size of the containers, the interest of the applicant in the product, whether the lot has been inspected previous to the application by any Federal agency and the purpose for which inspection is desired.

4. Section 52.9 is revised to read as follows:

§ 52.9 Record of filing time.

A record showing the date when each application for inspection or for an appeal inspection is received shall be maintained.

5. Section 52.24 is amended by revising paragraph (a)(1) to read as follows:

§ 52.24 Where to file for an appeal inspection and information required.

(a) * * *

(1) The supervisor in the office that issued the inspection certificate on which the appeal covering the processed product is requested; or

* * * * *

6. Section 52.28 is revised to read as follows:

§ 52.28 Appeal inspection certificate.

After an appeal inspection has been completed, the lot(s) cannot be further appealed unless authorized by the Administrator. An appeal inspection certificate shall be issued, showing the results of such appeal inspection; and such certificate shall supersede the inspection certificate previously issued for the processed product involved. Each appeal inspection certificate shall clearly identify the number and date of the inspection certificate which it supersedes. The superseded certificate shall become null and void upon the issuance of the appeal inspection certificate and shall no longer represent the quality or condition of the processed product described therein. The inspector or inspectors issuing an appeal inspection certificate shall forward notice of such issuance to such persons as he considers necessary to prevent misuse of the superseded certificate if the original and all copies of such superseded certificate have not previously been delivered to the inspector or inspectors issuing the appeal inspection certificate. The provisions in the regulations in this part concerning forms and certificates, issuance of certificates, and disposition of certificates shall apply to appeal inspection certificates, except that copies of such appeal inspection certificates shall be furnished to all interested parties who received copies of the superseded certificate.

7. Section 52.37 is revised to read as follows:

§ 52.37 How official samples are to be identified and shipped.

Unless otherwise directed by the Administrator, samples which are to be shipped to any office of inspection shall be forwarded to the office of inspection serving the area in which the processed products from which the samples were drawn is located. Such samples shall be shipped in a manner to avoid any material change in the quality or condition of the sample of the processed product. Containers shall be identified and properly sealed with tape. A facsimile of the "Officially Sampled" stamp shall be placed over the taped container. All transportation charges in connection with such shipments of samples shall be at the expense of the applicant.

8. Section 52.38 is amended by revising paragraphs (a) and (f) and Tables I, II, III, IV, and V to read as follows:

§ 52.38 Sampling plans and procedures for determining lot compliance.

(a) Except as otherwise provided for in this section in connection with in-plant inspection and unless otherwise approved by the Administrator, samples shall be selected from each lot in the exact number of sample units indicated for the lot size in the applicable sampling plans. The lot size is to correspond to a sample size with a maximum of 29 sample units: Provided, that at the discretion of the inspection service, the number of sample units selected may be increased to the exact number of sample units indicated for any one of the larger sample sizes provided for in the appropriate plans. The samples size may be increased beyond 29 sample units in accordance with the following sampling plan:

Sample Size	38	48	60
Acceptance Number	5	6	7

* * * * *

(f) Sampling plans referred to in this section are those contained in Tables I, II, III, IV, and V and (g)(1) and (g)(2) of this section which follow or any other plans which are applicable. For processed products not included in these tables, the minimum sample size shall be the exact number of sample units prescribed in the table, container group, and lot size that, as determined by the inspector, most closely resembles the product, type, container, size and amount of product to be sampled. The maximum sample size in tables I, II, III, IV, V, (g)(1), (g)(2) and processed products not included in these tables is 29 sample units.

ACCEPTANCE NUMBER	0	1	2	3	4
ON-LINE IN-PLANT INSPECTION SAMPLE SIZE (NO. OF SAMPLE UNITS) 2/	3	6	6	13	21
ACCEPTANCE NUMBER	0	1	1	2	3

1/ Under on-line in-plant inspection, a 5% overrun in number of containers may be permitted by the inspector before going to the next larger sample size.

2/ Samples consist of 25 ounce sample units, each of which may be a composite of product from a sufficient number of individual containers from 1 case to make up the weight. When previous inspection results from a particular source so indicate, 1 composite sample of 25 ounces of product may be formed from the 3 sample units in the smallest sample size, and 2 composite samples of 25 ounces each may be formed from the 6 sample units in the next to smallest sample size. Sample units in larger sample sizes may not be further composited.

BILLING CODE 3410-02-C

9. Section 52.39 is revised to read as follows:

§ 52.39 Issuance of certificate of sampling.

Each inspector and each licensed sampler shall prepare and sign a certificate of sampling to cover the samples drawn by the respective person, except that in-plant inspectors who inspect the samples which they have drawn need not prepare a certificate of sampling. One copy of each certificate of sampling prepared shall be retained by the licensed sampler and the original and all other copies thereof shall be disposed of in accordance with the instructions of the Administrator.

10. Section 52.41 is revised to read as follows:

§ 52.41 Payment of fees and charges.

Fees and charges for any inspection service shall be paid by the interested party making the application for such service, in accordance with the applicable provisions of the regulations in this part, and if so required by the inspection service, an advance of funds prior to rendering inspection service in an amount suitable to the Administrator, or a surety bond suitable to the Administrator, shall be required as a guarantee of payment for the services rendered. All fees and charges for any inspection service performed pursuant to the regulations in this part shall be paid by check, draft, or money order payable to the United States Department of Agriculture, Remittance shall be sent to the address specified on the bill for collection on or before the due date to avoid a late payment charge.

11. Section 52.42 is revised to read as follows:

§ 52.42 Schedule of fees.

Unless otherwise provided in a written agreement between the applicant and the Administrator, the fee for any inspection service performed under the regulations in part, shall be at the rate of $29.00 per hour plus an additional $5.50 per hour for all scheduled overtime hours. When work is performed on a holiday, an additional hour shall be charged at the regular hourly rate for each hour worked.

12. Section 52.47 is revised to read as follows:

§ 52.47 Fees to be charged for micro, chemical, certain other special analyses and other applicable services.

Fees for micro, chemical, and certain other special analyses, made at the request of the applicant, or because of additional specification requirements, and other applicable services, shall be at the rate of $25.00 per hour. Other applicable services include, but are not restricted to, grading unofficial samples, providing copies of score sheets and additional copies of certificates.

13. Section 52.48 is amended by revising paragraph (b) to read as follows:

§ 52.48 Charges for plant survey and sanitation inspection.

* * * * *

(b) Fees charged for a plant survey and a sanitation inspection under § 52.42 of this part will be credited back to plants entering into an in-plant inspection contract with AMS within 60 days of the survey.

14. Section 52.49 is revised to read as follows:

§ 52.49 Charges for copies of score sheets.

If the applicant for inspection service requests one or more copies of a score sheet referable to the processed product covered thereby, they may obtain such copies from the supervisor in the office of inspection serving the area where the service was performed at a charge of ½ hour per copy in accordance with the rate in § 52.47: Provided, that no charge shall be made for one copy if requested in connection with the request for inspection.

15. Section 52.50 is revised to read as follows:

§ 52.50 Charges for additional copies of inspection certificates.

Charges for additional copies of inspection certificates issued in accordance with § 52.21 may be supplied to any financially interested party at a charge of ½ hour per certificate in accordance with the rate in § 52.47 for each seven (7), or fewer copies.

16. Section 52.51 is revised to read as follows:

§ 52.51 Travel and other expenses.

Charges may be made to cover the cost of travel time incurred in connection with the performance of any inspection service, including appeal inspections, at the rate of $29.00 per hour. This includes time spent waiting for transportation as well as time spent traveling, but not to exceed eight hours of travel time for any one person for any one day: And provided further, that if travel is by common carrier, no hourly charge may be made for travel time outside the employee's official work hours.

17. Section 52.52 is amended by revising paragraphs (c) and (d) to read as follows:

§ 52.52 Charges for inspection service on a contract basis.

* * * * *

(c) Charges for year-round in-plant inspection services on a contract basis will be billed to the applicant monthly for all hours worked with a minimum of 40 hours per week for each inspector assigned to perform the inspection services in accordance with the following schedule:

(1) For personnel assigned on a year-round basis: Each inspector—$22.00 per hour.

(2) For personnel assigned on less than a year-round basis: Each inspector—$27.00 per hour; In-plant sampler—$14.00 per hour.

(3) Holiday pay. An eight (8) hour charge will be made for each inspector assigned at their regular hourly rate. When work is performed, an additional hour at the regular hourly rate will be charged for each hour worked.

(4) Night differential. A 10 percent night differential charge will be made for all work performed between the hours of 6 p.m. and 6 a.m.

(5) Overtime. All overtime hours will be charged at the regular rates specified in paragraphs (c) (1) and (2) of this section plus $5.50 per hour.

(d) Charges for less than year-round in-plant inspection services (four or more consecutive 40 hour weeks) on a contract basis will be billed to the applicant monthly for all hours with a minimum of 40 hours for each inspector assigned to perform the inspection services in accordance with the following schedule: [3]

(1) Each inspector—$27.00 per hour [3]

(2) In-plant Sampler—$14.00 per hour.

(3) Holiday pay. An eight (8) hour charge will be made for each inspector assigned at their regular hourly rate. When work is performed, an additional hour at the regular hourly rate will be charged for each hour worked.

(4) Night differential. A 10 percent night differential will be charged for all work performed between the hours of 6 p.m. and 6 a.m.

(5) Overtime. All overtime hours will be charged at the regular rates specified in (d)(1) of this section plus $5.50 per hour.

* * * * *

18. Section 52.53 is amended by revising paragraphs (a)(2), (a)(3), (a)(4), (a)(5), (d), (e) and adding new

[3] Except a minimum of 8 hours per day in lieu of a minimum of 40 hours a week for intermittent type in-plant services and less than four weeks in-plant assignment will be billed in accordance with § 52.42.

paragraphs (a)(7) and (i) to read as follows:

§ 52.38 Approved identification.

(a) * * *

(2) Have been produced or packed in an approved plant.

(3) Are truthfully and accurately labeled.

(4) When graded against a U.S. grade standard, meet the quality requirements for U.S Grade C or better;

(5) Meet applicable fill weight and/or drained weight, Brix or other characteristics of a commodity related to market value;

(6) Have been certified, or have been inspected and are eligible for certification, by an inspector; and, in addition, meet the specific requirements stated in (b), (c), and (d) of this section.

(7) Labels and advertising material containing or referring to approved identification must be approved by USDA inspection service prior to use.

* * * * *

(d) "Approved plant-lot inspection" grade and inspection marks. Processed products that are produced in an approved plant as defined in § 52.2 and inspected and certified by an inspector on a lot basis may be labeled with an official mark as defined in § 52.3 when adequate control and use is approved. The use of official marks for this type of service is restricted to grade marks (with or without plain shield) and/or the statement "Inspected by the U.S. Department of Agriculture" (with or without plain shield). The official marks shall be similar in form and design as illustrated in figures 11 through 14. Failure to have all lots bearing official marks either inspected and certified or certified as produced in an approved plant shall cause the debarment of the user from receiving subsequent services, and such other actions as provided for in the Agricultural Marketing Act of 1946.

(e) Sampling marks. Processed products which have been sampled for inspection as provided in this part may, at the option of the Department, be identified by an authorized representative of the Department. The products are identified by stamping the container(s) comprising such lot(s), with an official "sampling mark", similar in form and design to the example in figure 15 of this section. The "sampling marks" will identify products officially sampled by a particular field office. Such mark will include a code identifying the field office performing the sampling.

FIGURE 15

* * * * *

(i) Disposition of labels bearing approved grade or inspection marks when a contract is cancelled. Upon cancellation of a contract, labels bearing approved grade or inspection marks shall remain under the control of the inspection service. The inspection service will approve disposition of said labels for destruction, sale or transfer to another approved plant, remove or obliterate the grade or inspection mark, or other action as may be agreed upon by all interested parties.

Done at Washington, DC, on May 29, 1986.

AGENCY: Agricultural Marketing Service.

ACTION: Interim final rule.

SUMMARY: This interim final decision would modify the plant location adjustments to prices under 11 southeastern Federal milk marketing orders. The proposed amendments would change the location adjustment provisions in the 11 orders to conform with the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986. The decision denies proposals to limit in 8 orders the location adjustment applicable on bulk milk transferred from a plant to an other order plant. This decision is based on the record of a public hearing held in Atlanta, Georgia, on February 25–27, 1986. The hearing was requested by Dairyment, Inc. (DI).

DATE: Comments are due on or before June 20, 1986.

ADDRESS: Comments (nine copies) should be filed with the Hearing Clerk, Room 1079, South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–2089.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 7 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not a significant economic impact on a substantial number of small entities. The proposed amendments modify the transportation allowances provided under the 11 orders to make them conform more closely to the economic conditions that currently exist in the marketplace. The main economic condition involved is the Class I differentials that became effective May 1, 1986, as mandated by the Food Security Act of 1985, and the costs of transporting milk as reflected in such Class I differentials. Reflection of these changed marketing conditions through amendments to plant location adjustments to order prices will not result in a significant added price impact on regulated handlers.

Prior documents in this proceeding:

Notice of Hearing: Issued February 7, 1986; published February 13, 1986 (51 FR 5363).

Extension of Time for Filing Briefs: Issued March 11, 1986.

Preliminary Statement

Notice is hereby given of the filing with the Hearing Clerk of this interim final decision with respect to proposed amendments to the interim final marketing agreements and the orders regulating the handling of milk in the aforesaid specified marketing areas. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), and the Administrative Procedure Act (5 U.S.C. 556–557).

Interested parties may file written exceptions to this interim final decision with the Hearing Clerk, Room 1079, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, by the 15th day after publication of this decision in the Federal Register. Nine copies of the exception should be filed. All written submissions made pursuant to this notice will be available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The hearing notice specifically invited interested persons to present evidence concerning the probable regulatory and informations impact of the proposals on small businesses. Several participants at the hearing testified in general about the impact of the proposals in certain orders on small businesses. There was specific testimony about the potential adverse impact of adopting a proposed 34-cent increase in the Class I price for a plant at Somerset, Kentucky, over the Class I price at Louisville, It was indicated that such price increases would threaten the continued viability of Southern Belle Dairy, a small business enterprise. As noted later in this decision, the proposed increase was not adopted. Instead, an increase of 15 cents, or less than one-half of the proposed increase, was adopted.

The findings and conclusions set forth below are based on the record of a public hearing held at Atlanta, Georgia, on February 27–27, 1986, pursuant to a notice of hearing issued February 7, 1986, (51 FR 5363).

The material issues on the record relate to:

1. Plant location adjustments applicable to handlers under 11 southeastern Federal milk orders;
2. Class I differentials applicable under 8 southeastern Federal milk orders on bulk milk transferred from a pool plant to an other order plant; and
3. The need for emergency action with respect to issues No. 1 and 2.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

Background Statement

A public hearing to consider amendments to the plant location adjustment provisions of 11 southeastern Federal milk orders was held at Atlanta, Georgia, February 25–27, 1986. The hearing was requested by DI to conform the location adjustment provisions of the 11 orders to the Class I differentials mandated by the Food Security Act of 1985. The mandated changes increased the Class I price differentials under 35 of the 44 milk orders, including the 11 orders being considered herein. The amount of increase differed among markets, with progressively greater amounts from northern markets to southern markets. In the 11 orders involved in this proceeding, the increases in the mandated Class I differential varied from a low 41 cents in the Louisville-Lexington-Evansville order to a high of $1.03 in the Southeastern Florida order.

The basic purpose of plant location adjustment provisions under Federal milk orders is to provide a transportation allowance to handlers who assemble milk at plant locations outside the primary marketing area and move it to plants located in the primary marketing area for use in Class I so that a handler's cost of milk so moved is competitive with the cost of milk that is obtained locally. In general, the current location adjustment rates under Federal milk orders are the same as the rates that were used until May 1, 1986, to determine Class I differentials under Federal milk orders, i.e., 1.5 cents per hundredweight for each 10 miles.

The Class I differentials applicable under the 11 southeastern Federal milk orders were established by using a common basing point, Eau Claire, Wisconsin. For many years, the Class I differentials under the orders increased from market to market at a rate approximating 1.5 cents per hundredweight for each 10 miles of distance from Eau Claire.

On May 1, 1986, the Class I differentials were increased in 35 of the 44 Federal milk orders. The reasons for implementing the increased Class I differentials were set forth in an expedited decision involving all orders (51 FR 9669). Four paragraphs of that decision and the pertinent information from a table listing the Class I differentials of the orders before and after May, 1, 1986, and the amount of the increase are quoted below:

"Each of the 44 Federal marketing orders should be amended to provide minimum Class I price differentials for a two-year period, and subsequently unless modified by amendment to the order involved.

"The Class I milk price (the highest priced use-classification) under each order is established each month by adding a specified dollar amount to the Minnesota-Wisconsin manufacturing grade milk price (M–W price) for the second preceding month. These specific amounts, which are provided in the orders but not defined, are commonly referred to throughout the industry as "Class I differentials" or "fluid differentials." It is these differentials that the Food Security Act of 1985 establishes at higher levels in 35 of the orders and fixes at a minimum level in each of the 44 orders.

"The Food Security Act of 1985, Title I, Dairy, Subtitle C—Milk Marketing Orders, amends section 8c(5)(A) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)(A), reenacted with amendments by the Agricultural Marketing Agreement Act (Act). This new law (Pub. L. 99–198) mandates that the present 44 Federal milk marketing orders be amended, and that these amendments be applicable to milk received on and after May 1, 1986. The Food Security Act of 1985 increases Class I differentials in 35 of the 44 orders and provides a specific minimum Class I differential for each of the 44 orders for a two-year period.

"Official notice was taken at the public hearing held January 28, 1986, of Federal Milk Order Market Statistics for April 1985 and the Code of Federal Regulations for each of the 44 orders for the purpose of showing the present Class I differentials. The present Class I differentials, shown below, were taken from Table I on page 9 of the Federal Milk Order Market Statistics for April 1985. The new mandated Class I differentials that appear below are taken from the Congressional Record (official notice taken) dated December 17, 1985, at page H 12255."

Federal marketing order	Class I differentials		Increase
	Effective May 1, 1986	Before May 1, 1986	
Upper Florida	3.58	2.85	.73
Georgia	3.08	2.30	.78
Tennessee Valley	2.77	2.10	.67
Tampa Bay	3.80	2.95	.85
Southeastern Florida	4.18	3.15	1.03
Louisville-Lexington-Evansville	2.11	1.70	.41
Alabama-West Florida	3.08	2.30	.78
New Orleans-Mississippi	3.85	2.85	1.00
Greater Louisiana	3.29	2.47	.81
Nashville, Tennessee	2.52	1.85	.67
Paducah, Kentucky	2.39	1.70	.69

Class I differentials and plant location adjustments serve as price incentives to attract milk supplies to the locations where they are needed for fluid use. This is particularly critical in this southeastern region since many of the states in the region are deficit milk production states. The record indicates that Alabama, Georgia, Florida, North Carolina, and South Carolina are all deficit production areas, at least during the months of seasonally low milk production. These deficit milk production states rely regularly on milk produced in the nearby States of Virginia, Tennessee, and Kentucky to help meet the fluid milk sales demand. At times, there are not sufficient milk supplies in the region to satisfy fluid use demand and milk is imported from other distant production areas, particularly Wisconsin.

In this general milk supply situation, the changed Class I differentials will aid in assuring that adequate milk supplies will be made available for this southeast region and also cover much of the cost of needed movements of milk from where it is produced to where it is needed. Essentially, north to south movements of milk are required in this region to meet the milk needs of handlers regulated under the orders in the region. The changed differentials reflect this need. However, modification of plant location adjustments to the changed Class I differentials are needed to conform with the milk transportation allowances reflected in the new differentials.

Plant location adjustment rates for the Georgia order—Part 1007. The location adjustment provisions of the Georgia order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986. Location adjustments for plants located in the Georgia marketing area should be determined on the basis of adjustments established for four separate zones. A minus 15-cent adjustment should apply in the Northern Zone, an area consisting of 14 counties. No adjustment should apply in the North Central Zone, an area consisting of 41 counties. A plus 10-cent adjustment should apply in the South Central Zone, an area consisting of 41 counties. A plus 30-cent adjustment should apply in the Southern Zone, an area consisting of all the Georgia counties in the marketing area with the exception of those counties in the Northern, North Central and South Central Zones.

For plants located outside the marketing area, the plant location adjustment should be as follows:

1. Minus 11 cents in North Carolina.

2. The Class I price applicable at the nearer of the city halls in Augusta, Savannah, Lavonia, Waycross, Albany, Columbus, Atlanta and Rome, Georgia, should be the Class I price that applies at plants in that area south of the southern boundary of the States of Tennessee and North Carolina, excluding the Tennessee Valley marketing area.

3. Minus 31 cents for the Tennessee Valley marketing area.

4. Minus 20 cents plus an additional reduction of 2.5 cents for each 10 miles or fraction thereof in excess of 110 miles from the city hall in Atlanta, Georgia, in that area north of the southern boundary of the States of Tennessee and North Carolina, excluding the State of North Carolina and the Tennessee Valley marketing area.

Under the current order, there are only two location adjustment rates in the Georgia marketing area—a minus 15 cents in the Northern Zone consisting of 29 counties and no adjustment in the remainder of the marketing area. Outside the marketing area, there is a minus adjustment of 15 cents beyond 100 miles from Atlanta and north of an east-west line extending from the city hall in Atlanta and minus an additional 1.5 cents for each 10 miles or fraction thereof in excess of 110 miles from Atlanta. The current order also limits the location adjustment in Alabama and South Carolina to not more than 15 cents.

The four location adjustment zones for the marketing area and the adjustments outside the marketing area adopted herein were proposed by DI. However, DI proposed that the adjustment for the South Central Zone be a plus 15 cents instead of the plus 10 cents adopted herein.

Kinnett Dairies, Inc., at Columbus, Georgia, opposed the establishment of two additional location adjustment zones in Georgia. The witness for the dairy indicated that the Secretary in a 1988 decision had found that "Atlanta is the major point of distribution in the marketing area and that higher prices paid by handlers south of Atlanta would attract milk away from Atlanta handlers, where it is needed, into the less populous areas of South Georgia where it is not needed for fluid consumption." The witness presented extensive data indicating that the population of Georgia continues to be concentrated in the Atlanta area.

The dairy's plant at Columbus is in the South Central Zone and under the location adjustment pricing adopted herein would have a 10-cent higher Class I price than plants at Atlanta.

Pet Dairy with plants at Waycross and Washington, Georgia, and a plant at Spartanburg, South Carolina, opposed the establishment of two additional pricing zones in Georgia and the deletion of a minus 15-cent adjustment in South Carolina. Pet Dairy's plant at Waycross, Georgia, would have a 30-cent higher Class I price than handlers at Atlanta under the pricing adopted herein. Also, no location adjustment would apply at Pet Dairy's plant in Spartanburg, South Carolina. Currently, a minus 15-cent location adjustment applies at the Spartanburg plant. Pet's plant at Washington, Georgia, is in a no location adjustment zone and would continue to be in such zone under the pricing adopted herein. The witness for Pet Dairy indicated that an adequate supply of milk is available to supply the fluid milk requirements of the plants of Pet Dairy at Waycross, Georgia, and Spartanburg, South Carolina.

Borden, Inc. opposed the establishment of the South Central and Southern Zones for location adjustment pricing in Georgia. Borden's plants at Macon and Augusta are located in the South Central Zone. Under the pricing adopted herein for the South Central Zone, the Class I price at the two Borden plants would be 10 cents higher than the Class I price applicable at Atlanta, Georgia. Currently, the Class I price at Macon and Augusta is the same as the Atlanta Class I price. Borden testified that the location adjustment pricing proposed by DI for South Central and Southern Georgia woud distort the present competitive relationships among handlers.

Location adjustment pricing of minus 15 cents should apply in the Northern Zone which includes 14 Georgia counties. Currently, the Northern Zone consists of 29 counties and a minus 15-cent location adjustment applies in such area. The pool plants of Dempsey Brothers, Rome, Georgia, and Meadowbrook Dairy at Calhoun,

Georgia, are currently in the Northern Zone and these plants are also in the newly defined Northern Zone.

A witness appearing on behalf of the two plants in the Northern Zone requested that the Class I price for plants be the same as the Class I price for plants in the Chattanooga area that are regulated under the Tennessee Valley order. The opponent of the minus 15-cent adjustment pointed out that the current Class I price applicable in the Northern Zone is 5 cents higher than the Tennessee Valley order price at Chattanooga. For this reason, the witness held that the Class I price at plants in the Northern Zone should not exceed the Class I price at Chattanooga by more than the 5 cents currently provided.

Continuation of a minus 15-cent location adjustment is appropriate for the Northern Zone. Such amount represents one-half the difference between the mandated Class I differentials at Atlanta and Chattanooga ($3.08—$2.77=$0.31). As indicated by the witness for the two plants in the Northern Zone, Dempsey Dairies is about 67 miles from Chattanooga and 70 miles from Atlanta. On the basis of the plant's location and in consideration of the fact that the Northern Zone consists of a band of 14 counties midway between Atlanta and Chattanooga, a minus 15-cent adjustment from the Atlanta Class I differential for the Northern Zone will provide proper Class I price alignment for plants in such zone with respect to the legislated Class I differentials at Chattanooga and Atlanta.

No location adjustment should be provided for milk received at plants in the North Central Zone consisting of 41 counties. Such zone includes the following cities in which pool plants are located: Atlanta, Athens, Eatonton, Decatur and Washington. Milk received at pool plants located in these cities is currently not subject to location adjustment pricing. Under the location adjustment pricing adopted herein, no location adjustment pricing would apply at such plant locations.

Plant location adjustment pricing of plus 10 cents should apply in the South Central Zone. The South Central Zone consists of the 41 counties proposed by DI for such zone. However, proponent cooperative proposed a plus 15-cent location adjustment for such zone instead of the 10-cent adjustment adopted herein.

There are three pool plants located in the South Central Zone. These plants are the Borden plant at Macon the Borden plant at Augusta and the Kinnett Dairies plant at Columbus. The Macon and Columbus plants are located to the south and southwest, respectively, from the heaviest milk production area within Georgia. The plant at Augusta is located to the east of an area of concentrated milk production. One of the counties located in this heavy production area is Putnam. In December 1985, dairy farmers from Putnam County pooled 6.2 million pounds of milk on the Georgia order, 1.4 million pounds on the Upper Florida order, 1.7 million pounds on the Tampa Bay order and 1.2 million pounds on the Southeastern Florida order. Morgan County which borders Putnam County on the north is another heavy milk production area. In December 1985, dairy farmers from Morgan County pooled 8.5 million pounds on the Georgia order.

DI operates a pool supply plant that is located in this area of heavy milk production. The pool supply plant is located at Eatonton which is in Putnam County and is approximately 40 miles north of Macon, Georgia.

As previously noted, milk moves from farms in the Eatonton area into the three Florida markets. In recognition that milk in the vicinity of the Eatonton plant represents a potential supply source for the Macon plant, i.e., milk moves from Putnam County bypassing Macon, Georgia, on its way to Florida markets, the Class I differential at the Macon plant should reflect the cost of transporting milk from the Eatonton area to Macon, a distance of approximately 40 miles. In that regard, a location adjustment rate 2.5 cents per 10 miles for the 40 miles distance yields a 10-cent adjustment. On the basis of distance to the supply area at Eatonton, a plus 10-cent adjustment is appropriate for the Macon plant.

The Kinnett Dairies plant at Columbus and the Borden plant at Augusta should also have the same location adjustment pricing as the plant at Macon. The Columbus and Augusta plants are more distant from the heavy production area than the plant at Macon. The Columbus plant is located southwest of Macon, Georgia, and, thus, is more distant from the Eatonton supply plant than the Macon plant. The Augusta plant is located east of Eatonton. The distance from Augusta to Eatonton exceeds the distance from Eatonton to Macon. However, Columbus, Macon, and Augusta are all about the same distance south of the North Central Zone which is the largest milk production zone in the marketing area.

A location adjustment of plus 30 cents should apply at plants located in the Southern zone. The counties making up the zone and the plus 30-cent adjustment adopted herein were proposed by DI.

There are three pool plants located in the Southern Zone. The three plants are the Pet plant at Waycross, Roberd's Dairy at Savannah, and the Dairymen, Inc., plant at Savannah.

The operator of the Waycross plant opposed the plus 30-cent location adjustment at the plant's location. The witness for the dairy indicated that the dairy has experienced no problem in securing a supply of milk at the current time and expects no future shortage of supply at the plant.

Several individuals who opposed plus location adjustments in Georgia testified that Atlanta represents the major milk consumption area in Georgia. These individuals indicated that much of the milk produced on farms in Georgia must be moved to Atlanta. They contented that the establishment of plus location adjustment zones would impede the flow of milk to the Atlanta area.

A review of the milk production by counties for the Georgia market for December 1985 reveals that more than one-half of the milk pooled as producer milk under the Georgia order originated on farms outside the State of Georgia. Furthermore, a large amount of Georgia-produced milk moves to Florida. Of the 96.5 million pounds of Georgia milk that was pooled under the Georgia order and the three Florida orders in December 1985, more than 25 percent (24.4 million pounds) of that milk supply was moved to plant located in Florida. The Georgia procurement area for the Florida markets extends into the heavy milk production area of the North Central Zone.

In recognition of the substantial volume of milk that moves from Georgia into the State of Florida, Class I differentials in the Southern Zone of Georgia should be set at levels that will assure a continuing adequate supply of milk at the Waycross and Savannah plants. A plus 30-cent location adjustment should be established for the Southern Zone to assure that a supply of milk is available to plants in such zone. Based on the Waycross plant's location relative to plants in Jacksonville, Florida, a distance of nearly 80 miles, the 30-cent adjustment reflects a price that is 20 cents less than the mandated price under the Upper Florida order at Jacksonville. The Class I price at Waycross needs to be at least at a level within 20 cents of the Jacksonville price to compete for milk supplies produced as far north as north central Georgia. In addition, the plant at Waycross has sales accounts in the Upper Florida market in competition with the handlers regulated under that order. Thus, the

plus 30-cent zone is needed to maintain equitable inter-order pricing.

A location adjustment of minus 11 cents should be provided for plants located in North Carolina. Such adjustment would provide a Class I differential of $2.97 and will equate the pricing of Class I milk at plants in North Carolina with the Class I pricing for that area that is provided under the Tennessee Valley order. The justification for that level of pricing in North Carolina is discussed under location adjustments for the Tennessee Valley order.

In the States of South Carolina, Alabama, Florida and other areas south of the southern boundary of the States of Tennessee and North Carolina and outside of the Georgia marketing area, the Class I pricing level should be the same as that provided for a number of cities located within the Georgia marketing area. The cities are Augusta, Savannah, Lavonia, Waycross, Albany, Columbus, Atlanta, and Rome, Georgia. In most instances, a pool plant outside the marketing area will be competing for milk supplies and sales with pool plants located within the Georgia marketing area. It is reasonable that the out-of-area plant should have a Class I price equivalent to that which applies to the nearest pool plant within the marketing area.

The pricing of milk in Class I uses at two pool plants in South Carolina would be determined by the Class I prices that would apply at the nearest of eight named cities located in the Georgia marketing area. The two pool plants are located at Greenville and Spartanburg, South Carolina. The nearest of the eight cities in this case would be Lavonia which is in Franklin County. On that basis, the Class I differential for two South Carolina plants would be $3.06 since Franklin County is within the North Central zone.

The minus location adjustments that currently apply at plants in South Carolina are no longer appropriate since South Carolina is a deficit milk production area and milk needs to be moved there from alternative supply areas. The use of minus location adjustments in the southern part of South Carolina would give pool plant operators in such area who are making sales into the Georgia market a competitive advantage over Georgia handlers located in plus location adjustment zones. Furthermore, plants in South Carolina are equally as far distant as Georgia plants from the alternative supply areas of Tennessee. In addition, Class I pricing in the South Carolina market during the period when the South Carolina Milk Commission established Class I prices and at the present time under a negotiated pricing system has been at least at the level of Class I pricing under the Georgia order and in most instances has exceeded the Georgia Class I price.

The operator of a partially regulated distributing plant under the Georgia order that is located in Charleston, South Carolina, opposed the creation of two plus location adjustment zones in Georgia. The opponent of the plus location adjustment zones sells milk in the Savannah area in competition with handlers fully regulated under Federal orders. Under the pricing adopted herein for the Savannah area, the plant operator would have to pay more per hundredweight for Class I sales in the Georgia marketing area only if the prices paid to its dairy farmers were less than the classified use value of the milk under the Georgia order.

The location adjustment for plants located in the Tennessee Valley marketing area should be a minus 31 cents. Such adjustment would result in a Class I differential of $2.77 at a Chattanooga pool plant that is regulated by the Georgia order. The 31-cent minus adjustment will provide the same location value for milk in Class I use at the Chattanooga plant as the Class I differential that is mandated by the Food Security Act of 1985 for the Chattanooga location under the Tennessee Valley order. The $2.83 Class I differential that would apply at the Chattanooga plant by using the location adjustment proposed by DI is not appropriate in this instance because it exceeds the mandated Class I differential by 6 cents.

The pricing of milk of Class I use in areas north of the southern boundaries of the States of North Carolina and Tennessee and outside the State of North Carolina and the Tennessee Valley marketing area should be determined on a mileage basis from Atlanta. The plant location adjustment should be a minus 20 cents plus an additional reduction of 2.5 cents for each 10 miles or fraction thereof in excess of 110 miles from Atlanta. The pricing of milk under this provision would apply to only one pool plant currently regulated under the Georgia order. Such pricing from Atlanta would result in a minus 47.5 cents at Murfreesboro, Tennessee, which is approximately 211 miles from Atlanta. On that basis, the Class I differential would be $2.805 at Murfreesboro. Such Class I differential is appropriate for the Murfreesboro plant which is located somewhat less than 30 miles south of Nashville and in recognition that the mandated Class I differential at Nashville is $2.52 under the Nashville, Tennessee order.

Amendment of the Georgia order to provide plus location adjustment zones requires that several conforming changes be made in the order. The provisions dealing with the computation of the uniform price and plant location adjustments for producers and on nonpool milk have been amended to incorporate the required changes.

Plant location adjustment rates for Upper Florida, Tampa Bay and Southeastern Florida Federal milk orders—Parts 1006, 1012 and 1013. The location adjustment provisions of the Upper Florida, Tampa Bay and Southeastern Florida orders, respectively, should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986. Plants located in the State of Florida that are regulated under either the Upper Florida, Tampa Bay or Southeastern Florida orders but are physically located in the marketing area of either of the other two Florida orders should have a location adjustment (plus or minus) equal to the difference in the Class I prices existing in the order in which the plant is regulated and the order in which the plant is located. For plants located outside the State of Florida and regulated under one of the three Florida orders, a location adjustment rate of 2 cents for each 10 miles or fraction thereof should apply. Under the Upper Florida order, such minus adjustment should apply at plants located in excess of 85 miles from either Jacksonville or Tallahassee, and should be added to a minus adjustment of 15 cents that would apply at plants located more than 70 miles but less than 85 miles from such cities. For plants regulated under the Tampa Bay order, the location adjustment would be computed from the City Hall in Tampa. Under the Southeastern Florida order, the distance to a plant would be computed from the City Hall in West Palm Beach.

The current location adjustment provisions of the three Florida orders differ from the provisions adopted herein in the rate of the location adjustment per 10 miles, the adjustment under the Upper Florida order of 10 cents at a plant located more than 70 miles but less than 85 miles from either Jacksonville or Tallahassee, and the amount of the difference in the Class I differentials of the three orders. The current rate of adjustment per 10 miles is 1.5 cents. The difference between the

Class I differentials of the Upper Florida and Tampa Bay orders is 10 cents. The difference between the Tampa Bay and the Southeastern Florida Class I differentials is 20 cents. With respect to the Upper Florida and Southeastern Florida Class I differentials, there is a difference of 30 cents.

Three Florida cooperative associations proposed the location adjustments and the rates adopted herein. The only opposition to the cooperatives' proposal was expressed by a witness for Cumberland Farms, Inc. Cumberland Farms requested that a location adjustment rate of 2.3 cents per 10 miles be established for plants located outside the State of Florida. The witness also requested that in computing the distance of the plant from the basing point specified in the order regulating the plant, recognition be given to the location of the inspection station in Florida which must give clearance to bulk milk brought into the State of Florida. In the case of Cumberland Farms which ships milk to its distributing plant at Riviera Beach, Florida, from the pool supply plant at Dover, Delaware, the witness indicated that such milk must receive clearance at the inspection station located in White Springs, Florida. As a consequence, each load of milk shipped to Cumberland's Florida plant from the Delaware supply plant cannot be shipped by the most direct route and must travel approximately 120 additional miles.

A plant location adjustment for a Florida plant that is regulated by one of the Florida orders and located in the marketing area of either of the other two Florida orders should have a location adjustment (plus or minus) equal to the difference in the Class I prices that apply in the order under which the plant is regulated and the order in which the plant is located. The net result of the location adjustments adopted herein for plants located in the marketing areas of the three Florida orders is that the Class I differential when adjusted for plant location results in a Class I price for such plant that is identical to the one that would apply at such plant if the plant were regulated by the order for the marketing area in which the plant is located. For example, a plant located in the Upper Florida marketing area and regulated by the Southeastern Florida milk order would have a $3.58 ($4.18–60 cent location adjustment) Class I differential. Such Class I differential is identical to the Class I differential that applies to a plant located in the Upper Florida marketing area and regulated by such order.

A location adjustment rate of 2 cents per 10 miles for plants located outside the State of Florida is appropriate for the three Florida orders. For the Upper Florida order, the minus 15-cent adjustment for plants located more than 70 miles but less than 85 miles from the nearest city of Jacksonville or Tallahassee in conjunction with an additional reduction of 2 cents per 10 miles for plants located beyond 85 miles is appropriate. Such adjustments would result in a Class I differential of $3.23 ($3.58 minus 15 cents minus 2 cents for 10 zones beyond 85 miles) for a plant at Macon, Georgia, if such plant were regulated under the Upper Florida order. If the Macon plant were regulated by the Tampa Bay order, a Class I differential of $3.12 would apply ($3.88 minus 2 cents per 10 miles for 377 miles). Regulation of the Macon plant under the Southeastern Florida order would result in a Class I differential of $3.14 ($4.18 minus 2 cents per 10 miles for a distance of 512 miles).

The rate of 2 cents per 10 miles also will result in reasonable price alignment with one of the principal supply areas outside the State of Florida. Milk regularly moves from Putnam County, Georgia, to Florida and at various times the supply plant at Eatonton, Georgia, has been a source of supply for the Florida orders. The Class I differential for Tampa of $3.88 when adjusted back to Eatonton (a distance of 414 miles by 2 cents per 10 miles) results in a Class I differential of $3.04 ($3.88 minus $0.84). This results in a very close approximation to the $3.08 Class I price that would apply at the Eatonton plant if regulated by the Atlanta order.

The 2.3-cent location adjustment rate advocated by Cumberland Farms was derived by estimating what effect the mandated Class I differential would have on the blend price at Dover, Delaware, under the Southeastern Florida milk order as compared with the blend price at such location under the Middle Atlantic order. The projected blend price at the Dover plant using 1985 actual pricing and utilization percentages modified to reflect the mandated increase in the Class I differentials indicated a $12.985 blend under the Middle Atlantic order compared to a $13.885 blend under Southeastern Florida. The witness for Cumberland Farms indicated that an increase in the location adjustment from 1.5 cents to 2.3 cents would reduce the Southeastern Florida blend price by 84.8 cents per hundredweight. Such adjustment would result in the blend prices differing by 5 cents per hundredweight.

The 2.3-cent location adjustment rate proposed by Cumberland Farms was designed to equate blend prices of two orders at a single plant location. However, this is contrary to the purpose of the hearing, which was to amend the location adjustment provisions of the orders so that the value of producer milk at various plants will be aligned on a intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985.

The plant location adjustment provision of the three Florida orders should not be revised to recognize the added cost that results when out-of-state milk must receive clearance from Florida health authorities prior to delivery to Florida milk plants. The additional mileage involved in obtaining the inspection should be borne by the importing handler to encourage the lowest cost movements of milk, rather than having producers subsidize inefficient movements through increased location adjustments from the pool proceeds.

Plant location adjustment rates for Tennessee Valley order—Part 1011. The location adjustment provisions of the Tennessee Valley order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective May 1, 1986. No location adjustment should apply on milk physically received at a plant located within the marketing area except the Kentucky portion of the marketing area, or in the State of Virginia. For milk received at a plant located within the State of North Carolina or south of the southern boundary of the States of North Carolina and Tennessee, a plus location adjustment of 20 cents should apply. A location adjustment of minus 32 cents should apply in the Kentucky counties of Bell, Breathitt, Clay, Harlan, Knott, Knox, Laurel, Leslie, Letcher, McCreary, Perry, Pulaski and Whitley. For milk that is received at a plant located more than 90 miles from the city halls in Bristol, Chattanooga and Knoxville and outside the States of Virginia and North Carolina, the Kentucky counties previously named and north of the southern boundary of the States of North Carolina and Tennessee, the Class I price should be reduced 2.5 cents for each 10 miles or fraction thereof that such plant is from the nearer of the city halls in Bristol, Chattanooga and Knoxville.

The location adjustment pricing adopted herein for the Tennessee Valley order was proposed by DI. Such pricing would be applicable to three of the 10 pool plants currently regulated under the Tennessee Valley order. The remaining seven pool plants are located in the marketing area of the Tennessee Valley order. No location adjustment currently applies at such plants and none was proposed by DI.

The Westover Dairy at Lynchburg, Virginia, would receive no location adjustment under DI's proposed pricing. Currently, a minus 30-cent adjustment applies at that plant's location. A Class I differential of $2.77 is appropriate for the Lynchburg plant. The plant is situated between the marketing area of the Tennessee Valley order and the marketing area of the Middle Atlantic order, which has a mandated Class I differential of $3.03. On the basis of the plant's distance from Washington, D.C., and a reduction of 1.5 cents per 10 miles in the Middle Atlantic Class I differential, the plant would have a minus location adjustment of 27 cents, or a $2.76 differential at Lynchburg. Under such circumstances, there is ample reason to abandon a minus location adjustment for the Lynchburg plant and to provide for no location adjustment at that location. Furthermore, Class I pricing by the Virginia Milk Commission at the Lynchburg plant has exceeded the level of the Federal order Class I price for the Tennessee Valley order for the last several years.

A Class I differential of $2.45 would apply at the Flav-O-Rich plant at London, Kentucky, under the minus 32-cent location adjustment proposed by DI for a number of Kentucky counties. The London plant currently has a minus 16.5-cent location adjustment based on a rate of 1.5 cents per 10 miles from Knoxville. The 32-cent adjustment represents a rate of 3 cents per 10 miles which is about the maximum rate that can be adopted in light of the current cost of moving milk.

DI's primary concern in establishing pricing at the London plant was to equate the Class I differential at that location with the Class I differential applicable under the Louisville-Lexington-Evansville order at a plant at Somerset, Kentucky. The plant at Somerset is in the adjoining county of Pulaski. As discussed in plant location pricing under the Louisville-Lexington-Evansville order, it is concluded that a Class I differential of $2.26 should apply at the Somerset plant. Such differential is 19 cents less than the $2.45 Class I differential for the London plant. Under the current provisions of the two orders, the Class I differentials differ by 33.5 cents.

While it is not feasible to apply the same Class I differential at the London and the Somerset plants when such plants are regulated by the Tennessee Valley and the Louisville-Lexington-Evansville orders, respectively, the two plants should have the same Class I differential when both plants are regulated by the same order. To accomplish this, the Tennessee Valley order should be amended to include Pulaski County, Kentucky, in the minus 32-cent zone. Thus, if the Somerset plant becomes regulated under the Tennessee Valley order, it would have a $2.45 Class I differential. Such pricing is appropriate for the two plants when they have the majority of their sales in the Tennessee Valley marketing area.

As discussed under the plant location adjustment pricing under the Louisville-Lexington-Evansville order, such order would be amended to include Pulaski County, Kentucky, in which the Somerset plant is located with Laurel County, Kentucky, (in which the London plant is located) and other counties in which a plus 15-cent location adjustment applies. This would result in a $2.26 Class I differential at the Somerset and the London plants when both plants are regulated under the Louisville-Lexington-Evansville order.

A plant location adjustment of plus 20 cents should apply at plants located in the State of North Carolina, or south of the southern boundary of the States of North Carolina and Tennessee and outside the marketing area of the order. The adjustment adopted herein was proposed by DI.

The current adjustment that applies at a North Carolina pool plant at Winston-Salem is minus 22.5 cents. An individual representing the Winston-Salem plant and two other North Carolina plants that are partially regulated under the Tennessee Valley order opposed any change in the current location adjustment.

Historically, the Class I prices that North Carolina plants have paid for milk sold in North Carolina have been in excess of the Federal order prices applicable in adjoining markets. In addition, North Carolina is a deficit milk production area and milk must be moved from Virginia into North Carolina plants to supply the Class I needs of the market. The Virginia milk must be procured in competition with handlers regulated under the Middle Atlantic order for which a $3.03 Class I differential is mandated. Also, North Carolina plants must compete for milk supplies with the South Carolina plants at Spartanburg and Greenville that are regulated under the Georgia order with a $3.06 Class I differential. Thus, the $2.97 differential for North Carolina plants is appropriate to hold milk supplies in competition with higher-priced markets to the south. Under these circumstances, a plus 20-cent location adjustment is appropriate for plants in North Carolina.

The location adjustment for plants more than 90 miles from Bristol, Chattanooga or Knoxville and north of the southern boundary of the States of North Carolina and Tennessee but outside the States of North Carolina and Virginia should be reduced by 2.5 cents for each 10 miles or fraction thereof that such plant is from the nearer of the city halls in Bristol, Chattanooga or Knoxville. This rate is the same as the rate that applies for the intervening distance between the Chicago and Knoxville areas under the mandated Class I differentials [($2.77 minus $1.40) divided by 543 miles]. On this basis, it is concluded that a 2.5-cent location adjustment rate is appropriate for the Tennessee Valley order.

Plant location adjustment rates for Louisville-Lexington-Evansville order—Part 1046. The location adjustment provisions of the Louisville-Lexington-Evansville order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986. For milk received from producers at a plant and which is classified as Class I milk, the Class I price should be adjusted as follows:

(1) For such milk that is physically received at plants located in the Kentucky counties of Bell, Breathitt, Caldwell, Christian, Clay, Harlan, Hopkins, Knott, Knox, Laurel, Leslie, Letcher, Logan, Lyon, McCreary, Muhlenberg, Perry, Pulaski, Todd, Trigg and Whitley, the Class I price should be increased by a location adjustment of 15 cents;

(2) For such milk that is physically received at plants located within the defined marketing area of the Paducah, Kentucky, Federal Milk Marketing Order, Part 1099, excluding those counties specified in the above paragraph (1), the Class I price should be increased by a location adjustment of 28 cents;

(3) For such milk that is physically received at plants located east of the Mississippi River and south of the northern boundary of Tennessee or the northern boundary of North Carolina,

the Class I price should be increased by a location adjustment of 41 cents;

(4) For such milk that is physically received at plants located in the marketing area of the State of Kentucky and outside the areas specified in the above paragraphs (1), (2), or (3), no location adjustment should apply; and

(5) For such milk that is physically received at plants located outside the areas specified in the above paragraphs (a), (2), (3), or (4) and 85 miles or more from the City Halls in Louisville and Lexington, Kentucky, and Evansville, Indiana, by the shortest hard-surfaced highway distance as determined by the market administrator, the Class I price distance as determined by the market administrator, the Class I price should be reduced by a location adjustment of 2.5 cents for each 10 miles or fraction thereof that such plant is from the City Hall in Louisville, Lexington or Evansville, whichever is nearest.

Currently, the order provides for a plus 15-cent location adjustment zone that encompasses 12 counties in southeastern Kentucky. No location adjustment applies at plants located in the marketing area, in the State of Kentucky except for the 12 counties in the plus 15-cent zone, in the State of Tennessee or in the area east of the Mississippi River and south of the southern boundary of Tennessee or the northern boundary of South Carolina. Outside of the areas previously enumerated and 85 miles or more from the city hall in Louisville, Lexington or Evansville, the Class I price is reduced by a location adjustment of 1.5 cents for each 10 miles or fraction thereof that the plant is from the nearest city hall in Louisville, Lexington or Evansville.

DI proposed that 2 plus location adjustment zones be established in Southern Kentucky. The cooperative proposed that the current 15-cent zone of 12 counties be expanded by 11 counties and that the amount of the adjustment be plus 34 cents (an increase of 19 cents). DI also proposed that a plus location adjustment of 15 cents apply in a 45-county area of Kentucky. For a plant located in the Paducah marketing area with the exception of several counties included in the proposed 15-cent zone a plus location adjustment of 28 cents would apply. For plants located east of the Mississippi River and south of the northern boundary of the States of Tennessee and North Carolina, a location adjustment of plus 41 cents would apply. Also, DI proposed that the current location adjustment rate of 1.5 cents be increased to 2.5 cents per 10 miles.

The reasons set forth by DI for the establishment of the new pricing zones in Kentucky are as follows:

(a) In southeastern Kentucky, there are two distributing plants, one at London and the other at Somerset. Under the Louisville order, there is no location adjustment applicable at the Somerset location but a plus 15-cent location adjustment applies to a zone that includes the London plant's location. The plant at London is regulated under the Tennessee Valley order and under the current location adjustment provisions would have a Class I differential of $2.605, or 49.5 cents higher than the $2.11 differential at Somerset. The cooperative contended that legislated Class I differentials at Louisville of $2.11 and at Knoxville of $2.77 require at least one intermediate price zone between Louisville and Knoxville.

Under DI's proposed pricing, the current zone in southeastern Kentucky would be expanded to include the Somerset, Kentucky, plant. The cooperative contended that the London and Somerset plants compete for sales and milk supplies in the same geographic area. For this reason, DI proposed that both plants should have a $2.45 Class I differential whether regulated by the Louisville or Tennessee Valley order.

(b) Lexington, Kentucky area—Currently, no location adjustment applies in the Lexington area under the Louisville order. The cooperative pointed out that there are two distributing plants in the Lexington area—the plant at Lexington is pooled under the Louisville order and the plant at Winchester is pooled under the Ohio Valley order.

DI noted that the two plants are less than 20 miles apart and for this reason the cooperative contended that the Class I differentials of the two plants should be the same irrespective of the order under which the plants are pooled.

(c) West Central Kentucky area—DI pointed out that there are two plants located in this area—one at Madisonville, Kentucky, regulated under the Louisville order and one at Hopkinsville, Kentucky, regulated under the Nashville order. The cooperative indicated that the West Central Kentucky area is a source of supply for the two plants. For this reason, the cooperative held that the Class I differential applicable at these two plants should be the same.

National Farmers Organization (NFO) opposed a 34-cent plus location adjustment for the pool distributing plant at Somerset, Kentucky. The cooperative indicated that if the Secretary decided that the Somerset plant should be in a plus zone, Pulaski County in which the plant is located should be placed in a 15-cent zone. NFO also proposed a location adjustment rate of a 2 cents per 10 miles instead of the 2.5-cent rate proposed by DI.

NFO expressed concern that a plus 34-cent location adjustment for the Somerset plant might deprive NFO of a sales outlet. The cooperative pointed out too that a number of manufacturing plants are located in the two proposed plus location adjustment zones and that milk diverted to such plants as producer milk could result in a reduction in the blend price to producers.

Southern Belle Dairy Company, Inc., the operator of the Somerset plant, opposed the 34-cent plus location adjustment. The company testified that Congress had mandated only a 26-cent difference in Class I prices between Louisville and Nashville whereas DI proposed a Class I price for Somerset 34 cents higher than Louisville even though Somerset is about midway between Louisville and Nashville.

In its brief, the Company listed 12 factors that should be taken into consideration in setting location adjustments. The company pointed out that the largest and third largest milk producing counties in Kentucky were proposed for inclusion in the plus 15-cent zone. The company also indicated that higher prices in the milkshed than in the city would encourage milk to go to manufacturing plants.

A representative of the Southeastern Graded Milk Producers Association, a cooperative association supplying Southern Belle Dairy Company, opposed DI's proposal to apply a plus location adjustment for milk received at the Somerset plant. The cooperative expressed concern that the proposed price increase would place Southern Belle Dairy at a disadvantage. According to the representative, such disadvantage might deprive the cooperative of a sales outlet.

Southeastern Dairies, the operator of a pool distributing plant at Louisville opposed the plus 15-cent location adjustment zone proposed by DI and the enlargement of the present plus 15-cent zone in conjunction with an increase in that zone's price to 34 cents. It was the company's position that milk in the Louisville market moves primarily from south to north. In that regard, the company indicated the Louisville plant draws 64 percent of its milk supply from the proposed plus 15-cent and plus 34-cent zones. The company contended that the price in south central Kentucky

should be lower than the Louisville price to encourage milk to move from the "production area" to the "consuming area."

Bel Cheese submitted a brief in opposition to the plus 15-cent location adjustment price that would apply at plants in Hart and Barren County. The company operates a nonpool manufacturing plant in the nearby county of Grayson, Kentucky, a county in which location adjustments would not apply. The company was concerned that it might be deprived of a fluid milk supply because there would be more of an incentive for dairy farmers to deliver milk to plants located in plus location adjustment zones than to plants in a no location adjustment zone. The company was concerned that it may have to pay higher prices to retain its milk supply due to the higher blend prices that would apply under DI's proposed pricing at similarly situated manufacturing plants in nearby counties.

Dean Foods, the operator of a pool distributing plant in Louisville, objected to the inclusion of Washington County in the plus 15-cent location adjustment zone. Dean Foods diverts milk during the flush months from its plant to the Armour Foods Company at Springfield, Kentucky, which is also a pool plant under the Louisville-Lexington-Evansville order. The company pointed out that those producers who are diverted during the flush months of production would have their price increased during the time of the year when prices generally decrease. When the milk of these producers is needed in Louisville for fluid use, they would find that their milk is priced 15 cents less than if it were received at Springfield.

A plus 15-cent location adjustment zone covering areas of southwestern and southeastern Kentucky should be provided to align Class I pricing for handlers under the Louisville order with handlers regulated under several nearby Federal order markets. Handlers regulated by the Louisville order compete with handlers located to the southeast, south and southwest of the Louisville market who are regulated under Federal orders which have higher Class I prices than the Louisville market. Class I differentials in the nearby southern markets are as follows: Tennessee Valley, $2.77; Nashville, Tennessee, $2.52; and Paducah, Kentucky, $2.30. These higher price levels to the south of the Louisville market dictate that Class I differentials for plants in southern Kentucky must be as high or higher than the $2.11 mandated for the Louisville-Lexington-Evansville market. Given the mandated Class I differentials in the adjoining Federal orders which vary from 20 cents in the southwestern market to 60 cents in the southeastern market more than the Class I differential at Louisville, it is necessary to establish an intermediate price zone in the southern Kentucky area to assure that an adequate supply of milk is made available to pool plants located in such area.

The plus 15-cent location adjustment zone should be structured to include two pool distributing plants in southern Kentucky and exclude the Kentucky counties in southern and south central Kentucky in which nonpool manufacturing plants are located. The two pool distributing plants are located in Madisonville and Somerset, Kentucky. The Kentucky counties in which nonpool manufacturing plants are located are as follows: Anderson (Lawrenceburg), Barren (Glasgow), Clinton (Albany), Davies (Owensboro), Grayson (Leitchfield), Hardin (Elizabethtown), Hart (Horse Cave), Mason (Maysville), Mercer (Harrodsburg), Monroe (Tompkinsville) and Washington (Springfield). A plus location adjustment is not warranted for those counties in which nonpool manufacturing plants are located for two reasons. A plus location adjustment for nonpool plants would provide an incentive for dairy farmers to deliver milk to nonpool plants in preference to delivering milk to fluid milk plants. Furthermore, a plus location adjustment at the nonpool plant locations would reduce the level of the blend price at the central market locations.

The plus 15-cent location adjustment zone should include Hopkins County, Kentucky. A pool distributing plant in such county is located at Madisonville. The plant competes for Class I sales with a plant at Hopkinsville which is regulated under the Nashville, Tennessee, order. As noted in the discussion of location adjustments under the Nashville order, a Class I differential of $2.26 should apply at the Hopkinsville location. Since the Madisonville plant competes with the Hopkinsville plant for raw milk supplies and for Class I sales, a Class I differential of $2.26 is appropriate for the Madisonville plant. A plus 15-cent location adjustment zone that includes Hopkins County would provide such Class I differential.

The plant at Somerset and the plant at London should have the same Class I differential when both plants are fully regulated. To accomplish this, the counties in which the plants are located should be in a plus 15-cent zone. Currently, Laurel County in which the London plant is located is in a plus 15-cent zone. Consequently, to achieve the same level of pricing at the Somerset plant, Pulaski County in which Somerset is located should be added to the same 15-cent location adjustment zone. Under such circumstance, both plants would have a $2.20 Class I differential if regulated under the Louisville order.

As noted in the discussion of location adjustments for the Tennessee Valley order, the London plant and the Somerset plant would have a $2.45 Class I differential if regulated under the Tennessee Valley order. In the event that the Somerset plant is regulated under the Louisville order and the London plant is regulated under the Tennessee Valley order, the Somerset plant would have a $2.20 Class I differential and the London plant would have a Class I differential of $2.45. Currently, there is a difference of 23.5 cents in the Class I prices at the Somerset and London locations. The revision would result in a difference of 19 cents in the Class I prices applicable at the two plants.

No basis exists on this record to establish a plus 15-cent location adjustment in the Lexington area. An area of heavy milk production is located about equidistant between Louisville and Lexington. Thus, an adequate supply of milk is available at the same price level for these two cities. Proponent cooperative's suggestion that a 15-cent plus location adjustment apply in the Lexington area appears to have been based on the expectation that the Class I differential for the Winchester plant would be established under the Ohio Valley order at $2.26. In the event that a Class I differential in excess of $2.11 is established at this Winchester location, recognition of such change and any accommodation that needs to be made to such change can be handled in a final decision.

A reduction of 2.5 cents per 10 miles should be used to determine the location adjustment for plants outside those areas in which plus location adjustments are provided under the order. The Class I price should be reduced by the 2.5-cent rate for each 10 miles or fraction thereof that the plant is located from the City Hall in Louisville, Lexington or Evansville, whichever is nearest. On the basis of mileage from Evansville and the use of the 2.5-cent rate, a plant in the Chicago area would have a Class I differential of $1.36 [$2.11 − (30 ten-mile zones × $.025)]. Such pricing approximates the $1.40 Class I differential mandated for the Chicago Regional order. Accordingly, the 2.5-cent

rate should provide appropriate price alignment.

Southeastern Dairies proposed that when milk of an individual producer is physically received at more than one location (including any nonpool plant) during the month, the location adjustment rate shall be the weighted average of the amounts computed for the respective locations, except that if 75 percent or more of such producer's milk is delivered to a plant or plants at which the same rate is applicable, such rate should be applicable to all deliveries of such producer during the month regardless of point of delivery. The company asked that such proposal be implemented only in the event that the "Secretary may be able to justify higher prices in the south central Kentucky milkshed as proposed by DI." According to proponent, the purpose of the proposal is to discourage the regular source of supply for Louisville from being diverted to manufacturing plants located in nearby areas in which plus location adjustments were proposed to take advantage of a higher blend price. Also, Southeastern Dairies indicated that its proposal was designed to mitigate the tendency of the DI proposals to reduce the blend price for milk delivered to Louisville. Furthermore, the company held that its proposal would greatly facilitate reporting, record-keeping and payment obligations under the order.

As noted earlier, none of the Kentucky counties in which a nonpool manufacturing plant is located has been included in the plus 15-cent location adjustment area. Such action obviates the need for Southeastern Dairies' proposal and, accordingly, there is no need to implement the proposal by Southeastern Dairies.

Plant location adjustment rates under the Alabama-West Florida order—Part 1093. The location adjustment provisions of the Alabama-West Florida order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986.

Plant location adjustments in Zones 1 through 4a should be as follows: Zone 1, minus 23 cents; Zone 2, no adjustment; Zone 3, plus 27 cents; Zone 4, plus 57 cents; and Zone 4a, plus 30 cents. For a plant located in any of the Tennessee and Georgia counties in which a minus 20 cents currently applies, the location adjustment should be a minus 31 cents. For a plant located in any of the Tennessee or Kentucky counties or in the Fort Campbell military reservation in which a minus 45-cent adjustment applies, the location adjustment should be a minus 56 cents. For a plant located outside the marketing area and in the State of Florida, a location adjustment of plus 50 cents should apply.

For a plant located outside the marketing area and north of a line extending through the northern boundaries of Georgia, Alabama and Mississippi (except the Tennessee and Kentucky counties in which a minus 31-cent of a minus 56-cent adjustment applies and Fort Campbell military reservation), the adjustment should be a minus 23 cents plus an additional reduction of 2.5 cents for each 10 miles or fraction thereof that the plant is from the nearer of the city halls in Florence or Huntsville, Alabama.

For a plant located outside the marketing area, the State of Florida and the Georgia counties in the Tennessee Valley marketing area and south of a line extending through the northern boundaries of Georgia, Alabama and Mississippi, the adjustment should be the adjustment applicable at Mobile, York, Tuscaloosa, Florence, Huntsville, Gadsden, Opelika, or Dothan, Alabama, whichever city is nearest. This provision is currently in the order and there was no proposal to change such provision. Accordingly, the provision should be continued without change.

The changes in the location adjustments adopted herein are identical to the changes proposed by DI except for Zone 4a. Zone 4a includes only Houston County and provides location adjustment pricing for a plant at Cowarts, Alabama. DI proposed that a plus 40 cents apply at such plant. However, a plus 30-cent adjustment is adopted herein.

Dairy Fresh opposed any change in the existing zone prices under the Alabama-West Florida order. The company operates two plants regulated under the order, one at Pritchard, Alabama, and one at Cowarts, Alabama.

Beatrice, which operates a pool plant at Huntsville, Alabama, proposed that the Class I differential at Huntsville should be aligned on the basis of the mandated Class I differentials for Nashville ($2.52) and Birmingham ($3.08) and the location of the Huntsville plant relative to those two pricing points. The company's representative pointed out that Huntsville is approximately 109 miles south of Nashville and 96 miles north of Birmingham. In Beatrice's view, the 56-cent difference in price between Nashville and Birmingham should be divided into two segments—30 cents for 109 miles between Nashville and Huntsville and 26 cents for the 96 miles between Huntsville and Birmingham.

DI opposed the 26-cent minus adjustment for Zone 1. The cooperative pointed out that the adjustment for such zone would apply to a pool plant at Decatur as well as to the Huntsville plant. The cooperative indicated that the Decatur plant is about 80 miles from Birmingham. On the basis of such distance, the cooperative held that an adjustment of no more than 23 cents is warranted.

The difference in the two proposed adjustments for Zone 1 amounts to only 3 cents per hundredweight. A further consideration is the level of the Class I differential that applies to the east of Zone 1 under the Georgia order in the Northern Zone ($2.93) and the Class I differential that applies to the west of Zone 1 in the northern Mississippi counties under the New Orleans-Mississippi order ($2.90). Such price levels in conjunction with the volume of milk that must be imported into the Alabama-West Florida order to meet Class I needs would indicated that a Class I differential of $2.85 is warranted for Zone 1.

No location adjustment should be provided in Zone 2. Currently, no adjustment applies in such zone and none was proposed at the hearing. Thus, the mandated Class I differential of $3.08 would apply to plants in Zone 2.

A plus location adjustment of 27 cents should apply in Zone 3. Such pricing would apply to 3 pool plants in Montgomery and 1 pool plant at Selma and result in a Class I differential of $3.35. The plants at Montgomery are about 92 miles from Birmingham. Thus, the 27-cent adjustment represents a rate of 2.7 cents per 10 miles. Furthermore, the Zone 3 area of the Alabama-West Florida order area is due east of the New Orleans-Mississippi Zone 3, an area in which a Class I differential of $3.35 would apply. Thus, the plus 27-cent location adjustment for Zone 3 is justified on the basis of distance from Birmingham and on the basis of Class I price alignment on an east-west axis with plants regulated under the New-Orleans-Mississippi order.

The plant location adjustment for Zone 4a should be plus 30 cents. This will provide a Class I differential of $3.38 for a plant of Cowarts in Houston County. Currently, a 20-cent difference in the Class I price exists between the plant at Cowarts and a pool distributing plant at Columbus, Georgia. As discussed under the section dealing with location adjustments for the Georgia order, a plus 10-cent adjustment would apply at the Columbus plant. The

resulting Class I differential would be $3.18 at the Columbus plant. The plus 30-cent adjustment to the Class I differential price at Birmingham of $3.08 resulting in a Class I differential of $3.38 at Cowarts will provide proper price alignment with the Columbus plant. Such pricing at Cowarts maintains the 20-cent difference in Class I pricing that currently exists between the Columbus, Georgia, plant and the plant at Cowarts, Alabama. Houston County is adjacent to the Southern Zone of the Georgia order where an identical $3.38 Class I differential is adopted. In addition, Cowarts is about 94 miles from Tallahassee, which is a basing point for location adjustments under the Upper Florida order. At 94 miles, the Upper Florida Class I differential would be adjusted to $3.41 at Cowarts. Thus, the $3.38 differential of Cowarts under the Alabama-West Florida order provides appropriate alignment in competition for milk supplies with handlers regulated under adjacent orders.

The location adjustment for the Mobile Alabama, area (Zone 4) should be a plus 57 cents. Such adjustment would result in a Class I differential of $3.65 for three pool plants—Mobile and Pritchard, Alabama, and Pensacola, Florida. On a east-west axis, the $3.65 Class I differential in the Mobile area is aligned with the Class I differential that applies at the Franklinton and Kentwood plants which are regulated under the New Orleans-Mississippi order. Furthermore, the Class I differential applicable in Zone 4 represents an increase of 96 cents over the current Class I differential that applies in such zone. Such increase is commensurate with the Class I price increase of $1.00 that was mandated for the New Orleans area by the Food Security Act of 1985.

The location adjustment should be minus 31 cents for a plant located in the Tennessee counties in the marketing area of the Tennessee Valley order plus Bledsoe County, Tennessee. The same adjustment should apply at a plant located in the Georgia counties included in the marketing area of the Tennessee Valley order. The 31-cent adjustment would result in a $2.77 Class I differential for milk at such plants. Such differential is the same as the mandated Class I differential that would apply at such plants if regulated under the Tennessee Valley order.

The location adjustment should be a minus 56 cents for a plant located in the Tennessee and Kentucky counties and Fort Campbell military reservation which are included in the marketing area of the Nashville, Tennessee, order. The 56-cent adjustment would result in a $2.52 Class I differential for milk at such plants. Such differential is the same as the mandated Class I differential that would apply at such plants if located within 50 miles of the State Capitol of Tennessee and regulated under the Nashville, Tennessee, order.

The location adjustment should be a plus 50 cents for a plant outside the marketing area and located in the State of Florida. The 50-cent adjustment would result in a $3.58 Class I differential for milk at such plant. Such differential is appropriate since it is the same as the mandated Class I differential that applies in the northern Florida area that is regulated under the Upper Florida order.

A minus adjustment of 23 cents plus an additional reduction of 2.5 cents per 10 miles should be used to determine the location adjustment for plants outside the marketing area and north of a line running through the northern boundaries of Georgia, Alabama and Mississippi except the Tennessee and Kentucky counties in which a minus 31-cent or minus 56-cent location adjustment applies. The plant's location should be measured from the nearer of the city halls in Florence or Huntsville, Alabama. On the basis of mileage from Huntsville, a plant in the Chicago area would have a Class I differential of $1.46 [$3.06—$0.23—(55 ten-mile zones × $.025]. Such pricing approximates the $1.40 Class I differential mandated for the Chicago Regional order. Accordingly, the reduction of 23 cents in conjunction with the 2.5-cent rate per 10 miles represents an appropriate adjustment to the Class I differential of the Alabama-West Florida order.

Plant location adjustment rates under the New Orleans-Mississippi order—Part 1094. The location adjustment provisions of the New Orleans-Mississippi order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986. Plant location adjustments in the marketing area should be as follows: Zone 1, no adjustment; Zone 2, minus 20 cents; Zone 2A, minus 40 cents; Zone 3, minus 50 cents; Zone 3A, minus 65 cents; Zone 4, minus 75 cents; Zone 5, minus 80 cents; and Zone 6, minus 95 cents. Plant location adjustments outside the marketing area should be as follows: Zone III of the Greater Louisiana order, minus 7 cents; Zone II of the Greater Louisiana order, minus 30 cents; Zone I of the Greater Louisiana order, minus 57 cents; and in the State of Mississippi outside the marketing area, minus 95 cents. Also, the minus adjustment rate that is currently 1.5 cents per 10 miles should be changed to 2.5 cents per 10 miles.

The location adjustments adopted herein are unchanged from those proposed by DI except for Zone 2A. In Zone 2A, which includes the Hattiesburg, Mississippi, area, the adjustment should be a minus 40 cents instead of the minus 30 cents proposed by DI.

Dairy Fresh, the operator of pool plants at Columbus and Hattiesburg, Mississippi, proposed that the plant location adjustments for the marketing area zones be as follows: Zone 1, no adjustment; Zone 2, minus 20 cents; Zone 3, minus 40 cents; Zone 4, minus 70 cents; Zone 5, minus 80 cents; and Zone 6, minus 90 cents.

Barber Pure Milk Company supported a Class I price differential of $2.85 in Zone 6 of the New Orleans-Mississippi order. The company operates a plant at Tupelo, Mississippi, and estimated that approximately 20 percent of its Class I sales are in Alabama in competition with plants in Zone 1 of the Alabama-West Florida order. For this reason, the company wanted its Class I differential at Tupelo to be no greater than the Class I differentials applicable in Zone 1 of the Alabama-West Florida order.

Gulf Dairy Association supported the pricing proposed for the New Orleans-Mississippi order except the pricing proposed by DI for the Hattiesburg area. Although Gulf Dairy Association approved the creation of a new Zone 2A, and area that includes Hattiesburg, the cooperative requested that a location adjustment of minus 40 cents apply instead of the minus 30 cents proposed by DI. The spokesman for the cooperative indicated that the 10-cent higher Class I differential proposed by DI would result in a loss of sales by the Hattiesburg plant to its competitors. The cooperative was concerned that the loss in Class I sales would adversely affect the cooperative's sales to the Hattiesburg plant.

Gulf Coast Dairymen's Association opposed the creation of Zone 2A proposed by DI. The cooperative requested that Zone 3 not be restructured and that a minus 40-cent location adjustment apply at the Hattiesburg location. The cooperative also expressed the view that the Hattiesburg plant might lose Class I sales if the location adjustment was changed from minus 40 cents to the minus 30 cents proposed by DI.

Zones 1 and 2 should be continued with no change in the area within each zone. In Zone 1, which includes the city of New Orleans, no location adjustment currently applies and none would be provided under the provisions adopted herein. Such pricing would result in a Class I differential of $2.65 for plants in New Orleans which is mandated by the Food Security Act of 1985. In Zone 2, a plant location adjustment of minus 20 cents should apply. Such level of pricing for Zone 2 was proposed by DI and by Dairy Fresh. Currently, a plant location adjustment of minus 18 cents applies in Zone 2. There was no objection to the proposed change. Such change appears warranted in view of current transportation costs and, accordingly, is adopted herein.

The plant location adjustment of minus 40 cents that applies at a plant at Hattiesburg should be continued. The adjustment at the Hattiesburg plant should be accomplished by dividing the area in the current Zone 3 into a Zone 2A that includes Hattiesburg and a new Zone 3. While DI contended that the minus 40 cents was not warranted on the basis of the 110–115 miles between New Orleans and Hattiesburg, such view must be considered in light of the statement by representatives of two cooperatives who currently deliver milk to the Hattiesburg plant that their member-producers are willing to deliver milk for Class I use to the plant for a Class I differential of $3.45. Under such circumstances, it is concluded that the minus 40-cent location adjustment should be continued at the Hattiesburg location. Such adjustment would result in the $3.45 Class I differential supported by the two cooperatives that supply milk to the plant.

The Class I differentials for pool distributing plants located at Jackson, Meridian and Canton, Mississippi, that currently are in the same pricing zone as the Hattiesburg plant should be established at 10 cents less than the Hattiesburg plant. This should be accomplished by leaving the counties in which such plants are located in Zone 3 and specifying that a minus 50-cent location adjustment shall apply in Zone 3.

DI and Gulf Dairy Association supported a minus 50-cent location adjustment for the Jackson, Meridian and Canton plants. Gulf Coast Dairymen's Association held that the three plants should have a minus 40-cent adjustment.

The operator of the Jackson and Meridian plants offered no testimony in opposition to the 10-cent greater price adjustment. DI, the operator of the Canton plant, proposed the Class I differential that would apply at the Canton plant.

Both the Jackson and Meridian plants are more than 80 miles from Hattiesburg. The Canton plant is even more distant from Hattiesburg since Canton is located north of Jackson and Meridian. On the basis of mileage and a location adjustment of 2.5 cents per 10 miles, a difference of 20 cents could be justified between Hattiesburg and the Jackson and Meridian plants. DI supported such 20-cent difference. However, DI wanted to achieve such 20-cent difference by applying a 10-cent higher Class I differential at Hattiesburg than that adopted herein.

The 80 miles or more separating the Hattiesburg plant and the Jackson, Meridian and Canton plants warrants a restructuring of the current Zone 3 into a Zone 2A and Zone 3. The Hattiesburg plant should be in Zone 2A with a minus 40-cent location adjustment. The Jackson, Meridian and Canton plants should be in Zone 3 with a minus 50-cent location adjustment. The 10-cent lower Class I differential at plants in Zone 3 is warranted by the 80 or more miles separating the pool plants in Zone 2A and Zone 3.

Zone 4 should be divided into a Zone 3A and Zone 4. Under such zoning, a plant at Kosciusko, Mississippi, would be in Zone 3A and the plant at Columbus, Mississippi, would remain in Zone 4. Currently, the two plants are in Zone 4 and have the same Class I differential. Under the zoning adopted herein, the plant at Kosciusko would have a 10-cent higher Class I differential than the plant at Columbus. The 10-cent higher price is justified on the basis that Columbus is located about 283 miles from New Orleans while Kosciusko is approximately 239 miles from New Orleans. The 40-50 miles that the Columbus plant is beyond the Kosciusko plant warrants the 10-cent difference in Class I differentials at the two locations.

Zone 5 should be continued with no change in the area within the zone. The location adjustment for the zone should be minus 80 cents. The two pool plants that would be affected by such pricing are Grenada Farms, Grenada, Mississippi, and Elliott Dairy, Amory, Mississippi. There was no opposition to the location adjustment proposed for Zone 5.

In Zone 6, a minus 95-cent location adjustment should apply. This would result in a Class I differential of $2.90 at a plant in Tupelo. Although the Tupelo plant operator contended that the Class I differential at Tupelo should not exceed the Class I differential of $2.85 that applies at a Huntsville, Alabama, plant, the Class I differential must be held at the $2.90 level to provide price alignment with the Memphis market. Tupelo is located in the same price zone under the Memphis order as a nearby plant at Oxford, Mississippi, that is regulated under the Memphis order. A $2.90 Class I differential is provided for this zone under the Memphis order. [Official notice is taken of an emergency decision on proposed amendments to the marketing agreement and the order regulating the handling of milk in the Memphis, Tennessee, marketing area that was published in the Federal Register on May 16, 1986 (51 FR 17982–17986).] Accordingly, inter-market price alignment will be maintained with the adoption of a $2.90 Class I differential for Zone 6 under the New Orleans-Mississippi order.

The plant location adjustments under the New Orleans-Mississippi order for the marketing area covered by the Greater Louisiana order should be coordinated with the Class I differentials that apply at plants regulated by the Greater Louisiana order. This can be accomplished by providing the following plant location adjustments for the zones of the Greater Louisiana order: Zone I, minus 57 cents; Zone II, minus 30 cents and Zone III, minus 7 cents.

For milk received at a plant located outside the States of Mississippi, Alabama or Louisiana and the Florida counties of Escambia or Santa Rosa and more than 150 miles from the City Hall in New Orleans, the Class I price should be reduced by 45 cents plus an additional reduction of 2.5 cents per 10 miles or fraction thereof that the plant is more than 160 miles from the New Orleans Hall. The plant location adjustment rate of 2.5 cents per hundredweight per 10 miles for the New Orleans-Mississippi order is the same as that proposed by DI for the other 7 Federal orders for which the cooperative proposed changes in the location adjustment. On the basis of mileage from New Orleans, a plant in the Chicago area would have a Class I differential of $1.475 [$3.85—45 cents—(77 10-mile zones x $0.25)]. Such price approximates the $1.40 Class I differential mandated for the Chicago Regional order.

Plant location adjustment rates for the Greater Louisiana order—Part 1098. The location adjustment provisions of the Greater Louisiana order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1,

1986. For a plant located in the marketing area, no location adjustment should apply in Zone I, a plus 27-cent adjustment should apply in Zone II and a plus 50-cent adjustment should apply in Zone III. For a plant located outside the marketing area, the following location adjustments should apply:

(1) For a plant located in any of the following Louisiana parishes, the adjustment should be:

(i) Plus 57 cents.

Jefferson, Lafourche, Orleans, Plaquemines, St. Bernard, St. Charles, Terrebonne.

(ii) Plus 37 cents.

St. Tammany, Tangipahoa, Washington.

(2) For a plant located in any of the following Mississippi counties, the adjustment should be:

(i) Plus 37 cents.

George, Hancock, Harrison, Jackson, Pearl River, Stone.

(ii) Plus 17 cents.

Amite, Covington, Forrest, Franklin, Greene, Jefferson Davis, Jones, Lamar, Lawrence, Lincoln, Marion, Perry, Walthal, Wayne and Wilkinson.

(iii) Plus 7 cents.

Adams, Claiborne, Clarke, Copiah, Hinds, Issaquena, Jasper, Jefferson, Kemper, Lauderdale, Leake, Madison, Neshoba, Newton, Rankin, Scott, Sharkey, Simpson, Smith, Warren and Yazoo.

(3) For a plant located in any of the following Texas counties, the adjustment should be:

(i) Plus 54 cents.

Chambers, Hardin, Harris, Jefferson, Liberty, Orange.

(ii) Plus 37 cents.

Jasper, Newton, Polk, Tyler.

(iii) No adjustment.

Angelina, Cass, Harrison, Gregg, Marion, Nacogodoches, Panola, Rusk, Sabine, San Augustine, Shelby, Upshur.

(4) For a plant located outside of the areas described in the above paragraphs (1) through (3) and located more than 50 miles by the shortest hard-surfaced highway distance, as determined by the market administrator, from the nearer of the City Hall in Monroe or Shreveport, Louisiana, the adjustment should be minus 2.2 cents per hundredweight for each 10 miles or fraction thereof.

The current location adjustments for Zone I, Zone II and Zone III are no adjustment, plus 19 cents, and plus 38 cents, respectively. Of the 12 pool plants regulated under the Greater Louisiana order, 7 are located in Zone I, none in Zone II and 5 in Zone III.

There was no controversy regarding location adjustment pricing for Zone I and Zone II. In Zone I, which includes the Shreveport area, no location adjustment applies currently and no change was proposed. Although there are no pool plants in Zone II, it is reasonable to provide for a 27-cent plus location adjustment for that zone in the event a plant should someday be located there. Zone II is the midpoint between Zone I, which provides for no adjustment, and Zone III, for which a plus 50-cent adjustment was proposed and is adopted herein.

A handler who operates a pool plant at New Orleans that is regulated under the New Orleans-Mississippi order testified on behalf of five dairies (including his own) located in Zone 1 of the New Orleans-Mississippi order, which would have a $3.65 Class I differential. These dairies requested that the Class I differential in Zone III of the Greater Louisiana order be continued at the same level as the New Orleans price. The witness indicated that currently the Class I differentials in these two areas are identical.

DI offered an amended proposal at the hearing that would have provided a $3.65 Class I differential for Zone III. The cooperative proposed that the Class I differential for Zone I of the Greater Louisiana order be increased from the mandated $3.28 to $3.35. Such differential in conjunction with the 50-cent plus location adjustment that DI proposed for Zone III would have maintained the Class I price relationship that had existed between plants in Zone III of the Greater Louisiana order and Zone I of the New Orleans-Mississippi order. Objections to the receipt of testimony on the amended proposal were made at the hearing and were sustained by the Administrative Law Judge. As a consequence, DI then supported its proposal as published in the hearing notice.

A representative of Dairy Fresh, which operates a plant at Baton Rouge, Louisiana, proposed that the existing plus 38-cent location adjustment for Zone III be continued. Such adjustment in conjunction with the mandated differential of $3.28 at Shreveport would result in a Class I differential for Zone III (which includes Baton Rouge) of $3.66.

While the Baton Rouge and Lake Charles plants have had the same Class I differentials as plants in Zone 1 of the New Orleans-Mississippi order, a lower price for the Zone III area of Greater Louisiana is appropriate. On the basis of a north-south location, Baton Rouge lies on an east-west line that is approximately 20 to 25 miles north of New Orleans. On the basis of such mileage, a Class I differential that is 7 cents less than New Orleans will provide appropriate pricing for the Zone III area.

For plants located in the New Orleans-Mississippi marketing area in Zones 1 through 3, plant location adjustments should be established that will provide Class I differentials for plants regulated by this order at the same level as would prevail if the plants were regulated by the New Orleans-Mississippi order.

For milk received at a plant located in the Texas counties of Angelina, Cass, Harrison, Gregg, Marion, Nacogodoches, Panola, Rusk, Sabine, San Augustine, Shelby or Upshur, no adjustment should be made to the Class I price. Currently, no location adjustment applies at plants located in any of these 12 Texas counties and none was proposed.

The location adjustment should be a plus 54 cents for milk received at a plant located in the Texas counties of Chambers, Hardin, Harris, Jefferson, Liberty and Orange. Such adjustment would result in a $3.82 Class I differential for milk received in the 6-county area. The same level of Class I pricing under the Texas order would apply in the 6-county area under the location adjustment proposed in the notice of hearing involving the Texas order (official notice is taken of such notice of hearing appearing in the Federal Register at 51 FR 6250).

For milk received at a plant located in the Texas counties of Jasper, Newton, Polk and Tyler, a location adjustment of plus 22 cents should apply. Such adjustment would result in a $3.50 Class I differential for milk received at a plant in the 4-county area. Currently, a plus 19-cent adjustment applies in the 4-county area. Although DI proposed that a plus 37-cent location adjustment should apply in these four Texas counties, the cooperative provided no specific basis for the 18-cent increase.

We presume that the cooperative intended that the Class I differential at plants in Jasper, Newton, Polk or Tyler be the same whether regulated under the Greater Louisiana order or the Texas order. The adjustment of plus 22 cents that is adopted herein would provide the same level of Class I pricing that would prevail under the Texas order in the four Texas counties if the location adjustment proposed for such counties in the notice of hearing involving the Texas order is adopted.

In the event that the location adjustments proposed for the 6-county and 4-county area, respectively, under the Texas order are not adopted as proposed, any accommodation to such change under the Greater Louisiana order can be handled in a final decision.

For milk received at a plant outside the marketing area and outside those areas in Louisiana, Mississippi and Texas in which either plus adjustments or no adjustments are specified under this order and located more than 50 miles from the nearer of the City Hall in Monroe or Shreveport, Louisiana, the Class I price should be reduced 2.2 cents per hundredweight for each 10 miles or fraction thereof that the plant is located from the nearest of such City Halls. The plant location adjustment rate of 2.2 cents per 10 miles for the Greater Louisiana order is 0.3 cents less than the rate proposed by DI for this order and the other 7 Federal orders for which the cooperative proposed changes in the location adjustment rates. On the basis of mileage from Shreveport and the 2.5-cent rate, a plant in the Chicago area would have a Class I differential of $1.13 [$3.28−(86 10-mile zones×$.025)]. Such price is 27 cents less than the $1.40 Class I differential mandated for the Chicago Regional order. Top achieve the needed Class I price alignment, a lower rate is needed. A rate of 2.2 cents per 10 miles would reduce the Class I differential for a plant in the Chicago area to $1.368 and achieve the needed Class I price alignment.

Plant location adjustment rate for the Nashville, Tennessee, order—Part 1098. The location adjustment provisions of the Nashville, Tennessee, order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986. For milk received from producers which is classified as Class I milk, the Class I price should be adjusted as follows:

(1) For such milk that is physically received at plants located in the Kentucky counties of Bell, Breathitt, Caldwell, Christian, Clay, Harlan, Hopkins, Knott, Knox, Laurel, Leslie, Letcher, Logan, Lyon, McCreary, Muhlenberg, Perry, Pulaski, Todd, Trigg, and Whitley, the Class I price should be decreased by a location adjustment of 28 cents;

(2) For such milk that is physically received at plants located within the defined marketing area of the Paducah, Kentucky, Federal Milk Marketing Order Part 1099, excluding those counties specified in the above paragraph (1), the Class I price should be decreased by a location adjustment of 13 cents;

(3) For such milk that is physically received at plants located outside the areas specified in the above paragraphs (1) or (2) and north of the northern boundary of Tennessee or the northern boundary of North Carolina and more than 50 miles from the State Capitol in Nashville by the shortest hard-surfaced highway distance as determined by the market administrator, the Class I price should be reduced by 17.5 cents plus an additional reduction of 2.5 cents for each 10 miles or fraction thereof that such plant is more than 70 miles from the State Capitol; and

(4) For such milk that is physically received at plants located east of the Mississippi River and south of the northern boundary of Tennessee or the northern boundary of North Carolina, no adjustment should be made.

The location adjustments for the Nashville order were proposed by DI. There was no opposition to the rates proposed.

There are only three pool plants currently regulated under the Nashville order. Purity Dairies at Nashville, Tennessee, and DI's plant at Lewisburg, Tennessee, are in the area in which no location adjustment applies. At such plants, the mandated Class I differential of $2.52 for the Nashville order would apply. The third plant is Model Pure Milk at Hopkinsville, Kentucky. This plant is located in Christian County, Kentucky, and a location adjustment of minus 28 cents should apply at such plant location.

A location adjustment of 28 cents for the Hopkinsville location is appropriate. Hopkinsville is situated in the triangular area formed by drawing a line from Evansville, Indiana, to Paducah, from Paducah to Nashville, and from Nashville to Evansville. The mandated Class I differentials for the three locations are $2.11 for Evansville, $2.39 for Paducah and $2.52 at Nashville.

The minus 28-cent location adjustment will result in similar Class I pricing for the Hopkinsville plant and the plant at Madisonville, Kentucky, which is regulated under the Louisville-Lexington-Evansville order. As noted in the discussion of the plant location adjustment rate for the Louisville-Lexington-Evansville order, the Class I differential would be $2.26 at Madisonville. The location adjustment of minus 26 cents from the Nashville Class I differential of $2.52 would result in a $2.26 Class I differential at Hopkinsville.

For milk received at a plant north of the northern boundary of the States of Tennessee and North Carolina (except those Kentucky counties where minus location adjustments of 13 cents and 26 cents apply) and more than 50 miles from the State Capitol in Nashville, the Class I price should be reduced 17.5 cents plus an additional reduction of 2.5 cents for each 10 miles or fraction thereof that such plant is more than 70 miles from the State Capitol. The plant location adjustment rate of 2.5 cents per hundredweight per 10 miles for the Nashville order is the same as that proposed by DI for the other 7 Federal orders for which the cooperative proposed changes in the location adjustment rates. On the basis of mileage from Nashville, a plant in the Chicago area would have a Class I differential of $1.395 [$2.52−(45 10-mile zones×$.025)]. Such price is equivalent to the $1.40 Class I differential mandated for the Chicago Regional order.

Plant location adjustment rate for the Paducah, Kentucky, order—Part 1099. The location adjustment provisions of the Paducah, Kentucky, order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986. For milk received from producers at a plant located outside the State of Kentucky and north of an east-west line running through the southern boundary of the State of Kentucky and more than 40 miles by shortest highway distance as measured by the market administrator from the nearest County Courthouse in any of the counties included in the marketing area and disposed of as Class I milk or assigned Class I location adjustment credit, the Class I price should be reduced by 12.5 cents, plus an additional reduction of 2.5 cents for each 10 miles or fraction thereof that such distance exceeds 50 miles.

The order currently provides for a plant location adjustment of minus 7.5 cents per hundredweight for a plant located more than 40 but less than 50 miles from the nearest County Courthouse in any of the counties included in the marketing area. Beyond 50 miles, an additional adjustment of minus 1.5 cents per 10 miles or fraction thereof applies.

The rate adopted herein was proposed by Dairymen, Inc. There was no opposition to the proposed rate.

There is only one pool plant regulated under the Paducah order. The plant is not eligible for a location adjustment since it is within 40 miles of the nearest County Courthouse of any county in the marketing area.

The plant location adjustment rate of 2.5 cents per hundredweight per 10 miles for the Paducah order is the same as that proposed by DI for the other seven Federal orders for which the cooperative proposed changes in the location

adjustment rates. The mandated Class I differentials for the eight orders reflect a rate of about 2.5 cents from Chicago, Illinois. On the basis of mileage from Paducah, a plant in the Chicago area would have a Class I differential of $1.465 [$2.39—(37 10-mile zones×$0.25)]. Such pricing approximates the $1.40 Class I differential mandated for the Chicago Regional order. Thus, the use of the 2.5-cent rate to provide location adjustments under the Paducah order should result in a Class I alignment at plant locations north of Kentucky.

2. *Class I differential applicable under eight southeastern Federal milk orders on bulk milk transferred from a pool plant to an other order plant.* No change should be made in the Class I differentials applicable on bulk milk transferred to an other order plant from a pool plant regulated under either the Georgia, Tennessee Valley, Louisville-Lexington-Evansville, Alabama-West Florida, New Orleans-Mississippi, Greater Louisiana, Nashville, or Paducah Federal milk orders.

DI proposed that the plant location adjustment provisions of these eight orders be changed to provide that milk transferred to an other order plant for Class I use from a pool plant regulated by one of these orders would be subject to a Class I price that is not less than the Class I price that would apply at the transferor plant if it were regulated under the other Federal milk order. The three Florida orders included in the notice of hearing currently contain such provisions. Under the proposed change, the amount of the location adjustment to handlers would be limited so that the Class I price for milk moved to other order plants would not be less than the Class I price applicable to handlers who are competing for Class I sales with the transferee plant.

National Farmers Organization opposed the proposed change on the basis that no marketing conditions exist to warrant the change.

The proposed change in the pricing of bulk milk transferred from a pool plant to an other order plant should not be made on the basis of this record. There was no indication that a pricing problem was present under the Class I differentials existing in the eight orders prior to May 1, 1986, or that a pricing problem was likely to develop under the Class I differentials that became effective on May 1, 1986. In the event a marketing problem does occur, then a hearing can be called to address that problem and amendatory language necessary to correct the problem can be considered on the basis of the actual marketing situation.

Another consideration in the eight southeastern orders is that the proposed change would have very limited applicability. The reason for this limited applicability is that the plant location adjustment rates for the individual orders, with the exception of the Greater Louisiana order, use a rate of 2.5 cents per 10 miles which, according to the record evidence, approximates the price surface in the Class I differentials of the eight southeastern orders that became effective on May 1, 1986. To illustrate this point, a Louisville plant regulated under the Louisville order would have a Class I differential of $2.11, while a Louisville plant regulated under the Georgia order would have a $2.18 Class I differential ($3.08 Class I differential at Atlanta less a 90-cent location adjustment).

3. *The need for emergency action with respect to issues No. 1 and 2.* A recommended decision is omitted on the basis that the due and timely execution of the Secretary's functions require such omission to conform the orders to the Class I differential changes that became effective on May 1, 1986. However, this decision should be issued as an interim final decision so that interested parties have an opportunity to file exceptions to the changes in the orders adopted with this decision.

The hearing notice states that evidence would be taken to determine whether conditions exist that would warrant omission of a recommended decision under the rules of practice and procedure. Much of the testimony at the hearing on the need to omit a recommended decision centered on the view that the Department should have in place by May 1, 1986 amendments to the location adjustment provisions of the 35 Federal orders to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986.

In their briefs, DI and Beatrice Foods supported the omission of a recommended decision. NFO opposed the omission of a recommended decision. Five proprietary plant operators and three Florida cooperatives expressed no position in their briefs on the omission of a recommended decision. Counsel for several proprietary plant operators requested that an interim final decision be issued covering location adjustments for the Murfreesboro, Tennessee, plant and possibly the plant at London, Kentucky. For all other issues, Counsel requested additional briefing time and suggested that a recommended decision be issued covering such issues.

The complexity of the issues and the diversity of opinion regarding the proposals under consideration warrant the issuance of an interim final decision. This procedure will provide interested parties an opportunity to file exceptions to this interim final decision and, thereby, assist the Department in tailoring amendments so that the value of producer milk under each of the 11 orders at various plant locations will be aligned on an intra-market and inter-market basis to reflect changes in the Class I differentials mandated by the Food Security Act of 1985, effective on May 1, 1986.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

A written statement by the Honorable H.L. Callahan, United States Congressman, First District of Alabama, was submitted at the hearing by Dairy Fresh. An additional copy of the statement, the letter transmitting such copy to the Department, and the Department's response thereto were filed with the Hearing Clerk and made a part of the record. The statement set forth several concerns regarding the level of Class I pricing proposed by Dairymen, Inc., for portions of the marketing areas of Federal Orders No. 93, 94 and 96. As indicated in the Department's response, the Congressman's statement was made part of the record to be considered in this proceeding.

A request was made by Counsel in briefs filed on behalf of several proprietary plants that the Secretary in reviewing the record for substantial record evidence should also make findings on "the basis of relevant evidence which was withheld by DI or was presented in only general form when specific data would be more probative." The Department's rules of procedure (7 CFR 900.9(b)) provide that in the filing of briefs, proposed findings and conclusions "factual material other than that adduced at the hearing or subject to official notice shall not be

alluded to therein, and, in any case, shall not be considered in the formulation of the marketing agreement or marketing order." Obviously, evidence that is withheld or specific data that is not presented at a hearing is outside the scope of this proceeding. Accordingly, the request must be denied.

In its brief, Dairy Fresh renewed an exception to the ruling of the Administrative Law Judge, upon objection by DI, excluding cross-examination of Mr. Jung (the principal witness for DI) by Counsel for Dairy Fresh on Sunbelt's premium or over-order pricing. If cross-examination had been permitted, Counsel believed it would have shown that "differences in effective prices between various locations do not correspond with greater differences DI has proposed and therefore undermines the economic rationale for DI's proposals."

Later witnesses testified at the hearing regarding the level of over-order prices. Dairy Fresh's representative revealed that between certain locations there was a direct correlation between over-order prices and DI's proposed prices. The locations noted by the Dairy Fresh witness were Hattiesburg and Jackson, Hattiesburg and New Orleans, and Hattiesburg and Kentwood. Another witness testified that the over-order price was the same in Georgia and South Carolina and the effective price was the same in Macon and Waycross, Georgia. This witness pointed out that DI now asserts a new price relationship should be established between such locations.

With regard to Dairy Fresh's request for a finding that "effective negotiated prices in differences now established under the Federal Orders and do not correspond with differences proposed by DI to be adopted by regulation", such finding would be in conflict with Dairy Fresh's testimony as noted in the immediately preceding paragraph. In any event, the degree of correlation between over-order prices at various market locations and the location adjustments proposed by DI was not a controlling factor in the adjustments adopted herein.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the aforesaid orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) The interim marketing agreements and the orders, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act as amended by the Food Security Act of 1985;

(b) The interim marketing agreements and the orders, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, marketing agreements upon which a hearing has been held; and

(c) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the aforesaid marketing areas, and the minimum prices specified in the interim marketing agreements and the orders, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest.

Interim Marketing Agreement and Interim Order Amending the Orders

Annexed hereto and made part hereof are two documents, as Interim Marketing Agreement regulating the handling of milk and an Interim Order amending the orders regulating the handling of milk in the aforesaid marketing areas, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered that this entire decision and the two documents annexed hereto be published in the Federal Register.

Determination of Producer Approval and Representative Period

November 1985 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the interim orders, as amended and as hereby proposed to be amended by interim orders, regulating the handling of milk in the aforesaid marketing areas, except the Louisville-Lexington-Evansville marketing area, is appproved or favored by producers, as defined under the terms of the orders as amended and as hereby proposed to be amended, who during such representative period were engaged in the production of milk for sale within the aforesaid marketing areas.

Referendum Order To Determine Producer Approval; Determination of Representative Period; and Designation of Referendum Agent

It is hereby directed that a referendum be conducted and completed on or before the 20th day from the date this decision is issued, in accordance with the procedure for the conduct of referenda (7 CFR 900.300–311), to determine whether the issuance of the order as amended and as hereby proposed to be amended by an interim order, regulating the handling of milk in the Louisville-Lexington-Evansville marketing area is approved or favored by producers, as defined under the terms of the order as amended and as hereby proposed to be amended, who during the representative period were engaged in the production of milk for sale within the marketing area.

The representative period for the conduct of such referendum is hereby determined to be November 1985.

The agent of the Secretary to conduct such referendum is hereby designated to be Armold M. Stallings.

List of Subjects in 7 CFR Parts 1006, 1007, 1011, 1012, 1013, 1046, 1093, 1094, 1096, 1098 and 1099

Milk marketing orders, Milk, Dairy products.

Signed at Washinton, D.C., on May 28, 1986.

Karen K. Darling,

Deputy Assistant Secretary, Marketing and Inspection Services.

Interim Order [1] amending the orders, regulating the handling of milk in certain specified marketing areas

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said orders as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing areas; and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said orders as hereby amended regulate the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, marketing agreements upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof, the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The authority citation for Parts 1006, 1007, 1011, 1012, 1013, 1046, 1093, 1094, 1096, 1098 and 1099 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).

PART 1006—MILK IN THE UPPER FLORIDA MARKETING AREA

1. In § 1006.52, the table contained in paragraph (a) is revised to read as follows:

§ 1006.52 Plant location adjustments for handlers.

(a) * * *

Location of plant	Rate per cwt.
Outside the State of Florida:	
In excess of 70 but not more than 85 miles.	Subtract 15 cents.
For each additional 10 miles or fraction thereof	Subtract 2.0 cents.
Inside the State of Florida:	
South of a line forming the southern boundary of the counties of Alachua, Dixie, Gilchrist, Putnam and St. Johns, but outside the defined marketing area of Part 1013.	Add 30 cents.
In the defined marketing area of Part 1013.	Add 60 cents.
The remaining area within the State of Florida.	No adjustment.

* * * * *

PART 1007—MILK IN THE GEORGIA MARKETING AREA

1. In § 1007.52, paragraphs (a) and (b) are revised to read as follows:

§ 1007.52 Plant location adjustments for handlers.

(a) The following zones are defined for the purposes of determining location adjustments:

(1) "Northern Zone" means all the territory in the following Georgia counties:

Bartow, Cherokee, Dawson, Floyd, Forsyth, Gilmer, Gordon, Habersham, Hall, Lumpkin, Pickens, Towns, Union, and White.

(2) "North Central Zone" means all the territory in the following Georgia counties:

Banks, Barrow, Butts, Carroll, Clarke, Clayton, Cobb, Coweta, DeKalb, Douglas, Elbert, Fayette, Franklin, Fulton, Greene, Gwinnett, Haralson, Hart, Heard, Henry, Jackson, Jasper, Lamar, Lincoln, Madison, Meriwether, Morgan, Newton, Oconee, Oglethorpe, Paulding, Pike, Polk, Putnam, Rockdale, Spalding, Stephens, Taliferro, Troup, Walton, and Wilkes.

(3) "South Central Zone" means all the territory in the following Georgia counties:

Baldwin, Bibb, Bleckley, Burke, Chattahoochee, Columbia, Crawford, Crisp, Dodge, Dooly, Emanuel, Glascock, Hancock, Harris, Houston, Jefferson, Jenkins, Johnson, Jones, Laurens, Macon, Marion, McDuffie, Monroe, Muscogee, Peach, Pulaski, Richmond, Schley, Stewart, Sumter, Talbot, Taylor, Treutlen, Twiggs, Upson, Warren, Washington, Webster, Wilcox, and Wilkinson.

(4) "Southern Zone" means all the territory within the marketing area not specified in subparagraphs (1), (2), or (3) of this paragraph.

(b) The Class I price for producer milk at a plant located outside the North Central Zone shall be adjusted as follows:

(1) For producer milk at a plant located in the "Northern Zone" the Class I price shall be reduced by 15 cents;

(2) For producer milk at a plant located in the "South Central Zone" the Class I price shall be increased by 10 cents;

(3) For producer milk at a plant located in the "Southern Zone" the Class I price shall be increased by 30 cents;

(4) For producer milk at a plant located in the State of North Carolina the Class I price shall be decreased by 11 cents;

(5) For producer milk at a plant located in the Tennessee Valley marketing area the Class I price shall be decreased by 3¢ cents;

(6) For producer milk at a plant located outside the marketing area and outside the Tennessee Valley marketing area and south of the southern boundary of the States of Tennessee and North Carolina the Class I price shall be the Class I price applicable at the nearer of the city halls in Augusta, Savannah, Lavonia, Waycross, Albany, Columbus, Atlanta, and Rome, Georgia; and

(7) For producer milk at a plant located outside the areas specified in subparagraph (1), (2), (3), (4), (5) or (6) of this paragraph the Class I price shall be reduced 20 cents and an additional 2.5 cents for each 10 miles or fraction thereof in excess of 110 miles (by the shortest hard-surfaced highway distance as determined by the market administrator) that such plant is from the city hall in Atlanta, Georgia.

* * * * *

2. In § 1007.61, paragraph (a)(3) is revised to read as follows:

§ 1007.61 Computation of uniform price (including weighted average price and uniform prices for base and excess milk).

(a) * * *

(3) Add an amount equal to the total value of the minus adjustments and subtract an amount equal to the total value of the plus adjustments computed pursuant to § 1007.75;

* * * * *

3. In § 1007.75, paragraph (a) is revised to read as follows:

§ 1007.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price and the uniform price for base milk shall be adjusted according to the location of the plant at which the milk is physically received at the rates set forth in § 1007.52(b); and

* * * * *

PART 1011—MILK IN THE TENNESSEE VALLEY MARKETING AREA

1. In § 1011.52, paragraph (a) is revised to read as follows:

§ 1011.52 Plant location adjustments for handlers.

(a) For milk received from producers or from a handler described in § 1011.9(c) or (d) at a plant and which is classified as Class I milk subject to the limitations pursuant to paragraph (b) of this section, the Class I price shall be adjusted as follows:

(1) For such milk which is physically received at a plant located within the State of North Carolina, or a plant located outside the Georgia counties in the marketing area and south of the southern boundary of the States of North Carolina and Tennessee, the Class I price shall be increased by 20 cents;

(2) No adjustment shall be applicable on such milk which is physically received at a plant located within the marketing area except the Kentucky portion of the marketing area, or in the State of Virginia;

(3) For such milk which is physically received at a plant located within the Kentucky counties of Bell, Breathitt, Clay, Harlan, Knott, Knox, Laurel, Leslie, Letcher, McCreary, Perry, Pulaski, and Whitley, the Class I price shall be decreased by 32 cents; and

(4) For such milk which is physically received at a plant located more than 90 miles by the shortest hard-surfaced highway distance as determined by the market administrator from the nearest of the city halls of Bristol, Chattanooga, and Knoxville, Tennessee, and outside the areas specified in subparagraph (1), (2), or (3) of this paragraph, the Class I price applicable at the nearer of the city halls in Bristol, Chattanooga, or Knoxville, Tennessee shall be reduced by 2.5 cents for each 10 miles or fraction thereof that such plant is from the nearest of the city halls in Bristol, Chattanooga, and Knoxville, Tennessee.

* * * * *

PART 1012—MILK IN THE TAMPA BAY MARKETING AREA

1. In § 1012.52, the table contained in paragraph (a) is revised to read as follows:

§ 1012.52 Plant location adjustments for handlers.

(a) * * *

Location of plant	Rate per cwt.
Outside the State of Florida:	
For each 10 miles or fraction thereof from the city hall in Tampa, Fla.	Subtract 2.0 cents.
Inside the State of Florida:	
In the defined marketing area of Part 1013.	Add 20 cents.
South of a line forming the southern boundary of the counties of Alachua, Dixie, Gilchrist, Putnam and St. Johns, but outside the defined marketing area of Part 1013.	No adjustment.
The remaining area within the State of Florida.	Minus 20 cents.

* * * * *

PART 1013—MILK IN THE SOUTHEASTERN FLORIDA MARKETING AREA

1. In § 1013.52, the table contained in paragraph (a) is revised to read as follows:

§ 1013.52 Plant location adjustments for handlers.

(a) * * *

Location of plant	Rate per cwt.
Outside the State of Florida:	
For each 10 miles or fraction thereof from the U.S. Post Office in West Palm Beach, Fla.	Subtract 2.0 cents.
Inside the State of Florida:	
South of a line forming the southern boundary of the counties of Alachua, Dixie, Gilchrist, Putnam and St. Johns, but outside the defined marketing area of this order.	Subtract 30 cents.
The remaining area within the State of Florida.	Subtract 60 cents.

* * * * *

PART 1046—MILK IN THE LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA

1. In § 1046.52, paragraph (a) is revised to read as follows:

§ 1046.52 Plant location adjustments for handlers.

(a) For milk received from producers or from a handler described in § 1046.9(c) at a plant and which is classified as Class I milk subject to the limitations pursuant to paragraph (b) of this section, the Class I price shall be adjusted as follows:

(1) For such milk that is physically received at plants located in the Kentucky counties of Bell, Breathitt, Caldwell, Christian, Clay, Harlan, Hopkins, Knott, Knox, Laurel, Leslie, Letcher, Logan, Lyon, McCreary, Muhlenberg, Perry, Pulaski, Todd, Trigg and Whitley, the Class I price shall be increased by a location adjustment of 15 cents;

(2) For such milk that is physically received at plants located in the Kentucky counties of Ballard, Calloway, Carlisle, Fulton, Graves, Hickman, Livingstone, Marshall and McCracken and the Missouri counties of Mississippi, New Madrid, Pemiscot and Scot, the Class I price shall be increased by a location adjustment of 28 cents;

(3) For such milk that is physically received at plants located east of the Mississippi River and south of the northern boundary of Tennessee or the northern boundary of North Carolina, the Class I price shall be increased by a location adjustment of 41 cents;

(4) For such milk that is physically received at plants located in the marketing area or the state of Kentucky and outside the areas specified in paragraphs (1), (2), or (3) of this section, no location adjustment shall apply; and

(5) For such milk that is physically received at plants located outside the areas specified in paragraph (1), (2), (3), or (4) of this section, and 85 miles or more from the City Halls in Louisville and Lexington, Kentucky, and Evansville, Indiana, by the shortest hard-surfaced highway distance as determined by the market administrator, the Class I price shall be reduced by a location adjustment of 2.5 cents for each 10 miles or fraction thereof that such plant is from the City Hall in Louisville, Lexington or Evansville, whichever is nearest.

* * * * *

PART 1093—MILK IN THE ALABAMA-WEST FLORIDA MARKETING AREA

1. In § 1093.52, the table contained in paragraph (a)(i) is revised to read as follows:

§ 1093.52 Plant location adjustments to handlers.

(a) * * *

(1) * * *

Zone:	Adjustment per hundredweight,
1	Minus 23 cents.
2	No adjustment.
3	Plus 27 cents.
4	Plus 57 cents.
4a	Plus 30 cents.

* * * * *

2. In § 1093.52(a)(2), the provision "20" is revised to read "31".

3. In § 1093.52(a)(3), the provision "45" is revised to read "56".

4. In § 1093.52(a)(4), the provision "20 cents. Such minus adjustment shall be increased 1.5" is revised to read "23 cents. Such minus adjustment shall be increased 2.5".

5. In § 1093.52(a)(5), the provision "55" is revised to read "50".

PART 1094—MILK IN THE NEW ORLEANS-MISSISSIPPI MARKETING AREA

1. In § 1094.2, ZONE 3 and ZONE 4 are revised and zone 2A and zone 3A are added to read as follows:

§ 1094.2 New Orleans-Mississippi marketing area.

* * * * *

Zone 2A

Mississippi Counties

Amite, Covington, Forrest, Franklin, Greene, Jefferson Davis, Jones, Lamar, Lawrence, Lincoln, Marion, Perry, Pike, Walthal, Wayne, and Wilkinson.

Zone 3

Mississippi Counties

Adams, Claiborne, Clarke, Copiah, Hinds, Issaquena, Jasper, Jefferson, Kemper, Lauderdale, Leake, Madison, Neshoba, Newton, Rankin, Scott, Sharkey, Simpson, Smith, Warren, and Yazoo.

Zone 3A

Mississippi Counties

Attala, Holmes, Humphreys, Noxubee, Washington, and Winston.

Zone 4

Mississippi Counties

Bolivar, Carroll, Choctaw, Leflore, Lowndes, Montgomery, Oktibbeha, Sunflower, and Webster.

* * * * *

2. In § 1094.52(a)(1), the table is revised to read as follows:

§ 1094.52 Plant location adjustment for handlers.

(a) * * *

(1) * * *

Zone:	Adjustment per cwt.
1	No adjustment.
2	Minus 20 cents.
2A	Minus 40 cents.
3	Minus 50 cents.
3A	Minus 65 cents.
4	Minus 75 cents.
5	Minus 80 cents.
6	Minus 95 cents.

* * * * *

3. In § 1094.52(a)(2)(i), the provision "No adjustment" is revised to read "Minus 7 cents".

4. In § 1094.52(a)(2)(ii), the provision "19" is revised to read "30".

5. In § 1094.52(a)(2)(iii), the provision "38" is revised to read "57".

6. In § 1094.52(a)(3), the provision "65" is revised to read "95".

7. In § 1094.52(a)(5), the provision "1.5" is revised to read "2.5".

PART 1096—MILK IN THE GREATER LOUISIANA MARKETING AREA

1. In § 1096.52, paragraph (a) is revised to read as follows:

§ 1096.52 Plant location adjustments to handlers.

(a) For milk received at a plant from producers or a handler described in § 1096.9(c) and which is classified as Class I milk without movement in bulk form to a pool distributing plant at which a higher Class I price applies, the price computed pursuant to § 1096.50(a) shall be adjusted by an amount determined pursuant to paragraphs (a)(1) through (5) of this section for the location of such plant:

(1) For a plant located within one of the zones set forth in § 1096.2, the adjustment shall be as follows:

Zone:	Adjustment per hundredweight
I	No adjustment.
II	Plus 27 cents.
III	Plus 50 cents.

(2) For a plant located in any of the following Louisiana parishes, the adjustment shall be as follows:

(i) Plus 57 cents.

Jefferson, Lafourche, Orleans, Plaquemines, St. Bernard, St. Charles, Terrebonne.

(ii) Plus 37 cents.

St. Tammany, Tangipahoa, Washington.

3. For a plant located in any of the following Mississippi counties, the adjustment shall be as follows:

(i) Plus 37 cents.

George, Hancock, Harrison, Jackson, Pearl River, Stone.

(ii) Plus 17 cents.

Amite, Covington, Forrest, Franklin, Greene, Jefferson Davis, Jones, Lamar, Lawrence, Lincoln, Marion, Perry, Walthal, Wayne and Wilkinson.

(iii) Plus 7 cents.

Adams, Claiborne, Clarke, Copiah, Hinds, Issaquena, Jasper, Jefferson, Kemper, Lauderdale, Leake, Madison, Neshoba, Newton, Rankin, Scott, Sharkey, Simpson, Warren and Yazoo.

(4) For a plant located in any of the following Texas counties, the adjustment shall be as follows:

(i) Plus 54 cents.

Chambers, Hardin, Harris, Jefferson, Liberty, Orange.

(ii) Plus 37 cents.

Jasper, Newton, Polk, Tyler.

(iii) No adjustment.

Angelina, Cass, Harrison, Gregg, Marion, Nacogdoches, Panola, Rusk, Sabine, San Augustine, Shelby, Upshur.

(5) For a plant located outside of the areas described in paragraphs (a)(1) through (4) of this section and located more than 50 miles by the shortest hard-surfaced highway distance, as determined by the market administrator, from the nearer of the City Hall in Monroe or Shreveport, Louisiana, the adjustment shall be minus 2.2 cents per hundredweight for each 10 miles or fraction thereof.

* * * * *

PART 1098—MILK IN THE NASHVILLE, TENNESSEE, MARKETING AREA

1. In § 1098.52, paragraph (a) is revised to read as follows:

§ 1098.52 Plant location adjustments for handlers.

(a) For milk received from producers or from a handler described in § 1098.9(c) at a plant and which is classified as Class I milk subject to the limitations pursuant to paragraph (b) of this section, the Class I price shall be adjusted as follows:

(1) For such milk that is physically received at plants located in the Kentucky counties of Bell, Breathitt, Caldwell, Christian, Clay, Harlan, Hopkins, Knott, Knox, Laurel, Leslie, Letcher, Logan, Lyon, McCreary, Muhlenberg, Perry, Pulaski, Todd, Trigg, and Whitley, the Class I price shall be decreased by a location adjustment of 25 cents;

(2) For such milk that is physically received at plants located in the Kentucky counties of Ballard, Calloway, Carlisle, Fulton, Graves, Hickman, Livingstone, Marshall and McCracken and the Missouri counties of Mississippi, New Madrid, Pemiscot and Scot, the Class I price shall be decreased by a location adjustment of 13 cents;

(3) For such milk that is physically received at plants located outside the areas specified in paragraph (1) or (2) of this section and north of the northern boundary of Tennessee or the northern boundary of North Carolina and more than 50 miles from the State Capitol in Nashville by the shortest hard-surfaced highway distance as determined by the market administrator, the Class I price shall be reduced by 17.5 cents plus 2.5 cents for each 10 miles or fraction thereof that such plant is more than 70 miles from the State Capitol; and

(4) For such milk that is physically received at plants located east of the Mississippi River and south of the northern boundary of Tennessee or the northern boundary of North Carolina, no adjustment shall be made under this paragraph.

* * * * *

PART 1099—MILK IN THE PADUCAH, KENTUCKY, MARKETING AREA

1. In § 1099.52, paragraph (a) is revised to read as follows:

§ 1099.52 Plant location adjustments for handlers.

(a) For milk received from producers at a plant located outside the State of Kentucky and north of an east-west line running through the southern boundary

of the State of Kentucky and more than 40 miles by shortest highway distance as measured by the market administrator, from the nearest County Courthouse in any of the counties included in the marketing area and disposed of as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, the price computed pursuant to § 1099.50(a) shall be reduced by 12.5 cents, plus 2.5 cents for each 10 miles or fraction thereof that such distance exceeds 50 miles.

* * * * *

Tentative Interim Marketing Agreement Regulating the Handling of Milk in the Georgia and Certain Other Marketing Areas

The parties hereto, in order to effectuate the declared policy of the Act, and in accordance with the rules of practice and procedure effective thereunder (7 CFR Part 900), desire to enter into this marketing agreement and do hereby agree that the provisions referred to in paragraph I hereof as augmented by the provisions specified in paragraph II hereof, shall be and are the provisions of this marketing agreement as if set out in full herein.

I. The findings and determinations, order relative to handling, and the provision of §§ [1] to, all inclusive, of the order regulating the handling of milk in the said marketing area (7 CFR PART [2]) which is annexed hereto; and

II. The following provisions:

§ [3] *Record of milk handled and authorization to correct typographical errors.* (Seal)

(a) *Record of milk handled.* The undersigned certifies that he handled during the month of November 1985, [illegible] hundredweight of milk covered by this marketing agreement.

(b) *Authorization to correct typographical errors.* The undersigned hereby authorizes the Director, or Acting Director, Dairy Division, Agricultural Marketing Service, to correct any typographical errors which may have been made in this marketing agreement.

§ [3] *Effective date.* This marketing agreement shall become effective upon the execution of a counterpart hereof by the Secretary in accordance with Section 900.14(a) of the aforesaid rules of practice and procedure.

IN WITNESS WHEREOF, The contracting handlers, acting under the provisions of the Act, for the purposes and subject to the limitations herein contained and not otherwise, have hereunto set their respective hands and seals.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 1951

Loan and Grant Programs; Servicing and Collections

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its Community Facilities loan and grant servicing regulations to implement Pub. L. 99-88. This action is being taken to comply with Title I of Pub. L. 99-88 which gives certain FmHA Water and Waste Disposal (WWD) and Community Facility (CF) borrowers a choice of the interest rates on their loans. The law applies to WWD and CF loans closed or approved on or after November 12, 1983. The effect of this rule is to establish the procedures for FmHA to service those loans closed on or after November 12, 1983, in which the borrower requests a change of loan interest rate. This amendment also implements Pub. L. 99-198. Title XIII of Pub. L. 99-198 changes the criteria for determining what interest rate must apply to certain WWD and CF loans. This rule establishes procedures for FmHA to service those loans closed on or after December 23, 1985, and before March 25, 1986, wherein the interest rate in effect at the time of loan closing may be lower due to the provision of Pub. L. 99-198.

DATES: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Bonnie Justice, Loan Specialist, Community Facilities Division, (202) 382-1490, or William F. Hagy, Loan Specialist, Water and Waste Disposal Division, (202) 382-9636, Farmers Home Administration, USDA, South Building, 14th and Independence Avenue SW., Washington, DC 20250.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291, and has been determined to be "non-major" since the annual effect on the economy is less than $100 million and there will be no significant increase in cost or price for consumers, individual industries; Federal, State or Local Government agencies; or geographic regions. Furthermore, there will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This action is not expected to substantially affect budget outlay or to affect more than one agency or to be controversial. The net result is expected to provide better service to rural communities.

This program/activity is listed in the Catalog of Federal Domestic Assistance under Nos. 10.418 and 10.423 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and Local officials. (49 FR 22675, May 31, 1984; 50 FR 14088, April 10, 1985)

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91-190, an Environmental Impact Statement is not required.

The Office of Management and Budget's (OMB) clearance has been obtained for the reporting and recordkeeping requirement which this rule places on the public. This requirement stems from the borrower's notification, in writing, to FmHA that they request to change the interest rate on their loan(s) in accordance with Pub. L. 99-88 or wish to retain the original interest rate. The OMB approval number is 0575-0066.

This rule implements FmHA's servicing of loans and grants closed on or after November 12, 1983, when the borrower requests a change of interest rate. These loans and grants assist in financing the development costs of community facilities and domestic water and waste disposal systems to rural communities and other associations of farmers, ranchers, rural residents, and other rural users.

Pub. L. 99-88 requires that effective November 12, 1983, and thereafter, upon request of the borrower, the interest rate charged by FmHA to WWD and CF borrowers shall be the lower of the rates in effect at either the time of loan approval or loan closing and any FmHA grant funds associated with such loans shall be set in the amount based on the interest rate in effect at the time of loan approval. Until Pub. L. 99-88, WWD and CF borrowers did not have a choice of the interest rate of their loans. The

interest rate was established on the date of loan approval and the loan was closed at that rate.

Pub. L. 99–198 requires that the interest rate will not exceed 5 per centum per annum for loans that meet certain other requirements and where the median household income of the persons to be served by such facility is below the higher of 80 per centum of the statewide nonmetropolitan median household income or the poverty line established by the Office of Management and Budget, as revised under section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)). Pub. L. 99–198 further requires the interest rate not be in excess of 7 per centum per annum on loans for such facilities that do not qualify for the 5 per centum interest rate but are located in areas where the median household income of the persons to be served by the facility does not exceed 100 per centum of the statewide nonmetropolitan median household income. For those WWD and CF borrowers whose loan(s) was closed on or after December 23, 1985, and before March 25, 1986, the loan will be re-evaluated based upon the provisions of Pub. L. 99–198, and if the interest rate at time of loan closing would have been lower based upon the provisions of Pub. L. 99–198, the borrower will have a choice of interest rate, in accordance with Pub. L. 99–88. If the borrower requests the lower rate, FmHA will administratively accomplish the resulting change of interest rate.

FmHA adds a provision to Subpart E of Part 1951 to service loans closed on or After November 12, 1985, to allow borrowers to request that their interest rate be changed and to administratively accomplish the resulting change in interest rate for WWD and CF loans. This action will bring existing FmHA Community Facility servicing regulations into compliance with Pub. L. 99–88 and Pub. L. 99–198.

FmHA amends Subpart E of Part 1951 by adding § 1951.221 to auhorize that, upon request of the borrower, FmHA will change the interest rate on a closed WWD or CF loan.

On March 3, 1986, a proposed rule was published in the Federal Register (51 FR 7282) for a 30-day review and comment period. Following is a summary of the comments received from the public review process and FmHA's responses.

a. Two comments were received concerning the use of the date of November 12, 1985, for offering borrowers, with loans closed on or after that date, a choice of interest rate of the lower of the rates in effect at either the time of loan approval or loan closing. Commentors felt that the provision should be effective October 1, 1985, or October 1, 1981, and the law should be changed accordingly. The date of November 12, 1985, remains in the final rule because this is the date set forth in Pub. L. 99–88 and unless legislation amends this date, FmHA has no authority to use another date.

b. One comment was received suggesting that there must be a legally binding instrument to evidence the change in interest rate and the instrument should be affixed to the bond. When FmHA administratively changes the interest rate for a loan, a copy of the borrower's letter to FmHA, signed by a duly authorized official requesting the interest rate change, will be attached to the debt instrument. The borrower is responsible to assure that the borrower official executing the letter is duly authorized and any action(s) necessary for this authorization has been taken as required. Any costs associated with a change in interest rate will be the responsibility of the borrower. FmHA has added a provision to § 1951.211(b) to clarify this borrower responsibility. FmHA has determined that no change to the debt instrument is necessary to accomplish the change of interest rate.

c. One comment was received suggesting that formal action should be taken so that the borrower will be assured that the lower interest change would be continued and suggested that the borrower adopt an amending ordinance modifying the interest rate and stamp a brief legend on the face of each bond so that any potential subsequent bondholder will be apprised of the reduced rate should FmHA sell the bonds at a future date. FmHA has determined that attaching the borrower's request, signed by an authorized borrower official, for an interest rate change to the bond instrument is sufficient to proceed with the administrative change of interest rate and would notify any interested third party of the change. The borrower is responsible to assure that any action(s) necessary for this authorization has been taken as required.

d. Several comments were received concerning FmHA administratively changing the interest rate but not reducing the loan installment payments for amortized accounts. One commentor stated that if FmHA can administratively change the interest rate in a borrower's account, the installment schedule could also be changed. Several commentors indicated that not reducing the payment installment amounts for amortized accounts penalizes those borrowers; that even though the loan is repaid earlier by not reducing the installment amount, lower payments are needed to reduce user rates so that present users could benefit from the lower interest rate through reduced user rates, rather than future users benefiting after the loan is repaid. Loan installment schedules are specifically set forth in debt instruments for loans with amortized accounts, therefore FmHA cannot administratively change that installment schedule. A new or amended debt instrument would be necessary and would, in most instances, result in costs to the borrower. FmHA determines, at the time of loan approval, that a project is economically feasible and the user rates are reasonable compared to other similar systems in the project area. A provision is included in § 1951.207 (f) of this Subpart for reamortization of a loan account if a borrower needs a reduced installment to provide for a sound operation.

e. Several commentors indicated that loan reamortization is expensive due to legal costs associated with a new or replacement debt instrument. FmHA has determined that changing the interest rate administratively will not place this burden of expense upon the borrowers.

FmHA has made changes to § 1951.221 (a) to implement Pub. L. 99–198 for loans closed on or after December 23, 1985 and before March 25, 1986, and added an Exhibit E, "Interest Rate Requirements and Effective Dates" for use by FmHA personnel to determine loan closing interest rates. This Exhibit will be available to the public, upon request, at any FmHA office. FmHA also changed § 1951.221 (b)(2) to clarify the requirement for the borrower response to FmHA within a 90 calendar day period. In addition, § 1951.250 is added to show OMB control number.

List of Subjects in 7 CFR Part 1951

Account servicing, Grant programs—Housing and community development, Loan programs—Housing and community development, Reporting requirements, Rural areas.

Therefore, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1951—SERVICING AND COLLECTIONS

1. The authority citation for Part 1951 continues to read as follows:

Authority: 7 USC 1989; 42 USC 1480; 5 USC 301; 7 CFR 2.23; 7 CFR 2.70

Subpart E—Servicing of Community Program Loans and Grants

2. Section 1951.221 is added and reads as follows:

§ 1951.221 Special provision for interest rate change.

(a) *General.* Pub. L. 99–88 provides that effective November 12, 1985, and thereafter, upon request of the borrower, the interest rate charged by FmHA to water and waste disposal and community facility borrowers shall be the lower of the rates in effect at either the time of loan approval or loan closing and any FmHA grant funds associated wih such loans shall be set in the amount based on the interest rate in effect at the time of loan approval. Loans closed November 12, 1985, through October 25, 1985, were closed at the interest rate in effect at the time of loan approval and that interest rate is reflected in the borrower's debt instrument. For community facility and water and waste disposal loans closed on or after November 12, 1985, and for which the interest rate in effect at the time of loan closing is lower than the interest rate in effect at the time of loan approval, the borrower may request to be charged the lower interest rate. The loan closing interest rate will be determined by FmHA based upon interest rate requirements in effect at the date of loan closing. Exhibit E of this subpart (available in any FmHA office) contains a summary of the interest rate requirements for specific time periods. Exhibit C, of Subpart O of this part will be used to determine the interest rate and effective dates by category of poverty, intermediate and market rates. Loans closed on or after December 23, 1985, and before March 25, 1986, wherein a borrower has received a choice of interest rate under the provisions of Pub. L. 99–88, shall be re-evaluated, utilizing Exhibit E and the changes in qualifying income levels provided in Pub. L. 99–198. If the re-evaluation results in a loan closing interest rate lower than that previously offered the borrower, the borrower will be provided a second choice of interest rate. This second choice of interest rate will be in accordance with this section. Loans meeting the criteria of this section that have been paid in full are eligible for the borrower to request the lower interest rate. For loan(s) that involved multiple advances of FmHA funds using temporary debt instruments, wherein the borrower requests the interest rate in effect at loan closing, the interest rate charged shall be the rate in effect on the date when the first temporary debt instrument was issued.

(b) *Notification to borrower and borrower selection of interest rate.* (1) FmHA servicing officials will notify each borrower meeting the provisions of this section of the availability of a choice of interest rate. The notification will be made in writing at the earliest possible date and sent by certified mail, return receipt requested. Borrowers will be advised at the time of notification that if a change of interest rate is requested, the change will be accomplished administratively by FmHA. The effect of the change on the loan account will also be fully explained to the borrower.

(2) Borrowers should notify FmHA within 90 calendar days of the date of FmHA notification indicating the borrower's election to retain the interest rate in effect at loan approval or to change the interest rate to the rate in effect at the time of loan closing. If the borrower does not respond within the 90 day period, FmHA will not consider a borrower's future request for a lower interest rate under the provisions of this subpart.

(3) The borrower is responsible to assure that the borrower official executing the letter requesting the change of interest rate is duly authorized and any action(s) necessary for this authorization have been taken as required. Any costs associated with a change of interest rate will be the responsibility of the borrower.

(c) *Processing loan interest rate change.* The State Director is authorized to approve loan interest changes which meet the requirements of this section. Loan interest rate changes will be accomplished as follows:

(1) All loan payments already made to the loan account(s) will be reversed and reapplied, by FmHA, utilizing the changed interest rate. The balance of loan payments after the completion of the reversal and reapplication procedures will be applied to any delinquency on the account and the balance applied to principal.

(2) For paid-in-full accounts which meet the criteria of § 1951.221(a) of this subpart, the balance of loan payments after completion of the reversal and reapplication procedures will be returned to the paid-in-full borrower as a refund unless the borrower is delinquent on another FmHA loan of the same type, in which case the refund will be applied first to the delinquent account and any balance refunded to the borrower.

(3) The Finance Office will administratively change the interest rate on a borrower's account in accordance with the notification from the FmHA servicing official. The installment schedule as set forth in each borrower's debt instrument will not change. The original principal schedule for principal-plus-interest accounts where principal *only* is stipulated will continue to be used for payment calculated by the Finance Office. Amortized accounts will adhere to the original payment schedule and amount.

(4) A borrower with an amortized account, who has requested a change of interest in accordance with this subpart and FmHA has accomplished this change by an administrative adjustment to the loan account, yet a reduction in installment amounts is needed to provide for a sound operation, may request FmHA to consider a reamortization of the account in accordance with § 1951.207(f) of this subpart.

3. Section 1951.250 is added and reads as follows:

§ 1951.250 OMB control number.

Collection of information requirements contained in this subpart have been approved by the Office of Management and Budget and have been assigned OMB control number 0575–0066.

Dated: May 9, 1986.

Vance L. Clark,

Administrator, Farmers Home Administration.

BILLING CODE 3410–07–M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 385 and 399

[Docket No. 60478–6079]

Foreign Policy Controls; Export of Certain Chemicals to Syria

AGENCY: Office of Technology and Policy Analysis Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Department of Commerce, in consultation with the Department of State, is imposing foreign policy controls on the export to Syria of certain chemicals:

Potassium fluoride
Dimethyl methylphosphonate
Methyl phosphonyl difluoride
Thiodiglycol
Dimethylamine
Phosphorus oxychloride
Dimethylamine hydrochloride

Ethylene chlorohydrin (chloroethanol).

A validated license is now required to export any of these chemicals to Syria. This rule is in accordance with U.S. foreign policy, particularly the U.S. policy of opposing the prohibited use of chemical weapons and possible diversion of chemicals for prohibited use, maintaining neutrality in the Iran/Iraq war, and promoting a mediated end to that war.

This rule is issued in consultation with the Department of State and in compliance with all requirements and conditions in Section 6 of the Export Administration Act of 1979, as amended. The report required by section 6 of the Export Administration Act was submitted to the Congress on April 28, 1986.

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: David Schlechty, Country Policy, Export Administration, Telephone: (202) 377-4252.

SUPPLEMENTARY INFORMATION: 1. Because this rule concerns a foreign affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary of final Regulatory Impact Analysis has to be or will be prepared.

2. This rule contains a collection of information requirement under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Applicants for the validated export license required by this rule must complete and submit Form ITA-622P. This collection of information requirement has been approved by the Office of Management and Budget under control number 0625-0001.

3. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Comments should be submitted to Betty Ferrell, Office of Technology and Policy Analysis, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

4. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and § 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

Communist countries, exports.

15 CFR Part 399:

Exports.

PART 385—[AMENDED]

Accordingly, the Export Administration Regulations (15 CFR Part 368–399) are amended as follows:

1. The authority citation for Parts 385 is revised to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503, 50 U.S.C. App. 2401 *et seq.*, as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985; Pub. L. 95-223, 50 U.S.C. 1701 *et seq.*, E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

§ 385.4 [Amended]

2. Paragraph (e) of § 385.4 is amended as follows:

In the first sentence, the phrase "to Iran and Iraq" is revised to read "to Iran, Iraq and Syria";

After the third sentence, a new sentence is inserted, reading: "However, applications for Syria will be approved when the export is in performance of a contract or agreement entered into before April 28, 1986."; and

In the last sentence, the phrase "to Iran or Iraq" is revised to read "to Iran, Iraq or Syria".

PART 399—[AMENDED]

3. The authority citation for Part 399 continues to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503, 50 U.S.C. App. 2401 *et seq.*, as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95-223, 50 U.S.C. 1701 *et seq.*; E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

§ 399.1 [Amended]

4. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 7 (Chemicals, Metalloids, Petroleum Products and Related Materials), the following amendments are made:

The phrase "to Iran and Iraq" is revised to read "to Iran, Iraq and Syria" in the *Validated License Required* paragraph of ECCN 5799D;

The phrase "to Iraq and Iran" is revised to read "to Iran, Iraq and Syria" in the *Reason for Control* paragraph of ECCN 5799D; and

The phrase "to Iran and Iraq" is revised to read "to Iran, Iraq and Syria" in the *Validated License Required* paragraph of ECCN 6799C.

Dated: May 30, 1986.

Walter J. Olson,

Deputy Assistant Secretary for Export Administration.

15 CFR Parts 385 and 399

[Docket No. 60476-6076]

Exports of Helicopters; Expansion of Foreign Policy Controls

AGENCY: Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: Export Administration maintains foreign policy controls on exports of certain items to countries that have repeatedly provided support for acts of international terrorism. These countries are Cuba, Iran, Libya, People's Democratic Republic of Yemen, and Syria. Items controlled include crime control and detection equipment, military vehicles and items specially designed to produce certain military equipment, and other commodities specified in Part 385 of the Export Administration Regulations. This rule subjects all helicopters, regardless of weight, to antiterrorism controls if destined for any of the above mentioned countries.

This rule is issued in consultation with the Department of State and in compliance with all requirements and conditions contained in Section 6 of the Export Administration Act of 1979, as amended.

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: David Schlechty, Country Policy, Export Administration, Telephone: (202) 377-4252.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the

United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, like other Department of Commerce rules, comments from the public are always welcome. Comments should be submitted to Betty Ferrell, Office of Technology and Policy Analysis, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule does not contain a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects

15 CFR Part 385

Communist countries, Exports.

15 CFR Part 399

Exports, Reporting and recordkeeping requirements.

PARTS 385 AND 399—[AMENDED]

Accordingly, Parts 385 and 399 of the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

1. The authority citation for Parts 385 and 399 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. App. 2401 *et seq.*, as amended by Pub. L. 97–145 of December 29, 1981 and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 99–223, 50 U.S.C. 1701 *et seq.*, E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

§ 385.4 [Amended]

2. Section 385.4(d)(2) is amended by removing from the first sentence the words "over 10,000 pounds empty weight" and by inserting a second-to-last sentence in (d)(2), reading "Licenses and authorizations for helicopters 10,000 pounds empty weight or less will be approved when the export is in performance of a contract or agreement entered into before April 28, 1986, but subject to applicable national security or other applicable controls."

§ 399.1 [Amended]

3. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 4 (Transportation Equipment), ECCN 1460A is amended by removing paragraph "1." under *Special Foreign Policy Controls* and redesignating paragraphs "2." and "3." as "1." and "2." and revising them to read as follows:

1460A Nonmilitary aircraft and helicopters, aero-engines, and aircraft and helicopter equipment.

* * * * *

Special Foreign Policy Controls: 1. For commodities defined in paragraph (a) of the List below, foreign policy controls apply to Libya, Iran, the Republic of South Africa, and Namibia for both aircraft and helicopters regardless of value; and to Syria and the People's Democratic Republic of Yemen for fixed-wing aircraft valued at $3,000,000 or more and for all helicopters (except aircraft and helicopters for use by regularly scheduled airlines, subject to certain assurances—see § 385.4(d)2)).

2. For commodities defined in paragraphs (b), (c), and (d) of the List below, foreign policy controls apply only to Libya and Iran.

* * * * *

4. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 4 (Transportation Equipment), ECCN 5460F is amended by adding the words "and all other helicopters" to the end of the heading and by adding the words "and helicopters" after the phrase "$3,000,000 each or more" in the *Special Foreign Policy Controls* paragraph.

5. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 4 (Transportation Equipment), ECCN 6460F is amended by removing the words "and helicopters" from the heading and from the List of Aircraft and Helicopters Controlled by ECCN 6460F; by removing the comma and the word "helicopters" after the word "aircraft" in the *Unit* paragraph; by removing the words "(including helicopters)" from the *Special Foreign Policy Controls* paragraph; and by removing the words "helicopters and" from paragraph (b) under the List of Aircraft and Helicopters Controlled by ECCN 6460F.

Dated: May 30, 1986.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Before Federal Trade Commission

[Docket No. 8641]

Order Reopening the Proceeding and Modifying Cease and Desist Order

Commissioners: Daniel Oliver, Chairman, Patricia P. Bailey, Terry Calvani, Mary L. Azcuenaga, Andrew J. Strenio, Jr.

In the Matter of American Home Products Corporation.

On January 21, 1986, American Home Products Corporation (Petitioner) filed a petition pursuant to Rule 2.51 of the Commission's Rules of Practice, 16 CFR 2.51, and Paragraph III of the order in question to reopen the proceeding and modify the final cease and desist order entered against it by the Commission on June 9, 1970, in Docket No. 8841 (77 F.T.C. 726).

The final order in this matter was the product of extended litigation concerning therapeutic advertising claims for Preparation H Ointment or Suppositories. The order effectively proscribes all therapeutic advertising claims for Preparation H Ointment or Suppositories, or any other non-prescription drug product for the treatment or relief of hemorrhoids or any of its symptoms, except for three specifically enumerated claims. The three claims permitted under the order are (1) that the use of the product will help reduce swelling of hemorrhoidal tissue caused by edema, infection, or inflammation; (2) that the use of the product will help reduce swelling of hemorrhoidal tissue by lubricating the affected area; and (3) that use of the product will afford temporary relief of pain and itching of hemorrhoidal tissue in many cases. The order concludes with a proviso (Part III) that if the Food and Drug Administration (FDA) should approve for such products any other claims as permissible in labeling, respondent may petition for a modification of the order on that ground.

Subsequently, the Food and Drug Administration (FDA) undertook a comprehensive review of the safety and effectiveness of over-the-counter (OTC) drug products under the "Drug Amendments of 1962" to the "Federal Food, Drug and Cosmetic Act." As part of this review, the FDA appointed panels of independent experts in medicine and pharmacology to review the available literature and data and evaluate the safety and effectiveness of ingredients used in OTC products. After completing their evaluations the panels reported their findings and conclusions concerning the classes of OTC products evaluated and recommended appropriate labeling claims for each of the classes of OTC products reviewed. The labeling recommendations are incorporated into proposed monographs which, after a three step procedure designed to determine appropriate revisions, if any, will be promulgated as final monographs or rules which will govern the labeling claims of OTC products. One such panel reviewed and evaluated OTC hemorrhoidal (anorectal) drug ingredients. Its findings and conclusions and recommendations and a proposed monograph for OTC anorectal drugs were published in the Federal Register on May 27, 1980. (45 FR 35575.)

It is this proposed monograph that forms the basis for Petitioner's requested modification. Under this proposed monograph OTC anorectal drug ingredients are classified into several groups on the basis of their pharmacologic action, such as local anesthetics, vasoconstrictors, protectants, and counterirritants. An OTC anorectal drug can be classified as a protectant if, for example, it contains cocoa butter 50 percent or greater per dosage unit or it contains white petrolatum USP 50 percent or greater per dosage unit. An OTC anorectal drug meeting these percentage requirements would be entitled under the proposed monograph to be labeled with certain specific protectant claims.

Petitioner claims that Preparation H Ointment contains 72.8% petrolatum and that Preparation H Suppositories contains 79.5% cocoa butter thereby qualifying those products as protectants under the proposed monograph. As a consequence, Petitioner argues that it should be entitled to make as labeling claims those claims permitted by the FDA under the proposed monograph. However, the Commission's final order prohibits the use of a number of these claims and Petitioner asserts this prohibition places it at a competitive disadvantage with OTC anorectal protectant drug products marketed by others. As a consequence, Petitioner has requested that the final order be modified to allow it to make all advertising claims it is allowed by the proposed monograph to use in its labeling for Preparation H Ointment or Suppositories.

We agree. In prior decisions, we have held that proposed FDA monographs may be relied on as a reasonable basis for performance claims. *AHC Pharmacal, Inc.*, 101 F.T.C. 40, 43 (1983); *Thompson Medical Co., Inc.*, 104 F.T.C. 648, 826 (1984); *Chesebrough-Pond's Inc.*, Docket No. C-602 (November 25, 1985). Such relief is particularly appropriate where, as here, the advertising claims would be dependent on their acceptability as labeling claims. Based on the foregoing, we conclude that Petitioner has made the requisite showing for a reopening of the proceeding and a modification of the order under Rule 2.51 and Paragraph III of the final order. Respondent has asked that Part III of the order be modified to make clear that it may make claims in advertising that the FDA has allowed in labeling.

It is therefore ordered that the proceeding as hereby reopened and that Paragraph III of the final order issued June 9, 1970, in Docket No. 8841 be, and it hereby is modified to read as follows:

"III. This Order is not intended to nor does it prohibit respondent from making any representations for non-prescription drug preparations for the treatment or relief of hemorrhoids or any of their symptoms which the Food and Drug Administration has determined, in the course of its over-the-counter drug review, relate to conditions for which the drug preparation is generally recognized as safe and effective and not misbranded. In the event that respondent at any time in the future markets any non-prescription drug preparation for the treatment of relief of hemorrhoids or any of its symptoms for which it desires to make any of the representations now prohibited under Paragraph I of the order, it may petition the Commission for a modification of the order. Such petition shall be accompanied by a showing that the representation is not false or misleading within the meaning of the Federal Trade Commission Act."

By the Commission. Commissioners Oliver and Strenio did not participate.

Issued: May 22, 1986.

Emily H. Rock,

Secretary.

RAILROAD RETIREMENT BOARD

20 CFR Part 295

Regulations Under Title VII of the Regional Rail Reorganization Act

AGENCY: Railroad Retirement Board.

ACTION: Final rule.

SUMMARY: The Railroad Retirement Board amends its regulations pertaining to reviews and appeals of initial determinations under the benefit schedules promulgated by the Secretary of Labor pursuant to section 701 of the Regional Rail Reorganization Act. The benefit schedules are administered by the Board.

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Arthur A. Arfa, Assistant Director of Hearings and Appeals, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611, (312) 751-4793 (FTS 387-4793).

SUPPLEMENTARY INFORMATION: Section 295 of the Board's rules provided for certain time limits during which a claimant who wished to appeal an initial adverse determination might file such an appeal. The regulations were not precise as to when the time period

began to run since they used the phrase, "communicated" to the claimant as the start of the appeal time period. The use of that phrase makes it unclear whether the appeal period starts on the date the notice of the decision is sent to the claimant or when it is received by the claimant. The amendment to the regulation clarifies that the appeal period begins to run from the date the notice is mailed.

The Board has determined that this is not a major rule under Executive Order 12291. Therefore, no regulatory analysis is required. There are no information collections associated with this rule.

A notice of proposed rulemaking was published in the Federal Register on February 24, 1986 (51 FR 6422). No comments were received from the public.

List of Subjects in 20 CFR Part 395

Employee benefit plans, Employee protection benefits, Railroad employees, Railroad Retirement.

PART 395—[AMENDED]

Title 20 CFR Part 395 is amended as follows:

1. The authority citation for Part 395 is revised to read:

Authority: 45 U.S.C. 362(1); 45 U.S.C. 797.

§ 395.9 [Amended]

2. Section 395.9 is amended by adding at the end of paragraphs (c)(1) and (d)(1) the following new sentence which reads as follows: Notice shall be deemed to have been communicated to the claimant when it is mailed to the claimant at the latest address furnished by him or her.

Dated: May 28, 1986.
By Authority of the Board.

Beatrice Eaerski,

Secretary to the Board.

Food and Drug Administration

21 CFR Part 740

[Docket No. 78N-0486]

Cosmetic Product Warning Statements: Establishment of Effective Date for Label Caution Requirement on Children's Foaming Detergent Bath Products; Response to Comments

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration [FDA] is announcing that it has completed its reconsideration of 21 CFR 740.17, a regulation that would require that directions for safe use and a caution statement appear on the label of foaming detergent bath products. The agency announced its intention to reconsider this regulation in the Federal Register of February 13, 1985 (48 FR 7203). Upon reconsideration, FDA has decided to take the following actions: (1) FDA is denying the petitions of the Cosmetic, Toiletry and Fragrance Association, Inc. (CTFA), and of the Independent Cosmetic Manufacturers and Distributors (ICMD) to revoke the regulation for children's foaming detergent bath products or any such product whose label does not make clear that it is intended for use exclusively by adults. (2) FDA is granting these petitions to revoke the regulation for those products whose labels make clear that they are intended for use exclusively by adults. (3) FDA is establishing a new effective date for the regulation except with respect to those products whose label makes clear that they are intended for use exclusively by adults.

DATES: Effective June 5, 1987. All foaming detergent bath products except those intended for use exclusively by adults that are initially introduced or initially delivered for introduction into interstate commerce on or after June 5, 1987, shall comply with this regulation. FDA is continuing the interim stay of the effective date of 21 CFR 740.17 until June 5, 1987.

FOR FURTHER INFORMATION CONTACT: Heinz J. Eiermann, Center for Food Safety and Applied Nutrition (HFF-440), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1530.

SUPPLEMENTARY INFORMATION: In the Federal Register of August 19, 1980 (45 FR 55172), FDA published a final regulation (21 CFR 740.17) that requires that labels of foaming detergent bath products bear a prescribed caution statement and provide adequate directions for safe use. The statement cautions that excessive use of, or prolonged exposure to, foaming detergent bath products may cause irritation to the skin and the urinary tract. It urges consumers to discontinue use of such products if rash, redness, or itching occurs and to consult a physician if irritation persists.

Foaming detergent bath products are commonly identified and recognized by consumers as "bubble baths" or "foaming bath oils." These products are also known by other names such as "foaming bath," "milk foam bath," and "foaming bath powder." To avoid any confusion as to which products are subject to this regulation, FDA has adopted the general term "foaming detergent bath product" for these types of products. FDA has modified § 740.17 to reflect this new terminology.

Section 740.17 was to have gone into effect on August 18, 1981. However, on June 1, 1981, the agency issued a press release announcing its intention to stay this regulation. On February 18, 1983, FDA announced an interim stay of the effective date of the regulation (48 FR 7169).

In addition to issuing the interim stay, FDA proposed to stay the effective date of the regulation while it reconsidered the labeling requirement (48 FR 7203). The agency stated that it was still concerned about the adverse effects of foaming detergent bath products on children when not properly used, but that the petitions of CTFA and ICMD to revoke the labeling requirement had raised issues that merited a full review of the regulation.

In the February 18, 1983 notice of proposed stay, FDA invited interested persons to submit comments, data, or other information on how consumers could be informed of the risks associated with the use of foaming detergent bath products and effectively protected from irritation to the skin and urinary tract that might result from the misuse of these products. The agency asked that comments specifically address the following questions:

1. How may consumers be informed of the risks associated with the use of foaming detergent bath products other than by means of a required label caution statement and directions for safe use?

2. Did the reported adverse reactions associated with foaming detergent bath products marketed for adult use occur predominantly in adults or children?

3. Would a revised regulation applicable only to products intended for use by children provide adequate consumer protection taking into account the possibility of use (or misuse) of adult products as children's products?

4. What costs would be associated with the caution labeling requirements of § 740.17 or the alternatives suggested in comments?

FDA received 17 comments during the comment period on the proposal. Four comments were from consumers, three were from physicians, one was from a consumer organization, two were from cosmetic trade associations, and seven were from cosmetic manufacturers. Six comments were in favor of a caution labeling requirement, one comment recommended that cosmetic foaming

BEST COPY AVAILABLE

detergent bath products be banned, and 10 comments were against the regulation. None of the comments suggested alternatives to requiring caution labeling, and none responded in a substantive manner to the questions about the risks of foaming detergent bath products to adults or about whether revised regulations would adequately protect children from use of adults' products. Three comments gave estimates of the costs to manufacturers of implementing the caution labeling as required by § 740.17.

FDA has now completed its review of the regulation, as well as of the petitions and of the comments that it received on the proposal to stay the regulation. Based on this review, the agency finds that there is a continuing cognizable risk for children from improper use of foaming detergent bath products. The agency has therefore decided to deny the petitions to revoke the caution labeling regulation except for products whose labels make clear that they are intended for use exclusively by adults.

FDA considers all products not labeled as intended for use exclusively by adults to be intended for use by children. Label statements that would identify products as being intended for use exclusively by adults would include: "Keep out of reach of children" and "For adult use only."

An explanation for the agency's decision on children's foaming detergent bath products, a description of the points made in the petitions and in the comments on the petitions, and the agency's responses to these points follow.

I. The Petitions and Comments Do Not Provide a Basis for Revoking the Rule

A. Need for the Regulation

1. The petitions and a number of the comments (FDA will hereinafter refer to the petitions and the comments on those petitions collectively as "the comments") restated arguments that FDA had discussed in the preamble to the final rule published in the **Federal Register** of August 19, 1980 (45 FR 55172–55173). The comments asserted that the number of injury complaints cited by FDA was not large enough, and that the reported injuries were not serious enough, to demonstrate a hazard warranting a label warning. These comments also stated that the annual numbers of reported adverse reactions had been decreasing since 1973. Two comments claimed that the risk of injury from use of foaming detergent bath products is insignificant. In support of this claim, these comments cited the July 1, 1977, to June 30, 1978, statistics on cosmetic injuries reported by hospital emergency rooms into the National Electronic Injury Surveillance System (NEISS) of the Consumer Product Safety Commission. Two manufacturers of foaming detergent bath products submitted their animal testing data as evidence of the safety of these products.

FDA disagrees with the argument that the consumer injury data do not demonstrate a hazard warranting a caution statement and directions for safe use on labels of foaming detergent bath products. The information presented in the preambles of the proposed and final regulations fully documented the need for these requirements.

There was a decrease during the mid-70's in the recorded number of complaints from consumers about foaming detergent bath products because of a change in complaint forwarding policy by district offices. FDA explained in the preambles to both the proposal (42 FR 5368) and the final rule (45 FR 55172) that the reason for the significantly higher number of complaints before 1973 was the press and radio solicitation by the Federal Trade Commission of reports of adverse reactions from consumers. The fact that a large producer of these products voluntarily added a caution statement to the label of its foaming detergent bath products in 1974 may also have contributed to the decline in consumer complaints. The decrease in complaints that occurred between 1975 and 1978 has not continued. The rate of these complaints in relation to the total numbers of complaints recorded annually has averaged 1.98 percent (standard deviation of 0.75 percent) since 1975. The adverse reaction data submitted to FDA by cosmetic manufacturers as part of the voluntary registration program show averages of 1.22 (standard deviation of 0.57) adverse reactions per million units distributed for the years 1974 to 1976 and 1.66 (standard deviation of 0.51) for the years 1982 through 1984.

The seriousness of the adverse reactions is reflected in part in the relatively high percentage of injuries reported that required medical attention. For the years 1979 through 1984, an average of 43.8 percent of the injuries associated with foaming detergent bath products that were reported under the voluntary industry reporting program required medical treatment, whereas the average for all product categories for the same time period was 17.9 percent (standard deviation of 11.3 percent). After feminine deodorant products (55.6 percent) and fragrance sachets (45.4 percent), both of which have low numbers of experiences reported, which may produce distortion, "bubble bath products" is the product category with the highest rate of injuries requiring medical attention. Additionally, of the 234 consumer complaints received by FDA associated with foaming detergent bath products between 1970 and 1984, 38 percent concerned urogenital disorders.

The NEISS data of July 1, 1977, to June 30, 1978, which were submitted by two comments in support of the argument that foaming detergent bath products do not present a health risk that requires caution labeling, usually reflect acute toxic manifestations, resulting from accidental product misuse, that are treated at the reporting hospital emergency rooms. As discussed in the **Federal Register** notices during the rulemaking, the injuries associated with foaming detergent bath products are not likely to result from just one exposure to this type of product, and consumers are not expected to seek treatment at an emergency room for a gradually worsening skin rash or urogenital irritation.

Equally inapplicable are the animal testing data for eye or skin irritation submitted by two manufacturers of foaming detergent bath products. The tests from which these data were obtained are typical for assessing the safety of detergent-containing products before conducting human studies. However, the data from these tests have no relevance to this proceeding because they are not indicative of the adverse reactions that may occur in consumers under the conditions of misuse that the caution labeling regulation is intended to address.

2. Of the three physicians who commented on the proposed stay of the effective date of the foaming detergent bath labeling regulation, two reported treating numerous cases of urogenital irritation or infection that were associated with foaming detergent bath products. Both of these physicians were pediatricians. One recommended that foaming detergent bath products be banned, and the other favored caution labeling. The third comment, from a physician principally involved in consumer product safety evaluation, described several cases of skin and urogenital irritation that occurred during the testing of foaming detergent bath products but expressed the opinion that the warning was not justified.

FDA has carefully considered the views of each of these three physicians along with other available information and concludes that, on balance, the medical opinions that have been submitted to the agency support the

need for the regulation. The medical observations reported by the two pediatricians complement those reported by the five physicians who commented on the proposed rule (see 45 FR 55172). Accordingly, seven of the nine physicians who have commented have supported the agency's finding that foaming detergent bath products can cause adverse reactions, particularly when misused. The caution statement and directions for safe use are justified as a means of preventing that misuse.

3. Two comments stated that the requirement of a caution statement and directions for safe use will undermine the impact of warnings on products that present serious risks, destroy the incentive to develop the least irritating product, and encourage use of noncosmetic substitute products, such as household detergents, in baths. Other comments asserted that manufacturers had cooperated with FDA to reduce the possibility of adverse reactions by reformulating products and voluntarily including caution language in labeling about the consequences of misuse. These comments claimed that the regulation threrefore was unnecessary.

Neither of these comments provides any evidence to support the predictions that they make. The need for both caution labeling and directions for safe use to prevent misuse and serious injury is fully documented in the record of this proceeding. The agency is not aware of any data that indicate that cosmetic manufacturers would stop striving to market the safest product possible, or that consumers would substitute household detergents for cosmetic foaming detergent bath products, if the agency puts this regulation into effect.

The agency reviewed all cosmetic foaming detergent bath product formulations voluntarily registered with FDA under 21 CFR Part 710 during the past 10 years. Of the formulation changes registered with FDA, few involved foaming agents. Furthermore, FDA is aware of only one cosmetic manufacturer that has voluntarily included caution language in the labels of its foaming detergent bath products. That manufacturer informed FDA that it also made several formulation changes in its products, including elimination of alkylarylsulfonate, in an effort to reduce those products' potential for irritating the skin.

4. One comment argued that the regulation is a burdensome and unnecessary rule that conflicts with the regulatory policy of Executive Order 12291.

FDA has carefully considered this comment. As the agency's responses in this document make clear, there is a need to caution users of foaming detergent bath products that injuries to children may result from the misuse of those products. Moreover, as explained in the discussion that follows, the costs of this regulation are low and therefore not burdensome. Nonetheless, to ensure that the obligations imposed by this regulation are no greater than necessary to protect children, FDA is not requiring the caution on those products whose labels make clear that they are intended for use exclusively by adults.

B. Labeling Costs

5. Four comments addressed the issue of the costs to cosmetic manufacturers of complying with the requirements of § 740.17. One manufacturer of foaming detergent bath products reported a cost of $35 per label for new silk screens and, because of the many brands involved, a total cost to the firm of $50,000 to $55,000. The manufacturer of a line of children's foaming detergent bath products estimated the total cost for its various label changes to be almost $50,000. A comment from a trade organization stated that the cost of compliance with the regulation will be about $10,000 for an existing product and $12,000 to $15,000 for a new product. This comment also argued that small firms would probably incur greater absolute, as well as comparative, costs than large firms because large firms would benefit from economies of scale. A trade organization reporting information obtained from two of its member firms stated that one firm estimated the cost to be between $50,000 and $55,000. The other firm estimated the cost to be in excess of $250,000.

FDA has conducted an independent study of the expected costs of compliance and has concluded that the total cost to industry will be approximately $300,000. This total includes the cost of changes in artwork, the expense of preparing new film representations for printing plates, and administrative costs for each producer of foaming detergent bath products. The agency has not, however, considered decreased revenues for producers of foaming detergent bath products as a cost. FDA concludes that any reduction in use of foaming detergent bath products that occurs will be toward safe levels, so that decreases in revenues cannot be counted as a true economic cost. Details of the FDA study can be found in the "Threshold Assessment for the Modification and Withdrawal of Stay of the Foaming Detergent Bath Products Caution Statement Regulation," which is on file with the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

Based upon the FDA study of compliance costs, and on the study of the costs of a one-time label change done by A.D. Little, Inc., for FDA in 1981, FDA can find no basis for some of the cost estimates submitted by industry. In particular, it is not clear why, as one comment asserted, the costs for a new product would be $12,000 to $15,000. Except for administrative costs, there should be no compliance cost for a new product because the label would be designed from the outset in compliance with existing labeling requirements. Furthermore, given all information currently available, FDA can find no substantive evidence that the cost for any one firm approaches the $250,000 figure cited by one company.

Considering that consumers are likely to benefit from caution labeling by having fewer adverse reactions to foaming detergent bath products, less severe injuries, less bodily suffering, and fewer medical expenses, the agency concludes that the cost of implementing the labeling requirement is well justified and is neither burdensome nor inflationary.

C. Procedural Issues

6. One comment argued that, in the preamble to the final regulation, the agency had failed to address certain important comments. According to the comment, FDA had not addressed the issue of exclusion of adult foaming detergent bath products, liquid products, and products in small size containers from the coverage of the rule; the argument that alkylarylsulfonates were the apparent source of adverse reactions; or the assertion that the complaint levels had decreased following reduced use of alkylarylsulfonate.

FDA disagrees with this comment. In the final rule, the agency addressed each of the contentions mentioned in the comment. FDA stated that the marketing of foaming detergent bath products in small packages does not offer the agency assurance that adverse reactions will not occur (45 FR 55174). It stated that the adverse reaction data in its consumer complaint files did not permit it to conclude that liquid products and products intended for use by adults did not cause a significant number of adverse reactions (*id.*). With regard to alkylarylsulfonate, a surface-active agent, the agency referenced its discussion of this ingredient in the preamble to the proposed regulation and explained why it was not persuaded that this ingredient alone was

responsible for the high complaint rates (45 FR 55173). Finally, in the final rule, the agency explained why it did not agree with claims that the rate of adverse reactions to foaming detergent bath products had declined since 1973 (*id.*). This explanation also responds to the assertion that complaint levels had decreased following reduced use of alkylarylsulfonate in foaming detergent bath products. For all these reasons, FDA finds that there is no basis for the comment's claim that the agency had failed to address important comments.

II. Continuing Need for Caution on Children's Products

As part of its reconsideration of this regulation, FDA considered not only whether the evidence establishes a need for the regulation, but also whether it establishes a basis for treating foaming detergent bath products intended for use by adults differently than those intended for use by children. As discussed above, in the February 18, 1983, notice, FDA specifically asked for comments on the latter question. FDA finds that the evidence establishes that consumer complaints are associated with both types of products, and that therefore there is an appropriate basis in the record for requiring adequate directions for safe use and some type of caution on both types of products.

FDA reviewed the foaming detergent bath product-related consumer complaint statistics and the adverse reactions voluntarily filed by some cosmetic manufacturers under 21 CFR Part 730. Between 1970 and 1984, FDA received 234 foaming detergent bath product-related consumer complaints. Sixty-seven percent of those complaints were related to products intended for use by children, and 24 percent were related to products intended for use by adults. The other complaints could not be classified.

FDA's review of the data voluntarily submitted by cosmetic manufacturers between 1979 and 1984 revealed that of the 345 reported adverse reactions to foaming detergent bath products, 87 percent were associated with adults' products, 5 percent were associated with children's products, and 8 percent were associated with products that could not be classified.

The two sets of statistics thus contradict each other, and FDA could not conclude that only one category of products was predominantly responsible for the reported adverse reactions. A review of the voluntarily registered foaming detergent bath formulations and of the technical trade literature also provided no evidence of distinctive differences in composition (other than generally higher fragrance concentrations in adult products) that would indicate that one type of product has a significantly greater potential for injury when misused than the other. It should be noted, however, that neither the data in FDA's files on consumer complaints nor those in the voluntary registration files permitted statistical evaluation of whether the adverse reactions associated with adults' products or with children's products always occurred in the respective age group. Some adverse reactions associated with adults' foaming detergent bath products may have occurred in children and vice versa.

Based on its review of the evidence, however, FDA finds that children are particularly vulnerable to the consumer hazard of primary concern, urogenital injury. There is evidence of an association between urogenital injury and children's products. Although the voluntarily registered industry data were not sufficiently detailed to permit analysis, the agency was able to analyze the complaints that it received directly from consumers about foaming detergent bath products and found that they reported 86 cases of urogenital adverse reactions. Eighty-two percent of those adverse reactions were associated with products intended for use by children. Although it may be that not all of those adverse reactions occurred in children, it is certain that the great majority of them did.

Further, FDA has received a number of reports that were specifically about urogenital injuries to children from foaming detergent bath products. Two pediatricians commented on the proposed stay and reported treating numerous children for urogenital irritation or infection associated with foaming detergent bath products. Thus, seven of the nine physicians who commented reported treating children for urogenital symptoms associated with these products (see 45 FR 55172).

Therefore, FDA is persuaded that, to give appropriate protection to children, § 740.17 should go into effect for all foaming detergent bath products except those intended for use exclusively by adults at the earliest practicable date. Because FDA has determined that 1 year is the appropriate lead time (see 45 FR 55175), the effective date of this regulation will be June 5, 1987.

In the absence of as large a number of urogenital adverse reactions in adults as were observed in children, FDA has decided not to require the caution on products intended for use exclusively by adults. Therefore, FDA is amending § 740.17(b) to make clear that the caution in that section is required on all products except those that are labeled as intended for use exclusively by adults. FDA believes it is appropriate to make these changes at this time because it solicited comment on the issue of the coverage of the regulation in the February 18, 1983, notice.

Consistent with these actions, FDA is continuing the interim stay of the effective date of 21 CFR 740.17 until June 5, 1987, the new effective date of this regulation.

III. Environmental Impact

The agency has previously considered the environmental effects of this rule as announced in the proposed rule (January 28, 1977; 42 FR 5368). FDA's regulations implementing the National Environmental Policy Act then in effect have been replaced by a rule published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would be categorically excluded from an environmental assessment and an environmental impact statement under 21 CFR 25.24(a)(11).

IV. Economic Impact

FDA has examined the costs of this regulation and determined that the only significant economic costs are the activities which must be undertaken in order to change packages and labels of foaming detergent bath products. The agency has estimated these costs to be less than $300,000, well under the $100 million per year threshold established by Executive Order 12291 for determining what is a "major" rule. FDA therefore certifies that this is not a major rule as defined by Executive Order 12291, and that it is thus exempt from the requirement for a regulatory impact analysis.

In accordance with the Regulatory Flexibility Act (Pub. L. 96-354), FDA has considered the effect that this regulation will have on small entities including small businesses and has determined that it will not place a significantly greater burden on small businesses than on large businesses. Therefore, FDA certifies in accordance with section 605(b) of the Regulatory Flexibility Act that this regulation will have no significant economic impact on a substantial number of small entities.

List of Subjects in 21 CFR Part 740

Cosmetics, Safety substantiation, Warning statements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, Part 740 is amended as follows:

PART 740—COSMETIC PRODUCT WARNING STATEMENTS

1. The authority citation for 21 CFR Part 740 is revised to read as follows:

Authority: Secs. 201(n), 601, 602, 701(a), 52 Stat. 1041, 1054–1055 (21 U.S.C. 321(n), 361, 362, 371(a)); 21 CFR 5.10, 5.11.

2. By revising § 740.17 to read as follows:

§ 740.17 Foaming detergent bath products.

(a) For the purpose of this section, a foaming detergent bath product is any product intended to be added to a bath for the purpose of producing foam that contains a surface-active agent serving as a detergent or foaming ingredient.

(b) The label of foaming detergent bath products within the meaning of paragraph (a) of this section, except for those products that are labeled as intended for use exclusively by adults, shall bear adequate directions for safe use and the following caution:

Caution—Use only as directed. Excessive use or prolonged exposure may cause irritation to skin and urinary tract. Discontinue use if rash, redness, or itching occurs. Consult your physician if irritation persists. Keep out of reach of children.

(c) In the case of products intended for use by children, the phrase "except under adult supervision" may be added at the end of the last sentence in the caution required by paragraph (b) of this section.

Dated: April 28, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

DEPARTMENT OF STATE

22 CFR Part 51

[Department Regulation 108.849]

Bureau of Consular Affairs; Execution of Passport Application

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The Department of State is amending its passport regulations to extend the period of time within which persons previously issued United States passports may apply for new passports without appearing in person before a person authorized by the Secretary of State to administer oaths and accept applications. Additionally, the regulations are being amended to broaden the categories of persons who are eligible to apply for passports without appearing in person.

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: William B. Wharton, Director, Office of Citizenship Appeals and Legal Assistance, Room 5813, Department of State, 2201 C Street, NW, Washington, DC 20520. Telephone (202) 647–0635.

SUPPLEMENTARY INFORMATION: Present regulations allow a U.S. citizen to apply for a new U.S. passport under certain conditions without appearing in person before a person authorized by the Secretary to administer oaths and accept such applications. Personal appearance may not be required when: the most recently issued passport was issued when the citizen was 18 years of age or older; the application is made within eight years from the date on which the most recent passport was issued; and the citizen can present that passport with his or her application for a new passport.

These regulations were promulgated when the maximum validity period for which a passport could be issued was five years. Pub. L. 97–241 (96 Stat. 279 (1983)) extended the period of validity of a passport from five years to ten years. Thus, there was no longer a grace period beyond the passport's expiration date within which a person could apply without appearing before a person authorized by the Secretary of State to administer oaths and accept applications.

The revised regulations will allow persons who have been issued a full validity passport when they were 16 years of age or older to use the "mail-in" procedure to obtain a new passport within twelve years after the date on which the expired passport was issued.

Consideration has been given to the need to balance the requirements for identification and the convenience to the traveling citizen. The Federal Advisory Committee on False Identification (FACFI) evaluated various identification systems and processes. The conclusions and recommendations of FACFI's Report of November 1976 were taken into account at the time the Department was considering implementation of the 10 year passport legislation. The regulations permitting the use of this "mail-in" procedure allows applicants a grace period within which to apply without impairing the reliability of the passport as an identity document. In addition, extending the "mail-in" procedures to minors whose previous passports were issued when they were 16 years of age or older will extend the benefits of this procedure to an increased number of people.

Since this amendment to the regulations is being made to bring them into conformity with the legislation referred to above, and extends a benefit to passport applicants, the Department has determined that the public notice requirement of the Administrative Procedure Act (APA), 5 U.S.C. 553, as amended, may be dispensed with because it is unnecessary. 5 U.S.C. 553(b)(B).

The Department has also determined that this regulation will not impose unnecessary burdens on individuals or on the economy and, therefore, is not significant for the purpose of Executive Order 12044.

List of Subjects in 22 CFR Part 51

Administrative practice and procedure, Passports and visas.

PART 51—[AMENDED]

22 CFR Part 51 is amended as follows:

1. The authority citation for Part 51 is revised to read as follows:

Authority: Sec. 1, 44 Stat. 887; sec. 1, 41 Stat. 750; sec. 2, 44 Stat. 887; sec. 4, 63 Stat. 111, as amended (22 U.S.C. 211a, 214, 217a, 2658); E.O. 11295, 36 FR 10603; 3 CFR 1966–70 Comp. p. 507.

2. In § 51.21, paragraphs (a), (c), and (d) are revised to read as follows:

§ 51.21 Execution of passport application.

(a) *First time applicants or persons who have not been issued a passport within the past twelve years.* A person who has never been issued a passport in his or her own name, or who has not been issued a passport in his or her own name within 12 years of the date of a new application, shall appear in person before a person authorized by the Secretary to give oaths, verify the application by oath or affirmation before that authorized person, provide two recent photographs, and pay the established fees.

* * * * *

(c) *Persons in the United States who have previously been issued a full validity passport.* A person in the United States who has been issued a passport in his or her own name may obtain a new passport by filling out and mailing a specially prescribed application together with his or her previous passport, two recent photographs, and the established fee to the nearest U.S. Passport Agency provided:

(1) The most recently issued previous passport was issued when the applicant was 16 years of age or older;

(2) The application is made not more than 12 years following the issue date of the previous passport;

(3) The most recently issued previous passport is submitted with the new application.

(d) *Persons outside of the United States who have previously been issued a full validity passport.* In a foreign country in which a U.S. consular district has been designated by the Secretary to receive such passport applications, a person who has been issued a passport in his or her own name may obtain a new passport by filling out a specially prescribed application and sending it (by mail or as prescribed by the Secretary), together with his or her previous passport, two recent photographs, and the established fee to the consular office in the consular district in which he or she is present, provided:

(1) The most recently issued passport was issued when the applicant was 16 years of age or older;

(2) The application is made not more than 12 years following the issue date of the previous passport;

(3) The most recently issued previous passport is submitted with the new application.

For the Secretary of State.

Dated: May 22, 1986.

Joan M. Clark,

Assistant Secretary, Bureau of Consular Affairs.

[FR Doc. 86-12543 Filed 6-4-86; 8:45 am]

BILLING CODE 4710-06-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 15

[Docket No. R-86-1226; FR-2914]

Disclosure of Profit and Loss Information to Potential Purchasers of HUD-Held Mortgages

AGENCY: Office of the Secretary, HUD.

ACTION: Interim rule.

SUMMARY: This interim rule revises the regulations at 24 CFR Part 15 governing disclosure of departmental records. This rule clarifies the records that may be withheld from inspection or copying under 24 CFR 15.21(a)(4), i.e., "trade secrets and commercial or financial information", and provides for the disclosure of information on Form HUD-92410, Statement of Profit and Loss, to prospective eligible bidders (as defined in the auction announcement) on mortgages offered in the Department's multifamily mortgage auctions. HUD has determined that the disclosure to potential bidders of information in the Profit and Loss Statement is necessary for the successful conduct of these mortgage sales.

DATES: Effective date: July 21, 1986.

Comment due date: August 4, 1986.

Mortgagors of projects for which HUD holds the mortgage may request that HUD not release Form HUD-92410 in connection with any mortgage auctions conducted before the effective date of the final rule in this rulemaking. These requests must be addressed in writing to: Marvin Hillman, Director, Multifamily Property Disposition Division, Office of Multifamily Housing Management, Department of Housing and Urban Development, Room 6272, 451 Seventh Street SW., Washington, DC 20410. The Department must receive these request by August 4, 1986. Unless an affected mortgagor forwards its request to HUD within that deadline, HUD may release Form HUD-92410 to prospective eligible bidders subject to the conditions in this interim rule.

ADDRESS: Interested parties are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, Room 10276, 451 Seventh Street SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Marvin Hillman, Director, Multifamily Property Disposition Division, Office of Multifamily Housing Management, Department of Housing and Urban Development, Room 6272, 451 Seventh Street SW., Washington, DC 20410. Telephone (202) 755-7343. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

I. Background

HUD mortgage auctions involve two types of mortgages:

(2) *Assigned mortgages:* These mortgages secure loans that were originally made by the lender and insured by HUD under the National Housing Act. Lenders have assigned these mortgages to HUD after a default. The Department pays insurance benefits to the lender and thus becomes the new mortgagee.

(2) *Purchase money mortgages.* These mortgages were taken back by the Department in conjunction with the sale of a HUD-owned property. HUD acquired the property by foreclosing on an assigned mortgage, taking a deed-in-lieu-of-foreclosure, or by accepting conveyance of title from the insured lender.

The Department has determined that the disclosure of information on Form HUD-92410, Statement of Profit and Loss, to prospective eligible bidders (as defined in the auction announcement) on mortgage offered in HUD multifamily mortgage auctions is necessary for the successful conduct of future auctions. (For purposes of this interim rule, "auction" includes any mortgage sale procedure where oral or written bids are submitted to HUD or its authorized agent.) Such disclosure is important because eligible bidders have advised HUD that they need access to profit and loss information in order to make an informed decision about whether to bid and how much to bid on certain mortgages. Disclosure of this type of financial information concerning the property securing the mortgage is vital to enhancing the level of participation in and the success of HUD's mortgage auctions. The form includes specific income sources and amounts and project expense categories. (A listing of the data entry categories included in Form HUD-92410 is published as an appendix to this interim rule, so that commenters will be fully apprised of the kinds of data proposed to be made available in connection with mortgage auctions.)

The availability of this information to qualified bidders is particularly important because of the reaction of bidders during recent auctions. In the two 1984 auctions, when information from Form HUD-92410 was not released to potential bidders, 315 mortgages were offered, but only 47 were sold—a 15 percent sales rate. In five previous auctions during 1982–83, when such information was released to potential bidders, 1,372 mortgages were offered for sale, and 400 (20 percent) were sold. Similarly, the ratio of mortgages bids (i.e., bids received from a bidder other than the mortgagor) received to mortgages offered has significantly decreased in the two 1984 auctions. In those two auctions, a total of 57 mortgagee bids was received, (a ratio of bids to mortgages offered of approximately 1:5), as contrasted with 820 mortgagee bids in the previous four auctions (a ratio of approximately 2:3).

This substantial drop in interest on the part of potential mortgage purchasers is no doubt attributable in part to HUD's February 10, 1984 memorandum announcing discontinuation of FHA insurance on auction mortgages. However, it is also

true that sales have been retarded by the absence of adequate financial data concerning the projects securing the mortgages. According to discussions held with several financial institutions, in the absence of HUD mortgage insurance, their potential bids for mortgages must depend on some indication of a project's financial status.

The Department traditionally has provided for prior notice and comment even when not required by the Administrative Procedure Act (see 24 CFR 10.1). Although this is the general policy of the Department, HUD has determined that there exists good cause to proceed with this rulemaking through the promulgation of an interim rule, rather than a proposed rule. This rule must be promulgated as an interim rule to meet the specific goals in the HUD Budget for Fiscal Year 1987 for proceeds resulting from the Department's mortgage auctions. In particular, the Department has determined that this interim rule is necessary in connection with a mortgage auction contemplated for the first quarter of Fiscal Year 1987. To reach the total proceeds planned for Fiscal Year 1987, it is anticipated that additional mortgage auctions will be conducted during the fiscal year. The mortgages will be sold without FHA mortgage insurance.

In order to protect the concern of any affected mortgagor for the confidentiality of the data contained in the project's Form HUD–92410 in connection with any mortgage auctions held before the effective date of the final rule in this rulemaking, HUD will allow mortgagors to notify the Department within 60 days after the publication of this interim rule that Form HUD–92410 for their project should not be released before the effective date of the final rule. The final rule will reflect HUD's consideration of any comments received within the comment due date for this interim rule.

II. Statutory Authority

The Department's authority to conduct auctions of HUD–held mortgages is based on sections 207(k) and 207(l) of the National Housing Act, 12 U.S.C. 1713(k) and 1713(l), and on section 7(i)(3) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(i)(3). Section 207(k) provides in part that pending acquisition by voluntary conveyance or by foreclosure, the Secretary is authorized, with respect to mortgages assigned to the Secretary under section 207, to sell such mortgages. Section 207(l) provides in part that the Secretary is authorized to expend from the General Insurance Fund necessary funds for the administration of such mortgage auctions.

Section 7(i)(3) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(i)(3), authorizes the Secretary to "sell or exchange at public or private sale, or lease, real or personal property, and sell or exchange any securities or obligations, upon such terms as he may fix. . . ."

HUD has determined that the disclosure of information from Form HUD–92410 to potential bidders at HUD mortgage auctions is essential to the successful implementation of the above-mentioned statutory authorities. For this reason, the disclosure of information from Form HUD–92410 is authorized by law for disclosure under the Trade Secrets Act, 18 U.S.C. 1905, and, under the limited conditions described in this interim rule, information included on the form will be released to prospective eligible bidders. (However, under this interim rule, HUD will not release Form HUD–92410 before the effective date of the final rule for any affected mortgagor who forwards a request to HUD within the deadline specified elsewhere in this preamble (see discussion under "Comment Due Date", above).) An appendix published with this rule provides a list of the data entries included in Form HUD–92410 that will be subject to disclosure under this rule.

The Trade Secrets Act

In pertinent part, section 1905 of the Trade Secrets Act provides:

"Whoever, being an officer or employee of the United States or of any department or agency thereof, . . . *publishes, divulges, discloses, or makes known in any manner or of any extent not authorized by law* any information coming to him in the course of his employment or official duties or by reason of any examination or investigation made by, or return, report or record made to or filed with, such department or agency or officer or employee thereof, which information concerns or relates to the trade secrets, processes, operations, style of work, or apparatus, or to the identity, confidential statistical data, amount or source of any income, profits, losses, or expenditures of any person, firm, partnership, corporation, or association; or permits any income return or copy thereof of any book containing any abstract or particulars thereof to be seen or examined by any person except as provided by law; shall be fined not more than $1,000, or imprisoned not more than one year, or both; and shall be removed from office or employment." (Emphasis added.)

The interpretation of the phrase "authorized by law" in section 1905 of the Trade Secrets Act has been the subject of Federal judicial interpretation. The United States Supreme Court held in *Chrysler* v. *Brown*, 441 U.S. 281, 301–303 (1979), that in order for an agency regulation to constitute authority for disclosure of "trade secrets" or similar information, the regulation must be: (1) "Substantive", (2) promulgated under a grant of "quasi-legislative authority", and (3) issued in accordance with the procedural requirements of the Administrative Procedure Act (APA).

Concerning the first requirement under the *Chrysler* decision that a rule authorizing the disclosure of "trade secrets" be "substantive", the Court held that the key test is whether it affects "individual rights and obligations" rather than merely consisting of "general statements of policy, or rules of agency organization, procedure, or practice." The Department has determined that this interim rule meets this test. It would authorize the disclosure of mortgagor financial and management information contained in Form HUD–92410 to qualified bidders in HUD-sponsored mortgage auctions. This information is essential for the bidders' evaluation of the respective projects and the structuring of their bids for specific HUD-held mortgages.

As related to the second requirement of the *Chrysler* decision, i.e., that the disclosure of "trade secrets" be justified under a grant of "quasi-legislative authority", the Department has determined that the disclosure of the information in Form HUD–92410 is essential to the proper conduct of HUD's authority under sections 207(k) and 207(l) of the National Housing Act and section 7(i)(3) of the Department of Housing and Urban Development Act. This determination is based on the Department's recent experience at multifamily mortgage auctions and in discussions with financial institutions that have been active in the purchase of HUD-held mortgages in past auctions. Without HUD mortgage insurance to safeguard potential bidders' investment decisions, these institutions are concerned that if the information contained in Form HUD–92410 is not disclosed, they could not structure their bids in a manner consistent with their fiduciary responsibilities to their investors.

The Department's determination that this statutory authority provides a quasi-legislative authority to justify this qualified disclosure of "trade secrets" is also supported by an interpretation of section 1905 of the Trade Secrets Act in an Opinion of the Attorney General at 41 Op. Att'y Gen. 166 (1953). In that opinion, the Attorney General responded to an inquiry of the Secretary of the Treasury concerning whether

borrowers' financial statements (including profit and loss statements) and other information could be disclosed in connection with the liquidation of the assets and the winding up of affairs of the Reconstruction Finance Corporation (RFC). (Most of the RFC's assets were in the form of loans to businesses and mortgage notes and other securities issued by financial institutions, railroads, other business enterprises, and public agencies.) Although no statutory provision explicitly authorized disclosure of borrowers' financial information in connection with such assets, the Attorney General concluded that appropriate legislative authority to disclose the information to potential purchasers of the notes and securities could be inferred if disclosure were necessary for the "orderly and efficient liquidation" of the assets.

HUD has determined that a successful mortgage auction program (aided by an increased pool of bidders as a result of the disclosure of information contained in Form HUD–92410 would provide more competition as well as the assurance that the Department would realize the best price for mortgages sold. Furthermore, HUD's mortgage auction program reduces the Department's borrowing needs and related costs. In addition, since HUD will no longer need to perform accounting or servicing functions on the mortgages sold, the mortgage auction program reduces HUD's administrative workload and costs.

The third requirement of the *Chrysler* decision is that a regulation authorizing the disclosure of "trade secrets" be issued in accordance with the procedural requirements of the Administrative Procedure Act (APA), 5 U.S.C. 701. This rulemaking is being conducted in accordance with the Department's procedural regulations at 24 CFR Part 10 and in full compliance with the public participation provisions in those regulations (see § 10.10).

III. Amendment to 24 CFR Part 15 Under This Interim Rule

This interim rule adds a new § 15.21(c) to 24 CFR Part 15. Section 15.21 provides a list of departmental records exempted from disclosure under the Freedom of Information Act, 5 U.S.C. 552, including "Trade secrets and commercial or financial information obtained from a person and privileged or confidential" (24 CFR 15.21(a)(4)). Section 15.21(c) of this interim rule authorizes the release of the Form HUD–92410 to eligible potential bidders and to potential investors in the mortgage (who receive Form HUD–92410 from a potential bidder) in connection with a multifamily mortgage auction conducted by the Department.

Under § 15.21(c), eligible potential bidders (as defined in the auction announcement) would be required to keep the information confidential, to disclose the information only to potential investors in the mortgage, to use the information for the sole purpose of their evalution of the mortgage in connection with the mortgage auction, and to follow disclosure procedures for that auction that have been established by the Secretary. The release of this information to potential bidders would be limited to the period from the date given in the announcement of the specific auction through the last date of any post-auction sale. In addition, any potential bidder is responsible for notifying potential investors in the mortgage who receive this information from that bidder of the investors' obligations under § 15.21(c)(3). Similar requirements are stated in the interim rule for potential investors in the mortgage who receive this information from potential bidders.

Disclosure of this information not in accordance with this rule will subject an eligible potential bidder or a potential investor (who has received the information from a potential bidder and has been notified by that potential bidder of its obligations under § 15.21(c)(3)) to HUD administrative sanctions under 24 CFR Part 24, including debarment, suspension, or placement in ineligibility status for purposes of HUD contracts, grants, mortgage insurance, or other form of HUD assistance described in Part 24.

The Department requests public comments on this interim rule to facilitate the limited disclosure of Form HUD–92410 to eligible potential bidders and potential investors in the mortgage in connection with a specific mortgage auction. In particular, HUD invites comments on: (1) Whether other mortgagor project or financial information that has been submitted to HUD for purposes of HUD mortgage insurance should be disclosed to eligible potential bidders and potential investors in the mortgage; (2) whether alternative or additional requirements and remedies should be included in this interim rule to limit the disclosure of Form HUD–92410 with respect to both eligible potential bidders and potential investors; and (3) whether only a portion of the information in Form HUD–92410 should be authorized for disclosure in connection with mortgage auctions.

IV. Miscellaneous

This interim rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued by the President on February 17, 1981. The rule does not: (1) Have an annual effect on the economy of one hundred million dollars or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or (3) have significant adverse effect on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Consistent with the provisions of 5 U.S.C. 605 (the Regulatory Flexibility Act), the Secretary has determined that this rule would not have a significant economic impact on a substantial number of small entities, because the impact of this limited financial disclosure is not expected to be substantial, and because most mortgagors affected by the rule are not small firms.

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520), the collection of information under Form HUD–92410 has been approved by OMB, and assigned approval number 2502–0052. This rule would not provide any additional collection of information burdens on affected firms, but would permit the disclosure of information from Form HUD–92410 for HUD mortgage auctions under limited conditions.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement Section 102(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours at the Office of Rules Docket Clerk at Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

This rule was listed as item number 809 in the Department's Semiannual Agenda of Regulations published on April 21, 1986 (51 FR 14036, 14049) under Executive Order 12291 and the Regulatory Agenda.

List of Subjects in 24 CFR Part 15

Classified information, Freedom of information.

Accordingly, 24 CFR Part 15 is amended as follows:

PART 15—PRODUCTION OR DISCLOSURE OF MATERIAL OR INFORMATION

1. The authority citation for 24 CFR Part 15 is revised to read as set forth below and any authority citation following any section in Part 15 is removed:

Authority: Freedom of Information Act (5 U.S.C. 552); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 15.21 paragraph (a)(4) is revised, and paragraph (c) is added to read as follows:

§ 15.21 Exemptions authorized by 5 U.S.C. 552.

* * * * *

(a) * * *

(4) Except as otherwise provided in paragraph (c) of this section, trade secrets and commercial or financial information obtained from a person and privileged or confidential;

* * * * *

(c) Subject to the following conditions, financial and related information submitted by a mortgagor and contained on Form HUD–92410, (Statement of Profit and Loss) or a HUD-approved substitute form that the mortgagor may have submitted, may be disclosed to eligible potential bidders (as defined in the auction announcement) in connection with a multifamily mortgage auction conducted by the Department.

(1) Information from Form HUD–92410 concerning a project may be made available in conjunction with the auction of a mortgage covering that project conducted under the authority of sections 207 (k) and (l) of the National Housing Act, 12 U.S.C. 1713 (k) and (l), or section 7(i)(3) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(i)(3). Included among the types of mortgage auctions affected by this provision are any mortgage sale procedures wherein oral or written bids are submitted to HUD or to its authorized agent.

(2) The release of this information by HUD to eligible potential bidders shall be limited to the period from the date given in the announcement of the specific auction through the last date of any post-auction sale.

(3) Eligible potential bidders who have received this information shall agree to keep the information confidential, to disclose the information only to potential investors in the mortgage, to use the information for the sole purpose of their evaluation of the mortgage in connection with the mortgage auction, and to follow disclosure procedures for that auction that have been established by the Secretary. Any disclosure by eligible potential bidders to potential investors in the mortgage shall be limited to the period from the date given in the announcement of the specific auction through the last date of any post-auction sale. Similarly, potential investors in the mortgage shall agree to keep the information confidential and to use the information for the sole purpose of their evaluation of the mortgage in connection with their investment decision. In addition, potential investors in the mortgage may not disclose the information to other entities, unless the disclosure is necessary for the investor's evaluation of the mortgage, is in accordance with disclosure procedures for the specific auction that have been established by the Secretary, and is limited to the period from the date given in the announcement of the specific auction through the last date of any post-auction sale. Any potential bidder is responsible for notifying potential investors in the mortgage who receive this information from that bidder of the investors' obligations under this section.

(4) Disclosure of information from Form HUD–92410 by an eligible potential bidder or by a potential investor (who has received the information from a potential bidder and has been notified by that potential bidder of its obligations under paragraph (c)(3) of this section) that is not in accordance with this section is a violation of this regulation and may subject the entity making the unauthorized disclosure to administrative sanctions under 24 CFR Part 24.

3. An appendix is added to Part 15 to read as follows:

Appendix to Part 15—List of Data Entries Included in Form HUD–92410, Statement of Profit and Loss

BILLING CODE 4310-25-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8068]

Income Taxes; Temporary Regulations Under Section 338, Stock Acquisitions, Statements of Elections and Due Dates

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to temporary rule.

SUMMARY: This document contains a correction to the temporary regulations that were published in the Federal Register on May 16, 1986 (51 FR 17929). Those regulations, issued as Treasury Decision 8068, relate to section 338(g) of the Internal Revenue Code.

FOR FURTHER INFORMATION CONTACT: Thomas J. Kane of the Legislation and Regulations Division, Office of the Chief Counsel, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attn: CC:LR:T). Telephone 202-566-3458 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Treasury Decision 8068 provides additional guidance to taxpayers concerning the filing of certain Statements of election on or after December 9, 1985, and on or before July 15, 1986; clarifies the application of the mitigation of limitations provisions; and extends the time for taking certain action under section 338 of the Internal Revenue Code.

Need for Correction

As published, T.D. 8068 contains a typographical error in a date that appears in one of the examples in § 1.338-1T(m)(15).

Correction of Publication

Accordingly, the publication of Treasury Decision 8068, which was the subject of FR Doc. 86-10998, is corrected as follows:

§ 1.338-1T [Corrected]

In § 1.338-1T, paragraph (m)(15), *Example (10)*, on page 17936, first column, in the last sentence the language "November 3, 1983," is removed and the language "November 3, 1986," is added in its place.

Donald E. Ostenn,

Acting Director, Legislation and Regulations Division.

BILLING CODE 4830-01-M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 4

[T.D. ATF-229; Ref: Notice Nos. 522, 534, 542]

Wine Labeling and Advertising; Use of Geographic Brand Names

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Treasury decision, final rule.

SUMMARY: This final rule amends the labeling regulation in 27 CFR 4.39(i), concerning geographic brand names of viticultural significance. In essence, the amended regulation permits a brand name of viticultural significance to be used on a label only if the wine meets the appellation of origin requirements for the geographic area named. However, the bottling winery need *not* be located in the geographic area used in the brand name.

EFFECTIVE DATE: July 7, 1986.

FOR FURTHER INFORMATION CONTACT: James P. Ficaretta or John A. Linthicum, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue NW., Washington, DC 20226, 202-566-7626.

SUPPLEMENTARY INFORMATION:

Background

Treasury Decision ATF-53 (43 FR 37672, August 23, 1978 and 43 FR 54024, November 22, 1978), set forth a new provision in 27 CFR 4.39(i) by providing that a brand name of viticultural significance may not be used unless the bottling winery is located within the geographic area used in the brand name, and the wine meets the appellation of origin requirements for the geographic area named, or; the brand name is qualified by the word "brand" immediately following the brand name in the same size of type and as conspicuous as the brand name itself.

As specified in § 4.39(i), a name has viticultural significance when it is the name of a state or county (or the foreign equivalents), when approved as a viticultural area in 27 CFR Part 9, or by a foreign government, or when found to have viticultural significance by the Director.

Petition to Defer the Mandatory Compliance Date

The Wine Institute petitioned ATF to delay the effective date of § 4.34(c) (also promulgated under T.D. ATF-53), and § 4.39(i) from January 1, 1983, to January 1, 1985. Due to the fact that the validity of other regulations promulgated by T.D. ATF-53 was cast into doubt by *Wawszkiewicz* v. *Department of the Treasury*, 480 F.Supp. 739 (D.D.C. 1979), *rev'd in part* and *aff'd in part*, 670 F. 2d 296 (D.C. Cir. 1981), wine industry members could not effectively plan to redesign their labels to conform to all the requirements set forth in the Treasury decision. The Wine Institute believed that its members should only be required to redesign their labels once in order to conform to the rules promulgated in T.D. ATF-53, and they could not be sure what those rules were

until the *Wawszkiewicz* litigation was finalized.

Thereafter, ATF issued a notice of proposed rulemaking which resulted in T.D. ATF–128 (January 21, 1983; 48 FR 2762) deferring the effective date of 27 CFR 4.34(c) and 4.39(i) until January 1, 1985. A final rule concerning § 4.34(c) was subsequently published on January 7, 1985 (50 FR 759). The mandatory compliance date for § 4.39(i) was eventually extended until January 1, 1987, as a result of T.D. ATF–194 (January 7, 1985; 50 FR 758).

In their petition to defer the mandatory compliance date for §§ 4.34(c) and 4.39(i) in T.D. ATF–53, the Wine Institute reiterated their earlier position on the use of (TM) and (R), in lieu of the word "brand." They believed that the provision in § 4.39(i) requiring the word "brand" to appear in the same size of type as the brand name was unaesthetic. In addition, they believed the word "brand" would not preclude any misleading impressions that might be conveyed by a geographic brand name.

Notice No. 522

Based on the Wine Institute's petition, ATF published Notice No. 522 (May 7, 1984; 49 FR 19330), presenting four alternatives to § 4.39(i), but proposing action on one:

Alternative No. 1. This alternative consisted of leaving the regulation (§ 4.39(i)) as currently stated.

Alternative No. 2. This alternative proposed to eliminate the regulation, § 4.39(i), and therefore, any brand name found to be misleading without being qualified by the word "brand" would, under § 4.33(b), no longer be allowed to appear on labels of wine.

Alternative No. 3. This alternative would amend the type size requirement for the word "brand." Instead of the word "brand" appearing in the same size type as the brand name, it would only be required to appear in type of at least one-half the size of the brand name, but no smaller than two millimeters. The other requirements as stated in § 4.39(i) would remain the same.

Alternative No. 4. This was the alternative proposed by ATF. A brand name of viticultural significance may not be used unless: The bottling winery is located within the geographical area used in the brand name, and the wine meets the appellation of origin requirements for the geographical area name, *or;* the brand name is qualified by the word "brand" immediately following the brand name in the same size of type and as conspicuous as the brand name itself, *or;* the wine is labeled with an appellation of origin that is either a county or viticultural area if the geographic area named in the brand name is other than a state name and is a name to which the wine is not entitled as an appellation of origin, *or;* the wine is labeled with an appellation of origin that is a state name, county name, or viticultural area name, if the brand name contains a state name to which the wine is not entitled as an appellation of origin, *or;* the wine is labeled with a statement which the Director finds to be sufficient to dispel the impression that the geographic term used in the brand name is an appellation of origin.

The comment period for Notice No. 522 closed on July 6, 1984. It was extended until September 14, 1984, as a result of Notice No. 534 (July 12, 1984; 49 FR 28417), and extended again, until January 2, 1985, as a result of Notice No. 542 (September 4, 1984; 49 FR 34847).

Analysis of Comments

In response to Notice Nos. 522, 534 and 542, ATF received 26 comments. The majority of the commenters (17) favored Alternative Nos. 2 and 4. Nine commenters (representing mostly foreign interests) were in favor of Alternative No. 2. Most of the eight commenters favoring Alternative No. 4, represented domestic interests.

Most commenters favoring Alternative No. 2 believed that ATF's proposed Alternative No. 4 encouraged misleading brand names. For example, it was believed that a brand name of geographical significance, such as "Rheinhessen," would be acceptable as long as an appellation of origin (such as "The Hamptons") appeared on the label. In that regard, however, ATF would not approve "Rheinhessen" as a brand name on a label for wine other than from Germany, in accordance with 27 CFR 4.24(c) and 4.39(k).

One commenter, favoring Alternative No. 2, stated that Alternative No. 4 would allow "the possibility of using two appellations of origin, one which is truthful and one which is a brand name and thus misleading. The consumer would not be able to tell which is the truthful appellation."

Commenters favoring Alternative No. 2 also referred to various international resolutions and agreements, supported by the U.S., concerning protection of non-generic designations of origin. One specific reference was the exchange of letters (July, 1983) between the EEC Commission and the U.S. In their letter, the EEC noted with satisfaction the willingness of the U.S. to work within the framework of § 4.24(c)(3) to prevent "erosion" of non-generic designations of geographic significance indicating a wine-growing area in the EEC.

Basically, proponents of Alternative No. 4 believed that this alternative offered maximum flexibility to the industry while affording maximum protection to the consumer. As one commenter stated, the consumer is assured "that no misleading impression can be conveyed, either because the brand name correctly identifies the origin of the wine, or because the label contains one of a variety of definite statements sufficient to dispel the impression that the brand name refers to the origin of the wine." At the same time, industry is afforded several alternatives in lieu of having to use the "aesthetically unattractive" word "brand." In addition, this commenter noted that the word "brand" "would not resolve the question of misleading consumer information."

Final Rule

ATF believes that the brand name, usually the most prominent item on a wine label, in certain instances conveys information to the consumer. In the case of a geographic brand name of viticultural significance, ATF believes that such a name on a label indicates the origin of the wine, that is, the place where the grapes were grown. This was brought out in the comments received in response to Notice No. 522.

In addition, as mentioned earlier, some commenters believed that use of the word "brand" did not dispel any misleading impression that could be conveyed by a brand name of viticultural significance where the wine did not meet the appellation of origin requirements for the geographic area named.

Therefore, with the effective date of this final rule, a brand name of viticultural significance may not be used unless the wine meets the appellation of origin requirements of § 4.25a for the geographic area named. Further, the word "brand" may not be used on labels where the wine does not meet the appellation of origin requirements for the area named in the brand name. For example, the word "brand" may not be used with the brand name "Carmel Valley Vineyards" if the wine does not meet the appellation of origin requirements for Carmel Valley.

For certificates of label approval issued prior to the effective date of this final rule, the wine shall meet the appellation of origin requirements for the geographic area named in the brand name, *or;* the wine shall be labeled with an appellation of origin in accordance with § 4.34(b) as to location and size of

type of either: (A) A county or a viticultural area, if the brand name bears the name of a geographic area smaller than a state, or (B) a state or county appellation of origin or a viticultural area, if the brand name bears a state name, *or;* the wine shall be labeled with some other statement which the Director finds to be sufficient to dispel the impression that the geographic area suggested by the brand name is indicative of the origin of the wine.

As with new certificates of label approval, the word "brand" may not be used on labels where the wine does not meet the appellation of origin requirements for the area named in the brand name. ATF will be reviewing existing certificates of label approval to insure that the requirements of the new regulation are met.

ATF has reconsidered its position regarding the location of the bottling winery when a geographic brand name of viticultural significance is used. Under § 4.39(i), as well as ATF's proposed Alternative No. 4 in Notice No. 522, the bottling winery had to be located in the geographic area indicated in the brand name. By definition, an appellation of origin indicated where the grapes (fruit) are grown. There is no reference or requirement as to the location of the bottling winery. Only under the requirements of § 4.26 ("estate bottled") is the location of the bottling winery a factor. Therefore, unless otherwise required, when a geographic brand name of viticultural significance is used, the bottling winery need not be located in the geographic area named.

ATF believes that this final rule will provide industry with sufficient flexibility in designing their labels, while at the same time providing consumers with protection from any misleading impressions that might arise from the use of geographic brand names.

Executive Order 12291

In compliance with Executive Order 12291, ATF has determined that this final rule is not a "major rule" since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions; or

(c) Significant adverse affect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The collection of information contained in this final rule has been reviewed and approved by the Office of Management and Budget (OMB).

Disclosure

Copies of the petition, the notices of proposed rulemaking, all written comments, and this final rule will be available for public inspection during normal business hours at: Office of Public Affairs and Disclosure, Room 4406, Federal Building, 12th and Pennsylvania Avenue NW., Washington, DC.

Authority and Issuance

PART 4—[AMENDED]

27 CFR Part 4, Labeling and advertising of wine is amended as follows:

Par. 1. The authority citation for 27 CFR Part 4 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. Section 4.39 is amended by revising paragraph (i) to read as follows:

§ 4.39 Prohibited practices.

* * * * *

(i) *Geographic brand names.*

(1) Except as provided in subparagraph 2, a brand name of viticultural significance may not be used unless the wine meets the appellation of origin requirements for the geographic area named.

(2) For brand names used in existing certificates of label approval issued prior to (effective date of final rule):

(i) The wine shall meet the appellation of origin requirements for the geographic area named; or

(ii) The wine shall be labeled with an appellation of origin in accordance with § 4.34(b) as to location and size of type of either:

(A) A county or a viticultural area, if the brand name bears the name of a geographic area smaller than a state, or;

(B) A state, county or a viticultural area, if the brand name bears a state name; or

(iii) The wine shall be labeled with some other statement which the Director finds to be sufficient to dispel the impression that the geographic area suggested by the brand name is indicative of the origin of the wine.

(3) A name has viticultural significance when it is the name of a state or county (or the foreign equivalents), when approved as a viticultural area in Part 9 of this chapter, or by a foreign government, or when found to have viticultural significance by the Director.

* * * * *

§ 4.34 [Amended]

Par. 3. Section 4.34(b)(3) is amended by deleting the reference to "brand name" and "§ 4.39(i)".

Signed: March 14, 1986.

Stephen E. Higgins,

Director.

Approved: May 16, 1986.

Francis A. Keating II,

Assistant Secretary, (Enforcement and Operations).

BILLING CODE 4810-31-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD 12-86-01]

Drawbridge Operation Regulations; Sacramento River, CA

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the California Department of Transportation, the Coast Guard is changing the regulations governing the Butte City bridge across the Sacramento River, mile 169.7, at Butte City, California to provide that the draw need not open. This change is being made because no requests have been made to open the draw since the bridge was completed in 1949. This action will relieve the bridge owner of the burden of maintaining the machinery and of having a person available to open the draw, and still provide for the reasonable needs of navigation. The Coast Guard is also deleting the 1972 requirement that the draws above Chico Landing be returned to operable condition within six months after notification by the District Commander.

EFFECTIVE DATE: July 7, 1986.

FOR FURTHER INFORMATION CONTACT: Rose E. Guerra, Assistant Chief, Bridge Section, Aids to Navigation Branch (telephone: (415) 437–3514).

SUPPLEMENTARY INFORMATION: On Thursday, March 6, 1986 the Coast Guard published proposed rules (51 FR 7913) concerning this amendment. The Commander, Twelfth Coast Guard District, also published the proposal as a Public Notice dated 10 April 1986. Interested persons were given until 21 April 1986 to submit comments on the proposed rule. Interested persons were given until 9 May 1986 to submit comments on the public notice.

Drafting Information

The drafters of these regulations are Rose E. Guerra, project officer, and Lieutenant Commander Peter K. Mitchell, project attorney.

Discussion of Comments

Three comments were received. The Corps of Engineers and California State Resources Agency had no comment. California Department of Transportation was in favor of the proposal.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulations and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. There have not been any requests for openings since the bridge was constructed so there will not be any impact on navigation.

Since the economic impact of these regulations is expected to be minimal, the Cost Guard certifies that they will not have a signficant economic impact on substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

In consideration of the foregoing, the Coast Guard is amending Part 117 of Title 33, Code of Federal Regulations as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46 and 33 CFR 1.05–1(g).

2. Section 117.189(b) and (c) are revised to read as follows:

§ 117.189 Sacramento river.

* * * * *

(b) The draws of the California Department of Transportation bridges, mile 90.1 at Knights Landing, and mile 135.5 at Meridian, shall open on signal if at least 12 hours notice is given to the California Department of Transportation at Marysville.

(c) The draws of the bridges above Meridian need not be opened for the passage of vessels.

Dated: May 21, 1986.

John D. Costello,

Vice Admiral, U.S. Coast Guard, Commander, Twelfth Coast Guard District.

[FR Doc. 86–12865 Filed 6–4–86; 8:45 am]

BILLING CODE 4910-14-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

45 CFR Part 1177

Claims Collection

AGENCY: National Endowment for the Humanities.

ACTION: Final rule.

SUMMARY: This final rule implements the Federal Claims Collection Act of 1966 and the Debt Collection Act of 1982. It is consistent with regulations issued jointly by the Department of Justice and the General Accounting Office at 4 CFR 101–105 as amended by 49 FR 8889. This rule will enhance the Endowment's ability to collect debts by providing guidance to officers and employees charged with debt collection responsibilities. In addition, the rule provides notice to those with delinquent accounts of agency claims collection practices.

EFFECTIVE DATE: July 7, 1986.

FOR FURTHER INFORMATION CONTACT: Stephen J. McCleary, Deputy General Counsel, 1100 Pennsylvania Avenue NW., Washington, DC 20506, (202) 786–0322.

SUPPLEMENTARY INFORMATION: The National Endowment for the Humanities published a proposed rule for claims collection in the **Federal Register** on March 18, 1986, 51 FR 9228–9230. Interested parties were asked to submit comments within 30 days. The National Endowment for the Humanities received several comments. The comments suggested that the Endowment include provisions to: collect administrative costs for processing claims; assess penalty charges; and offset the salaries of Endowment employees who have delinquent accounts. The National Endowment for the Humanities has adopted these suggestions. Provisions to charge for administrative expenses incurred in processing claims and to assess penalty charges have been added at section 1177.7 of this rule. The National Endowment for the Humanities will include employee salary offset provisions by amending this rule at a future date.

E.O. 12291

This rule does not require a Regulatory Impact Analysis because it is not a "major rule" as defined in Executive Order 12291, dated February 17, 1981 because it is unlikely to result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies or geographical regions, or a significant adverse effect on competition, employment, investment, productivity, innovation or on the ability to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

I certify under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities including small businesses, small organizations and small local governments. Accordingly, a regulatory flexibility analysis is not required by 5 U.S.C. 603.

Reporting and Recordkeeping Requirements

The proposed rule would establish no burdens as defined under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). These regulations impose no new reporting or recordkeeping requirements

that must be cleared by the Office of Management and Budget.

List of Subjects in 45 CFR Part 1177

Administrative practice and procedures, Claims, Government employees, Privacy.

Approved:

Lynne Cheney,
Chairperson.

Title 45 of the Code of Federal Regulations, Chapter XI, is amended by adding a new Part 1177 to read as follows:

PART 1177—CLAIMS COLLECTION

Sec.

1177.1 Purpose and scope.
1177.2 Definitions.
1177.3 Other remedies.
1177.4 Claims involving criminal activity or misconduct.
1177.5 Collection.
1177.6 Notices to debtor.
1177.7 Interest, Penalties, and Administrative Costs.
1177.8 Administrative offset.
1177.9 Use of credit reporting agencies.
1177.10 Collection services.
1177.11 Referral to the Department of Justice or the General Accounting Office.
1177.12 Compromise, suspension and termination.
1177.13 Omissions not a defense.
1177.14–1177.99 [Reserved].

Authority: 31 U.S.C. 3711, 3716–3719.

§ 1177.1 Purpose and scope.

This part prescribes standards and procedures for officers and employees of the National Endowment for the Humanities who are responsible for the collection and disposition of debts owed to the United States. The authority for this part is the Federal Claims Collection Act of 1966, as amended, 31 U.S.C. 3711 and 3716–3719; the Federal Claims Collection Standards at 4 CFR Parts 101–105, as amended by 49 FR 8889; 5 U.S.C. 552a, and Office of Management and Budget Circular A–129. The activities covered include: collecting claims in any amount; compromising claims, or suspending or terminating the collection of claims that do not exceed $20,000 exclusive of interest and charges, and referring debts that cannot be disposed of by the Endowment to the Department of Justice or to the General Accounting Office for further administrative action or litigation.

§ 1177.2 Definitions.

For the purpose of this part the following definitions will apply:

(a) "Claim" or "debt" means an amount of property owed to the United States. These include but are not limited to: overpayments to program beneficiaries; overpayments to contractors and grantees, including overpayments arising from audit disallowances; excessive cash advances to grantees and contractors; and civil penalties and assessments. A debt is overdue or delinquent if it is not paid by the due date specified in the initial notice of the debt (see sec. 1177.6 of this part) or if the debtor fails to satisfy his or her obligation under a repayment agreement.

(b) "Debtor" means an individual, organization, group, association, partnership, or corporation indebted to the United States, or the person or entity with legal responsibility for assuming the debtor's obligation.

(c) "Endowment" means the National Endowment for the Humanities.

(d) "Administrative offset" means satisfying a debt by withholding money payable by the United States to or held by the United States for a debtor.

§ 1177.3 Other remedies.

The remedies and sanctions available to the National Endowment for the Humanities under this part are not intended to be exclusive. The Chairperson of the National Endowment for the Humanities or his designee may impose other appropriate sanctions upon a debtor for prolonged or repeated failure to pay a debt. For example, the Chairperson or his designee may place the debtor's name on a list of debarred, suspended, or ineligible grantees and contractors, convert the method of payment under a grant from an advance to a reimbursement method, or revoke a grantee's letter of credit. In such cases the debtor will be advised of the Endowment's action.

§ 1177.4 Claims involving criminal activity or misconduct.

(a) A debtor whose indebtedness involves criminal activity such as fraud, embezzlement, theft, or misuse of government funds or property is subject to punishment by fine or imprisonment as well as to a civil claim by the United States for compensation for the misappropriated funds. The Endowment will refer these cases to the appropriate law enforcement agency for prosecution.

(b) Debts involving fraud, false, claims, or misrepresentation shall not be compromised, terminated, suspended, or otherwise disposed of under this rule. Only the Department of Justice is authorized to compromise, terminate, suspend, or otherwise dispose of such debts.

§ 1177.5 Collection.

(a) The Endowment will take aggressive action to collect debts and reduce delinquencies. Collection efforts shall include sending to the debtor's last known address a total of three progressively stronger written demands for payment at not more than 30 day intervals. When necessary to protect the Government's interest, written demand may be preceded by other appropriate action, including immediate referral for litigation. Other contact with the debtor or his or her representative or guarantor by telephone, in person and/or in writing may be appropriate to demand prompt payment, to discuss the debtor's position regarding the existence, amount and repayment of the debt, and to inform the debtor of his or her rights and the effect of nonpayment or delayed payment. A debtor who disputes a debt must promptly provide available supporting evidence.

(b) If a debtor is involved in insolvency proceedings, the debt will be referred to the appropriate United States Attorney to file a claim. The United States may have a priority over other creditors under 31 U.S.C. 3713.

§ 1177.6 Notice to debtor.

The first written demand for payment must inform the debtor of the following:

(a) The amount and nature of the debt;

(b) The date payment is due, which will generally be 30 days from the date the notice was mailed;

(c) The assessment of interest under § 1177.7 from the date the notice was mailed if payment is not received within the 30 days;

(d) The right to dispute the debt;

(e) The office, address and telphone number that the debtor should contact to discuss repayment and reconsideration of the debt and;

(f) The sanctions available to the National Endowment for the Humanities to collect a delinquent debt including, but not limited to, referral of the debt to a credit reporting agency, a private collection bureau, or the Department of Justice for litigation.

§ 1177.7 Interest, penalties, and administrative costs.

(a) Interest will accrue on all debts from the date when the first notice of the debt and the interest requirement is mailed to the last known address or hand-delivered to the debtor if the debt is not paid within 30 days from the date the first notice was mailed. The Endowment will charge an annual rate of interest that is equal to the average investment rate for the Treasury tax and loan accounts on September 30 of each

year, rounded to the nearest whole per centum. This rate, which represents the current value of funds to the United States Treasury, may be revised quarterly by the Secretary of the Treasury and is published by the Secretary of the Treasury annually or quarterly in the Federal Register and the Treasury Financial Manual Bulletins.

(b) The rate of interest initially assessed will remain fixed for the duration of the indebtedness, except that if a debtor defaults on a repayment agreement interest may be set at the Treasury rate in effect on the date a new agreement is executed.

(c) The Endowment shall charge debtors for administrative costs incurred in handling overdue debts.

(d) Interest will not be charged on administrative costs.

(e) The Endowment shall assess a penalty charge, not to exceed 6 per cent per year on debts which have been delinquent for more than 90 days. This charge shall accrue from the date that the debt became delinquent.

(f) The Chairperson or his designee may waive in whole or in part the collection of interest and administrative and penalty charges if determined that collection would be against equity or not in the best interests of the United States. The Endowment shall waive the collection of interest on the debt or any part of the debt which is paid within 30 days after the date on which interest began to accrue.

§ 1177.8 Administrative offset.

(a) The Endowment may collect debts owed by administrative offset if:

(1) The debt is certain in amount;

(2) Efforts to obtain direct payment have been, or would most likely be unsuccessful, or the Endowment and the debtor agree to the offset;

(3) Offset is cost effective or has significant deterrent value; and

(4) Offset is best suited to further and protect the Government's interest.

(b) The Endowment may offset a debt owed to another Federal agency from amounts due or payable by the Endowment to the debtor or request another Federal agency to offset a debt owed to the Endowment;

(c) Prior to initiating administrative offset, the National Endowment for the Humanities will send the debtor written notice of the following:

(1) The nature and amount of the debt and the agency's intention to collect the debt by offset 30 days from the date the notice was mailed if neither payment nor a satisfactory response is received by that date;

(2) The debtor's right to an opportunity to submit a good faith alternative repayment schedule to inspect and copy agency records pertaining to the debt, to request a review of the determination of indebtedness; and to enter into a written agreement to repay the debt and;

(3) The applicable interest.

(d) The National Endowment for the Humanities may effect an administrative offset against a payment to be made to a debtor prior to the completion of the procedures required by paragraph (c) of this section if:

(1) Failure to offset would substantially prejudice the Government's ability to collect the debt and

(2) The time before the payment is to be made does not reasonably permit completion of those procedures.

§ 1177.9 Use of credit reporting agencies.

(a) The Endowment may report delinquent accounts to credit reporting agencies consistent with the notice requirements contained in the § 1177.6 of this part. Individual debtors must be given at least 60 days written notice that the debt is overdue and will be reported to a credit reporting agency.

(b) Debts may be reported to consumer or commercial reporting agencies. Consumer reporting agencies are defined in 31 U.S.C. 3701(a)(3) pursuant to 5 U.S.C. 552a(b)(12) and 31 U.S.C. 3711(f). The Endowment may disclose only an individual's name, address, social security number, and the nature, amount, status and history of the debt and the program under which the claim arose.

§ 1177.10 Collection services.

(a) The Endowment may contract for collection services to recover outstanding debts. The Endowment may refer delinquent debts to private collection agencies listed on the schedule compiled by the General Services Administration. In such contracts, the National Endowment for the Humanities will retain the authority to resolve disputes, compromise claims, terminate or suspend collection, and refer the matter to the Department of Justice or the General Accounting Office.

(b) The contractor shall be subject to the disclosure provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a(m)), and to applicable federal and state laws and regulations pertaining to debt collection practices, including the Fair Debt Collection Practices Act, 15 U.S.C. 1692. The contractor shall be strictly accountable for all amounts collected.

(c) The contractor shall be required to provide to the Endowment any data contained in its files relating to the debt account upon agency request or upon returning an account to the Endowment for referral to the Department of Justice for litigation.

§ 1177.11 Referral to the Department of Justice or the General Accounting Office.

Debts over $600 but less than $100,000 which the Endowment determines can neither be collected nor otherwise disposed of will be referred for litigation to the United States Attorney in whose judicial district the debtor is located. Claims for amounts exceeding $100,000 shall be referred for litigation to the Commercial Litigation Branch, Civil Division of the Department of Justice.

§ 1177.12 Compromise, suspension and termination.

(a) The Chairperson of the National Endowment for the Humanities or his designee may compromise, suspend or terminate the collection of debts where the outstanding principal is not greater than $20,000. Endowment procedures for writing off outstanding accounts are available to the public.

(b) The Chairperson of the National Endowment for the Humanities may compromise, suspend or terminate collection of debts where the outstanding principal is greater than $20,000 only with the approval of, or by referral to the United States Attorney or the Department of Justice.

(c) The Chairman of the National Endowment for the Humanities will refer to the General Accounting Office (GAO) debts arising from GAO audit exceptions.

§ 1177.13 Omissions not a defense.

Failure to comply with any provisions of this rule may not serve as a defense to any debtor.

§ 1177.14–1177.99 [Reserved]

BILLING CODE 7536-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

48 CFR Parts PHS 301, 304, 305, 306, 314, 315, 323, 333, 335, 336, 352, and 380

Acquisition Regulation; Amendments

AGENCY: Public Health Service (PHS), HHS.

ACTION: Final rule; amendments.

SUMMARY: This rule amends the final rule with request for comments published in the Federal Register on

September 14, 1984 (49 FR 36235–36270) that established the Public Health Service Acquisition Regulation (PHSAR) as Appendix A to the Department of Health and Human Services Acquisition Regulation (HHSAR), Chapter 3 of Title 48, Code of Federal Regulations (49 FR 13660, April 9, 1984). The PHSAR implements and supplements the HHSAR and the Federal Acquisition Regulation (FAR), Title 48 CFR Chapter 1. The amendments being made in this rule reflect comments made by two respondents; administrative, clerical, and typographical corrections disclosed internally; changes resulting from the Competition in Contracting Act of 1984, Title VII of Pub. L. 98–369; and the transfer of construction and architect-engineer acquisition responsibilities from the Office of the Secretary, Health and Human Services (HHS), to the Public Health Service (PHS).

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Charleen Kelly (Procurement Analyst), (301) 443–2710.

SUPPLEMENTARY INFORMATION: The final rule published on September 14, 1984, requested comments from interested parties. Two responses were received and both indicated that the regulations concerning human subjects and care of laboratory animals were outdated. As a result, the program office responsible for these policies revised the regulations in the PHSAR to bring them into compliance with existing practices and regulations, and the revised material is included in this document.

Other amendments, including addition of a Part PHS 306, Competition Requirements, are a result of the Competition in Contracting Act of 1984 and its implementation in the FAR and HHSAR. Construction and architect-engineer coverage, originally published as Subpart 323.70 of the HHSAR, is added to the PHSAR because of a transfer of construction and architect-engineer acquisition responsibilities from the Office of the Secretary, HHS, to PHS. The remaining amendments correct administrative, clerical and typographical errors.

The provisions of this regulation are issued under 5 U.S.C. 301; 40 U.S.C. 486(c).

List of Subjects in 48 CFR Parts PHS 301, 304, 305, 306, 314, 315, 323, 333, 352, and 380

Government procurement.

Accordingly, the Department of Health and Human Services amends 48 CFR Chapter 3, Appendix A, as set forth below.

Dated: May 28, 1986.

Henry G. Kirchheimer, Jr.,

Deputy Assistant Secretary for Procurement, Assistance and Logistics.

As indicated in the preamble, Appendix A to Chapter 3, of Title 48, Code of Federal Regulations, is amended as shown.

1. The authority citation for Parts PHS 301, 304, 305, 306, 314, 315, 323, 333, 352, and 380 continues to read as follows:

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

PART PHS 301—[AMENDED]

PHS 301.105 [Amended]

2. Section PHS 301.105 is amended by revising the table to read as follows:

* * * * *

PHSAR segment	OMB control No.
All segments (excluding PHS 352.223–70 and PHS 352.232–70)	0990–0138
PHS 352.223–70	0990–0137
PHS 352.232–70	0990–0134

PHS 301.270 [Amended]

3. Section PHS 301.270 is amended by removing the words "Acquisition Management Advisory Committee (AMAC)" in the title and first sentence of paragraph (a), and inserting, in their place, the words "Procurement Management Advisory Committee (PMAC)." In paragraph (b), the acronym "AMAC" is removed, and the acronym "PAMAC" is inserted in its place.

PHS 301.470 [Amended]

4. Paragraph (b) of section PHS 301.470 is amended by inserting the words "in addition to the information required by 301.470(b)" after the word "following" and before the semicolon. In addition paragraphs (b) (1), (2), and (5) of section PHS 301.470 are removed, and paragraphs (b) (3) and (4) are renumbered as PHS 301.470(b)(1) and PHS 301.470(b)(2) respectively.

PART PHS 304—[AMENDED]

PHS 304.670–1 [Amended]

5. Section PHS 304.670–1 is amended by removing the words after "are responsible" and inserting, in their place, the words "for ensuring that all required information is collected, submitted, and received into the PHSCIS in accordance with the central PHSCIS User Manual."

6. Section PHS 304.7101 is amended as follows:

a. Paragraph (b)(2)(i) is revised to read as follows:

PHS 304.7101 Contracts requiring review and approval.

(b)(2)(i) In addition to the reviews required by 304.7101(a) and PHS 304.7101(c), internal reviews are to be conducted of acquisitions made by the following contracting offices in the National Institutes of Health for contract awards that fall below the dollar threshold for review and approval set forth in PHS 304.7101(c) but exceed the dollar threshold set forth herein:

National Cancer Institute—$750,000
National Heart, Lung, and Blood Institute—$500,000
National Institute of Environmental Health Sciences—$250,000
National Institute of Allergy and Infectious Diseases—$250,000
National Institute of Child Health and Human Development—$250,000
Centralized procuring activity for all other National Institutes of Health Research Organizations (Research Contracts Branch)—$250,000

These internal reviews shall be conducted by senior personnel with each contracting office. Typically, the chief of contracting office or his/her deputy should be involved in the review. Personnel involved in the contract action shall not perform the review. Each review shall be documented in writing, and any substantive issues identified shall be resolved prior to award.

b. A new paragraph (b)(2)(iii) is added as follows:

* * * * *

(iii) Contract awards and modifications of proposed architect-engineer contracts expected to exceed $50,000 shall be reviewed and approved prior to award by the reviewing official designated in PHS 304.7101(c).

* * * * *

c. In paragraph (c), the chart showing the reviewing officials and the dollar thresholds for preaward contract review is revised to read as follows:

* * * * *

Review and approval required for contracts expected to exceed	PHS acquisition activity	Reviewing official
	Office of the Assistant Secretary for Health	
$300,000	Administrative Services Center, Office of Management	Director, Administrative Services Center.
	Alcohol, Drug Abuse and Mental Health Administration	
300,000	National Institute on Drug Abuse	Director, Division of Grants and Contracts Management.
300,000	National Institute on Alcohol Abuse and Alcoholism	Do.
300,000	National Institute of Mental Health	Do.
300,000	St Elizabeths, Hospital, NIMH	Do.
50,000	Addiction Research Center	Do.
	Centers for Disease Control	
300,000	Centers for Disease Control	Director, Procurement and Grants Office.
	Food and Drug Administration	
300,000	Division of Contracts and Grants Management	Director, Division of Contracts and Grants Management.
300,000	National Center for Toxicological Research	Do.
	National Institutes of Health	
1,500,000	National Cancer Institute	Director, Division of Contracts and Grants.
1,000,000	National Heart, Lung, and Blood Institute	Do
	National Institutes of Environmental Health Sciences	
1,000,000	Research and development awards	Do.
100,000	Other than research and development	Director, Division of Procurement.
750,000	National Institute of Child Health and Human Development	Director, Division of Contracts and Grants.
750,000	National Institute of Allergy and Infectious Diseases	Do.
500,000	National Institute of Neurological and Communicative Disorders and Stroke	Do.
	National Library of Medicine	
500,000	Research and development awards	Director, Division of Contracts and Grants.
250,000	Other than research and development	Director, Division of Procurement.
250,000	National Institute of Dental Research	Director, Division of Contracts and Grants.
250,000	National Institute of Arthritis, Metabolism and Digestive Diseases	Do.
750,000	Centralized procuring activity for all other National Institutes of Health Research Organizations	Do.
250,000	Procurement Branch, Division of Procurement, OFS	Director, Division of Procurement.
	Health Resources and Services Administration	
500,000	Awards made by Headquarters and the Indian Health Service	Director, Division of Grants and Procurement Management.
300,000	Awards made by other than Headquarters and the Indian Health Service	Do.

7. A new Part PHS 305 is added to read as follows:

PART PHS 305—PUBLICIZING CONTRACT ACTIONS

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 305.2—Synopses of Proposed Contract Actions

PHS 305.202 Exceptions.

(b) A determination and finding has been executed by the Acting Assistant Secretary for Health after concurrence by the Administrator of the Office of Federal Procurement Policy and the Administrator of the Small Business Administration, which exempts for the period September 30, 1985 through September 29, 1988, certain acquisitions with the National Academy of Sciences (NAS) from the synopsis requirements set forth in FAR 5.201. This exemption is applicable only to acquisitions where NAS is the only source which can provide the measure of expertise, independence, objectivity, and audience acceptance necessary to meet the program requirements. To ensure that this exemption will be used only when appropriate, the agency competition advocate shall certify, prior to award, each acquisition with NAS which is not synopsized regardless of the dollar value. The certification must state that only NAS can provide the measure of expertise, independence, objectivity, and audience acceptance necessary to meet the program needs.

8. A new Part PHS 306 is added to read as follows:

PART PHS 306—COMPETITION REQUIREMENTS

Subpart PHS 306.3—Other Than Full and Open Competition

Sec.

PHS 306.304 Approval of the justification.

Subpart PHS 306.5—Competition Advocates

PHS 306.502 Duties and responsibilities.

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 306.3—Other Than Full and Open Competition

PHS 306.304 Approval of the justification.

(a)(3) The Deputy Assistant Secretary for Health, Operations, PHS, is designated as the approving official referenced in FAR 6.304(a)(3) and 306.304(a)(3).

Subpart PHS 306.5—Competition Advocates

PHS 306.502 Duties and responsibilities

(b) The competition advocates for the PHS activities shall coordinate their efforts with the PHS competition advocate, the Deputy Assistant Secretary for Health Operations.

PART PHS 314—[AMENDED]

9. Paragraph PHS 314.406–3(g)(3) is revised to read as follows:

PHS 314.407–3 Other mistakes disclosed before award.

(g)(3) In addition to the requirement in 314.406–3(g)(3), a copy of the data required by FAR 14.406–3(g)(3) shall be sent to the Office of General Counsel, Business and Administrative Law Division, Parklawn Building, Room 17A–32, 5600 Fishers Lane, Rockville, MD 20857. An information copy of the contracting officer's written statement of facts and circumstances shall be provided to the Contracts Management Branch, DGC/ORM/OM/PHS.

10. Paragraph PHS 314.406–4(e)(2) is revised to read as follows:

PHS 314.406–4 Mistakes after award.

(e)(2) The data shall be submitted as prescribed in PHS 314.406–3(g)(3).

PHS 314.407–8 [Removed]

11. PHS 314.407–8 is removed in its entirety.

PHS 314.470 [Removed]

12. PHS 314.470 is removed in its entirety.

PART PHS 315—[REMOVED]

13. Part PHS 315 is removed in its entirety.

14. A new Part PHS 323 is added to read as follows:

PART PHS 323—ENVIRONMENT, CONSERVATION, AND OCCUPATIONAL SAFETY

Subpart PHS 323.70—Safety and Health

Sec.
PHS 323.7000 Scope of subpart.
PHS 323.7001 General.
PHS 323.7002 Policy.
PHS 323.7003 Actions required.
PHS 323.7004 Contract clause.
PHS 323.7005 Solicitation notice—construction.

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 323.70—Safety and Health

PHS 323.7000 Scope of subpart.

This subpart prescribes the use of a safety and health clause in contracts involving hazardous material or operations, and procedures for developing and administering safety and health provisions.

PHS 323.7001 General.

Various statutes and regulations (e.g., Walsh-Healey Act; Service Contract Act) require adherence to minimum safety and health standards by contractors engaged in potentially hazardous work. Positive action to reduce accidents and conditions hazardous to health under all contracts is in the Government's interest since the cost of such accident and health hazards is borne by the Government through higher prices and sometimes by direct indemnification of contractors against liability claims.

PHS 323.7002 Policy.

(a) The guidance contained in FAR Subpart 23.3 shall be used for hazardous material as the primary reference. When that guidance is judged insufficient or does not meet the safety and health situation in the instant acquisition, this subpart shall be followed.

(b) Whenever the performance of a contract will require use of hazardous materials or operations, the contracting activity shall require the prime contractor and subcontractors to:

(1) Provide protection for the life and health of PHS employees, contractor employees, other persons involved with work on PHS programs and projects, and the public;

(2) Avoid accidental work interruptions which could delay progress of PHS programs and project;

(3) Maintain controls for the prevention of damage and loss to property; and

(4) Accumulate and provide data necessary for analysis of risk and loss factors relating to PHS programs and projects.

PHS 323.7003 Actions required.

(a) *Contracting activities.* Contracting activities shall use the clause set forth in PHS 352.223–70 as a guide in developing appropriate safety and health clauses for use in prospective contracts involving the following:

(1) Services or products;

(2) Research, development, or test projects;

(3) Transportation of hazardous materials; and

(4) Construction, including construction of facilities on the contractor's premises.

(b) *Safety officers.* OPDIV safety officers shall advise and assist initiators of acquisition requests and contracting officers in:

(1) Determining whether safety and health provisions should be included in a prospective contract;

(2) Selecting or developing safety and health clause provisions for incorporation in a prospective contract;

(3) Evaluating a prospective contractor's safety and health programs; and

(4) Conducting post-award review and surveillance to the extent deemed necessary.

(c) *Initiators.* Initiators of acquisition requests for items described in paragraph (a) of this section shall:

(1) During the preparation of a request for contract, and in the RFP or IFB:

(i) Ensure that hazardous materials and operations to be utilized in the performance of the contract are clearly identified; and

(ii) Coordinate with the appropriate safety officer to ensure that all hazardous materials and operations are evaluated and that adequate safety requirements are established in the RFP or IFB.

(2) During the period of performance:

(i) Apprise the contracting officer of any noncompliance with safety and health provisions identified in the contract; and

(ii) Cooperate with the safety officer in conducting review and surveillance activities.

PHS 323.7004 Contract clause.

All contracts which require the use of hazardous materials or operations shall include a clause to provide adherence to minimum safety and health standards. The clause set forth in PHS 352.223–70 may be used or appropriately modified to meet the needs of the individual contract.

PHS 323.7005 Solicitation notice—construction.

The contracting officer shall include the clause in PHS 352.223–71 in all solicitations and resultant contracts for construction and construction services.

15. A new Part PHS 333 is added to read as follows:

PART PHS 333—PROTESTS, DISPUTES, AND APPEALS

Subpart PHS 333.1–Protests

Sec.
PHS 333.102 General.
PHS 333.104 Protests to GAO.
PHS 333.105 Protests to GSBCA.

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 333.1–Protests

PHS 333.102 General.

The Division of Grants and Contracts (DGC), ORM/OM/PHS, will participate directly in the resolution of protests against PHS agencies when the Office of the Secretary, HHS, requests DGC involvement, or when DGC considers a protest action to be sensitive or controversial, or otherwise has an interest in the protest. In cases where DGC will participate, the cognizant PHS contracting office shall be notified. In those instances, all file materials and written statements normally forwarded

directly to the Departmental Protest Control Officer shall be forwarded to DGC, ORM/OM/PHS.

PHS 333.104 Protests to GAO.

(a) *General.* (2) A copy of the protest files shall be sent to the Office of General Counsel, Business and Administrative Law Division (OGC-BAL), Parklawn Building, Room 17A-32, 5600 Fishers Lane, Rockville, MD 20857. In addition, an information copy of the contracting officer's statement of facts required by 333.104(a)(2)(i) shall be sent to the Contracts Management Branch, DGC/ORM/OM/PHS.

(b) *Protests before award.* (1) The head of the contracting activity authority to approve the written finding required by FAR 33.104(b)(1) to authorize a contract award while a protest is pending, may be delegated to an organizational level no lower than the Executive Officer of each PHS Agency.

(4) The data shall be submitted as prescribed in PHS 333.104(a)(2).

(c) *Protests after award.* (1) The data shall be submitted as prescribed in PHS 333.104(a)(2).

(2) The head of the contracting activity authority to authorize contract performance notwithstanding a protest as set forth in FAR 33.104(c)(2), may be delegated to an organizational level no lower than the Executive Officer of each PHS Agency.

PHS 333.105 Protests to GSBCA.

(b) The copy of the protest file to be sent to OGC-BAL shall be sent to OGC-BAL, Parklawn Building, Room 17A-32, 5600 Fishers Lane, Rockville, MD 20857. In addition, an information copy of the contracting officer's statement of facts required by 333.105(b)(1) shall be sent to the Contracts Management Branch, DGC/ORM/OM/PHS.

18. A new Part PHS 335 is added as follows:

PART PHS 335—RESEARCH AND DEVELOPMENT CONTRACTING

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

PHS 335.000 Special determinations and findings affecting research and development contracting.

The Assistant Secretary for Health shall sign individual and class determinations and findings for:

(a) Acquisition or construction of equipment or facilities on property not owned by the United States pursuant to 42 U.S.C. 241(a)(7); and

(b) Use of an indemnification provision in a research contract pursuant to 42 U.S.C. 241(a)(7).

17. A new Part PHS 336 is added as follows:

PART PHS 336—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart PHS 336.6—Architect-Engineer Services

Sec.
PHS 336.600 Program of Requirements approval.
PHS 336.601 Funding.

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 336.6—Architect-Engineer Services

PHS 336.600 Program of Requirements approval.

The programmatic and technical requirements for PHS design projects are established in a special document known as a Program of Requirements (POR). In the case of design projects involving the construction of new space, including new facilities, replacement facilities, and building additions, the contracting officer shall ensure that the Office of the Assistant Secretary for Health has approved, or waived approval of, a POR prior to the issuance of the synopsis or solicitation for architectural/engineering services.

PHS 336.601 Funding.

(a) The contracting officer shall ensure that the agency financial management officer has identified and certified that design funds have been appropriated and apportioned prior to the release of a synopsis or solicitation for architect-engineer services for the types of acquisitions specified in PHS 336.600. New facilities, replacement facilities, and building additions must only be acquired with funds appropriated for that specific project as evidenced by either (1) specific language in an appropriations act, or (2) Congressional appropriations intent as reflected in appropriations committee reports or Congressional budget justification.

(b) In the case of ADAMHA, FDA, HRSA, and NIH, the referenced agency financial management officer is the Director of the agency's Division of Financial Management. In the case of CDC, this official is the Director of the Financial Management Office. Subject to HRSA concurrence, funding for projects of the Indian Health Service/HRSA may be certified by the designated financial management officer within the IHS Office of Administration.

(c) The funding source certification shall include identification of the title, appropriation symbol, and fiscal year of the appropriation plus any relevant project or activity description in the appropriation act or reports.

(d) In an unusual circumstance where time is critical, a synopsis or solicitation for architect-engineer services may be issued after the POR has been approved if the agency financial management officer certifies that appropriation and apportionment of proper funds as set forth in paragraph (a) above are expected within 60 days. In such cases, the synopsis or solicitation must specify that award is subject to the availability of funds. In these circumstances the contracting officer shall ensure that contract award is not made until the agency financial management officer has certified in writing that proper funds have been appropriated and apportioned. Other exceptions to the funding requirements set forth in paragraph (a) above, must be specifically approved in writing by the Office of the Assistant Secretary for Health prior to the release of a synopsis or solicitation for architect-engineer services for new facilities, replacement facilities, and building additions.

18. Subpart PHS 352.2 is amended to add sections PHS 352.223-70, PHS 352.223-71, and PHS 352.232-70:

PART PHS 352—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart PHS 352.2—Texts of Provisions and Clauses

Sec.
PHS 352.223-70 Safety and health.
PHS 352.223-71 Safety and health—construction.
PHS 352.232-70 Additional payment provision.

* * * * *

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 352.2—Texts of Provisions and Clauses

PHS 352.223-70 Safety and health.

The following clause is covered by the policy set forth in Subpart PHS 323.70 and is to be used in accordance with the instructions set forth in PHS 323.7002 and PHS 323.7003.

Safety and Health (APR 1984)

(a) In order to provide safety controls for protection to the life and health of employees and other persons; for prevention of damage to all property; and for avoidance of work interruptions in the performance of the contract; the Contractor will comply with the following standards: (Insert codes, standards, and criteria (including any applicable State and local requirements) prescribed by the Safety Officer.)

Further, the Contractor shall take or cause to be taken such additional safety measures

as the Contracting Officer may determine to be reasonably necessary; *Provided*, that, if compliance with such additional safety measures results in a material increase in the cost or time of performance of the contract, an equitable adjustment will be made in accordance with the clause of this contract entitled "Changes."

(b) Prior to commencement of work, the Contractor will submit in writing its plan for complying with the safety and health provisions of this contract, and will meet with the Contracting Officer or his/her designated representative to discuss and develop a mutual understanding relative to administration of the overall safety program.

(c) During the performance of work under this contract, the Contractor shall comply with all procedures prescribed by the Contracting Officer for the control and safety of persons visiting the job site and will comply with such requirements to prevent accidents as may be prescribed by the Contracting Officer.

(d) The Contractor will maintain an accurate record of, and report to the Contracting Officer in such manner as the Contracting Officer may prescribe, all accidents and incidents resulting in death, traumatic injury, occupational disease, and/or damage to all property incident to work performed under the contract.

(e) The Contracting Officer shall notify (if otherwise, confirm in writing) the Contractor of any noncompliance with the provisions of this clause and corrective action to be taken. After receipt of such notice, the Contractor shall immediately take such corrective action. (Such notice, when delivered to the Contractor or its representative at the site of the work, shall be deemed sufficient for the purpose.) If the Contractor fails or refuses to comply promptly, the Contracting Officer may issue an order stopping all or part of the work until satisfactory corrective action has been taken. No part of the time lost due to any such stop order shall be the subject of claim for extension of time or for costs or damages by the Contractor.

(f) The Contractor shall insert the substance of this clause in each subcontract involving the use of hazardous materials or operations. Compliance with the provisions of this clause by subcontractors will be the responsibility of the Contractor.

(End of clause)

PHS 352.223-71 Safety and health—construction.

The following clause shall be included in all solicitations and resultant contracts for construction and construction services, as required by PHS 323.7005.

Safety and Health—Construction (APR 1984)

Your attention is invited to the regulations issued by the Secretary of Labor pursuant to section 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 333) entitled "Safety and Health Regulations for Construction" (29 CFR Part 1926). The Contractor is required to comply with the referenced regulations to the extent that the resultant contract involves construction.

(End of clause.)

PHS 352.232-70 Additional payment provision.

The following clause shall be included in all solicitations and resultant contracts for construction which contain the "Payments Under Fixed-Price Construction Contracts" clause set forth in FAR 52.232-5:

Additional Payment Provision (APR 1984)

Unless otherwise stated in this contract, there will be taken into consideration in computing progress payments material that will be incorporated into the structure if such material is delivered at the site, or is delivered to the Contractor and properly stored by it in a suitable warehouse, storage yard, or similar place either within 25 miles of the site or as otherwise approved by the Contracting Officer. Before each payment is made, the Contractor shall furnish to the Contracting Officer such evidence as he/she may require of the quantity and value of such material and that it will be incorporated into the structure. If such material is stored off the site, the Contractor shall also furnish to the Contracting Officer, before payment, properly executed bills of sale to the Government for the delivered material upon which such payment is to be made.

(End of clause)

19. Section PHS 352.280-1 is revised to read as follows:

PHS 352.280-1 Protection of human subjects.

The policy and procedures to be followed whenever individuals may be involved as subjects in research activities supported or conducted by the Department under a contract are provided in Subpart PHS 380.1 and 45 CFR Part 46, Protection of Human Subjects.

(a) The following provisions shall be included in solicitations expected to involve human subjects:

Notice to Offerors of Requirements of 45 CFR Part 46, Protection of Human Subjects (Sep 1985)

(a) Copies of the Department of Health and Human Services (Department) regulations for the protection of human subjects, 45 CFR Part 46, are available from the Office for Protection from Research Risks (OPRR), National Institutes of Health, Bethesda, Maryland 20892. The regulations provide a systematic means, based on established ethical principles, to safeguard the rights and welfare of individuals who participate as subjects in research activities supported or conducted by the Department.

(b) The regulations define a human subject as a living individual about whom an investigator (whether professional or student) conducting research obtains (1) data through intervention of interaction with the individual, or (2) identifiable private information. The regulations extend to the use of human organs, tissue, and body fluids from individually identifiable human subjects as well as to graphic, written, or recorded information derived from individually identifiable human subjects. The use of autopsy materials is governed by applicable State and local law and is not directly regulated by 45 CFR Part 46.

(c) Activities in which the only involvement of human subjects will be in one or more of the categories set forth in 45 CFR 46.101(b)(1-6) are exempt from coverage.

(d) Inappropriate designations of the non-involvement of human subjects or of exempt categories of research in a project may result in delays in the review of a proposal. The Public Health Service will make a final determination of whether the proposed activities are covered by the regulations or are in an exempt category, based on the information provided in the proposal. In doubtful cases, *prior consultation with OPRR, (telephone: 301-496-7014), is recommended.*

(e) In accordance with 45 CFR Part 46, prospective Contractors being considered for award shall be required to file with OPRR an acceptable Assurance of Compliance with the regulations, specifying review procedures and assigning responsibilities for the protection of human subjects. The initial and continuing review of a research project by an institutional review board shall assure that the rights and welfare of the human subjects involved are adequately protected, that the risks to the subjects are reasonable in relation to the potential benefits, if any, to the subjects and the importance of the knowledge to be gained, and that informed consent will be obtained by methods that are adequate and appropriate. Prospective Contractors proposing research that involves human subjects shall be contacted by OPRR and given detailed instructions for establishing an institutional review board and filing an Assurance of Compliance.

(f) It is recommended that OPRR be consulted for advice or guidance concerning either regulatory requirements or ethical issues pertaining to research involving human subjects.

(End of provision)

(b) The following clause shall be included in contracts involving human subjects:

Protection of Human Subjects (Sep 1985)

(a) The Contractor agrees that the rights and welfare of human subjects involved in research under this contract shall be protected in accordance with 45 CFR Part 46 and with the Contractor's current Assurance of Compliance on file with the Office for Protection for Research Risks, National Institutes of Health, Public Health Service. The Contractor further agrees to provide certification at least annually that the institutional review board has reviewed and approved the procedures which involve human subjects in accordance with 45 CFR Part 46 and the Assurance of Compliance.

(b) The Contractor shall bear full responsibility for the performance of all work and services involving the use of human subjects under this contract in a proper

manner and as safely as is feasible. The parties hereto agree that the Contractor retains the right to control and direct the performance of all work under this contract. Nothing in this contract shall be deemed to constitute the Contractor or any subcontractor, agent or employee of the Contractor, or any other person, organization, institution, or group of any kind whatsoever, as the agency or employee of the Government. The Contractor agrees that it has entered into this contract and will discharge its obligations, duties, and undertakings and the work pursuant thereto, whether requiring professional judgement or otherwise, as an independent Contractor without imputing liability on the part of the Government for the acts of the Contractor or its employees.

(End of clause)

20. PHS 352.280–2 is revised to read as follows:

PHS 352.280–2 Care of laboratory animals.

The policies and procedures to be used when contracts involve live vertebrate animals are provided in Subpart PHS 380.2, and in the *PHS Policy on Humane Care and Use of Laboratory Animals by Awardee Institutions* and accompanying implementation instructions published in a special edition of the *NIH Guide for Grants and Contracts*, Vol. 14, No. 8, June 25, 1985.

(a) The following provision shall be included in solicitations expected to involve vertebrate animals:

Notice To Offerors of Requirement for Adequate Assurance of Protection of Vertebrate Animal Subjects (Sep 1985)

The *PHS Policy on Humane Care and Use of Laboratory Animals by Awardee Institutions* establishes a number of requirements for research activities involving animals. Before a PHS award may be made to an applicant organization, the organization shall file, with the Office for Protection from Research Risks (OPRR), National Institutes of Health (NIH), PHS, a written Animal Welfare Assurance which commits the organization to comply with the provisions of the *PHS Policy on Humane Care and Use of Laboratory Animals by Awardee Institutions*, the Animal Welfare Act, and the *Guide for the Care and Use of Laboratory Animals* prepared by the Institute of Laboratory Animal Resources. In accordance with the *PHS Policy on Humane Care and Use of Laboratory Animals by Awardee Institutions*, applicant organizations must establish a committee, qualified through the experience and expretise of its members, to oversee the institution's animal program, facilities and procedures. No PHS award involving the use of animals shall be made unless the Animal Welfare Assurance has been approved by OPRR. Prior to award, the contracting officer will notify Contractor(s) selected for projects that involve live vertebrate animals that an Animal Welfare Assurance is required. The contracting officer will request that OPRR negotiate an acceptable Animal Welfare Assurance with those Contractor(s). *For further information, OPRR may be contacted at NIH, Bethesda, Maryland 20892 (301–496–7041).*

(End of provision)

(b) The following clause shall be included in all contracts involving research on vertebrate animals:

Care of Live Vertebrate Animals (Sep 1985)

(a) Before undertaking performance of any contract involving research on live vertebrate animals, the Contractor shall register with the Secretary of Agriculture of the United States in accordance with 7 U.S.C. 2316 and 9 CFR 2.25–2.28. The Contractor shall furnish evidence of such registration to the Contracting Officer.

(b) The Contractor shall acquire vertebrate animals used in research from a dealer licensed by the Secretary of Agriculture under 7 U.S.C. 2133 and 9 CFR 2.1–2.11, or from a source that is exempt from licensing under those sections.

(c) The Contractor agrees that the care and use of any live vertebrate animals used or intended for use in the performance of this contract will conform with the *PHS Policy on Humane Care and Use of Laboratory Animals by Awardee Institutions*, the current Animal Welfare Assurance, the *Guide for the Care and Use of Laboratory Animals* prepared by the Institute of Laboratory Animal Resources and the pertinent laws and regulations of the United States Department of Agriculture (see 7 U.S.C. 2131 *et seq.* and 9 CFR Subchapter A, Parts 1–4). In case of conflict between standards, the more stringent standard shall be used.

Note.—The Contractor may request registration of its facility and a current listing of licensed dealers from the Regional Office of the Animal and Plant Health Inspection Service (APHIS), USDA, for the region in which its research facility is located. The location of the appropriate APHIS Regional Office, as well as information concerning this program may be obtained by contacting the Senior Staff Officer, Animal Care Staff, USDA/APHIS, Federal Center Building, Hyattsville, Maryland 20782.

(End of clause)

PHS 352.280–4 [Amended]

21. Paragraph (d) of Clause 6, Payment (June 1977), in PHS 352–280–4(a) is amended by adding the phrase "the Contractor to" between the phrases "shall be paid by" and "the Government, to the extent."

22. Subpart PHS 380.1 is revised to read as follows:

PART PHS 380—SPECIAL PROGRAM REQUIREMENTS AFFECTING PHS ACQUISITIONS

Subpart PHS 380.1—Acquisitions Involving Human Subjects

Sec.

PHS 380.101 Applicability.
PHS 380.102 Policy.
PHS 380.103 Assurances.
PHS 380.104 Notice to offerors.
PHS 380.105 Contract clause.

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 380.1—Acquisitions Involving Human Subjects

PHS 380.101 Applicability.

This subpart applies to all research and development contracts involving human subjects except those that are exempt by Secretarial waiver under 45 CFR 46.101(e) or exempt under 45 CFR 46.101(b).

PHS 380.102 Policy.

(a) Safeguarding the rights and welfare of human subjects in activities under Public Health Service (PHS) research and development contracts is the responsibility of each institution that receives or is accountable to PHS for funds awarded for the conduct of that activity. To assure that this institutional responsibility is met, PHS shall not permit a nonexempt research activity involving human subjects to be undertaken unless the institution has an assurance on file with the Office for Protection from Research Risks (OPRR), NIH/PHS, and has filed a certification that an institutional review board (IRB) has reviewed and approved the activity in accordance with 45 CFR Part 46.

(b) Contracts involving human subjects will not be awarded to an individual unless he/she is affiliated with or sponsored by an institution which can and will assume responsibility for safeguarding the human subjects involved.

PHS 380.104 Assurances.

In accordance with 45 CFR 46.103, OPRR is responsible for negotiation of assurances covering all PHS-supported research activities involving human subjects. Consultation with OPRR (telephone: 301–496–7041) is recommended on issues regarding assurances, certification of IRB review and approval, and interpretation of the regulations for the protection of human subjects in 45 CFR 46.

PHS 380.105 Notice to offerors.

Solicitations shall contain the notice to offerors set forth in PHS 352–280–1(a) whenever contract performance is expected to involve human subjects.

PHS 380.105 Contract clause.

The clause set forth in PHS 352.280–1(b) shall be inserted in all contracts involving human subjects.

23. Subpart PHS 380.2 is revised to read as follows:

BEST COPY AVAILABLE

PART PHS 380—SPECIAL PROGRAMS REQUIREMENTS AFFECTING PHS ACQUISITIONS

* * * * *

Subpart PHS 380.2—Acquisitions Involving the Use of Laboratory Animals

Sec.

PHS 380.201 Scope of subpart.
PHS 380.202 Definitions.
PHS 380.203 Policy.
PHS 380.204 Applicability.
PHS 380.205 Contractor implementation.

* * * * *

Authority: 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart PHS 380.2—Acquisitions Involving the Use of Laboratory Animals

PHS 380.201 Scope of subpart.

This subpart describes Public Health Service (PHS) contracts for projects or activities involving animals, and the responsibilities of the PHS agencies and subordinate elements for implementing policies and procedures described herein.

PHS 380.202 Definitions.

(a) *Animal.* Any live, vertebrate animal used or intended for use in research, research training, experimentation or biological testing or for related purposes.

(b) *Animal facility.* Any building, room, area, enclosure, or vehicle, including satellite facility, used for animal confinement, transport, maintenance, breeding or experiments of surgical manipulation. A satellite facility is any containment outside of a core facility or centrally designated or managed area in which animals are housed for more than 24 hours.

(c) *Animal Welfare Act.* Pub. L. 89–544, 1966, as amended (Pub. L. 91–579 and Pub. L. 94–279) 7 U.S.C. 2131 et seq. Implementing regulations are published in the Code of Federal Regulations (CFR), Title 9, Subchapter A, Parts 1, 2, 3, and 4, and are administered by the U.S. Department of Agriculture.

(d) *Animal Welfare Assurance or Assurance.* The documentation from an awardee or a prospective awardee institution assuring institutional compliance with this policy.

(e) *Guide. Guide for the Care and Use of Laboratory Animals,* NIH Pub. No. 85–23, 1985 edition or succeeding revised editions.

(f) *Institution.* Any public or private organization, business, or agency (including components of Federal, State and local governments).

(g) *Institutional official.* An individual who has the authority to sign the institution's Assurance, making a commitment on behalf of the institution that the requirement of this subpart will be met.

(h) *Public Health Service.* The Public Health Service includes the Office of the Assistant Secretary for Health; the Alcohol, Drug Abuse, and Mental Health Administration; the Centers for Disease Control; the Food and Drug Administration; the Health Resources and Services Administration; and the National Institutes of Health.

(i) *Quorum.* A majority of the members of the Institutional Animal Care and Use Committee.

PHS 380.203 Policy.

It is the policy of PHS to require institutions to establish and maintain proper measures to ensure the appropriate care and use of all animals involved in research, research training and biological testing (hereinafter referred to as activities) supported by PHS. PHS endorses the "U.S. Government Principles for the Utilization and Care of Vertebrate Animals Used in Testing, Research and Training" developed by the Interagency Research Animal Committee (IRAC). This policy is intended to implement and supplement those Principles.

PHS 380.204 Applicability.

(a) This policy is applicable to all PHS-supported activities involving animals, whether the activities are performed at an awardee institution, or any other institution, in the United States, the Commonwealth of Puerto Rico, or any territory or possession of the United States. Institutions in foreign countries receiving PHS support for activities involving animals shall comply with this policy, or provide evidence to PHS that acceptable standards for the humane care and use of the animals in PHS-supported activities will be met.

(b) No PHS support for an activity involving animals will be provided to an individual unless that individual is affiliated with or sponsored by an institution which can and does assume responsibility for compliance with this policy for PHS-supported activities, or unless the individual makes other arrangements with PHS.

(c) This policy does not supercede or preempt applicable State or local laws or regulations which impose more stringent standards for the care and use of laboratory animals. All institutions are required to comply, as applicable, with the Animal Welfare Act, and other Federal statutes and regulations relating to animals.

PHS 380.205 Contractor implementation.

(a) *Animal Welfare Assurance.* No activity involving animals will be supported by PHS until the institution conducting the activity has provided a written Assurance acceptable to PHS, setting forth compliance with the policy in this subpart for PHS-supported activities. Assurances shall be submitted to OPRR, Office of the Director, National Institutes of Health, 9000 Rockville Pike, Building 31, Room 4B09, Bethesda, Maryland 20892. The Assurance shall be typed on the institution's letterhead and signed by an institutional official. OPRR will provide the applicant institution with necessary instructions and an example of an acceptable Assurance. All Assurances submitted to PHS in accordance with the policy will be evaluated by OPRR to determine the adequacy of the institution's proposed program for the care and use of animals in PHS-supported activities. On the basis of this evaluation, OPRR may approve or disapprove the Assurance, or negotiate an acceptable Assurance with the institution. Approval of an Assurance will be for a specified period of time (no longer than five years) after which time the institution must submit a new Assurance to OPRR. OPRR may limit the period during which any particular approved Assurance shall remain effective or otherwise condition, restrict, or withdraw approval. Without an applicable PHS approved Assurance, no PHS-supported activity involving animals at the institution will be permitted to continue.

(1) *Institutional program for animal care and use.* The Assurance shall fully describe the institution's program for the care and use of animals in PHS-supported activities. PHS requires institutions to use the *Guide for the Care and Use of Laboratory Animals* (*Guide*) as a basis for developing and implementing an institutional program for activities involving animals. The program description must include the following:

(i) A list of every branch and major component of the institution, as well as a list of every branch and major component of any institution which is to be included under the Assurance;

(ii) The lines of authority and responsibility for administering the program and ensuring compliance with this policy;

(iii) The qualifications, authority and responsibility of the veterinarian(s) who will participate in the program;

(iv) The membership list of the Institutional Animal Care and Use

Committee(s) (IACUC) [1] established in accordance with the requirements set forth in this subpart;

(v) The procedures which the IACUC will follow to fulfill the requirements set forth in this subpart;

(vi) The health program for personnel who work in laboratory animal facilities or have frequent contact with animals;

(vii) The gross square footage of each animal facility (including satellite facilities), the species housed therein and the average daily inventory, by species, of animals in each facility; and

(viii) Any other pertinent information requested by OPRR.

(2) *Institutional status.* Each institution must assure that its program and facilities are in one of the following categories:

(i) *Category 1*—Accredited by the American Association for the Accreditation of Laboratory Animal Care (AAALAC). All of the institution's programs and facilities (including satellite facilities) for activities involving animals have been evaluated and accredited by AAALAC, or another accrediting body recognized by PHS.[2]

(ii) *Category 2*—Evaluated by the Institution. All of the institution's programs and facilities (including satellite facilities) for activities involving animals have been evaluated by the IACUC and will be reevaluated by the IACUC at least once each year. The IACUC shall use the *Guide* as a basis for evaluating the institution's program and facilities.

A report of the IACUC evaluation shall be submitted to the institutional official and updated on an annual basis.[3] The initial report shall be submitted to OPRR with the Assurance. Annual reports of the IACUC evaluation shall be maintained by the institution and made available to OPRR upon request. The report must contain a description of the nature and extent of the institution's adherence to the *Guide* and this policy.[4] The report must identify specifically any departures from provisions of the *Guide* and this policy, and state the reasons for each departure. If program or facility deficiencies are noted, the report must contain a reasonable and specific plan and schedule for correcting each deficiency. The report must distinguish significant deficiencies from minor deficiencies. A significant deficiency is one which, in the judgment of the IACUC and the institutional official, is or may be a threat to the health or safety of the animals. Failure of the IACUC to conduct an annual evaluation and submit the required report to the institutional official may result in PHS withdrawal of its approval of the Assurance.

(3) *Institutional Animal Care and Use Committee (IACUC).* (i) Each institution shall appoint an Institutional Animal Care and Use Committee (IACUC), qualified through experience and expertise of its members, to oversee the institution's animal program, facilities and procedures.

(ii) The Assurance must include the names, position titles and credentials of the IACUC chairperson and the members. The committee shall consist of not less than five members, and shall include at least:

(A) One Doctor of Veterinary Medicine, with training or experience in laboratory animal science and medicine, who has direct or delegated program responsibility for activities involving animals at the institution;

(B) One practicing scientist experienced in research involving animals;

(C) One member whose primary concerns are in a nonscientific area (for example, ethicist, lawyer, member of the clergy); and

(D) One individual who is not affiliated with the institution in any way other than as a member of the IACUC, and is not a member of the immediate family of a person who is affiliated with the institution.

(iii) An individual who meets the requirements of more than one of the categories detailed in PHS 360.205(d)(2)(i)-(iv) above, may fulfill more than one requirement. However, no committee may consist of less than five members.

(b) *Functions of the Institutional Animal Care and Use Committee.* As an agent of the institution, the IACUC shall, with respect to PHS-supported activities:

(1) Review at least annually the institution's program for humane care and use of animals;

(2) Inspect at least annually all of the institution's animal facilities, including satellite facilities;

(3) Review concerns involving the care and use of animals at the institution;

(4) Make recommendations to the institutional official regarding any aspect of the institution's animal program, facilities or personnel training;

(5) Review and approve, require modifications in (to secure approval), or withhold approval of those sections of PHS applications or proposals related to the care and use of animals, as specified in PHS 360.205(f) of this subpart;

(6) Review and approve, require modifications in (to secure approval), or withhold approval of proposed significant changes regarding the use of animals in ongoing activities; and

(7) Be authorized to suspend an activity involving animals in accord with specifications set forth in this subpart.

(c) *Review of applications and proposals.* In order to approve applications and proposals or proposed changes in ongoing activities, the IACUC shall conduct a review of those sections related to the care and use of animals and determine that the proposed activities are in accordance with this policy. In making this determination, the IACUC shall confirm that the activity will be conducted in accordance with the Animal Welfare Act insofar as it applies to the activity, and that the activity is consistent with the *Guide*, unless the IACUC determines that acceptable justification for a departure is presented. Furthermore, the IACUC shall determine that the activity conforms with the institution's Assurance and meets the following requirements:

(1) Procedures with animals will avoid or minimize discomfort, distress and pain to the animals, consistent with sound research design.

(2) Procedures that may cause more than momentary or slight pain or distress to the animals will be performed with appropriate sedation, analgesia, or anesthesia, unless the procedure is justified for scientific reasons in writing by the investigator.

(3) Animals that would otherwise experience severe or chronic pain or distress that cannot be relieved will be painlessly sacrificed at the end of the procedure or, if appropriate, during the procedure.

---

[1] The name Institutional Animal Care and Use Committee (IACUC) as used in this policy is intended as a generic term for a committee whose function is to ensure that the care and use of animals in PHS-supported activities is appropriate and humane in accordance with this policy. However, each institution may identify the committee by whatever name it chooses. Membership and responsibilities of the IACUC are set forth in PHS 360.205(d).

[2] As of the issuance date of this policy the only accrediting body recognized by PHS is the American Association for Accreditation of Laboratory Animal Care (AAALAC).

[3] The IACUC may, at its discretion, determine the best means of conducting an evaluation of the institution's programs and facilities. The IACUC may invite ad hoc consultants to conduct or assist in conducting the evaluation. However, the IACUC remains responsible for the evaluation and report.

[4] If some of the institution's facilities are accredited by AAALAC or other accrediting body recognized by PHS, the report should identify those facilities and need not contain any further information about evaluation of those facilities.

(4) The living conditions of animals will be appropriate for their species and contribute to their health and comfort. The housing, feeding and nonmedical care of the animals will be directed by a veterinarian or a scientist trained and experienced in the proper care, handling and use of the species being maintained or studied.

(5) Medical care for animals will be available and provided as necessary by a qualified veterinarian.

(6) Personnel conducting procedures on the species being maintained or studies will be appropriately qualified and trained in those procedures.

(7) Methods of euthanasia used will be consistent with the recommendations of the American Veterinary Medical Association (AVMA) Panel of Euthanasia [8], unless a deviation is justified for scientific reasons in writing by the investigator.

PHS 360.209 Public Health Service implementation.

(a) *Responsibility of the Office for Protection from Research Risks (OPRR).* OPRR is responsible for the general administration and coordination of this policy and will:

(1) Request and negotiate, approve or disapprove, and, as necessary, withdraw approval of Assurances;

(2) Distribute to executive secretaries of initial review and technical evaluation groups, and to PHS contracting offices, lists of institutions that have an approved Assurance;

(3) Advise contracting offices and awardee institutions concerning the implementation of this policy;

(4) Evaluate allegations of noncompliance with this subpart;

(5) Have the authority to review and approve or disapprove waivers of this subpart (see paragraph (d) of this section); and

(6) With other PHS officials, conduct site visits to selected institutions.

(b) *Responsibilities of PHS contracting offices.* PHS contracting offices shall not make an award for an activity involving animals unless the institution submitting the application or proposal is on the list of institutions that have an approved Assurance of file with OPRR, and the institutional official has provided verification of approval by the IACUC of those sections of the application or proposal related to the care and use of animals. If an institution is not listed, the contracting office shall ask OPRR to negotiate an Assurance with the institution before an award is made. No award shall be made until the Assurance has been submitted by the institution, approved by OPRR, and the institution has provided verification of approval by the IACUC of those sections of the application or proposal related to the care and use of animals in PHS-supported activities.

(c) *Conduct of special reviews/site visits.* Each awardee institution is subject to review at any time by PHS staff and advisors, which may include a site visit, to assess the adequacy of the institution's compliance with this policy.

(d) *Waiver.* Institutions may request a waiver of a provision of this policy by submitting a request to OPRR. No waiver will be granted unless sufficient justification is provided, and the waiver is approved in writing by OPRR.

Proposed Rules

Federal Register
Vol. 51, No. 108
Thursday, June 5, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86-CE-13-AD]

Airworthiness Directives; Cessna Models 208 and 208A Airplanes

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice to adopt a new Airworthiness Directive (AD), applicable to all Cessna Models 208 and 208A airplanes. This AD would require modification of the airplane fuel system by adding frangible safety wires to secure the wing fuel tank selectors in the "on" position. In addition, the proposal would require a temporary instructional placard and temporary revision of the Pilots Operating Handbook and Airplane Flight Manual (POH/AFM) to inform the owner/operator of the procedures required because of the modification to the wing fuel tank selectors. Reports have been received of forced landings believed to have been caused by fuel starvation due to attempting takeoff with both wing fuel tank selectors in the "off" position. The proposed actions will help preclude fuel starvation during takeoff due to improper positioning of the wing fuel tank selectors.

DATES: Comments must be received on or before July 7, 1986.

ADDRESSES: Documents applicable to this AD may be obtained from the Rules Docket at the address below. Send comments on the proposal in duplicate to Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 86-CE-13-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Paul O. Pendleton, Aerospace Engineer, Aircraft Certification Office ACE-140W, FAA, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946-4437.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Director before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. Comments are specifically invited on the overall regulatory, economic, environmental and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA public contact concerned with the substance of this proposal will be filled in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86-CE-13-AD, Room 1558, 601 East 12th Street Kansas City, Missouri 64106.

Discussion

Reports have been received of engine power loss due to fuel starvation and subsequent forced landings involving Cessna Models 208 and 208A airplanes. The fuel starvation is believed to have occurred because takeoff was attempted with both wing fuel tank selectors in the "off" position. With these selectors in the "off" position, the only fuel supply available for use is that contained in the fuel reservoir. Cessna is currently developing a fuel system modification which will preclude this situation of fuel mismanagement. Cessna has also developed warning placards and revised operational emergency procedures for inadvertent fuel flow interruption. The FAA has determined that these placards and revised procedures are needed as an interim measure and an Adopted Rule AD is currently being issued to require their installation and use. Additionally, the FAA has determined that further interim action is required until such time as the Cessna fuel system modification becomes available. Thus, the FAA proposes an AD requiring modification of the wing fuel tank selectors by adding frangible safety wires to insure the selectors are in the "on" position for takeoff, plus a temporary instructional placard and a temporary POH/AFM revision to inform the owner/operator of the procedures required due to the modification of the wing fuel tank selectors.

Since the condition described is likely to exist or develop in other Cessna Models 208 and 208A airplanes of the same design, the AD would require modification of the fuel system by the addition of frangible safety wires to the wing fuel tank selectors, the addition of a temporary instructional placard and a temporary POH/AFM revision. The FAA has determined there are approximately 100 airplanes affected by the proposed AD. The cost of modifying these airplanes as required by the proposed AD is estimated to be $30 per airplane. The total cost is estimated to be $3,000 to the private sector.

The cost is so small that compliance with the proposal will not have a significant financial impact on any small entities owning affected airplanes. Therefore, I certify that this action (1) is not a major rule under the provisions of Executive Order 12291, (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation has been prepared for this action and has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the FAR as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Cessna: Applies to Models 208 and 208A (all serial numbers) airplanes certificated in any category.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent fuel starvation during takeoff due to improper positioning of the wing fuel tank selectors, accomplish the following:

(a) Modify the wing fuel tank selectors as follows:

(1) Place both selectors in the "on" positions.

(2) While holding a metal sheet under the selectors, drill a 0.032 inch (0.81 mm) diameter hole in each selector knob as shown in Figure 1 of this AD.

(3) Replace the existing screw currently installed between the selectors with an AN 502-10-10 screw as shown in Figure 1 of this AD.

(4) Safety wire each selector knob separately to the screw (installed per paragraph (a)(3) of this AD) using the holes drilled per paragraph (a)(2) of this AD and 0.015 inch (0.384mm) frangible copper safety wire (Cessna Part Number 30310).

Note.—Refer to A.C. 65-9, Chapter 8, Pages 119-120 for standard safety wiring methods.

(b) Revise the airplane Pilot's Operating Handbook and Airplane Flight Manual (POH/AFM) by adding the Temporary AFM Supplement shown in the Appendix of this AD.

(c) Fabricate and install adjacent to the wire fuel tank selectors the following placard using letters of a minimum of 0.10 inch (2.56 mm) in height:

"SEE TEMPORARY AFM SUPPLEMENT FOR FUEL SYSTEM OPERATION. BREAK SAFETY WIRE ON FUEL SELECTORS ONLY IN CASE OF AN EMERGENCY."

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Aircraft Certification Office, FAA, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209.

Issued in Kansas City, Missouri, on May 22, 1986.

Edwin S. Harris,

Director, Central Region.

SELECTOR KNOB DETAIL

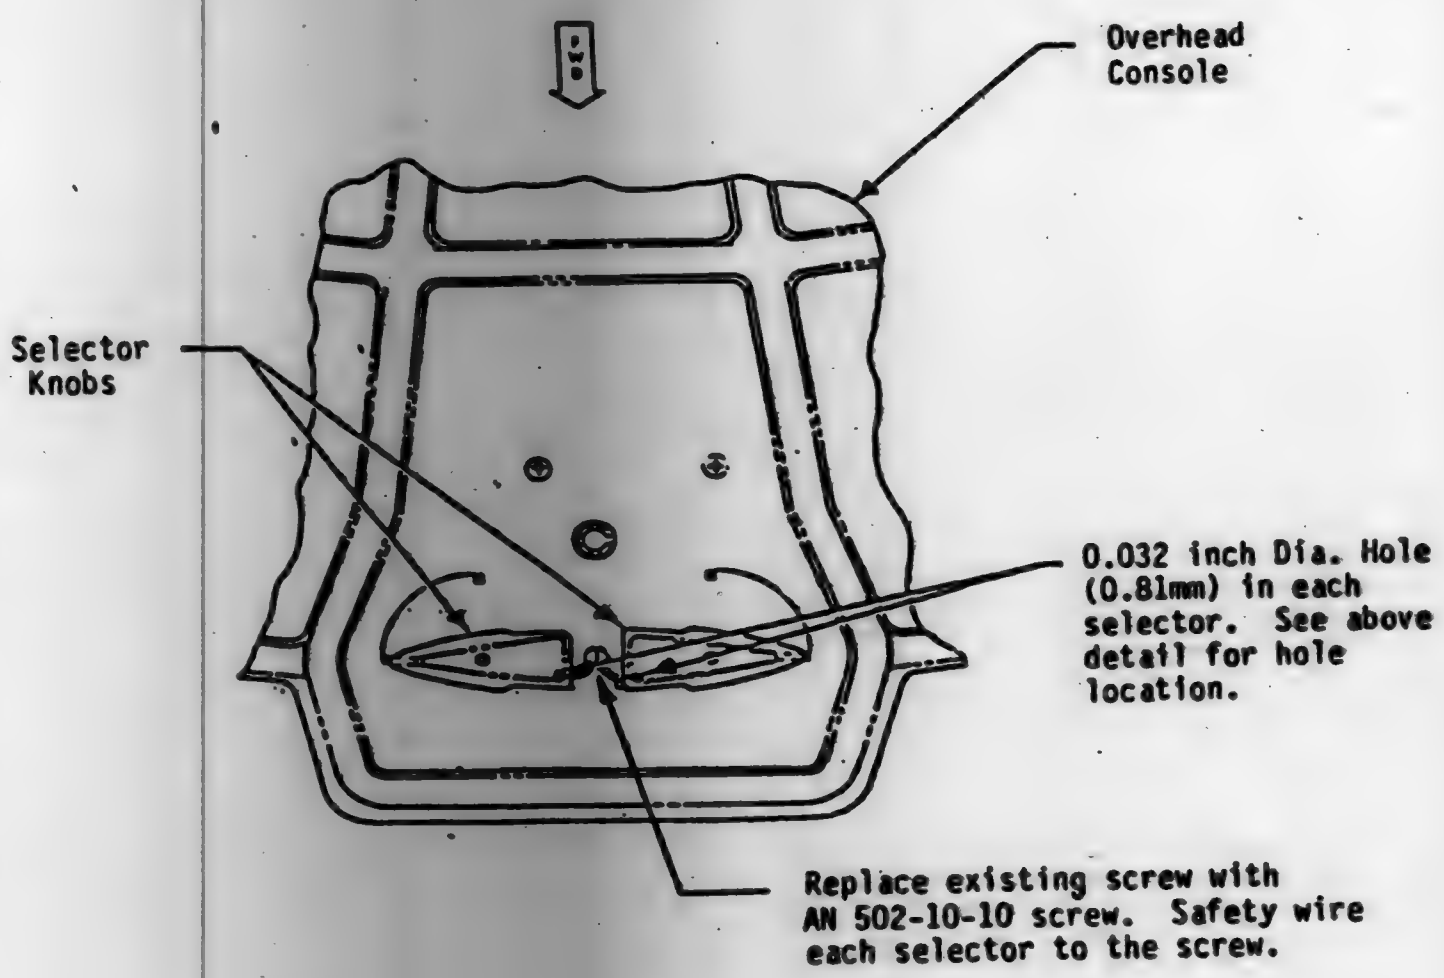

FIGURE 1.

BILLING CODE 4910-13-C

Appendix—Cessna Model 208/208A, Temporary Airplane Flight Manual Supplement

Temporary Fuel System Limitation and Operators Procedures

The fuel tank selector value knobs must be safety wired in the "ON" position as described in this AD. Any reference in the POH/AFM, in any section other than Section 3, Emergency Procedures, pertaining to shutting one or both fuel valves "OFF", must be disregarded and the values are both to remain "ON" for all normal operations. Emergency Procedures as specified in Section 3 of the POH/AFM are unchanged. If it becomes necessary to accomplish any Emergency Procedures where one or both fuel valves are to shut off, exert enough force to break the safety wire.

If one or both valves are turned off, resafety the selector valve knobs before the next flight.

It should be noted that the 200 pounds maximum fuel unbalance limit still applies. Therefore, to minimize uneven fuel feed and/or transfer between tanks, the airplane should be parked on a level ramp whenever possible and should be flown in a coordinated fashion to the extent possible. If fuel has transferred while the aircraft is parked, such that one tank has more than 200 pounds more fuel than the other, the fuel load must be rebalanced within limits before flight by defueling and/or refueling or by reparking with the fuller tank high on a sloping ramp.

If fuel does not feed evenly in flight, rudder trim should be reset to bias the ball in the slip-skid indicator approximately but not to exceed one-fourth (¼) ball towards the wing with the lesser fuel quantity to allow fuel to burn from the heavier tank. When operating in this condition, the fuel quantity indicator accuracy will be affected and the airplane will periodically have to be returned to coordinated flight to monitor the fuel quantity indicators to determine the balance situation. Under these conditions the fuel should be consumed from the heavier tank at least at a rate approximately equal to the fuel flow of the engine (e.g.: at an engine fuel flow rate of 335 pounds per hour, fuel should rebalance at a rate of approximately five pounds per minute. At this fuel flow, with a 100 pound unbalance, it will take approximately 20 minutes in a one-fourth (¼) ball out of trim condition to correct the unbalance.) If the above procedures do not result in maintaining equal fuel balance, land the airplane prior to exceeding the 200 pound unbalance limit.

When refueling after "topping" each tank (when full fuel is desired) the opposite tank should be "re-topped" to allow for any transfer that has occurred during refueling.

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 841 0038]

The North Carolina Orthopaedic Association; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would, among other things, prohibit The North Carolina Orthopaedic Assoc. from placing unreasonable restrictions against podiatrists seeking access to hospital facilities or surgical privileges and not to induce hospitals or medical staffs to deny such privileges to qualified podiatrists.

DATE: Comments will be received until August 4, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th Street and Pennsylvania Avenue, NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Harold Kirtz, Atlanta Regional Office, Federal Trade Commission, 1718 Peachtree Street, NW., Atlanta, GA 30367. (404) 881-4836.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Agreement Containing Consent Order To Cease and Desist

In the matter of the North Carolina Orthopaedic Association, a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of the North Carolina Orthopaedic Association, a non-profit corporation, hereinafter sometimes referred to as proposed respondent, and it now appearing that proposed respondent is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by and between the North Carolina Orthopaedic Association, by its duly authorized officers and its attorneys, and counsel for the Federal Trade Commission that:

1. Proposed respondent is a non-profit corporation organized, existing, and doing business under and by virtue of the laws of the State of North Carolina.

2. Proposed respondent admits all of the jurisdictional facts set forth in paragraphs one through eight of the draft of the complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of the complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information with respect thereto will be publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the North Carolina Orthopaedic Association, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement

purposes only and does not constitute an admission by the North Carolina Orthopaedic Association that the law has been violated as alleged in the draft compliant here attached.

6. This agreement contemplates that, if it is accepted by the Commission and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to the North Carolina Orthopaedic Association, (1) issue its complaint corresponding in form and substance to the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect as and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to the address of proposed respondent's counsel, George L. Little, Jr., and F. Joseph Treacy, Jr., of Petree, Stockton, Robinson, Vaughn, Glaze, & Maready, 1001 West Fourth Street, Winston-Salem, North Carolina 27101, shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. The North Carolina Orthopaedic Association has read the proposed complaint and order comtemplated thereby. Proposed respondent understands that, once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is so ordered that, for the purpose of this order, "respondent" means the North Carolina Orthopaedic Association, a non-profit corporation, its Executive Committee, officers, representatives, agents, employees, successors, and assigns.

II

It is ordered that respondent shall cease and desist from, directly or indirectly or through any corporate or other device, in or in connection with respondent's activities as a professional non-profit association in or affecting commerce, the following:

A. Entering into, continuing, maintaining, adhering to, acquiescing in, or aiding and abetting any agreement, combination or conspiracy to unreasonably exclude, unreasonably discriminate against, or place unreasonable restrictions on any podiatrist seeking or having surgical privileges at any hospital or access to or use of any hospital facilities, when such privileges, access or use is permitted under North Carolina law;

B. Inducing or seeking to induce any hospital, hospital medical staff, physician, or other person or entity to obstruct or deny surgical privileges at any hospital or access to or use of any hospital facilities by the podiatric profession or any licensed podiatrist through any representation that is false or deceptive within the meaning of the Federal Trade Commission Act.

Provided that nothing in subpart II(B) shall prohibit respondent from making or publishing a representation for which respondent possesses a reasonable basis regarding the training, education, practice, or other qualifications of podiatrists or any individual podiatrist.

Provided further that nothing in this order shall prohibit respondent from exercising rights guaranteed by the First Amendment to the United States Constitution to petition any federal, state, or local government, executive agency or legislative body concerning legislation, rules or procedures, or to participate in any federal, state, or local administrative or judicial proceeding.

III

It is further ordered that, within sixty (60) days after the date of service of this order, respondent shall:

A. Mail or otherwise furnish a copy of this order, accompanied by the cover letter attached as Appendix I, to each person who on the date of service of this order is a member of respondent and to each person who on the date of service of this order is an executive employee of respondent;

B. Mail or personally deliver a copy of this order, accompanied by the cover letter attached as Appendix I, to the President of the North Carolina Medical Society;

C. Withdraw any policy, standard, or position regarding podiatry, if any, that is inconsistent with the terms of Part II of this order.

IV

It is further ordered that respondent shall:

A. File a written report with the Commission within ninety (90) days following the date of service of this order, and annually on the anniversary of the date of service of this order for a period of five (5) years, and at such other times as the Commission or Commission staff may by written notice to respondent require, setting forth in detail the manner and form in which it has complied with this order;

B. For five (5) years after the date of service of this order, maintain and make available to the Commission staff, for inspection and copying upon reasonable notice, any documents regarding podiatric clinical privileges or access to hospital facilities, podiatric training or education, or the appropriate scope of practice by podiatrists; and

C. For five (5) years after the date of service of this order, provide each new member and each new executive employee of the respondent, or any other employee whose responsibilities include disseminating respondent's views, with a copy of this order at the time he or she is accepted into membership or employment.

V.

It is further ordered that respondent shall notify the Commission of any proposed change in its organization at least thirty (30) days prior to the proposed change in respondent, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation or association, or any other change that may affect compliance with this order.

Appendix I

Dear [Sir or Madam]:

As you may know, on _____ the Federal Trade Commission issued a Consent Order settling charges that the North Carolina Orthopaedic Association (NCOA) has been involved in activities that restricted the lawful practice of podiatry and restrained competition between medical doctors and podiatrists. This order was entered as part of a compromise settlement in order to save NCOA the expense of defending a costly litigation and without any admission whatsoever of any wrongdoing on the part of NCOA. NCOA has not admitted that it has violated the law, nor admitted that it has done the acts alleged in the Complaint except those relating solely to jurisdiction.

Under the terms of the Order issued by the Commission, among other things, NCOA is prohibited from entering into or maintaining any agreement or conspiracy to unreasonably exclude or discriminate against any podiatrist seeking or having surgical privileges at any hospital or access to or use

of any hospital facilities, when such privileges, access or use is permitted under North Carolina law.

The Order also prohibits NCOA from inducing any hospital, hospital medical staff, physician, or other person or entity to obstruct or deny surgical privileges at any hospital or access to or use of any hospital facilities by the podiatric profession or any licensed podiatrist through any representation for which NCOA does not have a reasonable basis.

The Order, however, does not prohibit NCOA or its members from exercising their First Amendment rights to petition any legislative or executive body concerning any rules, legislation, or procedures, or participating in any administrative or judicial proceeding. The Order does not prevent any individual from engaging in unilateral conduct, in an individual capacity and not as an officer, agent or representative of NCOA.

Pursuant to the Order issued by the Federal Trade Commission, we are withdrawing all of our policies and statements relating to podiatry, if any, that are not consistent with the Order.

Your attention to these matters will be appreciated. Thank you for your cooperation.

Sincerely,

President, The North Carolina Orthopaedic Association.

[File No. 841-0038]

THE NORTH CAROLINA ORTHOPAEDIC ASSOCIATION

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from the North Carolina Orthopaedic Association ("NCOA"). The agreement would settle charges by the Commission that the proposed respondent, through certain acts and practices, has restrained competition between medical doctors and podiatrists in North Carolina, in violation of section 5 of the Federal Trade Commission Act.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Proposed Complaint

A complaint has been prepared for issuance by the Commission along with the proposed order. It alleges that NCOA agreed with some of its members and others to engage in conduct that unreasonably restrains the practice of podiatry. Specifically, the complaint alleges that NCOA entered into an agreement to take action to exclude or unreasonably discriminate against podiatrists who seek hospital privileges or access to hospital facilities within the scope of their state licenses. As part of the alleged conspiracy, NCOA passed two resolutions opposing the hospital practice of podiatry and enjoined its members to review or change hospital bylaws accordingly.

The complaint alleges that the restrictions imposed by NCOA unreasonably limited competition in the following respects:

(a) Competition based on price, quality and service in the delivery of professional health services has been lessened;

(b) The ability of patients and prospective patients to select a licensed practitioner of their choice has been hindered;

(c) The ability of podiatrists to compete with medical doctors has been restricted; and

(d) Podiatrists have been discouraged from practicing in North Carolina because of the difficulty of obtaining hospital privileges.

The Proposed Order

The proposed order prohibits NCOA from entering into or aiding and abetting any combination or conspiracy to unreasonably exclude or unreasonably discriminate against podiatrists who seek hospital privileges or access to hospital facilities when such privileges or access is authorized under state law. NCOA is also prohibited from inducing or seeking to induce any medical staff, physician, or hospital to obstuct or deny privileges to podiatrists by means of misrepresentations. However, NCOA may make statements about podiatry for which it has a reasonable basis. Further, the order does not prevent NCOA from exercising its First Amendment rights.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

[File No. 842 3209]

Saga International, Inc.; Proposed Consent Agreement With Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would, among other things, require a Compton, Calif. manufacturer and seller of ultrasonic pest-control devices to refund the full purchase price of its "Home Free" pest-control product to any consumer who bought the device after Dec. 31, 1983. Additionally, respondent would be required to provide signs for retailers to post about the availability of refunds and advertise their availability through newspaper ads. Further, respondent would be prohibited from making any performance or efficacy claims about any ultrasonic pest-control product unless it possesses and relies upon competent and reliable evidence that substantiates its claims.

DATE: Comments will be received until August 4, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Janet Grady, Director, San Francisco Regional Office, Federal Trade Commission, 450 Golden Gate Avenue, San Francisco, CA 94102. (415) 556-1270.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period for sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

[File No. 842-3209]

Agreement Containing Consent Order To Cease and Desist

In the matter of Saga International, Inc., a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Saga International, Inc., a corporation (hereinafter sometimes referred to as proposed respondent or respondent), and it now appearing that proposed respondent is willing to enter into an agreement containing an order to cease and desist from the acts and practices being investigated,

It is hereby agreed by and between Saga International, Inc., and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Saga International, Inc., is a corporation organized, existing, and doing business under and by virtue of the laws of the State of California, with its offices and principal place of business located at 1220 West Walnut Street, Compton, California 90220.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft complaint here attached.

3. Proposed respondent waives:

a. Any further procedural steps;

b. The requirement that the Commission's decision contain a statement of findings of facts and conclusions of law;

c. All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

d. All claims under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent and its attorney have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, proposed respondent will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that respondent Saga International, Inc., a corporation, its successors and assigns and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary division or other device, in connection with the advertising, offering for sale, sale or distribution of the "Home Free" ultrasonic pest control device or any other ultrasonic pest control product or device in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Representing, directly or by implication, that the Home Free or any other ultrasonic pest control product will:

(1) Eliminate cockroaches, rats, mice or other pests from a home or place of business;

(2) Eliminate rodents or insects from a home or place of business within four to six weeks, or within any other specified period of time;

(3) Protect an area where said product is in use in a home or place of business from rodents or insects, or will cause an area to be free of rodents or insects; or

(4) Serve as an effective alternative to the use of conventional products such as spray, powders, trap of other chemicals in providing protection from insect and rodent infestation.

B. Representing, directly or by implication, any performance characteristic of any ultrasonic pest control product, unless at the time of making such representation respondent possesses and relies upon competent and reliable evidence which substantiates the representation. Evidence in the form of tests, experiments, analyses, research studies, or other evaluations shall be competent and reliable only if they are conducted in an objective manner by persons qualified to do so, using procedures generally accepted in the relevant professions or sciences to yield accurate, reliable, and reproducible results.

C. Representing, directly or by implication, that any ultrasonic pest control product is effective in providing protection from insect or rodent infestation in a home or place of business, unless at the time of making such representation respondent possesses and relies upon competent and reliable evidence which either directly relates to such home or place of business use conditions, or which can properly be applied to such conditions. Evidence in the form of tests, experiments, analysis, research studies, or other evaluations shall be competent and reliable only if they are conducted in an objective manner by persons qualified to do so, using procedures generally accepted in the relevent professions or sciences to yield accurate, reliable, and reproducible results.

II

It is further ordered that respondent, its successors and assigns, and its officers, employees, agents and representatives shall provide consumer refunds in accordance with the provisions of this paragraph to any retail purchaser of the HOME FREE device who purchased the HOME FREE device from any retail outlet at any time on or after January 1, 1984.

A. Notification of Consumers

1. Respondent shall:

(a) Within sixty (60) days from the date of service of this order, cause to be distributed to each of respondent's distributors, and to each retail outlet which is known by respondent or its distributors to have purchased the HOME FREE device for resale to the public, the "Notice" set out in Attachment A to this order, to which respondent shall cause to be affixed in tablet format (in sufficient quantities to anticipate foreseeable consumer demand) the form set out in Attachment B to this order;

(b) Within sixty (60) from the date of service of this order, cause to be disseminated to each retail outlet identified in response to paragraph II A.1.(a), a request that said retail outlet prominently display said "Notice" and tablet forms;

(c) Within sixty (60) days from the date of service of this order, as to those retail outlets which together have accounted for at least 75% of respondent's sales of the HOME FREE device, take all steps necessary to cause said "Notices" to be placed in public areas within each such retail outlet where such "Notices" are most likely to be seen by customers, particularly past purchasers of the HOME FREE device; and take all steps necessary to cause such "Notices" to remain in said public areas for a continuous period of six months from the date on which such "Notices" are first placed in each such retail outlet; and

(d) Within ninety (90) days from the date of service of this order, but no sooner than respondent has complied with the provisions of paragraph II.A.1. (a), (b) and (c), cause to be published, clearly and prominently, the text of the "Notice" set out in Attachment A of this order, in display advertising format in the weekend or Sunday edition of each local newspaper in which retailer identified in paragraph 11(A) (1) (c) regularly advertises.

2. The "Notice" referred to in paragraph II.A.1 above shall consist of a free standing sign or mounted wall poster of at least 8½ by 11 inches in dimension, on which is written, verbatim, in clear and prominent print of no less than 24 point print, the text as shown in Attachment A to this order.

3. Respondent shall, within ninety (90) days from the date of service of this order, cause to be published the text of the "Notice" set out in Attachment A to this order in each market area in which respondents caused newspaper, magazine, radio, or television advertisements for the HOME FREE to be placed at any time from January 1, 1983, to the date of service of this order. The text of the "Notice" shall be published in a clear and prominent form in display advertising format in the newspaper of greatest general circulation in the market area in which each such advertisement appeared.

B. Consumer Refund Procedures

1. Any purchaser of the HOME FREE shall be entitled to a refund in accordance with the provisions of this order upon: (a) return of a HOME FREE device to any retailer who has sold the HOME FREE on or after January 1, 1984, *and* submission of either a sales receipt for the device issued by that retailer and dated on or after January 1, 1984, or a signed "affidavit" (as hereinafter defined and described); OR (b) shipment of the HOME FREE device to respondent with either a sales receipt for purchase of the device issued by a retailer and dated on or after January 1, 1984, or a signed "affidavit" (as hereinafter defined and described).

2. The "affidavit" referred to in paragraph II.B.1 shall consist of either: (a) The form affixed in tablet format to the Notices furnished to all retailers in accordance with paragraph II.A.1.(a) above, or (b) at the discretion of the person claiming the refund, a substantially equivalent written and signed statement.

3. Where a consumer returns the purchased HOME FREE device(s) to respondent or to a participating retailer for refund(s), and the claim for refund is accompanied by some statement other than the affidavit form referred to herein (as permitted by paragraph II.B.2.(b) above), and respondent or a participating retailer rejects the alternate statement as not "substantially equivalent" to the affidavit, respondent shall immediately provide the consumer, or shall cause the consumer to be provided, with an affidavit form so that the consumer may promptly obtain the refund to which the consumer is entitled under the provisions of this order.

C. Respondent's Consumer Redress Obligations

Respondent or its successors or assigns shall: (1) Cause consumer refunds to be made by the retailers to any purchaser of the HOME FREE device who returns the device and submits to the retailer either (a) a sales receipt issued by a retailer and dated on or after January 1, 1984, or (b) a signed affidavit (or its equivalent) as described in paragraph II.B.2 above; and (2) make direct consumer refunds, including the cost of postage, to any purchaser of the HOME FREE device who returns the device and submits either (a) a sales receipt issued by the retailer and dated on or after January 1, 1984, or (b) a signed affidavit (or its equivalent) as described in paragraph II.B.2 above. Any claim in compliance with Part II of this Order shall be valid if made within one calendar year of the date of service of this order and, when made directly to respondent, shall be honored by respondent within thirty (30) days of receipt of the claim.

D. Amount of Individual Refund

Any consumer shall be entitled to a refund of the full amount of the purchase price paid for each HOME FREE device purchased as proven by a sales receipt issued by a retailer. In the absence of such a receipt, a consumer shall be entitled to a refund of no more than $19.95 plus postage if the device has been shipped to respondent at the consumer's expense.

E. Respondent's Reporting Requirements

Respondent shall report to the Federal Trade Commission the status of the consumer redress program required by this agreement in accordance with the following schedule:

(1) One hundred and twenty (120) days from the date of service of this order, respondent shall advise the Commission, in writing, of the number and location (by retail establishment address) of notices placed as required by paragraph II.A.1 of this agreement and shall provide the Commission with a sample of each advertisement caused by respondent to be disseminated in accordance with the provisions of paragraph II.A.1.(d) and II.A.3. of this order, along with the schedule of publication of such advertisements; and

(2) Fifteen (15) months from the date of service of this order, respondent shall provide the Commission with a summary report of the consumer redress program which shall include, but shall not necessarily be limited to, a tabulation, on a total cumulative basis, of the number of former purchasers of the HOME FREE who have claimed a refund as authorized by this agreement, the dollar amount of consumer refunds given (either by respondent directly or by retailers), and the number, name, and last known address of each claimant, if any, whose claim for refund has been denied by respondent.

F. Respondent's Record-Keeping Requirements

Respondent shall for at least two (2) years after service of this order, maintain and upon request make available to the Federal Trade Commission at a place it designates for

inspection and copying, sufficient records to identify:

(1) The name and last known address of each purchaser of the HOME FREE who received reimbursement and the amount of such reimbursement; and

(2) The name and last known address of each purchaser of the HOME FREE who requested reimbursement and was refused, and the reason for each refusal to reimburse.

III

It is further ordered that for a period of three (3) years after the last date of dissemination of any representation concerning the preformance characteristics of efficacy of any product covered by this order, respondent shall maintain and upon request make available to the Federal Trade Commission for inspection and copying copies of all materials relied upon to substantiate such representation, and copies of all documents in respondent's possession that contradict, qualify, or otherwise call into question said representation, including complaints from consumers.

IV

It is further ordered that respondent shall for a period of three (3) years distribute, or cause to be distributed, a copy of this order to all present and future managerial employees, distributors, independent sales agents, and former, present, and future direct purchasers from respondent of any product covered by this order.

V

It is further ordered that for a period of ten years:

A. Respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the respondent that may affect compliance obligations arising out of this order, such as dissolution, assignment of the ultrasonic pest control business, sale resulting in the emergence of a successor corporation, or the creation or dissolution of subsidiaries.

It is further ordered that respondent shall, within one-hundred and twenty (120) days after service upon it of this order, file with the commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

Attachment A—Refund Announcement For Purchasers of the "Home Free" Pest Control Device

UNDER THE TERMS OF A FEDERAL TRADE COMMISSION ORDER, YOU ARE ENTITLED TO A REFUND FOR ANY "HOME FREE" PEST CONTROL DEVICE BOUGHT ON OR AFTER JANUARY 1, 1984, UPON RETURN OF THE PRODUCT AT ANY TIME UNTIL *[Date to Be Supplied: One Year From Date of Service of Order by Commission Upon Respondent]*. THE FEDERAL TRADE COMMISSION HAS CHARGED THAT SUCH DEVICES ARE NOT EFFECTIVE FOR THE PURPOSES ADVERTISED. SEE YOUR RETAILER ABOUT OBTAINING THE REFUND OR CALL 1-800-624-3083 *(if you are in California)* or 1-800-344-4522 *(if you are outside of California)*.

Attachment B—Statement of Purchase

TO OBTAIN A REFUND FROM A PARTICIPATING RETAILER, YOU MUST RETURN THE "HOME FREE" TO THE RETAILER AND SUBMIT EITHER (1) A DATED SALES RECEIPT OR (2) THIS FORM, COMPLETED AND SIGNED.

I purchased a HOME FREE pest control device from

_____

on or after (Name of Retailer) January 1, 1984.

On penalty of perjury I certify that all of the above information is true and correct to the best of my knowledge. *(See 28 United States Code § 1746 (1966))*.

Date _____

_____

(Signature)

_____

_____

(Address)

IF YOUR RETAILER IS NOT A PARTICIPATING RETAILER, OR YOU ARE UNABLE TO OBTAIN A REFUND FROM THE RETAILER FOR ANY REASON, YOU MAY OBTAIN A REFUND FROM THE MANUFACTURER BY SUBMITTING A DATED SALES RECEIPT OR THIS FORM (COMPLETED AND SIGNED) *AND* SHIPPING THE HOME FREE TO: *3055 University Drive, Compton, CA 90220, ATTN: Customer Service Department*. YOU MAY SHIP THE DEVICE C.O.D. OR THE MANUFACTURER WILL REIMBURSE YOU FOR THE COST OF SHIPMENT. EACH REFUND FOR A HOME FREE PURCHASE IS LIMITED TO $19.95 UNLESS YOU SUBMIT A SALES RECEIPT SHOWING YOU PAID A HIGHER PRICE.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed Consent Order from Sage International, Inc., 1220 West Walnut Street, Compton, California 90220.

The proposed Consent Order has been placed on the public record for sixty (60) days for receipt of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will review the Agreement and the comments received and will decide whether it should withdraw from the Agreement or make final the Agreement's proposed order.

The respondent has been and is engaged in the manufacture and marketing of an ultrasonic pest control product called the "HOME FREE." In marketing the HOME FREE, respondent has said that the device is an effective alternative to the use of "dangerous chemicals," pesticides, sprays, and poisons. It has claimed that the HOME FREE will eliminate roaches, rats, mice, mosquitoes, crickets, fleas, flies, spiders and other crawling and flying pests from a home or place of business in four to six weeks.

According to the Commission's Complaint, the HOME FREE will not completely or permanently rid a home or place of business from insect or rodent infestation, nor will it do so within four to six weeks as claimed. The Complaint alleges that even though rodents can hear ultrasound, they rapidly habituate to it and any reaction by rodents to the HOME FREE would, at best, only be of short duration. According to the Complaint, the use of ultrasound is not an effective alternative to the use of conventional pest control products. The Complaint additionally charges that the respondent did not possess a reasonable basis for the product claims it made.

Respondent has signed an Agreement containing a Consent Order which requires it to cease and desist from representing that the HOME FREE or any ultrasonic pest control product will: (1) Eliminate cockroaches, rats, mice or other pests from a home or place of business; (2) eliminate rodents or insects within four to six weeks or within any other specified period of time; (3) protect an area from or cause an area to be free of rodents or insects; or (4) serve as an effective pest control alternative to the use of conventional products such as sprays or other chemicals.

The Order further requires respondent to refrain from making any performance claims for the HOME FREE or any other ultrasonic pest control product unless it possesses and relies upon competent and reliable evidence which substantiates the claims of performance.

The Order also requires respondent to refund the purchase cost of the HOME FREE to any consumer who purchased one or more of the devices after

December 31, 1983, and to give prominent publicity to purchasers' rights to refunds. To qualify for a refund under the Order, a purchaser need only return the device to a retailer or ship it to respondent at respondent's expense, and submit either a sales receipt or a simple form affidavit provided by the retailer. In the absence of a sales receipt showing that a greater amount was paid for the device, consumer refunds are limited under the terms of the Order to $19.95 (plus postage, where applicable). Respondent is required under the Order to provide notice of the refund program to *all* retailers known by it or by its distributors to have sold the HOME FREE, and to encourage their participation in the refund program. The Order imposes special obligations upon respondent to ensure full participation in the refund program by retailers accounting for at least 75% of HOME FREE sales.

Finally, the Order imposes certain administrative obligations upon respondent, requiring it to notify the Commission of any proposed changes in its corporate structure and to notify all managerial and sales personnel of the Order by distributing a copy of the Order to each of them. The Order also requires respondent to file a compliance report and a special report relating to the results of the refund program.

Respondent's Agreement to enter into this Order is for settlement purposes only, and does not constitute an admission by respondent that it has violated the law as alleged in the Complaint issued with the Order.

The purpose of this analysis is to facilitate public comment on the proposed Order, and it is not intended to constitute an official interpretation of the Agreement and proposed Order or to modify its terms in any way.

Emily H. Rock,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34-23276; 40-15117; File No. S7-12-86]

Facilitating Shareholder Communications

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Securities and Exchange Commission ("Commission") today is publishing for comment proposals intended to implement provisions of the recently enacted Shareholder Communications Act of 1985. The proposals will govern: (1) The process by which registrants communicate with the beneficial owners of securities registered in the name of a bank, association, other entity that exercises fiduciary powers or other nominee; and (2) the proxy processing activities of banks, associations and other entities that exercise fiduciary powers. In addition, the Commission is proposing certain other amendments to: (1) Rules 14a–13 and 14c–7 which would permit registrants to request from both brokers and banks beneficial owner lits that exclude owners who purchased securities through an employee benefit plan; and (2) Rules 14a–3 and 14c–2 regarding when and under what conditions registrants are no longer obligated to deliver annual reports or proxy or information statements to security holders.

DATE: Comments should be received on or before July 31, 1986.

ADDRESS: Comments should be submitted in triplicate to Shirley E. Hollis, Acting Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7–12–86. All comment letters received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Sarah A. Miller, (202) 272–2589, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is publishing for comment a new proposed Rule 14b–2 and corresponding revisions to Rules 14a–13 [1] and 14c–7.[2] These proposals are intended to implement provisions of the recently enacted Shareholder Communications Act of 1985 by regulating the proxy processing activities of banks, associations and other entities that exercise fiduciary powers (hereinafter referred to collectively as "banks").[3] The other proposals relate to both banks and brokers. These proposals would amend Rule 14a–13 as to employee plan purchases and Rules 14a–3 and 14c–2 [4] as to proxy delivery obligations. Certain other clarifying amendments also are proposed to Rules 14a–1, 14b–1 and 14c–1.[5]

I. Executive Summary

On December 28, 1985, the Shareholder Communications Act of 1985 ("the Act") was enacted into law. That Act, which amends section 14(b) of the Securities Exchange Act ("Exchange Act") [6], confers on the Commission authority to regulate the proxy processing activities of banks. The Act is to become effective December 28, 1986, one year after the date of enactment.

Pursuant to this authority the Commission may now regulate the proxy processing activities of banks in much the same manner that the Commission now regulates, under Rule 14b–1,[7] the proxy processing activities of brokers and dealers. To permit recognition of the differences between the brokerage and banking industries and to avoid unnecessary confusion with respect to broker's obligations under Rule 14b–1, a new Rule 14b–2 is proposed. Proposed Rule 14b–2 delineates the obligations of banks in much the same manner that Rule 14b–1 presently does for brokers. These obligations include: (1) The process by which registrants communicate with the beneficial owners of securities registered in the name of a bank; and (2) the proxy processing activities of banks. The Commission also is proposing certain revisions to Rules 14a–13 and 14c–7 which specify a registrant's obligations in connection with forwarding proxy and information statements to beneficial owners, to reflect the role of banks in the system of shareholder communications.

With respect to the system of direct communications with beneficial owners, brokers and banks are required to provide registrants, upon their request, with lists of beneficial owners. For brokers, those lists include all beneficial owners who do not object to disclosure of their identity. For banks, however, the Act provides that the Commission shall not require disclosure of the names of beneficial owners of securities held in

[2] 17 240.14c–7.

[3] Pub. L. 99–222, 99 Stat. 1737 (1986). The term "associations" is intended to cover: (1) Entities such as savings and loan associations and savings banks that maintain trust and custodian accounts and (2) other entities that engage in similar fiduciary activities. *See* H.R. Rep. No. 191, 99th Cong., 1st Sess. 3. For purposes of the Act, the Commission is proposing to define entities that exercise fiduciary powers as other than registered clearing agencies who hold in record name.

an account by the bank on the date of enactment unless the beneficial owner consents to such disclosure ("affirmative consent standard"). The Act requires the bank to employ a good faith effort to obtain consent from beneficial owners. The Commission can require and is proposing that the names of beneficial owners of securities held in an account opened by the bank after the date of enactment must be supplied to registrants unless the beneficial owner objects to disclosure ("non-objection standard").

In addition, the Commission is proposing certain amendments to Rules 14a–13 and 14c–7 which would permit registrants to request from both brokers and banks beneficial owner lists that exclude those beneficial owners who purchased securities through an employee benefit plan and to which the registrant has access to the beneficial owner's name and address by some other means.

Finally, the Commission is proposing certain other amendments to Rules 14a–3 and 14c–2 which would: (1) Clarify when a registrant is no longer obligated to deliver an annual report or a proxy or information statement to security holders; and (2) provide that a registrant's obligation to deliver an annual report or a proxy or information statement is reinstated once a security holder delivers or causes to be delivered to the registrant notice setting forth his then current address.

This release discusses the rule proposals which are intended to implement the provisions of the Act. In order to assist banks in their understanding of how the shareholder communications system works, the release also provides an overview regarding implementation of these proposals and discusses the background to the shareholder communications rules as applied to brokers and dealers.

II. Background

The legislation represents the implementation of a recommendation of the Commission's Advisory Committee on Shareholder Communications, contained in its report, *Improving Communications Between Issuers and Beneficial Owners of Nominee Held Securities*.[8] Specifically, the Advisory Committee recommended legislation to confer on the Commission authority to regulate the proxy processing activities of banks in much the same manner that it regulates the proxy processing activities of brokers and dealers.

Previously, the Commission implemented Advisory Committee recommendations by substantially revising, *inter alia*, Rule 14b–1 in 1983.[9] In addition to tightening the timetable within which activities under the rule take place, the Commission adopted paragraph (c) to Rule 14b–1 to provide a means of direct communication between registrants and their beneficial owners by requiring brokers to provide requesting registrants with the names, addresses, and securities positions of their customers who are beneficial owners of the registrant's securities and who have not objected to such disclosure. In August 1984, the Commission deferred the original effective date of paragraph (c) from January 1, 1985 to January 1, 1986.[10] The deferral provided additional time to ensure the most effective implementation of the shareholder communications system. Representatives of the securities industry and the registrant community agreed that during this deferral period they would develop and establish both an efficient means of furnishing beneficial owner information to registrants and an appropriate schedule of reimbursement.

In September 1984, the New York Stock Exchange ("the NYSE") appointed the AD Hoc Committee on Identification of Beneficial Owners. The Ad Hoc Committee, composed of members of both the securities industry and registrant community, was formed to resolve the reimbursement issue and to develop a workable and effective system that would be of maximum use to registrants and not burdensome to brokers. The Ad Hoc Committee largely resolved the problems which initially lead to the deferral of the effective date of Rule 14b–1(c). The reimbursement of start-up costs issue was resolved through self-regulatory organization ("SRO") rule changes that permit brokers to assess a $.20 per proxy surcharge for the 1985 annual meeting proxy solicitation.[11] This surcharge, together with an additional $.165 surcharge for the 1986 annual meeting proxy solicitation, funds the start-up costs associated with furnishing the beneficial owner information to registrants.[12] The other cost issue—determination of reasonable costs for supplying beneficial owner lists—also has been addressed. Under the rules of the NYSE, registrants who request a list of non-objecting beneficial owners are obligated to pay $.065 per name to the broker for providing this information.[13]

In August 1985, the Ad Hoc Committee drafted a model letter to aid brokers in communicating with their customers in order to ascertain whether or not they object to disclosure of their names, addresses, and securities positions. The NYSE forwarded that letter to brokers and to the American Stock Exchange and the National Association of Securities Dealers.

To make the system work and to ensure that registrants find the beneficial owner lists useful and meaningful, the Ad Hoc Committee also determined that an intermediary was necessary.[14] By brokers employing an intermediary to compile and to supply beneficial owner lists to registrants, registrants are assured that the lists are compiled in a standardized manner. Moreover, brokers are assured that the source of the lists will be kept confidential. In addition, economies of scale can be realized by permitting brokers to delegate this function to an intermediary which maximizes costs savings while minimizing burdens on brokers. The Ad Hoc Committee requested proposals and selected Independent Election Corporation of America "(IECA") to serve as the intermediary between registrants and brokers in supplying lists of beneficial owners. The direct communications system became effective on January 1, 1986 and is operating smoothly and successfully.[15]

[9] Release No. 34–20021 (July 28, 1983) [48 FR [illegible]].

[10] Release No. 34–21339 (September 21, 1984) [49 FR [illegible]].

[11] The $.20 surcharge rule change to the NYSE rules was approved by the Commission on March 28, 1985. Release No. 34–21900 (March 28, 1985) [50 FR 13287]. The Commission approved similar surcharges as part of the rules of the American Stock Exchange and National Association of Securities Dealers. Release No. 34–21915 (April 1, 1985) [50 FR 14000].

[12] The $.165 surcharge rule change to the NYSE AND AMEX rules was approved by the Commission on February 11, 1986 and April 15, 1986, respectively. Release No. 34–22989 (February 11, 1986) [51 FR 5821], Release No. 34–23121 (April 15, 1986) [51 FR 15063]. The Commission anticipates that other self-regulatory organizations soon will adopt as part of their proxy rules this surcharge for the 1986 annual meeting proxy solicitation.

[13] Release No. 34–22989 (February 11, 1986) [51 FR 5821], This fee does not include the fee to the intermediary which the Ad Hoc Committee also addressed. *See* Release No. 34–22989 at fn. 8.

[14] Employing an intermediary is, however, not a condition to complying with the shareholder communications rules.

[15] As of May 5, 1986, 1,816 requests for beneficial owner information involving 1,700 companies had been made through the central intermediary.

VOL 51 ISS 108 JE 5 1986 UMI

III. Overview of Proposals

Currently, Rules 14a-13 and 14b-1 set forth two different procedures relating to the obligations of registrants and brokers in connection with communicating corporate information to beneficial owners. The first procedure relates to supplying proxy cards, proxy soliciting material and annual reports to record holders for distribution to beneficial owners, while the second procedure sets forth the requirements for those registrants who wish to communicate directly with their beneficial owners.

Proposed new Rule 14b–2 would extend to banks the requirements for communicating with beneficial owners under these two procedures when the securities of beneficial owners are held of record by banks. Proposed revisions to Rule 14a–13 would clarify registrants' obligations in connection with communicating with these beneficial owners.

Under the first procedure, registrants would continue to be required, pursuant to Rule 14a–13(a), to inquire of their record holders by means of a search card or otherwise the number of proxies and other proxy soliciting material or annual reports to security holders needed by the record holder to forward the material to beneficial owners. Record holders would include not only brokers and banks but now also associations and other entities that exercise fiduciary powers. The registrant must request this information at least 20 calendar days prior to the record date of the annual meeting. The new aspect of this system would require banks (and other entities) under proposed Rule 14b–2(a) to respond to this request within seven business days of receipt of the request. Upon receipt of the proxy, proxy soliciting material or annual report, the bank would be required, under proposed Rule 14b–2(b), to forward these materials within five business days of receipt to its customers who are beneficial owners.

Bank nominees often may hold securities for several other banks, each of which, in turn, may hold securities on behalf of other banks. This layering or piggybacking of accounts may create delays in distribution of corporate communications which are often of a time-critical nature. To alleviate such distribution delays, proposed Rule 14b–2(a)(1) would provide that the bank record holder respond, within seven business days of receipt, to the registrant's inquiry regarding the number of sets of proxy materials required for forwarding to beneficial owners on behalf of *its* customers who are beneficial owners. With respect to those banks on whose behalf the bank record holder holds securities ("respondent banks"), proposed Rule 14b–2(a)(2) would require the bank record holder to forward to the respondent bank, by first class mail, the registrant's inquiry within one business day of receipt. Proposed Rule 14b–2(a)(1) also would require the bank record holder to indicate, at the time it responds to the registrant's Rule 14a–13(a) inquiry, the identity of any bank on whose behalf it holds securities [6] and the date that it has forwarded the inquiry to the respondent bank.

Upon receipt of the registrant's inquiry from the bank record holder, the respondent bank would have seven business days, under proposed Rule 14b–2(a)(1), to respond to the inquiry. If other layers of banks exist, the procedure would be repeated. For example, on May 1, 1986, the bank record holder receives the registrant's inquiry, made pursuant to Rule 14a–13(a), for the number of proxies and other proxy soliciting material or annual reports to security holders needed by the bank record holder to forward the material to beneficial owners. The bank record holder would forward the registrant's inquiry by first class mail, pursuant to proposed Rule 14b–2(a)(2), to its respondent bank ("Bank B") on May 2, 1986. Seven business days after receipt of the registrant's inquiry or May 12, 1986, the bank record holder, pursuant to proposed Rule 14b–2(a)(1), would respond to the inquiry indicating: (1) The number of sets of proxy materials needed for distribution to its customers; (2) Bank B's identity, and (3) May 2, 1986, the date it forwarded the registrant's inquiry to its respondent bank.

On May 5, 1986, Bank B receives the registrant's inquiry from the bank record holder. On May 6, 1986, Bank B would forward, by first class mail, pursuant to proposed Rule 14b–2(a)(2), the registrant's inquiry to its respondent bank, Bank C. Seven business days after receipt of the registrant's inquiry or May 14, 1986, Bank B, pursuant to proposed Rule 14b–2(a)(1), would respond to the inquiry directly to the registrant indicating: (1) The number of sets of proxy materials needed for distribution to its customers; (2) Bank C's identity, and (3) May 6, 1986, the date it forwarded the registrant's inquiry to its respondent bank. Bank C, under proposed Rule 14b–2(a)(1), would respond to the inquiry directly to the registrant seven business days after it received the inquiry from Bank B.

To assure that this system works smoothly and efficiently, the Commission envisions that the registrant will employ a search card format or some other similar mechanism that will be conducive to the bank record holder responding to the registrant's inquiry on behalf of its beneficial owner customers and forwarding the inquiry to its respondent banks. At the same time, the search card employed by the registrant also should permit any successive layers of respondent banks to perform their obligations under proposed rule 14b–2(a).

After receiving responses to its inquiry from record holders and any respondent banks, the registrant, pursuant to proposed amendments to Rule 14a–13(a)(3), would supply each record holder and respondent bank that has responded to the registrant's inquiry with the requisite number of sets of proxy soliciting material and annual reports to security holders needed to forward to beneficial owners. Because state law requires that the right to vote reside with the record owner,[17] registrants would be required, under proposed amendments to Rule 14a–13(a)(3), only to supply record holders and not respondent banks with the requisite number of proxy cards needed to forward to beneficial owners.[18] Record holder banks would then be required to forward the proxy cards to their respondent banks within one business day of receipt and the proxy card, proxy soliciting material or annual report within five business days of receipt to those of its customers who are beneficial owners but not respondent banks. Respondent banks, in turn, would be required to forward proxy soliciting material and annual reports, together with the proxy card received from the record holder bank, within five business days after receipt of the proxy card. If additional layers exist, the respondent bank must send along the proxy card within one business day. Under proposed Rule 14a–13, registrants would be obligated to pay the reasonable expenses of both bank record holders and respondent banks in connection with the mailing of the materials to beneficial owners.

Rule 14a–13(b) sets forth the requirements for those registrants who wish to communicate directly with their beneficial owners. In order to recognize the two different standards for obtaining

[16] *See* further discussion of proposals concerning record holders' response to search cards *infra* at Section IV.E.1.

[17] *See, e.g.*, 8 Del. Code Section (1979).

[18] *See*, discussion *infra* at Section IV.E.2.

beneficial owner approval for disclosure of identity as mandated by the Act, the system, as proposed to be changed to include banks, would require that the registrant must request a list of beneficial owners who either have affirmatively consented or do not object to disclosure of their names, addresses and securities positions. If the registrant makes such a request, it must make that request of all banks as well as all brokers having customers who are beneficial owners of the registrant's securities. Because the registrant, in making its Rule 14a–13(a) inquiry, will have ascertained the identity of any respondent banks on whose behalf the bank record holder holds securities, the registrant would make its request for a list of beneficial owners to all banks, not just record holder banks, who have customers who are beneficial owners of the registrant's securities. A registrant could request the beneficial owner information more often than once a year and the bank would be required to comply with any such request. The lists would be compiled as of the record date for the registrant's next annual or special meeting. If no meeting is scheduled and the registrant requests a list of its beneficial owners, that list would be compiled as of a date to be selected by the registrant that is no less than five business days after the bank receives the request. The bank would forward the beneficial owner information to the registrant no later than five business days after the compilation date of the list, *e.g.*, the record date or other date selected. For example, if no annual or special meeting is scheduled and the bank receives a registrant's request for the list of beneficial owners on May 1, 1986, the list would be compiled as of a date selected by the registrant that is no earlier than May 8, 1986. The bank, in turn, would be required to forward the beneficial owner list to the registrant no earlier than May 15, 1986.

As the system currently applies to brokers, the proposed amendments would provide that, if it chooses, the registrant may mail annual reports directly to beneficial owners. At the time it submits a search card requesting the beneficial owner information, the registrant would notify the bank it intends to mail annual report directly to its non-objecting and affirmatively consenting beneficial owners. If so notified by the registrant, a bank would have no obligation in connection with that mailing to forward the annual report to non-objecting and affirmatively consenting beneficial owners but would have, of course, the obligation to forward annual reports to those beneficial owners who either have not consented or objected to the disclosure of their identities.

The proposed amendments would provide that, without assurances of the registrant's reimbursement of reasonable expenses associated with satisfying its obligations with respect to communications with beneficial owners, a bank has no obligation to perform its obligations under Rule 14b–2 (b), (c) and (f). The registrant would have a corresponding obligation to pay a bank's reasonable expenses associated with providing beneficial owner information.

Finally, proposed Rule 14b–2(c) would provide that a bank may designate an agent or intermediary to act on its behalf in performing its obligations under Rule 14b–2(c). If the bank chooses to do so, the registrant would make its request for a list of non-objecting and affirmatively consenting beneficial owners to that designated agent. The registrant would learn the agent's identity when it submits, pursuant to Rule 14a–13(a), the search card requesting the number of proxy cards, proxy soliciting material and annual reports needed by the bank record holder and any of its respondent banks to forward to beneficial owners. The bank, in turn, would be required under Rule 14b–2(a), to identify its agent, if one has been designated. After receiving the registrant's request, the agent would notify all banks of the registrant's request. Banks would supply the information to the agent, who then would compile the information in a standardized delivery format and forward it to the registrant. Using the above example, the registrant would make its request to the designated agent for a list of non-objecting and affirmatively consenting beneficial owners. If no annual or special meetings is scheduled and the designated agent receives the registrant's request for the list on May 1, 1986, the list would be compiled as of the date selected by the registrant that is no earlier than May 8, that 1986. The designated agent would make the request for a list of non-objecting and affirmatively consenting beneficial owners to all banks. Banks, in turn, would forward the requested information to the designated agent who would then compile the list and deliver it to the registrant no later than May 15, 1986.

IV. Specific Discussion of Proposals

A. 14A–1 Definitions

The Commission proposes to add a new paragraph (c) defining the term "entity that exercises fiduciary powers" as any entity that holds securities in nominee name on behalf of a beneficial owner. New paragraph (c) also would make clear that the term does not include a clearing agency registered under Section 17A of the Exchange Act.[19] Proposed paragraph (c) would further explain that, where a registered clearing agency is the record holder, the participants identified by such clearing agency in the securities position listing (as defined by Rule 17Ad–8 [20]) assume the rights and obligations associated with such record ownership under Rules 14a–13 and 14b–1 and proposed Rule 14b–2. An amendment cross-referencing proposed paragraph (c) also is proposed to be added to note 1 to Rule 14a–13(a).

B. 14a–3 Information To Be Furnished to Security Holders

The Commission proposes to amend Rule 14a–3(e)(2) in two ways.[21] First, paragraph (e)(2) would be amended to provide that a registrant will be excused, unless state law requires otherwise, from delivering a proxy statement or annual report to any security holder of record if at least two "payments of" rather than "checks made in payment of" dividends or interest on securities sent to the security holder's address of record have been returned undeliverable. Such a revision would make clear that dividend or interest payments made other than by check, such as dividends payable in securities, also are to be considered in determining whether a registrant is excused from delivering a proxy statement or annual report to security holders.

Second, paragraph (e)(2) currently provides that a registrant's obligation to deliver the proxy statement or annual report is reinstated once it has the security holder's current address. The Commission proposed to amend this provision to provide that a registrant's obligation will be reinstated once a security holder delivers or causes to be delivered to the registrant notice for the purpose of setting forth his then current address.[22] Under this proposal, a

---

[19] 15 U.S.C. 78q–1 (1982).

[20] 17 CFR 240.17Ad–8.

[21] One commentator submitted these proposed revisions in response to the Commission's request for comments on its recent proposal of comprehensive amendments to the proxy rules and schedules. *See* Release No. 33–6582 (July 1, 1985) [50 FR 29409]. Because the Rule 14a–3(e) exemption from delivery was derived, in part, from a recommendation of the Advisory Committee on Shareholder Communications, *see* Advisory Committee Report at 27–28, the Commission believes it is appropriate to consider these proposed revisions in conjunction with the other shareholder communications proposals discussed herein.

[22] A similar provision is contained in 8 Del. Code § 220 (Supp. 1985).

registrant who has the security holder's current address as a result of dealings with the security holder in another context, such as if the security holder is the holder of a credit card issued by the registrant or has written to the registrant to complain about a product, would not be in violation of the rule if it had not resumed delivery of the annual report or proxy statements. This proposed revision would obligate a registrant to resume delivery, however, once the security holder has notified by means of a telephone, written communication or otherwise caused the registrant to be notified of his current address.

C. Rule 14a–13 Obligation of Registrants in Communicating With Beneficial Owners

Rule 14a–13, a registrant-related corollary to Rule 14b–1 and proposed Rule 14b–2, delineates a registrant's obligations in communicating with its beneficial owners and would work in tandem with both present Rule 14b–1 and proposed Rule 14b–2. Accordingly, the Commission proposes to amend Rule 14a–13 in several respects in order to recognize the role of the banks in the system of communications with beneficial owners.

First, Rule 14a–13 would be amended throughout to make clear that a registrant's obligations, such as making the appropriate inquiries of record holders and supplying record holders with the requisite proxy soliciting material, flow not only to brokers, dealers and banks but also to associations and other entities that exercise fiduciary powers.[23] Second, Rule 14a–13 would be revised to reflect the congressionally-mandated alternate standard of owner approval for disclosure of beneficial owner information required for bank customer accounts opened prior to December 28, 1985.[24] Specifically, Rule 14a–13 would be amended to reference both non-objecting and affirmatively consenting beneficial owners. Third, references in Rule 14a–13 to specific obligations of brokers under Rule 14b–1 would be expanded to include similar specific obligations of banks under proposed Rule 14b–2.

In addition, paragraph (a)(3) would be amended to reflect the piggybacking or layering of securities by banks.[25] Specifically, paragraph (a)(3) would require the registrant to supply proxy soliciting material and the appropriate number of annual reports to: (1) Record holders which would include not only brokers and dealers but also banks; and (2) banks that deposit for safekeeping customer securities with another bank who is listed on the stockholder list as the record holder. The rule would provide that the registrant need only supply proxy materials to those banks who deposit customer securities for safekeeping with other banks who have responded to the registrant's inquiry made under paragraph (a)(1) of Rule 14a–13 regarding the number of sets of proxy materials needed to supply beneficial owners. Because state law requires that record holders exercise the legal right to vote securities, Rule 14a–13(a)(3) would require registrants only to supply record holders and not respondent banks with the requisite number of proxy cards needed to forward to beneficial owners.

Paragraph (a)(3) also would be amended to provide that the registrant is obligated to reimburse those banks who deposit customer securities for safekeeping with the record holder the reasonable costs of completing the mailing or proxy soliciting material to beneficial owners. At present, registrants are only obligated to pay record holders the costs associated with mailing proxy soliciting material.

Paragraph (b) and (c) of Rule 14a—13 pertain to a registrant's obligations in connection with the system of direct shareholder communications. Under this system as proposed to be amended, registrants would request, under paragraph (b), access to the names, addresses and securities positions of non-objecting and affirmatively consenting beneficial owners. In this regard, the Commission is also including a proposal to amend paragraph (b)(1) to provide that a registrant need not include in its request for beneficial owners those owners who purchased securities through an employee benefit plan, such as an Employee Stock Ownership Plan ("ESOP") a Tax Reduction Act Stock Ownership Plan "(TRASOP") or a Payroll Stock Ownership Plan ("PASOP") and to which the registrant has access, by some other means, to the beneficial owner's name and address. Under this proposed amendment, registrants would not have to request and, therefore, pay for the names, addresses and securities positions of its employees who are beneficial owners of the registrant's securities if they can identify these beneficial owners who are employees by some means other than through lists obtained pursuant to Rules 14b–1(c) or 14b–2(c), such as payroll deductions. This proposed amendment only would apply where the plan confers voting authority on its participants. If voting authority rests with the plan trustee, the trustee would be considered, for purposes of the shareholder communications rules, the beneficial owner. While this proposal would enable registrants to recognize cost savings in obtaining beneficial owner information, the Commission is concerned about the ability of record holders to excise such beneficial owners without undue effort or expense and specifically requests comments as to the workability of this proposal and the cost/benefit effects thereof. Specifically, in considering the costs and benefits associated with this proposal, commentators should be aware that if registrants request a list of beneficial owners that does not include those owners who purchased through employee benefit plans, registrants would not be able, under the current shareholder communications rules, to realize the cost saving associated with direct mailing of annual reports to security holders to those beneficial owners. Instead, registrants would be required to forward the annual reports to security holders to record holders for distribution and to pay the costs of record holders and respondent banks associated with such mailing. Therefore, the Commission requests comment on whether the rules should be further amended to permit registrant to mail annual reports to security holders directly to plan participants and what type of notice to record holders would be necessary in order to assure that all plan participants will receive annual reports. Upon receipt of sufficient notice, record holders would be relieved of distribution obligations.

Further, paragraph (c) would permit registrants to mail annual reports directly to those non-objecting and affirmatively consenting beneficial owners so long as the registrant choosing to do its own annual report mailing informed the banks of its intention at the time it submitted, pursuant to paragraph (a), a search card requesting the beneficial owner information.

---

[23] As would be defined in proposed Rule 14a–1(c) (see discussion Section IV.A, *supra*), entities that exercise fiduciary powers do not include clearing agencies registered under Section 17A of the Exchange Act.

[24] *See* discussion *infra* Section IV.E. 2.

[25] Rule 14a–13(a)(2) requires registrants to begin the process of soliciting beneficial owners by sending out search cards 20 calendar days before the record date. This and other time periods are discussed and comment concerning revisions is solicited *infra* at Section IV.E.1.

D. Rule 14b–1 Obligation of Registrant Brokers and Dealers in Connection With the Prompt Forwarding of Certain Communications to Beneficial Owners

The Commission proposes to revise the note to paragraph (c) of Rule 14b–1 to make clear that, with respect to requests not made in connection with a meeting, the five business day time period for calculating the compilation date for non-objecting beneficial owner lists commences upon receipt by the broker or its designated agent of the registrant's request.

E. Rule 14b–2 Obligations of Banks, Associations and Other Entities That Exercise Fiduciary Powers in Connection With the Prompt Forwarding of Center Communications to Beneficial Owners

Proposed new Rule 14b–2 is intended to delineate a bank's obligations in connection with providing beneficial owner information to registrants and forwarding proxy soliciting material to beneficial owners. In proposing Rule 14b–2, the Commission has drawn upon its experience in regulating the proxy processing activities of brokers and the system of direct communications with beneficial owners. Thus, proposed Rule 14b–2, to the extent possible, parallels the requirements of 14b–1.

1. Proposed 14b–2(a)

Proposed paragraph (a) would provide that a bank must respond, within seven business days of receipt, to a registrant's inquiry, made under 14a–13(a)(1), regarding the number of proxy cards and other proxy soliciting material needed by the banks to forward the material to beneficial owners. Respondent banks who receive the registrant's inquiry from the bank record holder also would be required to respond to the registrant's Rule 14a–13(a)(1) inquiry within seven business days. Paragraph (a)(1) provides that that response would be sent directly to the registrant and not to the bank record holder.

Once a bank record holder receives the registrant's Rule 14a–13(a)(1) inquiry, it would be required under proposed Rule 14b–2(a)(2) to forward that inquiry, by first class mail or other equally prompt means, within one business day to its respondent banks. The phrase "other equally prompt means" would permit banks to use other advantageous methods such as overnight mail or some sort of electronic delivery, in forwarding the registrant's Rule 14a–13(a)(1) inquiry to its respondent banks. In responding to the registrant's Rule 14a–13(a)(1) inquiry, banks would be required under proposed Rule 14b–13(a)(1) also to indicate the identity of any respondent bank and the date that it forwarded the registrant's inquiry to that bank.

The Commission notes that under proposed paragraph (a)(1) banks would be under the same time limits for responding to a registrant's Rule 14a–13(a)(1) inquiry as brokers currently are under Rule 14b–1(a) and, generally, a registrant would receive the banks' responses to its inquiry at the same time as it would receive broker responses. The practice of piggybacking bank accounts, however, will cause some delay in registrants receiving responses to the Rule 14a–13(a)(1) inquiry from respondent banks. For example, a bank record holder receives the registrant's Rule 14a–13(a) inquiry on May 1, 1986, and forwards it, by first class mail, pursuant to proposed Rule 14b–2(a)(2), to its respondent banks on May 2, 1986. Assuming three days for first class mail, the respondent banks would not receive the registrant's inquiry until May 6, 1986. The respondent bank would have, under proposed Rule 14b–2(a)(1), seven business days or until May 15, 1986, to respond to the registrant's inquiry while the bank record holder, pursuant to proposed Rule 14b–2(a)(1), would have to forward its response to the registrant's inquiry on May 9, 1986. The difference in response dates for bank record holders and respondent banks would increase, or course, depending on the number of layers of piggybacked accounts.

In view of the common practice of piggybacking bank accounts, and the delays attendant thereto, the Commission is soliciting specific comment on whether other revisions to the time periods for the beneficial owner solicitation process would be appropriate. First, the Commission inquires whether the proposed seven business day period for banks' response to the search card should be shortened and, if so, by how many days. Second, the Commission inquires whether Rule 14a–13(a) should require registrants to begin the process 30 calendar days before the record date instead of the 20 calendar days currently provided. The Commission notes that the latter change would advance the timetable for the process as a whole, including brokers.

2. Proposed Rule 14b-2(b)

a. Proposed system—separating proxy card from other material. Proposed paragraph (b) would require both bank record holders and respondent banks to forward proxy cards, proxy soliciting material and/or annual reports to security holders within five business days of receipt, to those of its customers who are beneficial owners of the registrant's securities but are not respondent banks on whose behalf the securities are held. Record holder banks as well as respondent banks who hold on behalf of other banks would have an additional obligation to forward proxy cards to their respondent banks within one business day of receipt from his registrant. A registrant will learn the identity of respondent banks when the respondent banks respond directly to the registrant's Rule 14a–13(a)(1) inquiry thus relieving bank record holders from the responsibility of forwarding proxy soliciting material and annual reports to security holders to respondent banks. All record holders, including banks and brokers as well as any respondent banks, will receive the proxy soliciting material and annual reports to security holders for forwarding to their customers who are beneficial owners at approximately the same time. On the other hand, registrants will send proxy cards to record holders for forwarding to respondent banks beneficial owners. In order to ensure that those beneficial owners whose securities are held through respondent banks will receive their proxy cards with the proxy soliciting material, respondent banks would be required to wait until they receive the proxy cards and then forward complete sets of materials to their beneficial owner customers within five business days thereafter. While the Commission has attempted to minimize delays by requiring the proxy cards be forwarded to respondent banks within one business day of receipt, delays would increase depending on the number of layers of respondent banks involved. Accordingly, the Commission solicits specific comment on whether it should shorten the five business day forwarding requirement when respondent banks are involved in order to compensate for delays caused by the layering of accounts.

b. Discussion of proposed system and approaches. The Commission is seeking specific comment as to whether the proposed system of forwarding proxy material to the ultimate, i.e., voting, beneficial owner is the most practical and expeditious system or whether a different system would be preferable. The proposal entails sending the proxy card to respondent banks seaparately from the other proxy soliciting material. The respondent banks would then recombine the card with the other proxy material for forwarding to the beneficial owner. The Commission is concerned that this may create practical difficulties in the proxy process.

An alternative would require registrant to send enough complete sets (proxy card and soliciting material and/or annual report) to the record holder bank to supply its owns beneficial owner customers as well those of the respondent banks on whose behalf it hold securities. Registrants would know the appropriate number as a result of the respondent banks' response to the search card. The record holder bank, after executing the proxy, would then be required to forward the complete sets to the respondent bank. This system would leave unchanged the current chain by which materials flow from the record holder, through the respondent bank, to the beneficial owner customer. Because the respondent bank frequently receives a limited number from the record holder, this alternative would require record holder banks to handle and forward sets of proxy materials that they do not now handle. The additional costs entailed would be reimburseable by the registrants. The proposed rule would avoid requiring this significant volume of paper to be processed and mailed at each level of respondent bank relationship.

Another alternative would have companies send complete sets, including proxy cards, directly to respondent banks and have the beneficial owners provide voting instructions to the bank record owners, similar to the process used by brokers. This approach would require a change from the current practice of some record holder banks in handling voting instructions. The bank record holder would then forward all signed proxy cards to the registrant. The record holder would still handle the proxy card, but would do so on the return phase of the process rather than at the outset, which is currently the practice for some banks.

A fourth alternative would be to have record holders execute, in the name of the respondent banks, powers of attorney, or omnibus proxies similar to that used by Depository Trust Company. This system would permit registrants to send the annual report, the proxy statement and proxy directly to the respondent banks for forwarding to beneficial owners. The respondent bank would execute the proxy. While some banks have suggested that the authorization process within the bank could be burdensome, the Commission believes that the practical efficiencies would seem to outweigh such burdens.

The Commission specifically requests commentators' views as to the preferability and feasibility of these four alternative approaches. The Commission also requests comments on any modifications or refinements of these alternatives. The Commission specifically is considering all four of these alternatives and is interested in pursuing that alternative which public commentators indicate is the most effective.

3. Proposed Rule 14b–2 (c) and (f)

Proposed paragraph (c) delineates the banks' obligations in connection with registrants communicating directly with their beneficial owners. Proposed paragraph (c) would require any bank to provide a registrant, upon its request, with the names, addresses and securities positions of its customers who are beneficial owners of the registrant's securities, subject to the appropriate customer consent standard.

The registrant could request the beneficial owner list whenever it wants and the bank, in response to that request, would be required to provide the list. Specifically, the registrant could request the beneficial owner list to be compiled either as of the registrant's record date for its latest annual or special meeting of security holders or, if the request is not made in connection with a meeting, a date no earlier than five business days after receipt of the registrant's request. Banks would be required to respond to a registrant's request for beneficial owner lists within five business days of the compilation date.

With respect to determining customer consent to disclosure of beneficial owner information, proposed paragraph (c) differentiates between bank customer accounts opened on or before December 28, 1985, the date of enactment of the Act, and those bank customer accounts opened after December 28, 1985. Specifically, in order to disclose the names, addresses and securities positions of those bank customers who opened their accounts with banks on or before December 28, 1985, the customer would have to have affirmatively consented to disclosure of the information. For those bank customers who opened their accounts with banks after December 28, 1985, the customer would need only not object to disclosure of the beneficial owner information.

This distinction between accounts opened on or before December 28, 1985 and those opened after December 28, 1985 is consistent with authority given the Commission by the Shareholder Communications Act. That Act directs that the standard for obtaining customer consent for disclosure of beneficial owner information for bank customers whose accounts were opened prior to the date of enactment be one of affirmative consent. The Act left to the Commission the discretion to establish the appropriate standard for customer consent for accounts opened after the date of enactment, *i.e.*, whether affirmative consent or the non-objection standard ultimately should apply to beneficial owner accounts held by banks.

In considering this question, Congress noted that, after an appropriate notice and comment period, the Commission established that a non-objection standard for brokers was the appropriate standard required for an effective implementation of the direct communications system. Congress was cognizant, however, of the special issues of privacy raised under state law with respect to existing bank customers and addressed these issues by applying an affirmative consent standard to existing accounts. As the House Report on the Act noted, however, banking industry representatives believed that these considerations would not apply to new customers, who could be advised upon the opening of an account that their names would be supplied to registrants unless they objected.[20] In view of the importance of the non-objection standard to the operation of the direct communications system and in recognition that brokers are held to a non-objection standard, the Commission believes that it is the appropriate standard to be applied after the date of the Act's enactment.

The Commission recognizes, however, that a question exists as to whether the application of this standard for the period of time between the date of enactment and the date of the rules' proposal poses undue burdens on banks. Accordingly, the Commission solicits specific comment on whether the Commission rules should require disclosure of beneficial owner information pursuant to a non-objection standard for bank customers whose accounts were opened after December 28, 1985, but before the proposal date of the rules contained herein.

With regard to obtaining customer consent for disclosure of beneficial owner information, the Commission anticipates that banks have incorporated into their customer account opening forms and procedures neutral language which explains the purposes of the direct shareholder communications system and is consistent with the non-objection standard for disclosure of beneficial owner information.

For those customer accounts opened on or before December 28, 1985,

[20] H.R. Rep. No. 101 at 3–4.

proposed paragraph (f) would provide that, unless banks make a good faith effort to obtain affirmative consent to disclosure of beneficial owner information, the disclosure must be made on a nonobjection basis. The two alternative proposals effect the directive of Congress that the affirmative consent standard adopted for existing bank accounts for privacy concern reasons is not used to frustrate the purposes of the direct communications system and hamper shareholder communications. Proposal I is intended to provide that bank notices to customers who opened accounts on or before December 28, 1985 contain neutral and complete explanations of the purposes of the direct communications rules.

Proposal II would add as a safe-harbor a specific delineation of what will be deemed to be a good faith effort to obtain affirmative consent to disclosure of beneficial owner information. This paragraph would provide that banks shall be deemed to have made a good faith effort to obtain affirmative consent to disclosure of beneficial owner information if: (1) The inquiry is phrased in neutral language, explaining the purpose of the disclosure and the limitations on the registrant's use thereof; (2) the inquiry is made either in at least one mailing separate from other account mailings or in repeated mailings; and (3) the mailing includes return card, postage paid enclosures. This alternative proposal would provide specific guidance to banks while, at the same time, satisfying Congress' intent in mandating the use of good faith efforts on the part of banks to obtain affirmative consent to disclosure of beneficial owner information for customer accounts opened on or before December 28, 1985.[27] In contrast to the first proposal, this alternative proposal may not provide the same flexibility to banks in complying with the good faith requirement. Accordingly, the Commission solicits specific comment on the appropriate level of specificity required in the proposed rule to ensure that banks use good faith efforts to obtain affirmative consent to disclosure of beneficial owner information from their customers.

Finally, proposed paragraph (c) would provide that, like brokers, banks may designate an agent or intermediary to act on its behalf in performing its obligations under this paragraph and that a registrant must make its request of such intermediary. Registrants will make the request for a nonobjecting and affirmatively consenting beneficial owner list to the intermediary only after the bank's response to the search card identifying the intermediary is received. Should a bank later designate a new intermediary to act on its behalf, it would be to the benefit of all concerned parties for the bank to notify the registrant of this fact.

The Commission believes that the most effective implementation of the shareholder communications system would involve the use of an intermediary to compile and to supply beneficial owner lists. This will assure standardized delivery format and client confidentiality of banks. Further, economies of scale will be realized by maximizing cost savings while minimizing burdens on banks by permitting them to delegate this function to an intermediary. The fact that virtually all brokers have contracted with the intermediary to perform these functions indicates that brokers have found this to be the case.[28]

The intermediary would serve as a central processing agent between banks and registrants in the transmission of lists of beneficial owners. In addition, the intermediary would act, on behalf of banks, in performing all administrative functions required in providing beneficial owner information, including: receiving requests for beneficial owner information from registrants; advising banks of the record date for a registrant's request; receiving customer lists from banks; preparing, in a standardized format, lists of nonobjecting and affirmatively consenting beneficial owners; and billing registrants for fees associated with providing the beneficial owner information.

Employing an intermediary, however, would not be a condition to complying with the shareholder communications rules. Accordingly, proposed Rule 14b–2 and proposed revisions to Rule 14a–13 recognize that a bank may not wish to employ an intermediary to act on its behalf and that, in such cases, the registrant must make the request directly to the bank.

4. Proposed Rule 14b–2(d) and (e)

In addition to recognizing that a bank may designate an agent to act on its behalf, Rule 14b–2(d) would make clear that, without assurance by the registrant of reimbursement of reasonable expenses, both direct and indirect, incurred in connection with performing its obligations under the rule, a bank need not satisfy its obligations under proposed paragraphs (b), (c), and (f) of Rule 14b–2. A bank is obligated, under proposed paragraph (a), however, to supply the information requested by the registrant without regard to reimbursement.[29]

Proposed paragraph (e) to Rule 14b–2 addresses the issue of how the "reasonable expenses" of banks for forwarding proxy soliciting material and annual reports and providing beneficial owner lists are to be determined. In the rules applicable to brokers, the Commission has long left to the exchanges and other self-regulatory organizations the determination of what constitutes "reasonable expenses" and therefore what fees brokers appropriately may charge for forwarding proxy soliciting material. The Commission took the same approach as to the "reasonable expenses" of providing beneficial owner lists, believing that, because the self-regulatory organizations represent the interests of both registrants and brokers, they were in the best position to make a fair allocation of the costs associated with the rules. In this regard, the Commission has approved rule changes by the New York Stock Exchange, American Stock Exchange and the National Association of Securities Dealers, based on recommendations of the Ad Hoc Committee. These rule changes permit the start-up costs associated with the implementation of the beneficial owner identification rule to be funded by a surcharge of $.20 and $.185 respectively per proxy for each of a registrant's first two annual meeting proxy solicitations subsequent to the approval of the surcharge.[30] In addition, the rule changes set a charge of $.065 per name for registrants requesting beneficial ownership lists. The $.065 rate of reimbursement to brokers does not include fees which may be charged by an intermediary agent used by the broker. The NYSE also noted that the Ad Hoc Committee had considered the fees IECA Intermediary Services

---

[27] H.R. Rep. No. 161 at 4.

[28] After requesting proposals, the Ad Hoc Committee selected Independent Election Corporation of America ("IECA") to serve as intermediary.

[29] Under Rule 14a–13(a)(3), a registrant is obligated to pay the record holder and respondent banks its reasonable expenses for completing the mailing of proxies, proxy soliciting material and/or annual reports to security holders to whom the material is sent.

[30] *See* Release Nos. 34–21800 (March 28, 1985) [50 FR 13297] (File No. SR–NYSE–85–2) and 34–21915 (April 1, 1985) [50 FR 14006] (File Nos. SR–NASD–85–7 and SR–Amex–85–2) approving first surcharge; Release No. 34–22939 (February 11, 1986) [51 FR 5021] (File No. SR–NYSE–85–43) approving second surcharge and setting per name charge; and Release No. 34–22908 (February 14, 1986) [51 FR 6047] (File No. SR–NYSE–85–46), approving increases in charges for forwarding proxy materials and annual reports.

BEST COPY AVAILABLE

proposes to charge registrants for its services and determined the charges to be reasonable.

Because comparable self-regulatory organizations do not exist for banks, however, the Commission is proposing a safe-harbor provision which would allow banks to look to the fees charged by brokers for the same functions. Thus, if a bank charges no more than that which may be charged by brokers, the amount it charges registrants as reimbursement of "reasonable expenses" incurred in connection with the Rule 14b–2 functions shall not be deemed to be unreasonable. This safe harbor provision would cover fees charged for forwarding materials, the start-up surcharges, the per name fee for beneficial owner information and charges for intermediary services. The provision also would be nonexclusive. Banks which incur greater expenses could seek additional reimbursement, subject to the "reasonable expenses" limitation in paragraph (d)(1).

5. Proposed Rule 14b–2(g)

Proposed paragraph (g) would define the term beneficial owner to include any person who has or shares voting power. If more than one person shares voting power, then the provisions of the instrument determining the basis on which shares are voted would govern regarding the vote as to disclosure of beneficial owner information. Because banks often hold securities in various types of accounts where voting may rest entirely with either the bank or the customer or voting authority is shared among trustees, the proposed definitional provision may be necessary to alleviate any difficulties in determining whether disclosure of the identity of the beneficial owner is appropriate.

F. Rule 14c–1

The Commission proposes to amend Rule 14c–1 which is the definitional section for those rules governing the distribution of information statements and annual reports to security holders to conform, to the extent possible, to proposed revisions to Rule 14a–1.

G. Rule 14c–2

The Commission proposes to amend Rule 14c–2 which governs the distribution of information statements and annual reports to security holders to conform, to the extent possible, to proposed revisions to Rule 14a–3.

H. Rule 14c–7

The Commission proposes to amend Rule 14c–7 which governs the distribution of information statements and annual reports to security holders to conform, to the extent possible, to proposed revisions to Rule 14a–13.

VI. Cost—Benefit Analysis

To evaluate fully the benefits and costs associated with proposed Rule 14b–2 and the proposed amendments to Rules 14a–1, 14a–3, 14a–13, 14c–2 and 14c–7, the Commission requests commentators to provide views and data as to the costs and benefits associated with the rules incorporating banks into the shareholder communications system. In this regard, the Commission notes that the proposals will improve the proxy distribution process between registrants and beneficial owners thus ensuring that security holders will be able to exercise informed voting decisions. Further, by bringing banks into the direct communications system, registrants will be able to forward certain corporate communications to their beneficial owners which also will result in an increase in informed voting decisions on the part of beneficial owners. Registrants who mail corporate communications directly to beneficial owners whose securities are held of record by banks may realize increased cost savings. At present, registrants also may realize increased cost savings for those beneficial owners whose securities are held of record by brokers. As of May 5, 1986, 1,816 requests for beneficial owner information had been made, suggesting that registrants recognize the benefits associated with the direct communications system.

The costs associated with these proposals will result in banks being required to: (1) Process proxy materials; (2) respond to requests for beneficial owner information; and (3) perform certain recordkeeping obligations. Banks, however, will be reimbursed by registrants for the reasonable costs associated with performing these obligations. The proposals require that registrants who choose to avail themselves of the benefits associated with the proposals must reimburse banks for their reasonable costs incurred in performing their obligations.

VII. Regulatory Flexibility Act Inquiry

Proposed Rule 14b–2 and the corresponding revisions to Rules 14a–1, 14a–13, 14b–1, 14c–1 and 14c–7 and amendments to Rules 14a–3 and 14c–2 have been certified, pursuant to 5 USC 605(b), that, if promulgated, they will not have a significant economic impact on a substantial number of small entities. Nonetheless, because the Commission has not adopted a definition of small business or organization that would encompass banks for purposes of these Rules, the certification states that the Commission intends to use the definition of small bank as contained in 17 CFR 240.0–10(f) (1) and (3), regarding a municipal securities dealer that is a bank. The Commission requests comment as to whether this definition is appropriate for purposes of these Rules.

VIII. Request for Comments

Any interested persons wishing to submit written comments on the proposed revisions to the shareholder communication rules, as well as on other matters that might have an impact on the proposals contained herein, are requested to do so.

The Commission also requests comment on whether the proposed revisions, if adopted, would have an adverse effect on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a)(2) of the Exchange Act.[51]

IX. Statutory Basis and Text of Proposed Amendments

These amendments are being proposed pursuant to sections 12, 14 and 23(a) of the Securities Exchange Act of 1934.

List of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities, Banks, Associations.

X. Text of Proposals

In accordance with the foregoing Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 is amended by adding the following citations: (Citations before * * * indicate general rulemaking authority).

Authority: Sec. 23, 48 Stat. 901, as amended; 15 U.S.C. 78w. * * * §§ 240.14a–1, 240.14a–3, 240.14a–13, 240.14b–1, 240.14b–2, 240.14c–1, 240.14c–2 and 240.14c–7 also issued under Sections 12, 15 U.S.C. 781, and 14, Pub. L. 99–222, 99 Stat. 1737, 15 U.S.C. 78n.

2. By redesignating current paragraphs (c) through (f) as (d) through (g) and by adding new paragraph (c) to § 240.14a–1 to read as follows:

---

[51] 15 U.S.C. 78w(a)(2) (1982).

§ 240.14b–1 Definitions.

* * * * *

(c) *Entity that exercises fiduciary powers.* The term "entity that exercises fiduciary powers" means any entity that holds securities in nominee name on behalf of a beneficial owner but does not include a clearing agency registered pursuant to Section 17A of the Act. Where such registered clearing agency is the record holder, the participants identified by such clearing agency in the securities position listing (as defined by § 240.17Ad–8) assume the rights and obligations associated with record ownership under §§ 240.14a–13, 240.14b–1 and 240.14b–2.

* * * * *

3. By revising paragraph (e)(2) of § 240.14a–3 to read as follows:

§ 240.14a–3 Information to be furnished to security holders.

* * * * *

(e) * * *

(1) * * *

(2) Unless state law requires otherwise, a registrant is not required to send an annual report or proxy statement to a security holder if (i) an annual report and a proxy statement for two consecutive annual meetings or (ii) all, and at least two, payments (if sent by first class mail) of dividends or interest on securities during a twelve month period have been mailed to such security holder's address and have been returned undeliverable. If any such security holder delivers or causes to be delivered to the registrant notice setting forth his then current address for security holder communications purposes, a registrant's obligation to deliver an annual report or a proxy statement under this section is reinstated.

4. By revising § 240.14a-13 to read as follows:

§ 240.14a-13 Obligation of registrants in communicating with beneficial owners.

(a) If the registrant knows that securities of any class entitled to vote at a meeting (or by written consents or authorizations if no meeting is held) with respect to which the registrant intends to solicit proxies, consents or authorizations are held of record by a broker, dealer, voting trustee, or bank, association, other entity that exercises fiduciary powers or their nominees, the registrant shall:

(1) By first class mail or other equally prompt means: (i) inquire of such record holders: (A) whether other persons are the beneficial owners of such securities and if so, the number of copies of the proxy and other soliciting material necessary to supply such material to beneficial owners; and, in the case of an annual (or special in lieu of the annual) meeting, or written consents in lieu of such meeting, at which directors are to be elected, the number of copies of the annual report to security holders necessary to supply such material to beneficial owners to whom such reports are to be distributed by the broker, dealer, voting trustee, or bank, association, other entity that exercises fiduciary powers or their nominees and not by the registrant; and (B) if the record holder has an obligation under § 240.14b–1(c) or § 240.14b–2(c), whether an agent has been designated to act on its behalf in fulfilling such obligation and, if so, the name and address of such agent; and (ii) indicate to such record holders which are brokers, dealers, or banks, associations or other entities that exercise fiduciary powers whether the registrant, pursuant to paragraph (c) of this section, intends to distribute the annual report to security holders to beneficial owners of its securities who either have consented or not objected to disclosure of their names, addresses and securities positions.

(2) Make the inquiry at least 20 calendar days prior to the record date of the meeting of security holders, or (i) if such inquiry is impracticable 20 calendar days prior to the record date of a special meeting, as many days before the record date of such meeting as is practicable or (ii) if, consents or authorizations are solicited, and such inquiry is impracticable 20 calendar days before the earliest date on which they may be used to effect corporate action, as many days as is practicable, or (iii) at such later time as the rules of a national securities exchange on which the class of securities in question is listed may permit for good cause shown; and

(3) Shall supply, in a timely manner: (i) the record holders of whom the inquiry is made with additional copies of the proxy, other proxy soliciting material, and/or the annual report to security holders, in such quantities, assembled in such form and at such a place, as the record holder may reasonably request in order to address and send one copy of each to each beneficial owner of securities who is to be furnished with such material by the broker, dealer, voting trustee, or bank, association, other entity that exercises fiduciary powers, or their nominees; and (ii) those banks, associations or other entities that exercise fiduciary powers on whose behalf the record holder holds securities and who have responded to the registrant's inquiry made under paragraph (a)(1) of this section, with additional copies of the proxy soliciting material, and/or the annual report to security holders, (but not the proxy) in such quantities assembled in such form and at such a place, as such bank, association or other entity that exercises fiduciary powers may reasonably request in order to address and send one copy of each to each beneficial owner of securities who is to be furnished with such material by such bank, association or other entity that exercises fiduciary powers. The number of annual reports supplied shall be sufficient to supply those beneficial owners to whom the report is to be distributed by the broker, dealer, voting trustee, or bank, association, other entity that exercises fiduciary powers, or their nominees. The registrant shall upon the request of such record holder or such bank, association or other entity that exercises fiduciary powers, pay its reasonable expenses for completing the mailing of such material to security holders to whom the material is sent.

Note 1.—If the registrant's list of security holders indicates that some of its securities are registered in the name of a clearing agency registered pursuant to section 17A of the Act (*e.g.*, Cede & Co.," nominee for the Depository Trust Company), the registrant shall make appropriate inquiry of the clearing agency and thereafter of the participants in such clearing agency who may hold on behalf of a beneficial owner, and shall comply with the above paragraph with respect to any such participant (*see* § 240.14a–1(c)).

Note 2.—The attention of registrants is called to the fact that brokers, dealers, or banks, associations and other entities that exercise fiduciary powers have an obligation pursuant to § 240.14b–1(b), § 240.14b–2(b) and applicable self-regulatory organization requirements to obtain and forward, within the time periods prescribed therein, (a) proxy soliciting materials to all beneficial owners, and (b) annual reports to security holders, to all beneficial owners unless the registrant has notified the broker, dealer, or bank, association or other entity that exercises fiduciary powers that it has assumed responsibility to mail such material to consenting and non-objecting beneficial owners in which case the broker, dealer, or bank, association and other entity that exercises fiduciary power shall mail such material to non-consenting and objecting beneficial owners.

(b) Any registrant requesting pursuant to § 240.14b–1(c) and § 240.14b–2(c) a list of names, addresses and securities positions of beneficial owners of its securities who either have consented or have not objected to disclosure of such information shall:

(1) Request such list from all brokers, dealers, or banks, associations and other entities that exercise fiduciary powers (through their agents) having customers who are beneficial owners of

the registrant's securities *provided, however,* such request for a list of beneficial owners need not include beneficial owners of securities where (A) those beneficial owners have purchased securities pursuant to an employee benefit plan as defined in § 230.405; and (B) the registrant has access, by some means other than pursuant to paragraph (b) of this section to the beneficial owner's name and address;

(2) Use the information so furnished exclusively for purposes of corporate communications; and

(3) Upon the request of such brokers, dealers, or banks, associations or other entities that exercise fiduciary powers, through their agents, pay the reasonable expenses, both direct and indirect, of providing beneficial owner information.

Note.—A registrant will be deemed to have satisfied its obligations under paragraph (b) of this section by requesting consenting and non-objecting beneficial owner lists from a designated agent acting on behalf of the broker, dealer, or bank, association or other entity that exercise fiduciary powers and paying to that designated agent the reasonable expenses of providing the beneficial owner information.

(c) A registrant, at its option, may mail its annual report to security holders to the beneficial owners whose identifying information is provided by brokers, dealers, or banks, associations or other fiduciary entities that exercise fiduciary powers, through their agents, pursuant to § 240.14b–1(c) and § 240.14b–2(c), provided that such registrant notifies the brokers, dealers, or banks, associations or other fiduciary entities that exercise fiduciary powers, at the time a search card requesting the beneficial owner information in accordance with paragraph (a) of this section is sent that the registrant will mail the annual report to security holders to the beneficial owners so identified.

5. By revising paragraph (c) and the note to paragraph (c) of § 240.14b–1 to read as follows:

§ 240.14b–1 Obligation of registered brokers and dealers in connection with the prompt forwarding of certain communications to beneficial owners.

* * * * *

(c) Through its agent or directly, provide the registrant, upon the registrant's request, with the names, addresses and securities positions, compiled as of a date specified in the registrant's request which may be the registrant's record date for its next annual or special meeting of security holders, or, if not in connection with a meeting, another date which is no earlier than five business days after receipt of the registrant's request, of its customers who are beneficial owners of the registrant's securities and who have not objected to disclosure of such information. A broker or dealer, through its agent or directly, will be required to transmit the data to the registrant no later than five business days after the record date or other date specified by the registrant.

Note.—Where a broker or dealer employs a designated agent to act on its behalf in performing the obligations imposed on the broker or dealer by paragraph (c) of this section, the five business day time period for determining the date as of which the beneficial owner information for non-meeting lists is to be compiled is calculated from the date the designated agent receives the registrant's request. In complying with the registrant's request for beneficial owner information under paragraph (c) of this section, a broker or dealer need only supply the registrant with the names, addresses and securities positions of non-objecting beneficial owners.

* * * * *

6. By adding § 240.14b–2 to read as follows (There are alternative proposals for paragraphs (f) and (g)):

§ 240.14b–2 Obligation of banks, associations and other entities that exercise fiduciary powers in connection with the prompt forwarding of certain communications to beneficial owners.

A bank, association or other entity that exercises fiduciary powers shall:

(a)(1) Respond directly to the registrant no later than seven business days after receipt of an inquiry made in accordance with § 240.14a–13(a) by or on behalf of a registrant soliciting proxies, consents or authorizations by indicating, by means of a search card or otherwise: (i) the approximate number of its customers who are beneficial owners of the registrant's securities that are held of record by the bank, association, other entity that exercises fiduciary powers or its nominees;

(ii) With respect to customer accounts opened on or before December 28, 1985, the number of customers who are beneficial owners of the registrant's securities and who have affirmatively consented to disclosure of their names, addresses and securities positions if the registrant has indicated, pursuant to § 240.14a–13(a)(1)(ii), that it will distribute the annual report to security holders to beneficial owners of its securities who have affirmatively consented to disclosure of their names, addresses and securities positions; (iii) with respect to customer accounts opened after December 28, 1985, the number of customers who are beneficial owners of the registrant's securities and who have not objected to disclosure of their names, addresses and securities positions if the registrant has indicated, pursuant to § 240.14a–13(a)(1)(ii), that it will distribute the annual report to security holders to beneficial owners of its securities who have not objected to disclosure of their names, addresses and securities positions; (iv) the identity of any bank, association or other entity that exercises fiduciary powers on whose behalf it holds securities and the date that it has forwarded the inquiry made in accordance with § 240.14a–13(a) to those banks, associations or other entities that exercise fiduciary powers on whose behalf it holds securities; and (v) the identity of its designated agent, if any, acting on its behalf in fulfilling its obligations under paragraph (c) of this section;

(2) Upon receipt of the inquiry made in accordance with § 240.14a–13(a) by or on behalf of a registrant soliciting proxies, consents or authorizations, forward the inquiry, by first class mail or other equally prompt means, within one business day to those banks, associations or other entities that exercise fiduciary powers on whose behalf it holds securities.

(b) Upon receipt of the proxy, other proxy soliciting material, and/or annual reports to security holders, forward: (1) such materials to its customers who are beneficial owners of the registrant's securities (but are not banks, associations, or other entities that exercise fiduciary powers on whose behalf it holds securities) no later than five business days after the receipt of the proxy material or annual reports; (2) the proxy to those banks, associations or other entities that exercise fiduciary power on whose behalf it holds securities no later than one business day after the receipt of the proxy; *Provided, however,* that banks, associations or other entities that exercise fiduciary powers which receive other proxy soliciting material pursuant to § 240.14a–13(a)(3)(ii) shall not forward such material pursuant to paragraph (b)(1) of this section until such entities have received the proxy pursuant to paragraph (b)(2) of this section, at which time such entities shall then forward all such materials together, within the five business day period provided by paragraph (b)(1) of this section; and

(c) Through its agent or directly, provide the registrant, upon the registrant's request, with the names, addresses and securities positions, compiled as of a date specified in the registrant's request which may be the registrant's record date for its next annual or special meeting security holders, or, if not in connection with a

meeting, another date which is no earlier than five business days after receipt of the registrant's request, of: (1) With respect to customer accounts opened on or before December 28, 1985, its customers who are beneficial owners of the registrant's securities and who have affirmatively consented to disclosure of such information, subject to paragraph (f) of this section; and (2) with respect to customer accounts opened after December 28, 1985, its customers who are beneficial owners of the registrant's securities and who have not objected to disclosure of such information. A bank, association or other entity that exercises fiduciary powers, through its agent or directly, will be required to transmit the data to the registrant no later than five business days after the record date or other date specified by the registrant.

Note.—Where a bank, association or other entity that exercises fiduciary powers employes a designated agent to act on its behalf in performing the obligations imposed on the bank, association or other entity that exercises fiduciary powers by paragraph (c) of this section, the five business day time period for determining the date as of which the beneficial owner information for non-meeting lists is to be compiled is calculated from the date the designated agent receives the registrant's request. In complying with the registrant's request for beneficial owner information under paragraph (c) of this section, a bank, association or other entity that exercises fiduciary powers need only supply the registrant with the names, addresses and securities positions:

(1) With respect to customer accounts opened on or before December 28, 1985, of its customers who are beneficial owners of the registrant's securities and who have affirmatively consented to disclosure of such information, subject to paragraph (f) of this section; and (2) with respect to customer accounts opened after December 28, 1985, of its customers who are beneficial owners of the registrant's securities and who do not object to disclosure of such information.

(d) A bank, association or other entity that exercises fiduciary powers need not satisfy: (1) its obligations under paragraphs (b), (c) and (f) of this section if a registrant does not provide assurance of reimbursement of its reasonable expenses, both direct and indirect, incurred in connection with performing the obligations imposed by this section; or (2) its obligation under paragraph (b) of this section to forward annual reports to consenting and non-objecting beneficial owners identified by the bank, association or other entity that exercises fiduciary powers, through its agent or directly, pursuant to paragraph (c) of this section if the registrant notifies the bank, association or other entity that exercises fiduciary powers pursuant to § 240.14a–13(c) that the registrant will mail the annual report to such consenting and non-objecting beneficial owners, identified by the bank, association or other entity that exercises fiduciary powers and delivered in a list to the registrant pursuant to paragraph (c) of this section.

(e) For purposes of determining the fees which may be charged to registrants pursuant to § 240.14a–13(b)(3) and paragraph (d)(1) of this section for performing obligations under paragraphs (b), (c) and (f) of this section, an amount no greater than that permitted to be charged by brokers or dealers for reimbursement of their reasonable expenses, both direct and indirect, incurred in connection with performing the obligations imposed by § 240.14b–1 shall not be deemed to be unreasonable.

Alternative Proposal I

(f) For customer accounts opened on or before December 28, 1985, unless banks, associations and other entities that exercise fiduciary powers have made a good faith effort to obtain affirmative consent to disclosure of beneficial owner information pursuant to paragraph (c) of this section, such information shall be provided as to customers who are beneficial owners and do not object to disclosure of such information.

(g) For purposes of this section, the term "beneficial owner" includes any person who has or shares voting power which includes the power to vote, or to direct the voting of, such security.

Note.—If more than one person shares voting power, the provisions, of the instrument creating that voting power shall govern with respect to whether disclosure of beneficial owner information is made.

Alternative Proposal II

(f) For customer accounts opened on or before December 28, 1985, unless banks, associations and other entities that exercise fiduciary powers have made a good faith effort to obtain affirmative consent to disclosure of beneficial owner information pursuant to paragraph (c) of this section, such information shall be provided as to customers who are beneficial owners and do not object to disclosure of such information. Banks, associations and other entities that exercise fiduciary powers shall be deemed to have made a good faith effort to obtain affirmative consent to disclosure of beneficial owner information if: (1) The inquiry is phrased in neutral language, explaining the purpose of the disclosure and the limitations on the registrant's use thereof; (2) the inquiry is made either in at least one mailing separate from other account mailings or in repeated mailings; and (3) the mailing includes return card, postage paid enclosures.

(g) For purposes of this section, the term "beneficial owner" includes any person who has or shares voting power which includes the power to vote, or to direct the voting of, such security.

Note.—If more than one person shares voting power, the provisions of the instrument creating that voting power shall govern with respect to whether disclosure of beneficial owner information is made.

§ 240.14a–1 [Amended]

8. Section 240.14c–1 is amended by redesignating paragraphs (b) through (e) as paragraphs (c) through (f), respectively, and by adding a new paragraph (b) to read as follows:

* * * * *

(b) *Entity that exercises fiduciary powers.* The term "entity that exercises fiduciary powers" means any entity that holds securities in nominee name on behalf of a beneficial owner but does not include a clearing agency registered pursuant to section 17A of the Act. Where such registered clearing agency is the record holder, the participants identified by such clearing agency in the securities position listing (as defined by § 240.17Ad–8) assume the rights and obligations associated with record ownership under § 240.14c–7.

* * * * *

9. By revising § 240.14c–2(a) to read as follows:

§ 240.14c–2 Distribution of information statement.

(a) In connection with every annual or other meeting of the holders of a class of securities registered pursuant to section 12 of the Act, including the taking of corporate action with the written authorization or consent of the holders of a class of securities so registered, the registrant of such securities shall transmit a written information statement containing the information specified in Schedule 14C (§ 240.14c–101) or written information statements included in registration statements filed under the Securities Act of 1933 on Form S–4 or F–4 (§ 239.25 or 239.34 of this chapter) or Form N–14 (§ 239.23 of this chapter), and containing the information specified in such form, to every security holder of the class that is entitled to vote or give an authorization or consent in regard to any matter to be acted upon and from whom a proxy, authorization or consent is not solicited on behalf of the registrant pursuant to section 14(a) of the Act: *Provided however,* that (1) in the case of a class of securities in unregistered or bearer form, such statements need be transmitted only to those security holders whose names are known to the registrant, and (2) no such statements need to transmitted to a security holder if a registrant would be excused from delivery of an annual report or a proxy statement under Rule 14a–3(e)(2) (§ 240.14a–3(e)(2)) if such section were applicable.

* * * * *

10. By revising § 240.14c-7 to read as follows:

§ 240.14c-7 Providing copies of material for certain beneficial owners.

(a) If the registrant knows that securities of any class entitled to vote at a meeting, or by written authorizations or consents if no meeting is held, are held of record by a broker, dealer, voting trustee, or bank, association, or other entity that exercises fiduciary powers or their nominees, the registrant shall:

(1) By first class mail or other equally prompt means, inquire of such record holders whether other persons are the beneficial owners of such securities and, if so, the number of copies of the information statement necessary to supply such material to beneficial owners and, in the case of an annual (or special in lieu of the annual) meeting, or written consents in lieu of such meeting, at which directors are to be elected, the number of copies of the annual report to security holders, necessary to supply such material to such beneficial owners for whom proxy material has not been and is not to be made available and to whom such reports are to be distributed by the brokers, dealer, voting trustee, or bank, association, other entity that exercises fiduciary powers on their nominees and not by the registrant; and

(2) Indicate to such record holders which are brokers, dealers, or banks, associations or other entities that exercise fiduciary powers whether the registrant pursuant to paragraph (c) of this section, intends, to distribute the annual report to security holders to beneficial owners of its securities who either have consented or objected to disclosure of their names, addresses and securities positions; and

(3) Supply, in a timely manner: (i) such record holder of whom the inquiry is made; and (ii) those banks, associations or other entities that exercise fiduciary powers on whose behalf the record holder holds securities and who have responded to the registrant's inquiry made under paragraph (a)(1) of this section, with additional copies of the information statement and the annual report to security holders, in such quantities, assembled in such form and at such a place, as the record holder or bank, association or other entity that exercises fiduciary powers on whose behalf the record holder holds securities may reasonably request in order to address and send one copy of each to each beneficial owner of securities who is to be furnished with such material by the broker, dealer, voting trustee, or bank, association, other entity that exercises fiduciary powers or their nominees. The number of annual reports supplied shall be sufficient to supply those beneficial owners to whom the report is to be distributed by the broker, dealer, voting trustee, or bank, association, [other entity that exercises fiduciary powers or their nominees. The registrant shall, upon the request of such record holder or bank, association or other entity that exercises fiduciary powers on whose behalf the record holder holds securities, pay its reasonable expenses for completing the mailing of such material to security holders to whom the material is sent.

Note 1.—If the registrant's list of security holders indicates that some of its securities are registered in the name of a clearing agency registered pursuant to section 17A of the Act (*e.g.*, "Cede & Co.," nominee for the Depository Trust Company), the registrant shall make appropriate inquiry of the clearing agency and thereafter of the participants in such a clearing agency who may hold on behalf of a beneficial owner, and shall comply with the above rule with respect to any such participant (*see* § 240.14c-1).

Note 2.—The requirement for sending an annual report to security holders of record having the same address will be satisfied by sending at least one report to a holder of record at that address provided that those holders of record to whom a report is not sent agree thereto in writing. This procedure is not available to registrants, however, where banks, associations, other entities that exercise fiduciary powers, brokers and dealers and other persons hold securities in nominee accounts or "street names" on behalf of beneficial owners, and such persons are not relieved of any obligation to obtain or send such annual report to the beneficial owners.

Note 3.—The attention of registrants is called to the fact that brokers, dealers, and banks, associations and other entities that excise fiduciary powers have an obligation pursuant to applicable self-regulatory organization requirements to obtain and forward, in a timely manner, (a) information statements to all beneficial owners, and (b) when requested by the registrant annual reports to security holders to beneficial owners for whom such brokers and dealers hold securities.

(b) Any registrant requesting a list of names, addresses and securities positions of beneficial owners of its securities who either have consented or not objected to disclosure of such information shall:

(1) Request such list from all brokers and dealers (through their agents) having customers who are beneficial owners of the registrant's securities *provided however*, such request for a list of beneficial owners need not include beneficial owners of securities where (i) those beneficial owners have purchased securities pursuant to an employee benefit plan as defined in § 230.405; and (ii) the registrant has access, by some means other than pursuant to paragraph (b) of this section, to the beneficial owner's name and address;

(2) Use the information so furnished exclusively for purposes of corporate communications; and

(3) Upon the request of such brokers, dealers, and banks, associations, and other entities that exercise fiduciary powers, through their agents, pay the reasonable expenses, both direct and indirect, of providing beneficial owner information.

Note.—A registrant will be deemed to have satisfied its obligations under paragraph (b) of this section by requesting consenting and non-objecting beneficial owner lists from a designated agent acting on behalf of the broker, dealer, or bank, association or other entity that exercises fiduciary powers and paying to that designated agent the reasonable expenses of providing the beneficial owner information.

(c) A registrant, at its option, may mail its annual report to security holders to the beneficial owners whose identifying information is provided by brokers, dealers, or banks, associations and other entities that exercise fiduicary powers, through their agents, provided that such registrant notifies the brokers, dealers, or banks, associations and other entities that exercise fiduciary powers in accordance with paragraph (a) of this section that the registrant will mail the annual report to security holders to the beneficial owners so identified.

By the Commission.

Shirley E. Hollis,
Acting Secretary.
May 29, 1986.

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 655

Labor Certification Process for the Temporary Employment of Aliens in Agriculture: Adjustments to Piece Rates

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule.

SUMMARY: The Employment and Training Administration (ETA) of the Department of Labor (DOL) is proposing to amend its regulations for the certification of nonimmigrant aliens for temporary employment in agriculture in the United States. The proposed rule would amend the procedures for adjustment of peice rates employers offer and pay to United States and alien workers. The rule would require each piece rate to be no less than the prevailing piece rate for the crop activity

in the area of intended employment. It would also permit productivity requirement increases if justified by the employer and approved by the ETA Regional Administrator (RA). The rule would also discontinue the requirement that piece rates be designed to produce average hourly earnings at least equal to the adverse effect wage rate (AEWR).

DATES: Written comments on the proposed rule must be received on or before July 7, 1986.

ADDRESS: Send written comments to: Assistant Secretary of Labor, Employment and Training Administration, Room 8100, Patrick Henry Building, 601 D Street NW., Washington, DC 20213. Attention: Mr. Richard C. Gilliland, Director, U.S. Employment Service.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas M. Bruening. Telephone: (202) 376–6228.

SUPPLEMENTARY INFORMATION:

I. Background

A. Temporary Alien Labor Certification Process

Whether to grant or deny an employer's petition to import a nonimmigrant alien to the United States for the purpose of temporary employment is solely the decision of the Attorney General and his designee, the Commissioner of the Immigration and Naturalization Service (INS). 8 U.S.C. 1101(a)(15)(H)(ii) and 1184(c); 8 CFR 2.1. Pursuant to the requirement in 8 U.S.C. 1184(c) that the Attorney General consult with appropriate agencies of the Government concerning the importation of nonimmigrant (so called "H–2") workers, INS has determined that prior to granting or denying such a petition, it first will request the Department of Labor (DOL) to advise INS on availability of qualified United States workers for the jobs offered to the H–2 aliens, and whether the wages and working conditions attached to such a job offer will adversely affect similarly employed U.S. workers.

Pursuant to the INS regulations, the Employment and Training Administration (ETA) has published regulations at 20 CFR Part 655, Subpart C, for the certification of temporary employment of nonimmigrant aliens in agriculture and logging in the United States. DOL has determined that similarly employed U.S. workers have been adversely affected by the importation and employment of nonimmigrant aliens in agricultural employment. It has been determined further that employment of those aliens in a number of States at wages below specially computed adverse effect wage rates (AEWRs) would adversely affect the wages of similarly employed U.S. workers. 20 CFR 655.202(b)(9) and 655.207.

B. Piece Rates in the H–2 Program

Many employers who seek certification to employ foreign workers use the piece rate method of paying workers. The Department of Labor's (DOL's) regulation currently in effect on piece rates under this program provides that:

> (i)n any year in which the applicable adverse effect rate is increased, employers shall adjust their piece rates upward to avoid requiring a worker to increase his or her productivity over the previous year in order to earn an amount equal to what the worker would earn if the workers were paid at the adverse effect rate.

20 CFR 655.207(c) (1983); see 43 FR 10306, 10317 (March 10, 1978).

Historically, DOL has determined that workers should not be required to increase their level of productivity in order to earn, at a minimum, the hourly AEWR. See, e.g., 20 CFR 655.207(c) (1983); 20 CFR 602.10b(a)(2) (1971). Conversely, if the employer's piece rate for a particular crop activity allowed the average worker to receive earnings at or above the AEWR, that piece rate has been acceptable. Thus, if average hourly earnings for the average worker in the preceding year equalled or exceeded the applicable AEWR, the piece rate for that crop activity did not need to be raised. This interpretation of DOL's regulation on piece rates was reflected in its issuance to ETA regional offices and to State Job Service Agencies in General Administration Letter (GAL) No. 46–81, issued in September 1981.

In 1982 and 1983, the U.S. District Court for the District of Columbia, in two orders resulting from a suit filed by farmworkers *(NAACP, Jefferson County Branch* v. *Donovan),* issued an interpretation of the established regulation which differed with the Department's original intent in promulgating it. 566 F. Supp. 1202 (D.D.C. 1983); and 558 F. Supp. 218 (D.D.C. 1982). The court rule and ordered that the piece rates be increased each time the AEWRs are increased, based upon productivity in the specific crop activity in 1977, or the first year after 1977 in which the employer first entered the program. The 1977 productivity rate is determined by dividing the 1977 AEWR by the piece rate paid for that crop activity. Under this formula, the current piece rate would be equal to the current AEWR divided by the 1977 productivity rate or the 1977 piece rate increased by the same percentage as the increase in the AEWR since 1977.

Under the court's interpretation, employers who had paid a higher than average piece rate in 1977, and whose workers received, at that time, earnings above the adverse effect level, would have been bound to maintain their workers at levels of earnings above the hourly AEWR required by 20 CFR 655.207. In order to clarify its original intent, DOL promulgated a revised rule (20 CFR 655.207(c) (1985), 48 FR 40168 (September 2, 1983)) to reinstate and to reflect the original intent.

In promulgating the 1983 rule, the adjective "U.S." was added to modify the noun "workers" in the final rule to clarify DOL's intent, although the adjective had not appeared in the July 22, 1983, proposed rule. Addition of "U.S." was in response to public comments on the proposed rule and made it clear that in each year piece rates would be based on previous year's average earnings of U.S. workers. Some employers in Florida challenged this addition of "U.S." before the U.S. District Court for the Southern District of Florida. That court found, in a ruling issued March 19, 1984, that the piece rate regulation, as amended, was partially invalid, holding that adequate notice and opportunity to comment was not provided on the addition of the adjective "U.S." in the final regulation. In *Florida Fruit and Vegetable Association* v. *Donovan,* 583 F. Supp. 268 (S.D. Fla. 1984), the court ordered that the six references to "U.S." be deleted. However, it further held that the "final rule as modified, which is exactly as it was proposed, is a valid final rule." Only the procedure by which the adjective "U.S." was included in the final rule was questioned by the court, not the substance of the rule itself. (A similar ruling was issued later by the U.S. District Court in Burlington, Vermont, *Shoreham Cooperative Apple Producers' Association, Inc.* v. *Donovan,* Civ. No. 83–326 (D. Vt. November 9, 1984)).

While the Florida federal court struck down the revised rule on Administrative Procedure Act (APA) grounds, the U.S. District Court for the District of Columbia, in an order issued on August 15, 1984, found that the rulemaking had complied with the APA. *NAACP, Jefferson County Branch* v. *Donovan,* Civ. No. 82–2315 (D.D.C. August 15, 1984). This ruling was appealed by attorneys representing workers.

In order to satisfy the Florida federal court ruling of March 1984 (and the later Vermont federal court ruling), DOL published a notice in the Federal Register on December 10, 1984, announcing (and requesting comments on) a proposed rulemaking to repromulgate the piece rate rule to include the adjective "U.S." before "workers". 49 FR 48061. Following the review of submitted comments, a final rule was published on June 21, 1985. 50 FR 25706. Then, on July 8, 1985, the U.S. Court of Appeals for the District of

Columbia Circuit issued a ruling which overturned the decision made in the U.S. District Court for the District of Columbia on August 15, 1984. *NAACP, Jefferson County Branch* v. *Brock*, 705 F. 2d 1178 (D.C. Cir. 1983), *rev'g*, Civ. No. 82–2315 (D.D.C. August 15, 1984). The D.C. Circuit ruled that DOL had not sufficiently identified and justified a change in policy as required by the Administrative Procedure Act. This had the effect of reinstating the piece rate regulation at 20 CFR 655.207(c) as published in the Federal Register at 43 FR 10817, on March 16, 1978, and interpreted by the U.S. District Court for the District of Columbia in its 1982 and 1983 orders (556 F. Supp. 1202 and 558 F. Supp. 218). See *NAACP, Jefferson County Branch* v. *Brock*, Civ. No. 82–2315, final order and judgment (D.D.C. August 21, 1985). Subsequent to this development, ETA took steps to abide by the interpretation of the court and to condition 1985 temporary alien agricultural labor certifications upon employers' assurances to pay piece rates computed according to the D.C. District Court's interpretations.

All East Coast apple growers who were required to pay the piece rates did provide the necessary assurances that they would do so, with the exception of two growers in West Virginia. When the West Virginia growers were denied certification, they filed suit against DOL in the U.S. District Court for the Northern District of West Virginia. *Tri-County Growers, Inc.* v. *Brock*, Civ. No. 85–38–M (N.D.W.Va); *Fuller* v. *Brock*, Civ. No. 85–37–M (N.D.W.Va.). The West Virginia federal court, on August 28, 1985, ordered DOL to certify the temporary employment of H–2 workers by these growers, on the provision that the growers establish escrow accounts to cover the piece rate differences in dispute. These two cases (since then being heard together) are still pending.

Although 1985 certifications were issued to other apple growers who agreed to pay the required rates, information provided to ETA in September 1985 by farmworker attorneys indicated that the rates were not being paid. Subsequently, most of the growers sued DOL on this issue on September 20, 1985, contending that DOL could not require them to pay the rates because they were not parties to the litigation in the U.S. District Court for D.C. that resulted in the higher piece rate requirements. This case is pending before the U.S. District Court in the Western District of Virginia. *Frederick County Fruit Growers' Association* v. *Brock*, Civ. No. 85–0142IH (W.D.Va.). Subsequent payroll audits performed by ETA revealed that about two-thirds of the certified growers who had agreed to pay the rates as a condition of certification were not doing so. Pending a final ruling on the case, the Virginia federal court, on December 17, 1985, also ordered the growers to escrow the amounts in dispute.

II. Scope of Piece Rate Regulation Review and Considerations Involved

A. Scope of Review

A DOL/USDA interagency task force was established to examine possible alternatives to the current piece rate regulation at 20 CFR 655.207(c). While the piece rate regulation revisions promulgated in 1983 and 1985 were invalidated by the courts in 1985, the decision of the U.S. Court of Appeals for the District of Columbia Circuit clearly provided an opportunity for DOL to reexamine that regulation, consider other options, and if it chose, to change the rule. *NAACP, Jefferson County Branch* v. *Brock*, 705 F. 2d 1178 (D.C. Cir. 1983). The court wrote:

> We emphasize again that *NAACP I* and *NAACP II* do not themselves prevent DOL from altering its piece rate regulation even in a way that would represent a dramatic shift in policy. Those decisions require only that the Department admit that the new regulation is a change of policy.

705 F. 2d at 1183. The court continued:

> We do not hold that no reasoned justification for the new piece rate regulation is possible. The Department may find, for example, that the as-yet unconsidered consequences of the new regulation are overborne by problems the old regulation engendered. But we are not now positioned to consider the reasonableness of any particular explanation DOL might proffer to salvage its current regulatory formulation.
>
> As a reviewing court, "we may not supply a reasoned basis for the agency's action that the agency itself has not given." (Citation omitted) Accordingly, we reverse the District Court's judgment and remand the case to the District Court with instructions to return the amended regulation to DOL so that the Department may proceed to reconsider the matter in a manner consistent with this opinion.

705 F. 2d 1185.

DOL therefore undertook to examine the piece rate issued de novo, evaluating not only the reinstated 1978 rule and the 1983 and 1985 revisions which were invalidated by the courts, but also several other options.

B. Considerations Involved in Review

A number of considerations involving basic H–2 program objectives, administrative feasibility and economic factors were carefully weighed in reviewing the piece rate issue.

The major ones were:

1. Under the Immigration and Nationality Act and INS regulations, DOL has a mandate to protect the wages and job opportunities of U.S. workers. Specifically, DOL is responsible for determining whether U.S. workers are available to perform the work for which nonimmigrant foreign workers are being sought, and whether the employment of such aliens will adversely affect the wages of working conditions of similarly employed U.S. workers. Protecting the job opportunities and wages and working conditions of U.S. workers is of paramount importance when considering any aspects of the program. This objective must be balanced, however, with a concern for the ligitimate business interests of growers.

2. The hourly adverse effect wage rate (AEWR) is the primary wage standard designed to protect the jobs and earnings of U.S. workers; not the federal or State minimum wage, or the prevailing wage, or average hourly earnings, or piece rates. Piece rate requirements have always been defined in relation to the AEWR.

3. With the exception of the NEWR, which tends to be more than the prevailing wage, other wage and working condition requirements which are not specifically required as a minimum are related to those which are prevailing among U.S. workers similarly employed.

4. DOL has traditionally been concerned about situations where employers require increasing productivity, in piece-rate-paid occupations, in order to achieve a given hourly wage standard. Thus, the H–2 program regulations have contained language expressing that concern. This language was the basis for litigation brought by farmworker attorneys in 1982, which resulted in the interpretation upheld by the DC Circuit in 1985, cited above, requiring that piece rates be increased by the same proportion as the AEWR increases. The courts accepted the plaintiffs' contention that the DOL rule meant that a productivity increase could not be required or result for *any* U.S. worker because of an AEWR increase. The courts rejected DOL's contention that the rule was meant to prevent productivity increases required for the *average* U.S. worker.

5. While many of DOL's programs are concerned solely with the interests of U.S. workers, it is clear in the H–2 program that the interests of both workers and growers must be balanced. This principle has been clearly enunciated in federal court decisions.

6. Information on prevailing piece rates is collected by certain State Employment Security Agencies (SESAs). Information is obtained by crop and crop area. The survey, however, does not contain, for most States, sufficient information on aggregate earnings and hours worked to convert data to average hourly earnings.

7. Information on worker productivity is currently available only from payroll records of H–2 growers. These records have always been, by regulation, subject to on-site audit; in 1985, the Office of Management and Budget (OMB), approved the submission of such records to ETA for U.S. workers employed in 1983–1985. These records permit calculations of whether the "average U.S. worker" earned the AEWR. The records, however, are usually not detailed enough to make this determination separately for activities paid at different piece rates with the same grower and present other problems when no U.S. workers are employed.

8. The proportionate increase approach uses 1977 as the base year, implying that the productivity requirements in that year were appropriate. In addition to questioning the validity of that year's requirements, there are problems in determining what the appropriate requirement should be for new growers entering the H–2 program. The DC federal court's interpretation permitted new growers to use their current standards for the first year (subject to DOL administrative review against prevailing standards), which became the base for subsequent years' piece rate determinations. In DOL's view, based upon its experience and expertise, it is questionable whether this approach is appropriate for new States and crops which may come into the program.

9. The proportionate increase formula calls for grower-by-grower determinations. An approach using whatever productivity rates existed in 1977, or the first year a grower utilized the H–2 program thereafter, could result in inequities between growers if the productivity differences were not due to justifiable factors. Similarly, grower-by-grower determinations under the "average U.S. worker" approach could result in inequities due to a small number of nonrepresentative U.S. workers.

10. In considering whether productivity requirements should be permitted to change, whether on a grower-by-grower or area-wide basis, for justifiable reasons, the administrative requirements including objective criteria, staff expertise required and consistency of application must be considered. The availability of USDA State Extension Service Offices to assist in the process requires consideration.

11. Piece rates are generally accepted as a valuable tool which can be set within management's discretion to achieve desirable productivity and earnings outcomes, to the benefit of both employers and workers. Preservation of this principle is inherent in any piece rate regulation review.

12. While it is possible that workers' earnings could be manipulated by growers in changing productivity requirements, it should be recognized that there are many legitimate and desirable reasons for such productivity changes—from season-to-season, between growers, and even within one grower's operation. A piece rate regulation should give weight to the possibility.

III. Options Considered

Building on recommendations made by the DOL/USDA Task Force, DOL considered five major options for addressing the piece rate regulation issue. For two of those options, two sub-options were considered for each; for two more of the options, one sub-option was considered for each.

All of these options assume no change in any other aspects of the H–2 program. Only the treatment of piece rates was considered within the scope of review. This ruled out numerous other possible options for the treatment of piece rates, such as tying them to an hourly standard other than the AEWR, (e.g., the prevailing hourly rate or the Federal or State minimum wage). Since the AEWR is the primary wage standard in the H–2 program, DOL did not consider a piece rate approach tied to any other hourly standard.

Similarly, DOL did not consider possible options which would not address the productivity issue at all.

For example, the prevailing piece rate could be required with an AEWR guarantee, with no consideration of how the piece rate earnings of the U.S. workers relate to the AEWR, and with no administrative oversight of the productivity requirements on job orders.

Another option was not considered because it does not relate to "U.S. workers similarly employed;" namely, the "average worker" approach. This was the construction of DOL's 1963 rule by a Florida federal court. *Florida Fruit and Vegetable Association, Inc.* v. *Donovan*, 563 F. Supp. 286 (S.D. Fla. 1984). It would base the adequacy of the piece rate on whether the "average worker" (including foreign workers as well as U.S. workers) can earn the AEWR. Because of the generally higher productivity of the specially selected foreign workers, this would result in considerably lower piece rates, and would not protect the wage standards of similarly employed U.S. workers as required by law and regulation.

Each option has two major elements: (1) The basic derivation of the required piece rate, (*e.g.*, the prevailing piece rate, as determined by State employment security agency (SESA) wage surveys, or a rate indexed to AEWR changes, as in the DC District Court approach); and (2) how productivity requirements are dealt with (*e.g.*, self contained by the piece rate methodology itself, as in the court's approach, or by firing thresholds designated by growers in job orders and administratively examined by DOL). All options would require make-up pay to the AEWR level for any worker who did not earn the AEWR at the required rate. 20 CFR 655.202(b)(9)(ii) (1985).

Description of these options and a summary of pertinent factors for each option follow:

Option 1—Continue with the current regulation, as interpreted by the U.S. District Court for DC. Under this approach, the piece rate is adjusted each year by the percent change in the AEWR. The basis of these calculations are 1977 productivity rates which are determined on a grower-by-grower basis by dividing the 1977 AEWRs by the piece rates paid at that time. The current piece rate is then determined by dividing the current AEWR by the 1977 productivity rate (this is the equivalent of increasing the 1977 piece rate by the same percentage as the increase in the AEWR since 1977). In the case of a grower who uses the H–2 program for the first time in a year later than 1977, the productivity rate for that year is used as the basis for calculating the current piece rate, subject to DOL administrative review against prevailing standards. This approach is basically self contained with respect to productivity requirements; *i.e.*, the required piece rate adjustments would assure that U.S. workers would not have to increase their productivity in order to earn the AEWR when it is raised.

Sub-option A: Permit justifiable productivity requirement increases from the base year standard, on a grower-by-grower basis, based on information submitted by individual growers. Adjust required piece rates accordingly.

Sub-option B: Use area-wide, rather than grower-by-grower prevailing productivity standards in 1977 among h–2 growers, as base (or first year of H–2

wage in an area); permit area-wide justifiable productivity standard increases from the base year, based on information submitted by grower associations representing an area. Adjust required piece rates accordingly.

Option 3—Repromulgate the "average U.S. worker" approach, as promulgated in September 1983 and June 1985 and later invalidated on APA grounds by the courts, including procedures for addressing the productivity requirement increase issue noted by the U.S. Court of Appeals for the D.C. Circuit. Under this approach, the previling piece rate, as determined by ETAA–232 reports, is required as a minimum. Upward adjustments are required only if the average U.S. workers' productivity in the previous year would not yield the current AEWR at the prevailing piece rate. In that case, the piece rate would be increased by the amount necessary to yield the AEWR. This would be applied on an area-wide basis.

Sub-option A: Add administrative oversight of productivity requirements on job orders. Use 1977 as base year, on grower-by-grower basis; permit justifiable productivity increases based on information submitted by individual growers.

Sub-option B: Same as Sub-option A, except on area-wide, rather than grower-by-grower, basis.

Option 3—Minimum piece rates would be no less than the prevailing piece rates in the area of intended employment, as determined by ETA–232 report findings. Administratively review productivity requirements on job orders (firing threshold). Use 1977 as base year, on grower-by-grower basis; permit justifiable productivity increases based on information submitted by individual growers.

Sub-option A: Same, except on area-wide, rather than grower-by-grower, basis.

Sub-option A: Same, except on areawide, rather than grower-by-grower, basis.

Option 4—Require that the prevailing piece rate, plus a differential be paid. The differential could account for previous and prospective adverse effect, plus approximately 15 percent for social security and unemployment insurance taxes not paid for foreign workers. This approach would be self contained with respect to productivity requirements; *i.e.*, the higher piece rate would assure that U.S. workers would not have to increase their productivity in order to earn the AEWR when it is raised.

Option 5—Have no piece rate requirement except to insure that piece rate earnings be supplemented, when necessary, by make-up pay, to reach the AEWR level; administratively control productivity requirements on job orders (firing threshold). Use 1977 as base year, on grower-by-grower basis; permit justifiable productivity increases based on information submitted by individual growers.

Sub-option A: Same, except on area-wide, rather than grower-by-grower, basis.

Factor Summary

Option 1—Proportionate Increase Approach

—Provides strongest assurance that no productivity increases would be required, or result, for U.S. workers.
—Administratively feasible and easy, once base productivity rates have been established for individual growers, and for separate activities performed for a grower.
—Addresses to some degree the contention that the prevailing piece rate has probably already been adversely affected by the use of foreign workers, and would continue to be in the absence of this or a similar requirement.
—Provides strong incentives for U.S. workers to seek jobs with H–2 growers.
—Departs for AEWR as main wage standard; departs from "prevailing" principle; may require rates far in excess of prevailing piece rates.
—Automatic increases tied to 1977 base (or first year in program) do not provide for justifiable productivity increases; they discourage management initiatives to improve productivity.
—Designation of 1977 (or first year) as base year is arbitrary; based only on date chosen in D.C. federal court decision, but not based on any objective study or assessment by DOL. Could result in inequities between growers in same area, and between new and veteran H–2 program users.
—Undermines use of piece rate as management tool; growers would probably abandon piece rates in favor of hourly rates plus bonuses.

Sub-option A: Permit justifiable productivity increases, grower-by-grower.

—Provides for justifiable productivity requirement increases.
—Increases administative complexity; may require staff resources and expertise not available in DOL.

Sub-option B: Permit justifiable productivity requirement increases, area-wide.

—Increases administrative complexity.
—May not provide for justifiable productivity requirement increases for individual growers.

Option 2—Repromulgate Average U.S. Worker Approach

—Recognizes principle of not requiring undue productivity increases, without being inflexible; attempts to balance productivity concerns with principle of AEWR being main wage standard.
—Automatically permits some (but not all) justifiable productivity increases, without complex administrative burden of determining such increases on a case-by-case basis. Preserves piece rate as management tool to some extent.
—Tends to support "prevailing" concept in H–2 program, and standards for "U.S. workers similarly employed."
—Administratively feasible.
—Overcomes, to some degree, argument that prevailing piece rate has been and will continue to be adversely affected by foreign workers.
—May require, or result in, some increases in productivity requirements for U.S. workers unrelated to justifiable changes; this is the issue on which the DC Circuit invalidated DOL's 1985 rule.
—Has a number of administrative shortcomings and problems:

(1) large administrative burden for DOL;

(2) paperwork burden on employers to submit complete payroll records;

(3) payroll records cover only U.S. workers employed by H–2 growers, not *all* U.S. workers similarly employed;

(4) distortions may occur in some areas due to scarcity of U.S. workers;

(5) may be a big problem in new States and crops;

(6) growers' records are generally not well maintained, with insufficient detail for determining piece rate adequacy for separate activities (*e.g.*, drop vs. fresh market picking).

—Contains some disincentives for H–2 growers to hire low producing U.S. workers who may not be able to earn AEWR at prescribed piece rates.

Sub-option A: Review productivity firing threshold administratively, grower-by-grower.

—Strengthens observance of productivity principle; removes major defect identified by DC Circuit.
—Increases administrative burden in determining justifiable productivity increases.
—Reintroduces an arbitrary base year standard.

Sub-option B: Review productivity administratively on an area-wide basis.

—Strengthens productivity principle observance; addresses weakness identified by DC Circuit.

—Fails to recognize justifiable productivity variances between individual growers.

Option 3—Prevailing Piece Rate; Administratively Control Productivity Firing Threshold

—Recognition of AEWR as main wage standard.
—Gives strong support to prevailing standards principle in H–2 program and to standards for "U.S. workers similarly employed."
—Recognizes and addresses productivity requirement concerns; at same time, permits justifiable productivity requirement increases.
—Survey already in place (Domestic In-season Farm Labor Report, Form ETA–232) for obtaining prevailing piece rates; no new data collection required; survey contains adequate categorization by crop and area.
—Supports piece rate as management tool; provides flexibility to growers.
—Would result in discontinuation of requirement at 655.202(b)(9)(ii) that piece rate should yield AEWR—major policy change.
—Has administrative shortcomings and problems which must be acknowledged: (1) ETA–232 report is not as structured as USDA surveys; (2) determining justifiable productivity requirement increases may be administratively complex; (3) may require staff resources and expertise not available in DOL.
—Relatively low piece rates may be disincentive for U.S. workers to seek jobs with H–2 growers; may also be disincentive for growers to hire U.S. workers, since relatively few would be able to earn AEWR.

Sub-option A: Same, except review productivity on area-wide basis.

—May be somewhat easier to administer than grower-by-grower determinations.
—Penalizes individual growers who may introduce productivity-improving innovations.

Option 4—Prevailing Piece Rate Plus Differential

—Addresses productivity requirement concerns.
—Once formula for differential is established, would be easy to administer; ETA–232 report would provide base data; no problem with selecting a base year.
—Easy to apply to new growers, and those who don't use any U.S. workers.
—Compensates for past (and future) adverse effect on piece rates from use of foreign workers.
—Relatively high piece rates will be incentive for U.S. workers to seek jobs with H–2 growers; growers will have little disincentive to hire U.S. workers, most could earn AEWR.
—Departs from long-standing DOL principle of AEWR as main wage standard.
—Departs from prevailing standards principle of H–2 program; does not relate to standards of "U.S. workers similarly employed."
—Where an area/crop is dominated by H–2 workers, there will be constant escalation as this year's required piece rate (prevailing rate plus differential) becomes next year's prevailing rate, to which a differential will be added.
—Difficult to determine and document amount of differential for past adverse impact.
—Represents major departure from past DOL policy, and practice.
—Does not provide sufficient flexibility for justifiable productivity requirement increases.
—Disregards piece rate as management tool.
—Significant increase in labor costs may be required.

Option 5—No Piece Rate Requirement; Review Productivity Firing Threshold Administratively, Grower-by-Grower

—Unequivocably establishes AEWR as main wage standard.
—Recognizes and addresses productivity requirement concerns.
—Easy to administer; no surveys or payroll records needed.
—Gives maximum flexibility to account for justifiable productivity increases in setting piece rates; gives maximum flexibility to piece rate as management tool.
—Contradicts prevailing standard principle in H–2 program on major wage issue; does not address standards of U.S. workers similarly employed.
—Administratively complex determining justifiable grower-by-grower productivity firing thresholds; may require staff resources and expertise not available in DOL.
—Does not address issue that piece rates may have already been adversely affected by use of foreign workers.
—Highly productive foreign workers may hold down, or drive down further, prevailing piece rates.
—Probably poorest incentive of the five options for U.S. workers to seek jobs with H–2 growers; probably least incentive of the five options for H–2 growers to seek U.S. workers.

—*Sub-option A:* Same, except review productivity requirements on area-wide basis.

—May be somewhat easier to administer than grower-by-grower determinations.
—Penalizes individual growers who may introduce productivity-improving innovations.

IV. Method Selected

DOL has concluded that Option 3 is the best method for administering a piece rate policy in the H–2 program. This option represents the most balanced approach, taking into account the primary program responsibility to protect wages of U.S. workers, considerations of administrative feasibility and the legitimate concerns of agricultural employers that excessive piece rate earnings at levels maintained consistently above the AEWR will result in an economic disincentive to utilize domestic or certified foreign workers.

DOL recognizes that this approach departs from long standing policy that piece rates be designed to yield the AEWR (20 CFR 655.202(b)(9)(ii) and that Option #2 (with Sub-option A) would not result in this change. However, DOL believes there are too many practical weaknesses in the available tools for implementing Option #2. These weaknesses would present particularly serious problems when applying this approach to growers, crops and States coming into the program for the first time.

Under Option #3, growers would be required to offer and pay no less than the prevailing piece rate in the area of intended employment. This is currently a minimum Employment Service System-wide requirement for all agricultural employers who utilize the agricultural clearance system under the DOL regulation at 20 CFR 653.501(d)(4). The prevailing rate is determined by State Employment Service (ES) agencies and submitted in ETA–232 reports for review by ETA. Since the early 1950's, State ES agencies have been required to conduct annual prevailing wage surveys in areas where a sizable number of migratory farmworkers are employed or requested through the agricultural clearance order system, or where one or more "H–2" foreign workers are employed. The survey is conducted during the peak of the crop activity and consists of employer and worker interviews. Collected data are area and crop specific (e.g., apple picking in the Hudson Valley of New York). The surveys gather data on domestic worker wages only; H–2 workers are excluded. However, employers who hire both domestic and foreign workers at the same time are contacted for wage information on their domestic workers.

Along with requiring the payment of the prevailing piece rate as a minimum, DOL proposes to administratively review and determine the validity of productivity minimum requirements on job orders.

Beginning in 1986, all H–2 growers who pay by the piece rate will be required to specify minimum productivity levels required of workers to insure job retention on their job orders if they have not done so before, and if such productivity requirements are conditions of employment. Such levels will be permitted to move upward from their 1977 levels (or first year after 1977 in the program) only if they are justified in writing to the Regional Administrator and are approved by ETA. Thereafter, any future productivity increases must be justified in a similar fashion for technological, economic or other reasons on a yearly basis. (A paper prepared by the U.S. Department of Agriculture, "Factors Affecting Productivity of Agricultural Hand Field Workers," which was utilized by DOL in this proposed rulemaking is reprinted as an appendix to this Notice of Proposed Rulemaking.) For employers entering the program for the first time, minimum productivity requirements may not exceed those which are normally required by other employers growing similar crops in the area of intended employment.

V. Discretion in Establishing a Piece Rate Adjustment Policy

Section 214(c) of the Immigration and Nationality Act gives the Attorney General (and his designee the Commissioner of INS) broad discretion in the admission of nonimmigrant aliens to the United States. 8 U.S.C. 1184(c); 8 CFR § 2.1. With respect to determinations under the immigration laws on the availability of U.S. workers for jobs offered to nonimmigrant alien workers, and the adverse effect those aliens' employment may have on the wages and working conditions of similarly employed U.S. workers, the Secretary of Labor and DOL have been given broad discretion. See, *e.g.*, 8 CFR 214.2(h)(3)(i). This broad discretion, particularly with respect to methodologies for setting minimum wage rates under the immigration laws, has been recognized in the federal appellate and district courts. *Virginia Agricultural Growers' Association, Inc.* v. *Donovan*, 774 F. 2d 89 (4th Cir. 1985); *Florida Fruit & Vegetable Association, Inc.* v. *Brock*, 771 F. 2d 1455 (11th Cir. 1985), *cert. denied*, No. 85–1352, 54 U.S.L.W. 3659 (April 7, 1986); *Shoreham Co-operative Apple Producers' Association, Inc.* v. *Donovan*, 764 F. 2d 135 (2d Cir. 1985); *Rowland* v. *Marshall*, 650 F. 2d 28 (4th Cir. 1981); *Williams* v. *Usery*, 531 F. 2d 305 (5th Cir. 1976), *cert. denied*, 429 U.S. 1000; *Florida Sugar Cane League* v. *Usery*, 531 F. 2d 299 (5th Cir. 1976); and *Limoneira Co.* v. *Wirtz*, 327 F. 2d 499 (9th Cir. 1964), *aff'g* 225 F. Supp. 961 (S.D. Cal. 1963); see also *Elton Orchards* v. *Brennan*, 508 F. 2d 493 (1st Cir. 1974); and *Flecha* v. *Quiros*, 567 F. 2d 1154 (1st Cir. 1974). These decisions acknowledge DOL's discretion in the area of wages involving nonimmigrant alien agricultural workers and form the basis for construction of DOL's temporary alien labor certification regulations. See 20 CFR 655.0(e).

Since this is an area in which DOL has great "discretion to reach a number of different results rather than an area of pure statutory interpretation as to which there is in theory only a single answer" (See *Building & Construction Trades' Department, AFL–CIO* v. *Donovan*, 712 F. 2d 611, 619 (DC Cir. 1983), *cert denied*, 464 U.S. 1069 (1984)), DOL is proposing the rule below.

Regulatory Impact

The proposed promulgation of this rule would currently affect only those employers using non-immigrant alien workers ("H–2 visaholders") in temporary agricultural jobs paid by piece rate in fourteen States. It would not have the financial or other impact to make it a major rule, and, therefore, the preparation of a regulatory impact analysis is not necessary. See Executive Order No. 12291, 3 CFR, 1981 Comp., p. 127, 5 U.S.C. 601 note.

The Department of Labor has notified the Chief Counsel for Advocacy, Small Business Administration, and made the certification pursuant to 5 U.S.C. 605(b), that proposal would not have a significant economic impact on a substantial number of small entities. It applies only to the small number of employers (and their workers) who employ nonimmigrant aliens in piece-rate-paid agricultural employment in the United States.

Catalogue of Federal Domestic Assistance Number

This progam is listed in the Catalogue of Federal Domestic Assistance as Number 17.202, "Certification of Foreign Workers for Agricultural and Logging Employment."

Proposed Rule

Accordingly, it is proposed that Part 655 of Chapter V of Title 20, Code of Federal Regulations, be amended as follows:

PART 655—LABOR CERTIFICATION PROCESS FOR THE TEMPORARY EMPLOYMENT OF ALIENS IN THE UNITED STATES

1. The authority citation for Part 655 is proposed to be revised to read as follows and the separate authority citations following all the sections in Part 655 are proposed to be removed:

Authority: 8 U.S.C. 1101(a)(15)(H)(ii) and 1184(c); 29 U.S.C. 49 *et seq.*; 8 CFR 214.2(h)(3)(i).

2. It is proposed to amend § 655.202 by revising paragraph (b)(9)(ii) to read as follows:

§ 655.202 Contents of job offers.

* * * * *

(b) * * *

(9) * * *

(ii) (A) If the worker will be paid on a piece rate basis, and the piece rate does not result at the end of the pay period in average hourly earnings during the pay period at least equal to the amount the worker would have earned had the worker been paid at the adverse effect rate, the worker's pay will be supplemented at that time so that the worker's earnings are at least as much as the worker would have earned during the pay period if the worker had been paid at the adverse effect rate.

(B) If the employer who pays by the piece rate requires one or more minimum productivity standards of workers as a condition of job retention, *(1)* such standards shall be no more than those applied by the employer in 1977, unless the RA approves a higher minimum; or *(2)* if the employer first applied for temporary labor certification after 1977, such standards shall be no more than those normally required (at the time of that first application) by other employers for the activity in the area of intended employment, unless the RA approves a higher minimum.

* * * * *

§ 655.207 [Amended]

3. It is proposed to amend § 655.207 by removing paragraphs (c) and (d) and by redesignating paragraph (e) as new paragraph (c).

Signed at Washington, DC this 29th day of May, 1986.

William E. Brock,

Secretary of Labor.

Appendix

The material in this appendix is for information purposes only. It will not be codified as part of the final rule in the Code of Federal Regulations.

Factors Affecting Productivity of Agricultural Hand Field Workers—Executive Summary

- Research has demonstrated that productivity rates of agricultural hand field workers are affected by tree size, pruning of trees, yields, size of fruit, use of harvesting aids, varieties of fruits and vegetables harvested, type of supervision, type of product market, and experience of workers.
- Employers can increase worker productivity in the short term by changing pruning methods, supervisory practices, and type of harvesting equipment used; switching from fresh to processed markets; hiring more experienced workers; and placing workers in field so that they pick individually instead of in groups.
- Replanting orchards with smaller, higher-yielding trees have longer-term effects on labor productivity.
- The potential for improving the productivity of hand field workers without increasing worker effort exists on many farms. However, employers who hire H–2 workers are not currently permitted to increase their minimum productivity rates. Farmers who improve the efficiency of their farm operation and increase labor productivity may be penalized because increased worker productivity is not recognized in the formulation of piece rates in the H–2 program.

Factors Affecting Productivity of Agricultural Hand Field Workers

A recent court order issued by U.S. District Court Judge Charles R. Richey ruled that farm employers hiring H–2 workers cannot increase the minimum productivity rate required of piece rate workers for them to earn a wage equivalent to the adverse effect wage rate (AEWR). This decision implies that worker productivity rates are constant and that employers can do nothing to increase worker productivity except require workers to work harder. However, a review of research revealed that several factors, short of fully mechanizing operations, can affect productivity of hand field workers. These factors include changes in cultural techniques, changes in the way field work is organized and supervised, increased use of mechanical harvesting aids and more efficient product handling methods, and improved recruitment techniques which encourage the employment of more experienced and productive workers.

Cultural Techniques, Organization of Work, and Type of Market

One of the most comprehensive studies examining the productivity of harvest workers was done at Michigan State University in the late 1960's.[1] This study identified practices that affected labor productivity in Michigan apple harvesting, including the type of supervision that workers received, the type of picking equipment used by the workers, whether the apples harvested were for fresh or processed markets, degree of tree pruning, and the way workers were grouped into harvest units.

Worker productivity was increased by close supervision of workers, providing workers with metal picking equipment instead of canvas or other types of equipment, and placement of workers in orchards so that they picked individually instead of in groups. Picking appes for the fresh market resulted in lower productivity rates compared to picking for the processed market. For example, when workers were required to pick apples for the fresh market in such a manner that stems remained on all apples, their average productivity was almost 1 bushel per hour lower than when apples were picked without regard for stems. A moderate degree of tree pruning was associated with higher apple picking rates on the average than was little or no tree pruning. Tree age and tree spread were negatively related to the number of bushels of apples picked per hour by workers, although the effects of these variables on worker productivity were much less than for other variables mentioned above.

Another study of apple harvest labor productivity in Washington State determined that tree type (dwarf, semi-dwarf, semi-standard, and standard), yield per acre, and apple variety were important factors affecting worker productivity.[2] This study concluded that productivity rates were lower for larger trees compared to smaller trees because workers spent more time moving and climbing ladders when picking the larger trees. Higher yields per acre were found to increase the productivity rate. Also, apple variety was found to be an important factor affecting the productivity rate with varieties like McIntosh requiring more time to pick than other varieties.

An incentive piece-rate system is widely used for lemon harvesting in Ventura County, California.[3] This system recognizes that worker productivity is affected by tree height, furit size, and yield per tree. The wage rates developed under this incentive piece-rate system reflect the decreasing productivity in terms of boxes picked per hour associated with picking successively taller trees, picking trees with lower yields, and picking smaller sized fruit. A schedule of piece rates which vary by these factors results in an average worker being able to achieve the same hourly wage rate regardless of grove yields and picking conditions.

A similar wage incentive system was developed for the Valencia orange harvest in central Arizona.[4] This system also reflects differences in worker productivity based on tree height, fruit size, and yield per tree. As in California, worker productivity increases with smaller trees, larger fruit, and larger yields per tree.

Increased Use of Mechanical Harvesting Aids

Two types of mechanical technologies are useful for increasing the productivity of harvest workers: (1) Worker-positioning machinery for use in tree harvesting, and (2) bag and ladder picking which can be supplemented with mechanical harvesting aids for handling picked fruits in the field. Worker-positioning machines for tree harvest are designed to replace the ladder with a machine that positions the worker(s) so that fruit may be picked more efficiently. There are two basic types of worker-positioning machines: (1) A basket to hold the picker on a mast mounted on a movable chassis, and (2) a multi-person platform on which pickers stand as the platform moves or is pulled through the field or orchard. Research on these machines has been conducted most extensively in California. These studies show that worker-positioning machines can increase labor productivity by as much as 35 percent.[5] However, use of these machines is constrained in some fields and orchards by tree size, tree spacing, size of groves, and slope of land.

While actually picking fruit, the bag and ladder picker can compete effectively with workers using worker-positioning machines, but the bag and ladder picker spends a large portion of his time and energy in climbing ladders and emptying his bag into a field container. Traditionally, pickers dump their bags or containers of fruits into field boxes or pallets which are hand-loaded onto flat-bed trucks and taken to semi-trailers used to haul the fruit to a packing house. However, the use of conveyor belts, tractor fork-lifts, hydraulic boom lifts or other mechanized methods of handing fruits and vegetables in the field increases worker productivity by reducing time needed for loading and handling of products.

Improved Recruitment Techniques

The characteristics of workers have been shown to affect labor productivity rates. The Michigan study concluded that the productivity rate of apple pickers was significantly different by a worker's age, gender, work experience, ethnic origin, and residence.[6] Workers with the highest

productivity rates were migrant Mexican or Puerto Rican males between 25 and 50 years old with at least two years of apple picking experience. A study in Arizona showed that the profile of the most efficient citrus picker in Arizona was a married male nonsmoker.[7] However, the study concluded that most of the variance in productivity among workers was explained by other factors such as worker supervision, grove conditions, grove yields, weather, and coordination of harvest operations. Recruitment of workers with characteristics associated with higher labor productivity in harvesting fruits and vegetables can help growers establish a more productive work force.

Research has also indicated that experienced workers are more productive than inexperienced workers. Thus, efforts made by employers to encourage workers to return each year increase worker productivity. Migrant apple harvest workers in Pennsylvania who had returned to work for the same apple producer for 4 of more years averaged 11 percent greater production per hour than first year workers.[8] Improved skill level as well as success of the employer in attracting the more conscientious workers to return annually contributed to the greater productivity of these workers. Apple harvest workers in Michigan with 2 years or more of experience picked approximately 2 bushels an hour more than did the less experienced worker.[9]

The Coastal Growers Association in California has adopted innovative policies for management-employee relations which encourage lemon workers to return to the same jobs each year. The association recognized that trained workers who are willing to come back each year are more productive. Thus, the association offers wages and other benefits that encourage lemon pickers to return the next year—such as paid vacations to employees who work over 480 hours per year, opportunities for promotion, health insurance, a retirement plan, modern housing, adult education, and worker training. Between 1966, when new management policies were first adopted, and 1980, the total number of workers employed by Coastal Growers dropped from around 8,300 to less then 1,000, while the total number of boxes picked rose from 4.3 to 5.8 million.[10]

Conclusions

Research has suggested that employers can increase worker productivity in the short run by changing pruning methods, supervisory practices, and type of harvesting equipment used; switching from fresh to processed markets; hiring more experienced workers; and placing workers in fields so that they pick individually instead of in groups. Replanting orchards with smaller, higher-yielding trees have longer-term effects on labor productivity.

The potential for improving the productivity of hand field workers without increasing worker effort exists on many farms. However, employers who hire H-2 workers are not currently permitted to increase their minimum productivity rates for these workers. Farmers who improve the efficiency of their farm operation and increase labor productivity may be penalized because the increased worker productivity is not recognized in the formulation of piece rates in the H-2 program.

BILLING CODE 4810-30-M

UNITED STATES INFORMATION AGENCY

22 CFR Part 508

Nondiscrimination on the Basis of Sex in Education Programs and Activities Receiving or Benefiting From Federal Financial Assistance

AGENCY: U.S. Information Agency.

ACTION: Notice of proposed rules.

SUMMARY: The U.S. Information Agency proposes to add a new regulation for nondiscrimination on the basis of sex in education programs and activities receiving or benefitting from federal financial assistance. These rules are intended to implement Title IX of the Education Amendments of 1972, as amended, which prohibits (with certain exceptions) sex discrimination in federally-assisted education programs or activities. The public is invited to comment.

DATE: Comments must be received on or before July 7, 1986.

FOR FURTHER INFORMATION CONTACT: Horace G. Dawson, Jr., Director, Office of Equal Employment Opportunity and Civil Rights, Room M-10, U.S. Information Agency, 301 4th Street, S.W., Washington, D.C. 20547, Phone: (202) 485-7156.

SUPPLEMENTARY INFORMATION: On June 4, 1975, the then Department of Health, Education, and Welfare (HEW) issued final rules implementing Title IX. 45 CFR Part 86. The rules proposed by this Agency are intended to be consistent with the HEW rules

Section 508.15 exempts certain activities which are not referred to in the HEW rules. These exemptions reflect recent amendments to Title IX. See Pub. L. 94-482, 90 Stat. 2234.

One other difference in these rules and the HEW rules should be noted. In the HEW rules, "student" is defined as a person who has gained "admission." The term "admission" means "selection for . . . enrollment, membership, or matriculation in or at education program or activity . . . ." In § 508.2(m), the term "admission" is expanded to include selection for "participation" in an education program or activity to ensure that participants (who may not be members or enrollees) in U.S.I.A.-funded education activities are clearly included within the protection of these rules. By expanding the definition of "admission," the term "student" (to whom the rules repeatedly make reference) is also expanded. This change has been made to ensure that any informal education activities funded by U.S.I.A. in which participation is not dependent upon "enrollment, membership, or matriculation" are included.

Section 508.11 contains a divergence from HEW's rule on the application of these regulations which reflects the international functions of this Agency. U.S.I.A.'s regulations are restricted in their application to "each education program or activity operated *within the United States* . . . ."

This rule will not have a significant economic impact on a substantial number of small entities.

This rule contains reporting requirements that have been approved by OMB under the Paperwork Reduction Act and 5 CFR 1320 (Clearance number 3116-0181).

In consideration of the above, it is proposed that Part 508 be added to Title 22 of the Code of Federal Regulations to read as set forth below.

Dated: May 30, 1986.

Charles Z. Wick,

Director.

PART 508—NON-DISCRIMINATION IN EDUCATION PROGRAMS OR ACTIVITIES RECEIVING OR BENEFITTING FROM FEDERAL FINANCIAL ASSISTANCE—EFFECTUATION OF TITLE IX OF EDUCATION AMENDMENTS OF 1972

Subpart A—Introduction

Sec.

508.1 Purpose and effective date.
508.2 Definitions.
508.3 Remedial and affirmative action and self-evaluation.

Sec.
506.4 Assurance required.
506.5 Effect of other requirements.
506.6 Effect of employment opportunities.
506.7 Designation of responsible employee and adoption of grievance procedures.
506.8 Dissemination of policy.

Subpart B—Coverage

506.11 Application.
506.12 Educational institutions controlled by religious organizations.
506.13 Military and merchant marine educational institution.
506.14 Membership practices of certain organizations.
506.15 Exempt activities.
506.16 Admission.
506.17 Education institutions eligible to submit transition plans.
506.18 Transition plans.

Subpart C—Discrimination on the Basis of Sex in Admission and Recruitment Prohibited

506.21 Admission.
506.22 Preference in admission.
506.23 Recruitment.

Subpart D—Discrimination on the Basis of Sex in Education Programs and Activities Prohibited

506.31 Education programs and activities.
506.32 Housing.
506.33 Comparable facilities.
506.34 Access to course offerings.
506.35 Access to schools operated by L.E.A's.
506.36 Counseling and use of appraisal and counseling materials.
506.37 Financial assistance.
506.38 Employment assistance to students.
506.39 Health and insurance benefits and services.
506.40 Marital or parental status.
506.41 Athletics.
506.42 Textbooks and curricular materials.

Subpart E—Discrimination on the Basis of Sex in Employment in Education Programs and Activities Prohibited

506.51 Employment.
506.52 Employment criteria.
506.53 Recruitment.
506.54 Compensation.
506.55 Job classification and structure.
506.56 Fringe benefits.
506.57 Marital or parental status.
506.58 Effect of State or local law or other requirements.
506.59 Advertising.
506.60 Pre-employment inquiries.
506.61 Sex as a bona-fide occupational qualification.

Subpart F—Enforcement

506.71 Procedures.
506.72 Delegation of authority.

Appendix

Authority: Title IX of the Education Amendments of 1972, Pub. L. 92-318, as amended by section 3 of Pub. L. 93-568, 88 Stat. 1855 and section 412 of Pub. L. 94-482, 90 Stat. 2234 (except sections 904 and 906 thereof); 20 U.S.C. 1681, 1682, 1683, 1686.

Subpart A—Introduction

§ 506.1 Purpose and effective date.

The purpose of this part is to effectuate Title IX of the Education Amendments of 1972, as amended by Pub. L. 93-568, 88 Stat. 1855, and Pub. L. 94-482, 90 Stat. 2234 (except sections 904 and 906 of those Amendments) which is designed to eliminate (with certain exceptions) discrimination on the basis of sex in any education program or activity receiving Federal financial assistance, whether or not such program or activity is offered or sponsored by an educational institution as defined in this part.

§ 506.2 Definitions.

As used in this part, the term:

(a) "Title IX" means Title IX of the Education Amendments of 1972, Pub. L. 92-318, as amended by section 3 of Pub. L. 93-568, 88 Stat. 1855 and section 412 of Pub. L. 94-482, 90 Stat. 2234 (except sections 904 and 906 thereof); 20 U.S.C. 1681, 1682, 1683, 1685, 1686.

(b) "Agency" means the United States Information Agency, and includes each of its organizational units.

(c) The term "Director" means the Director of the United States Information Agency (U.S.I.A.) or any person specifically designed by him or her to perform any function provided for under this part, except where it is specified that only the Director is intended.

(d) "Federal financial assistance" means any of the following, when authorized or extended under a law administered by the Agency:

(1) A grant or loan of Federal financial assistance, including

(i) The acquisition, construction, renovation, restoration, or repair of a building or facility or any portion thereof; and

(ii) Scholarships, loans, grants, wages or other funds extended to any entity for payment to or on behalf of students admitted to that entity, or extended directly to such students for payment to that entity.

(2) A grant of Federal real or personal property or any interest therein, including surplus property, and the proceeds of the sale or transfer of such property, if the Federal share of the fair market value of the property is not, upon such sale or transfer, properly accounted for to the Federal Government.

(3) Provision of the services of Federal personnel.

(4) Sale or lease of Federal property or any interest therein at nominal consideration, or at consideration reduced for the purpose of assisting the recipient or in recognition of public interest to be served thereby, or permission to use Federal property or any interest therein without consideration.

(5) Any other contract, agreement, or arrangement which has as one of its purposes the provision of assistance to any education program or activity, except a contract of insurance or guaranty.

(e) "Recipient" means the State or a political subdivision thereof, of any instrumentality of a State or political subdivision thereof, any public or private agency, institution, or organization, or other entity, or any person, to whom Federal financial assistance is extended directly or through another recipient and which operates an education program or activity which receives or benefits from such assistance, including any submit, successor, assignee, or transferee thereof.

(f) "Applicant" means one who submits an application, request, or plan required to be approved by an Agency official, or by a recipient, as a condition to becoming a recipient.

(g) "Educational institution" means a local educational agency (L.E.A.) as defined by section 801(f) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 881), a preschool, a private elementary or secondary school, or an applicant or recipient of the type defined by paragraph (h), (i), (j), or (k) of this section.

(h) "Institution of graduate higher education" means an institution which:

(1) Offers academic study beyond the bachelor of arts or bachelor of science degree, whether or not leading to a certificate of any higher degree in the liberal arts and sciences; or

(2) Awards any degree in a professional field beyond the first professional degree (regardless of whether the first professional degree in such field is awarded by an institution of undergraduate higher education or professional education); or

(3) Awards no degree and offers no further academic study, but operates ordinarily for the purpose of facilitating research by persons who have received the highest graduate degree in any field of study.

(i) "Institution of undergraduate higher education" means:

(1) An institution offering at least two but less than four years of college level study beyond the high school level, leading to a diploma or an associated degree, or wholly or principally creditable toward a baccalaureate degree; or

(2) An institution offering academic study leading to a baccalaureate degree; or

(3) An agency or body which certifies credentials or offers degrees, but which may or may not offer academic study.

(j) "Institution of professional education" means an institution (except any institution of undergraduate higher education) which offers a program of academic study that leads to a first professional degree in a field for which there is a national specialized accrediting agency recognized by the United States Commissioner of Education.

(k) "Institution of vocational education means a school or institution (except an institution of professional or graduate or undergraduate higher education) which has as its primary purpose preparation of students to pursue a technical, skilled or semiskilled occupation or trade, or to pursue study in a technical field, whether or not the school or institution offers certificates, diplomas, or degrees and whether or not it offers fulltime study.

(l) "Administratively separate unit" means a school, department or college of an educational institution (other than a local educational agency) admission to which is independent of admission to any other component of such institution.

(m) "Admission" means selection for part-time, full-time, special, associate, transfer, exchange, or any other enrollment, membership, participation, or matriculation in or at an education program or activity operated by a recipient.

(n) "Student" means a person who has gained admission.

(o) "Transition plan" means a plan subject to the approval of the United States Commissioner of Education pursuant to section 901(a) of the Education Amendments of 1972, under which an educational institution operates in making the transition from being an educational institution which admits only students of one sex to being one which admits students of both sexes without discrimination.

(p) "Educational recipient" means an educational institution as defined in section 508.2(q) and every other recipient which has education as a significant purpose.

(q) "Education program or activity" means:

(1) Every program or activity operated by an educational recipient; and

(2) Every program or activity operated by other recipients where a significant purpose of the financial assistance is education.

(r) "United States" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and the territories and possessions of the United States, and the term "State" means any one of the foregoing.

§ 508.3 Remedial and affirmative action and self-evaluation.

(a) *Remedial action.* If the Director finds that a recipient has discriminated against persons on the basis of sex in an education program or activity, such recipient shall take such remedial action as the Director deems necessary to overcome the effects of such discrimination.

(b) *Affirmative Action.* In the absence of a finding of discrimination on the basis of sex in an education program or activity, a recipient may take affirmative action to overcome the effects of conditions which resulted in limited participation therein by persons of a particular sex. Nothing herein shall be interpreted to alter any affirmative action obligations which a recipient may have under Executive Order 11246.

(c) *Self-evaluation.* Each recipient shall, within one year of the effective date of this part:

(1) Evaluate in terms of the requirements of this part, its current policies and practices and the effects thereof concerning admission of students, treatment of students, and employment of both academic and non-academic personnel working in connection with the recipient's education program or activity;

(2) Modify any of these policies and practices which do not or may not meet the requirements of this part; and

(3) Take appropriate remedial steps to eliminate the effects of any discrimination which resulted or may have resulted from adherence to these policies and practices.

(d) *Availability of self-evaluation and related materials.* Recipients shall maintain on file for at least three years following the effective date of this part or completion of the evaluation required under paragraph (c) of this section, whichever is longer, and shall provide to the Director upon request, a description of any modifications made pursuant to paragraph (c)(1) of this section and of any remedial steps taken pursuant to paragraph (c)(2) of this section.

§ 508.4 Assurance required.

(a) *General.* Every application for Federal financial assistance for any education program or activity shall as condition of its approval contain or be accompanied by an assurance from the applicant or recipient, satisfactory to the Director, that each education program or activity operated by the applicant or recipient and to which this part applies will be operated in compliance with this part. An assurance of compliance with this part shall not be satisfactory to the Director if the applicant or recipeint to whom such assurance applies fails to commit itself to take whatever remedial action is necessary in accordance with section 508.3(a) to eliminate existing discrimination whether occurring prior or subsequent to the submission to the Adminstrator of such assurance.

(b) *Transfers of Property.* If a recipient sells or otherwise transfers property financed in whole or in part with Federal financial assistance to a transferee which operates any education program or activity, and the Federal share of the fair market value of the property is not upon such sale or transfer properly accounted for to the Federal Government both the transferor and the transferee shall be deemed to be recipients, subject to the provisions of Subpart B.

(c) *Duration of obligation.* (1) In the case of Federal financial assistance extended to provide real property or structures thereon, such assurance shall obligate the recipient or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used to provide an education program or activity.

(2) In the case of Federal financial assistance extended to provide personal property, such assurances shall obligate the recipient for the period during which it retains ownership or possession of the property.

(3) In all other cases such assurance shall obligate the recipient for the period during which Federal financial assistance is extended.

(d) *Form.* The Director will specify the form of the assurances required by paragraph (a) of this section and the extent to which such assurances will be required of the applicant's or recipient's subgrantees, contractors, subcontractors, transferees, or successors in interest.

§506.5 Effect of other requirements.

(a) *Effect of other Federal provisions.* The obligations imposed by this part are independent of, and do not alter, obligations not to discriminate on the basis of sex imposed by Executive Order 11246, as amended; Title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e et seq.); the Equal Pay Act (29 U.S.C. 206 and 206(d)); and any other act of Congress or Federal regulation.

(b) *Effect of State or local law or other requirements.* The obligation to comply with this part is not obviated or alleviated by any State or local law or other requirement which would render any applicant or student ineligible, or limit the eligibility of any applicant or student, on the basis of sex to practice any occupation or profession.

(c) *Effect of rules or regulations of private organizations.* The obligation to comply with this part is not obviated or alleviated by any rule or regulation of any organization, club, athletic or other league, or association which would render any applicant or student ineligible to participate or limit the eligibility or participation of any applicant or student, on the basis of sex, in any education program or activity operated by a recipient and which receives or benefits from Federal financial assistance.

(d) *Effect of compliance with HEW regulations.* If a recipient is covered by the Title IX regulations issued by HEW, 45 CFR Part 86, and has already complied with the HEW requirements corresponding to §§ 506.3(c), 506.4(a), 506.7(a) and (b), and 506(a) and (b), then the requirements of those sections need not be duplicated in order to comply with this part. However, if the requirements have not been applied to all programs funded by this Agency, then the requirements will have to be met as to those programs.

§ 506.6 Effect of employment opportunities.

The obligation to comply with this part is not obviated or alleviated because employment opportunities in any occupation or profession are or may be more limited for members of one sex than for members of the other sex.

§ 506.7 Designation of responsible employee and adoption of grievance procedures.

(a) *Designation of responsible employee.* Each recipient shall designate at least one employee to coordinate its efforts to comply with and carry our its responsibilities under this part, including any investigation of any complaint communicated to such recipient alleging its noncompliance with this part or alleging any actions which would be prohibited by this part. The recipient shall notify all its students and employees of the name, office address and telephone number of the employee or employees appointed pursuant to this paragaph. Should the employee terminate employment at any time, the employer shall notify promptly all interested parties of the replacement.

(b) *Complaint procedure of recipient.* A recipient shall adopt and publish grievance procedures providing for prompt and equitable resolution of student and employee complaints alleging any action which would be prohibited by this part.

§ 506.8 Dissemination policy.

(a) *Notification of policy.* (1) Each recipient shall implement specific and continuing steps to notify applicants for admission and employment, students and parents of elementary and secondary school students, employees, sources of referral of applicants for admission and employment and all unions or professional organizations holding collective bargaining or professional agreements with the recipient, that it does not discriminate on the basis of sex in the educational programs or activities which it operates, and that it is required by Title IX and this part not to discriminate in such a manner. Such notification shall contain such information, and be made in such manner, as the Director finds necessary to apprise such persons of the protections against discrimination assured them by Title IX and this part, but shall state at least that the requirement not to discriminate in education programs and activities extends to employment therein and to admission there to unless Subpart C does not apply to the recipient, and that inquiries concerning the application of Title IX and this part to such recipient may be referred to the employee designated pursuant to 506.7 or to the Director.

(2) Each recipient shall make the initial notification required by paragraph (a)(1) of this section within 90 days of the effective date of this part or of the date this part first applies to such recipient, whichever comes later, which notification shall include publication in

(i) Local newspapers,

(ii) Newspapers and magazines operated by such recipient or by student, alumnae, or alumni groups for or in connection with such recipient; and

(iii) Memoranda or other written communications distributed to every student and employees of such recipient.

(b) *Publications.* (1) Each recipient shall prominently include a statement of the policy described in paragraph (a) of this section in each announcement, bulletin, catalog, or application form which it makes available to any person of a type described in paragraph (a) of this section, or which is otherwise use in connection with the recruitment of students or employees.

(2) A recipient shall not use or distribute a publication of the type described in this paragraph which suggests, by text or illustration, that such recipient treats applicants, students, or employees differently on the basis of sex except as such treatment is permitted by this part.

(c) Distribution. Each recipient shall distribute without discrimination on the basis of sex each publication described in paragraph (b) of this section, and shall apprise each of its admission and employment recruitment representatives of the policy of nondiscrimination described in paragraph (a) of this section, and require such representatives to adhere to such policy.

Subpart B—Coverage

§506.11 Application.

Except as provided in this subpart, Part 506 applies to every recipient and to each education program or activity operated within the United States by such recipient which receives or benefits from Federal financial assistance pursuant to any authority held or delegated by the Director of the United States Information Agency, including the Federally-assisted programs and activities listed in Appendix A of this part.

§506.12 Educational institutions controlled by religious organizations.

(a) *Application.* This part does not apply to an educational institution which is controlled by a religious organization to the extent application of this part would not be consistent with the religious tenents of such organization.

(b) *Exemption.* An educational institution which wishes to claim the exemption set forth in paragraph (a) of this section shall do so by submitting in writing to the Director a statement by

the highest ranking official of the institution identifying the provisions of this part which conflict with a specific tenet of the religious organization.

§ 508.13 Military and merchant marine educational institution.

This part does not apply to an educational institution whose primary purpose is the training of individuals for a military service of the United States or for the merchant marines.

§ 508.14 Membership practices of certain organizations.

(a) *Social fraternities and sororities.* This part does not apply to the membership sororities which are exempt from taxation under section 501(a) of the Internal Revenue Code of 1954, the active membership of which consists primarily of students in attendance at institutions of higher education.

(b) *YMCA, YWCA, Girl Scouts, Boy Scouts and Camp Fire Girls.* This part does not apply to the membership practices of the Young Mens' Christian Association, the Young Womens' Christian Association, the Girl Scouts, the Boy Scouts and Camp Fire Girls.

(c) *Voluntary youth service organizations.* This part does not apply to the membership practices of voluntary youth service organizations which are exempt from taxation under section 501 (a) of the Internal Revenue Code of 1954 and the membership of which has been traditionally limited to members of one sex and principally to persons of less than nineteen years of age.

§ 508.15 Exempt activities.

(a) These regulations shall not aply to:

(1) Any program or activity of the American Legion undertaken in connection with the organization or operation of any Girls State Conference, Boys Nation Conference, or

(2) The selection of students to attend any such conference.

(b) These regulations shall not preclude father-son or mother-daughter activities at an educational institution, but if such activities are provided for students of one sex, opportunities for reasonably comparable activities shall be provided for students of the other sex.

(c) These regulations shall not apply with respect to any scholarship or other financial assistance awarded by an institution of higher education to any individual because such individual has received such award in any pageant in which the attainment of such award is based upon a combination of factors related to the personal appearance, poise, and talent of such individual and in which participation is limited to individuals of one sex only, so long as such pageant is in compliance with other nondiscrimination provisions of Federal law.

§ 508.16 Admission.

(a) Admission to educational institutions prior to June 24, 1973, are not covered by this part.

(b) *Administratively separate units.* For the purpose only of this section, §§ 508.17 and 508.18, and Subpart C, each administratively separate unit shall be deemed to be an educational institution.

(c) *Application of Subpart C.* Except as provided in paragraph (d) and (e) of this section, Subpart C applies to each assisted education program or activity. A recipient to which Subpart C applies shall not discriminate on the basis of sex in admission or recruitment in violation of that subpart.

(d) *Educational institutions.* Except as provided in paragraph (e) of this section as to recipients which are educational institutions, Subpart C applies only to institutions of vocational education, professional education, graduate higher education, and public institutions of undergraduate higher education.

(e) *Public institutions of undergraduate higher education.* Subpart C does not apply to any public institution of undergraduate higher education which traditionally and continually from its establishment has had a policy of admitting only students of one sex.

§ 508.17 Educational institutions eligible to submit transition plans.

(a) This section applies to each public institution of undergraduate higher education which traditionally and continually from its establishment had a policy of admitting only students of one sex, but which after June 23, 1972 begins the process of changing to being an institution which admits students of both sexes.

(b) An educational institution to which this section applies shall not discriminate on the basis of sex in admission or recruitment in violation of Subpart C unless it is carrying out a transition plan approved by the United States Commissioner of Education as described in section 508.18 which plan provides for the elimination of such discrimination by the earliest practicable date but in no event later than seven years after the institution begins the process of changing to an institution which admits students of both sexes.

§ 508.18 Transition plans.

(a) *Submission of plans.* An institution to which 508.17 applies and which is composed of more than one administratively separate unit may submit either a single transition plan applicable to all such units, or a separate transition plan applicable to each sub-unit.

(b) *Content of plans.* In order to be approved by the United States Commissioner of Education, a transition plan shall:

(1) State the name, address, and Federal Interagency Committee on Education (FICE) Code of the educational institution submitting such plan, the administratively separate units to which the plan is applicable, and the name, address, and telephone number of the person to whom questions concerning the plan may be addressed. The person who submits the plan shall be the chief administrator or president of the institution, or another individual legally authorized to bind the institution to all actions set forth in the plan.

(2) State whether the educational institution or administratively separate unit admits students of both sexes as regular students and, if so, when it began to do so.

(3) Identify and describe with respect to the educational institution or administratively separate unit any obstacle to admitting students without discrimination on the basis of sex.

(4) Describe in detail the steps necessary to eliminate as soon as practicable each obstacle so identified and indicate the schedule for taking these steps and the individual directly responsible for their implementation.

(5) Include estimates of the number of students, by sex, expected to apply for, be admitted to, and enter each class during the period covered by the plan.

(c) *Nondiscrimination.* No policy or practice of a recipient to which sec. 508.17 applies shall result in treatment of applicants to or students of such recipient in violation of Subpart C unless such treatment is necessitated by an obstacle identified in paragraph (b)(3) of this section and a schedule for eliminating that obstacle has been provided as required by paragraph (b)(4) of this section.

(d) *Effects of past exclusion.* To overcome the effects of past exclusion of students on the basis of sex, each educational institution to which § 508.17 applies shall include in its transition plan, and shall implement, specific steps designed to encourage individuals of the previously excluded sex to apply for admission to such institution. Such steps shall include instituting recruitment

programs which emphasize the institution's commitment to enrolling students of the sex previously excluded.

Subpart C—Discrimination on the Basis of Sex in Admission and Recruitment Prohibited

§ 508.21 Admission.

(a) *General.* No person shall, on the basis of sex, be denied admission, or be subjected to discrimination in admission, by any recipient to which this subpart applies, except as provided in §508.17 and 508.18.

(b) *Specific prohibitions.* (1) In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which this Subpart applies shall not:

(i) Give preference to one person over another on the basis of sex, by ranking applicants separately on such basis, or otherwise;

(ii) Apply numerical limitations upon the number or proportion of persons of either sex who may be admitted; or

(iii) Otherwise treat one individual differently from another on the basis of sex.

(2) A recipient shall not administer or operate any test or other criterion for admission which has a disproportionately adverse effect on persons on the basis of sex unless the use of such test or criterion is shown to predict validly success in the education program or activity in question and alternative tests or criteria which do not have such a disproportionately adverse effect are shown to be unavailable.

(c) *Prohibitions relating to marital or parental status.* In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which this subpart applies:

(1) Shall not apply any rule concerning the actual or potential parental, family or marital status of a student or applicant which treats persons differently on the basis of sex;

(2) Shall not discriminate against or exclude any person on the basis of pregnancy, childbirth, termination of pregnancy, or recovery therefrom, or establish or follow any rule or practice which so discriminates or excludes;

(3) Shall treat disabilities related to pregnancy, childbirth, termination of pregnancy, or recovery therefrom in the same manner and under the same policies as any other temporary disability or physical condition; and

(4) Shall not make pre-admission inquiry as to the marital status of an applicant for admission, including whether such applicant is "Miss" or "Mrs." A recipient may make pre-admission inquiry as to the sex of an applicant for admission, but only if such inquiry is made equally of such applicants of both sexes and if the results of such inquiry are not used in connection with discrimination prohibited by this part.

§ 508.22 Preference in admission.

A recipient to which Subpart C applies shall not give preference to applicants for admission on the basis of attendance at any educational institution or other school or entity which admits as students only or predominately members of one sex, if the giving of such preference has the effect of discriminating on the basis of sex in violation of this subpart.

§ 508.23 Recruitment.

(a) *Nondiscriminatory recruitment.* A recipient to which this subpart applies shall not discriminate on the basis of sex in the recruitment and admission of students. A recipient may be required to undertake additional recruitment efforts for one sex as remedial action pursuant to § 508.3(a), and may choose to undertake such efforts as affirmative action pursuant to § 508.3(b).

(b) *Recruitment at certain institutions.* A recipient to which this subpart applies shall not recruit primarily or exclusively at educational institutions, schools or entities which admit as students only or predominately members of one sex, if such actions have the effect of discriminating on the basis of sex in violation of this subpart.

Subpart D—Discrimination on the Basis of Sex in Education Programs and Activities Prohibited

§ 508.31 Education programs and activities.

(a) *General.* Except as provided elsewhere in the part, no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any academic, extracurricular, research, occupational training, or other education program or activity operated by a recipient which receives or benefits from Federal financial assistance. This subpart does not apply to actions of a recipient in connection with admission of its students to an education program or activity of (1) a recipient to which Subpart C does not apply, or (2) an entity, not a recipient, to which Subpart C would not apply if the entity were a recipient.

(b) *Specific prohibitions.* Except as provided in this subpart, in providing any aid, benefit, or service to a student, a recipient shall not, on the basis of sex:

(1) Treat one person differently from another in determining whether such person satisfies any requirement or condition for the provision of such aid, benefit, or service;

(2) Provide different aid, benefits, or services or provide aid, benefits, or services in a different manner;

(3) Deny any person such aid, benefit, or service;

(4) Subject any person to separate or different rules of behavior, sanctions, or other treatment;

(5) Discriminate against any person in the application of any rules of appearance;

(6) Apply any rule concerning the domicile or residence of a student, or applicant, including eligibility for in-State fees and tuitions;

(7) Aid or perpetuate discrimination against any person by providing significant assistance to any agency, organization, or person which discriminates on the basis of sex in providing any aid, benefit or service to students or employees;

(8) Otherwise limit any person in the enjoyment of any right, privilege, advantage, or opportunity.

(c) *Assistance administered by a recipient educational institution to study at a foreign institution.* A recipient educational institution may administer or assist in the administration of scholarships, fellowships, or other awards established by foreign or domestic wills, trusts, or similar legal instruments, or by acts of foreign governments and restricted to members of one sex, which are designed to provide opportunities to study abroad, and which are awarded to students who are already matriculating at, or who are graduates of the recipient institution, provided a recipient educational institution which administers or assists in the administration of such scholarships, fellowships, or other awards which are restricted to members of one sex, provides or otherwise makes available reasonable opportunities for similar studies for members of the other sex. Such opportunities may be derived from either domestic or foreign sources.

(d) *Programs not operated by recipient.* (1) This paragraph applies to any recipient which requires participation by any applicant, student, or employee in any education program or activity not operated wholly by such recipient, or which facilitates, permits, or considers such participation as part of or equivalent to an education program or activity operated by such recipient, including participation in education consortia and cooperative employment and student-teaching assignments.

(2) Such recipient:

(i) Shall develop and implement a procedure designed to assure itself that the operator or sponsor of such other education program or activity takes no action affecting any applicant, student or employee of such recipient which this part would prohibit such recipient from taking; and

(ii) Shall not facilitate, require, permit, or consider such participation if such action occurs.

§ 508.32 Housing.

(a) *General.* A recipient shall not, on the basis of sex, apply different rules or regulations, impose different fees or requirements, or offer different services or benefits related to housing, except as provided in this section (including housing provided only to married students).

(b) *Housing provided by recipient.* (1) A recipient may provide separate housing on the basis of sex.

(2) Housing provided by a recipient to students of one sex, when compared to that provided to students of the other sex shall be as a whole:

(i) Proportionate in quantity to the number of students of that sex applying for such housing; and

(ii) Comparable in quality and cost to the student.

(c) *Other housing.* (1) A recipient shall not, on the basis of sex, administer different policies or practices concerning occupancy by its students of housing other than provided by such recipient.

(2) A recipient which through solicitation, listing, approval of housing, or otherwise, assists any agency, organization, or person in making housing available to any of its students, shall take such reasonable action as may be necessary to assure itself that such housing as provided to students of one sex, when compared to that provided to students of the other sex, is as a whole: (i) Proportionate in quantity and (ii) comparable in quality and cost to the student. A recipient may render such assistance to any agency, organization, or other person which provides all or part of such housing to students only of one sex.

§ 508.33 Comparable facilities.

A recipient may provide separate toilet, locker room, and shower facilities on the basis of sex, but such facilities provided for students of one sex shall be comparable to such facilities provided for students of the other sex.

§ 508.34 Access to course offerings.

A recipient shall not provide any course or otherwise carry out any of tis education programs or activities separately on the basis of sex, or require or refuse participation therein by any of its students on such basis, including health, physical education, industrial, business, vocational, technical, home economics, music and adult education courses.

(a) With respect to classes and activities in physical education at the elementary school level, the recipient shall comply fully with this section as expeditiously as possible but in no event later than one year from the effective date of this regulation. With respect to physical education classes and activities at the secondary and post-secondary levels, the recipient shall comply fully with this section as expeditiously as possible but in no event later than three years from the effective date of this regulation.

(b) This section does not prohibit grouping of students in physical education classes and activities by ability as assessed by objective standards of individual performance developed and applied without regard to sex.

(c) This section does not prohibit separation of students by sex within physical education classes or activities during participation in wrestling, boxing, rugby, ice hockey, football, basketball and other sports, the purpose or major activity of which involves bodily contact.

(d) Where use of a single standard of measuring skill or progress in a physical education class had an adverse effect on members of one sex, the recipient shall use appropriate standards which do not have such effect.

(e) Portions of classes in elementary and secondary schools which deal exclusively with human sexuality may be conducted in separate sessions for boys and girls.

(f) Recipients may make requirements based on vocal range or quality which may result in a chorus or choruses of one or predominately one sex.

§ 508.35 Access to schools operated by L.E.A.'s.

A recipient which is a local education agency shall not, on the basis of sex, exclude any person from admission to:

(a) Any institution of vocational education operated by such recipients; or

(b) Any other school or educational unit operated by such recipient, unless such recipient otherwise makes available to such person, pursuant to the same policies and criteria of admission, courses, services, and facilities comparable to each course, service, and facility offered in or through such schools.

§ 508.36 Counseling and use of appraisal and counseling materials.

(a) *Counseling.* A recipient shall not discriminate against any person on the basis of sex in the counseling or guidance of students or applicants for admission.

(b) *Use of appraisal and counseling materials.* A recipient which uses testing or other materials for appraising or counseling students shall not use different materials for students on the basis of their sex or use materials which permit or require different treatment of students on such basis unless such different materials cover the same occupations and interest areas and the use of such different materials is shown to be essential to eliminate sex bias. Recipient shall develop and use internal procedures for ensuring that such materials do not discriminate on the basis of sex. Where the use of a counseling test or other instrument results in a substantially disproportionate number of members of one sex in any particular course of study or classification, the recipient shall take such action as is necessary to assure itself that such disproportion is not the result of discrimination in the instrument or its application.

(c) *Disproportion in classes.* Where a recipient finds that a particular class contains substantially disproportionate number of individuals of one sex, the recipient shall take such action as is necessary to assure itself that such disproportion is not the result of discrimination on the basis of sex in counseling or appraisal materials or by counselors.

§ 508.37 Financial assistance.

(a) *General.* Except as provided in paragraph (b) and (c) of this section, in providing financial assistance to any of its students, a recipient shall not:

(1) On the basis of sex, provide different amounts or types of such assistance, limit eligibility for such assistance which is of any particular type or source, apply different criteria or othewise discriminate;

(2) Through solicitation, listing, approval, provision of facilities or other services assist any foundation, trust, agency, organization, or person which provides assistance to any of such recipient's students in a manner which discriminates on the basis of sex; or

(3) Apply any rule or assist in application of any rule concerning eligibility for such asistance which treats persons of one sex differently from persons of the other sex with regard to marital or parental status.

(b) *Financial aid established by certain legal instruments.* (1) A recipient may administer or assist in the administration of scholarships, fellowships, or other forms of financial assistance established pursuant to domestic or foreign wills, trusts, bequests or similar legal instruments or by acts of a foreign government which require that awards be made to members of a particular sex specified therein: Provided, that the overall effect of the award of such sex-restricted scholarships, fellowships, and other forms of financial assistance does not discriminate on the basis of sex.

(2) To ensure nondiscriminatory awards of assistance as required in paragraph (b)(1) of this section, recipients shall develop and use procedures under which:

(i) Students are selected for award of financial assistance on the basis of nondiscriminatory criteria and not on the basis of availability of funds restricted to members of a particular sex;

(ii) An appropriate sex-restricted scholarship, fellowship, or other form of financial assistance is allocated to each student selected under paragraph (b)(2)(1) of this section; and

(iii) No student is denied the award for which he or she was selected under paragraph (b)(2)(i) of this section because of the absence of a scholarship, fellowship, or other form financial assistance designed for a member of that student's sex.

(c) *Athletic scholarships.* (1) To the extent that a recipient awards athletic scholarships or grants-in-aids, it must provide reasonable opportunities for such awards for members of each sex in proportion to the number of students of each sex participating in interscholastic or intercollegiate athletics.

(2) Separate athletic scholarships or grants-in-aid for members of each sex may be provided as part of separate athletic teams for members of each sex to the extent consistent with this paragraph and § 508.41.

§ 508.38 Employment assistance to students.

(a) Assistance by recipient in making available outside employment. A recipient which assists any agency, organization or person in making employment available to any of its student:

(1) Shall assure itself that such employment is made available without discrimination on the basis of sex; and

(2) Shall not render such services to any agency, organization, or person which discriminates on the basis of sex in its employment practices.

(b) Employment of students by recipients. A recipient which employs any of its student shall not do so in a manner which violates Subpart E.

§ 508.39 Health and insurance benefits and services.

In providing a medical, hospital, accident, or life insurance benefit, service, policy, or plan to any of its students, a recipient shall not discriminate on the basis of sex, or provide such benefit, service, policy, or plan in a manner which would violate Subpart E if it were provided to employees of the recipient. This section shall not prohibit a recipient from providing any benefit or service which may be used by a different proportion of students of one sex than of the other, including family planning services. However, any recipient which provides full coverage health service shall provide gynecological care.

§ 508.40 Marital or parental status.

(a) *Status generally.* A recipient shall not apply any rule concerning a student's actual or potential parental, family, or marital status which treats students differently on the basis of sex.

(b) *Pregnancy and related conditions.* (1) A recipient shall not discriminate against any student, or exclude any student from its education programs or activities, including any class or extracurricular activity, on the basis of such student's pregnancy, childbirth, false pregnancy, termination of pregnancy or recover therefrom, unless the student requests voluntarily to participate in a separate portion of the program or activity of the recipient.

(2) A recipient may require such a student to obtain the certification of a physician that the student is physically and emotionally able to continue participation in the normal education program or activity so long as such a certification is required of all students for other physical or emotional conditions requiring the attention of a physician.

(3) A recipient which operates a portion of its education program or activity separately for pregnant students, admittance to which is completely voluntary on the part of the student as provided in paragraph (b)(1) of this section, shall ensure that the instructional program in the separate program is comparable to that offered to non-pregnant students.

(4) A recipient shall treat pregnancy, childbirth, false pregenancy, termination of pregnancy and recovery therefrom in the same manner and under the same policies as any other temporary disability with respect to any medical or hospital benefit, service, plan or policy which such recipient administers, operates, offers, or participates in with respect to students admitted to the recipient's educational program or activity.

(5) In the case of a recipient which does not maintain a leave policy for its students, or in the case of a student who does not otherwise qualify for leave under such a policy, a recipient shall treat pregnancy, childbirth, false pregnancy, termination of pregnancy and recovery therefrom as a justification for a leave of absence for so long a period of time as is deemed medically necessary by the student's physician, at the conclusion of which the student shall be reinstated to the status which she held when the leave began.

§ 508.41 Athletics.

(a) *General.* No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, be treated differently from another person or otherwise be discriminated against in any interscholastic, intercollegiate, club or intramural athletics offered by the recipient, and no recipient shall provide any such athletics separately on such basis.

(b) *Separate teams.* Notwithstanding the requirements of paragraph (a) of this section, a recipient may operate or sponsor separate teams for members of each sex where selection of such teams is based upon competitive skill or the activity involved is a contact sport. However, where a recipient operates or sponsors a team in a particular sport for members of one sex but operates or sponsors no such team for members of the other sex, and athletic opportunities for members of that sex have previously been limited, members of the excluded sex must be allowed to try-out for the team offered unless the sport involved is a contact sport. For the purposes of this part, contact sports include boxing, wrestling, rugby, ice hockey, football, basketball, and other sports the purpose or major activity of which involves bodily contact.

(c) *Equal opportunity.* A recipient which operates or sponsors interscholastic, intercollegiate, club or intramural athletics shall provide equal athletic opportunity for members of both sexes. In determining whether equal opportunities are available the Director will consider, among other factors:

(1) Whether the selection of sports and levels of competition effectively accommodate the interests and abilities of members of both sexes;

(2) The provision of equipment and supplies;

BEST COPY AVAILABLE

(3) Scheduling of games and practice time;

(4) Travel and per diem allowance;

(5) Opportunity to receive coaching and academic tutoring;

(6) Assignment and compensation of coaches and tutors;

(7) Provision of locker rooms practice and competitive facilities;

(8) Provision of medical and training facilities and services;

(9) Provision of housing and dining facilities and services;

(10) Publicity.

Unequal aggregate expenditures for members of each sex or unequal expenditures for male and female teams if a recipient operates or sponsors separate teams will not constitute noncompliance with this section, but the Director may consider the failure to provide necessary funds for teams for one sex in assessing equality of opportunity for members of each sex.

(d) *Adjustment period.* A recipient which operates or sponsors interscholastic, intercollegiate, club or intramural athletics at the secondary or post-secondary school level shall comply fully with this section as expeditiously as possible but in no event later than three years from the effective date of this regulation.

§ 508.42 Textbooks and curricular material.

Nothing in this regulation shall be interpreted as requiring or prohibiting or abridging in any way the use of particular textbooks or curricular materials.

Subpart E—Discrimination on the Basis of Sex in Employment in Education Programs and Activities Prohibited

§ 508.51 Employment.

(a) *General.* (1) No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination in employment, or recruitment, consideration, or selection therefor, whether full-time or part-time, under any education program or activity operated by a recipient which receives or benefits from Federal financial assistance.

(2) A recipient shall make all employment decisions in any education program or activity operated by such recipients in a nondiscriminatory manner and shall not limit, segregate, or classify applicants or employees in any way which could adversely affect any applicant's or employee's employment opportunities or status because of sex.

(3) A recipient shall not enter into any contractual or other relationship which directly or indirectly has the effect of subjecting employees or students to discrimination prohibited by this subpart, including relationships with employment and referral agencies, with labor unions, and with organizations providing or administering fringe benefits to employees of the recipient.

(4) A recipient shall not grant preferences to applicants for employment on the basis of attendance at any educational institution or entity which admits as students only or predominantly members of one sex, if the giving of such preferences has the effect of discriminating on the basis of sex in violation of this part.

(b) *Application.* The provisions of this subpart apply to:

(1) Recruitment, advertising, and the process of application for employment;

(2) Hiring, upgrading, promotion, consideration for and award of tenure, demotion, transfer, layoff, termination, application of nepotism policies, right of return from layoff, and rehiring;

(3) Rates of pay or any other form of compensation, and changes in compensation;

(4) Job assignments, classifications and structure, including position descriptions, lines of progression, and seniority lists;

(5) The terms of any collective bargaining agreement;

(6) Granting and return from leaves of absence, leave for pregnancy, childbirth, false pregnancy, termination of pregnancy, leave for persons of either sex to care for children or dependents, or any other leave;

(7) Fringe benefits available by virtue of employment, whether or not administered by the recipient;

(8) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, selection for tuition assistance, selection for sabbaticals and leaves of absence to pursue training;

(9) Employer-sponsored activities, including social or recreational programs; and

(10) Any other term, condition, or privilege of employment.

§ 508.52 Employment criteria.

A recipient shall not administer or operate any test or other criterion for any employment opportunity which has a disproportionately adverse effect on persons on the basis of sex unless:

(a) Use of such test or other criterion is shown to predict validly successful performance in the position in question; and

(b) Alternative tests or criteria for such purpose, which do not have such disproportionately adverse effect, are shown to be unavailable.

§ 508.53 Recruitment.

(a) *Nondiscriminatory recruitment and hiring.* A recipient shall not discriminate on the basis of sex in the recruitment and hiring of employees. Where a recipient has been found to be presently discriminating on the basis of sex in the recruitment or hiring of employees, or has been found to have in the past so discriminated, the recipient shall recruit members of the sex so discriminated against so as to overcome the effects of such past or present discrimination.

(b) *Recruitment patterns.* A recipient shall not recruit primarily or exclusively at entities which furnish as applicants only or predominantly members of one sex if such actions have the effect of discriminating on the basis of sex in violation of this subpart.

§ 508.54 Compensation.

A recipient shall not make or enforce any policy or practice which, on the basis of sex:

(a) Makes distinctions in rates of pay or other compensation;

(b) Results in the payment of wages to employees of one sex at a rate less than that paid to employees of the opposite sex for equal work on jobs the performance of which requires equal skill, effort, and responsibility, and which are performed under similar working conditions.

§ 508.55 Job classification and structure.

A recipient shall not:

(a) Classify a job as being for males or for females;

(b) Maintain or establish separate lines of progression, seniority lists, career ladders, or tenure systems based on sex; or

(c) Maintain or establish separate lines of progression, seniority systems, career ladders, or tenure systems for similar jobs, position descriptions, or job requirements which classify persons on the basis of sex, unless sex is bona fide occupational qualification for the positions in question as set forth in § 508.61.

§ 508.56 Fringe benefits.

(a) *"Fringe benefits" defined.* For purposes of this part, "fringe benefits" means: Any medical, hospital, accident, life insurance or retirement benefit, service policy or plan, any profit-sharing or bonus plan, leave and any other benefit or service of employment not subject to the provision of § 508.54.

(b) Prohibitions: A recipient shall not:

(1) Discriminate on the basis of sex with regard to making fringe benefits available to employees or make fringe benefits available to spouses, families or dependents of employees differently upon the basis of the employee's sex;

(2) Administer, operate, offer, or participate in a fringe benefit plan which does not provide either for equal periodic benefits for members of each sex or for equal contributions to the plan by such recipient for members of each sex; or

(3) Administer, operate, offer, or participate in a pension or retirement plan which establishes different optional or compulsory retirement ages based on sex or which otherwise discriminates in benefits on the basis of sex.

§ 508.57 Marital or parental status.

(a) *General.* A recipient shall not apply any policy or take any employment action:

(1) Concerning the potential marital, parental, or family status of an employee or applicant for employment which treats persons differently on the basis of sex; or

(2) Which is based upon whether an employee or applicant for employment is the head of household or principal wage earner in such employee's or applicant's family unit.

(b) *Pregnancy.* A recipient shall not discriminate against or exclude from employment any employee or applicant for employment on the basis of pregnancy, childbirth, false pregnancy, termination of pregnancy, or recovery therefrom.

(c) *Pregnancy as a temporary disability.* A recipient shall treat pregnancy, childbirth, false pregnancy, termination of pregnancy, and recovery therefrom and any temporary disability resulting therefrom as any other temporary disability for all job-related purposes, including commencement, duration and extensions of leave, payment of disability income, accrual of seniority and any other benefit or service, and reinstatement, and under any fringe benefit offered to employees by virtue of employment.

(d) *Pregnancy leave.* In the case of a recipient which does not maintain a leave policy for its employees, or in the case of an employee with insufficient leave or accrued employment time to qualify for leave under such a policy, a recipient shall treat pregnancy, childbirth, false pregnancy, termination of pregnancy and recovery therefrom as a justification for a leave of absence without pay for a reasonable period of time, at the conclusion of which the employee shall be reinstated to the status which she held when the leave began or to a comparable position, without decrease in rate of compensation or loss of promotional opportunities, or any other right or privilege of employment.

§ 508.58 Effect of State or local law or other requirements.

(a) *Prohibitory requirements.* The obligation to comply with this subpart is not obviated or alleviated by the existence of any State or local law or other requirement which imposes prohibitions or limits upon employment of members of one sex which are not imposed upon members of the other sex.

(b) *Benefits.* A recipient which provides any compensation service, or benefit to members of one sex pursuant to a State or local law or other requirement shall provide the same compensation service, or benefit to members of the other sex.

§ 508.59 Advertising.

A recipient shall not in any advertising related to employment indicate preference, limitation, specification, or discrimination based on sex unless sex is a bona fide occupational qualification for the particular job in question.

§ 508.60 Pre-employment inquiries.

(a) *Marital status.* A recipient shall not make pre-employment inquiry as to the marital status of an applicant for employment, including whether such applicant is "Miss or Mrs."

(b) *Sex.* A recipient may make pre-employment inquiry as to the sex of an applicant for employment, but only if such inquiry is made equally of such applicants of both sexes and if the results of such inquiry are not used in connection with discrimination prohibited by this part.

§ 508.61 Sex as a bona fide occupational qualification.

A recipient may take action otherwise prohibited by this subpart provided it is shown that sex is a bona fide occupational qualification for that action, such that consideration of sex with regard to such action is essential to successful operation of the employment function concerned. A recipient shall not take action pursuant to this section which is based upon alleged comparative employment characteristics or stereotyped characterizations of one or the other sex, or upon preference based on sex of the recipient, employees, students, or other persons, but nothing contained in this section shall prevent a recipient from considering an employee's sex in relation to employment in a locker room or toilet facility used only by members of one sex.

Subpart F—Enforcement

§ 508.71 Procedures.

For the purpose of implementing this part, the procedural provisions applicable to Title VI of the Civil Rights Act of 1964 apply to this part. These procedures are found at 22 CFR 209.6–209.13.

§ 508.72 Delegation of authority.

Responsibility for administration and enforcement of this part with respect to programs administered by another Federal department or agency pursuant to delegation, transfer, interagency service agreement, or other arrangement is vested in the head of such department or agency, or his delegate, and subject to such delegations or redelegations as that head may make or authorize.

Appendix—Program of Financial Assistance Administered by USIA To Which These Regulations Apply

1. Grants to individuals, public or private nonprofit organizations, State and local governmental institutions in the United States and in other countries for interchanges of books, periodicals and government publications, and preparation, distribution and interchange of other educational materials (Section 202 of the United States Information and Educational Exchange Act of 1948, as amended, 22 U.S.C. 1447).

2. Grants to individuals, public or private nonprofit organizations, State and local governmental institutions in the United States and in other countries to assist libraries and community centers abroad, founded or sponsored by citizens of the United States, and serving as demonstration centers for methods and practices employed in the United States (Section 203 of the United States Information and Educational Exchange Act of 1948, as amended, 22 U.S.C. 1448).

3. Grants to private agencies, including existing American press, publishing, radio, motion picture, and other agencies in disseminating abroad information about the United States, its people, and policies (Section 1005 of the United States Information and Educational Exchange Act, 22 U.S.C. 1437).

4. Grants to public or private nonprofit foundations, institutions, or organizations for educational and cultural exchanges, visits, and interchanges, (Section 102 of the Mutual Eduational and Cultural Exchange Act of 1961, as amended, 22 U.S.C. 2452).

BILLING CODE 8230–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD3 86-14]

Regatta; Blessing of the Fleet and Water Show, Hudson River, Albany, NY

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The Coast Guard is considering a proposal to establish Special Local Regulations for the Blessing of the Fleet and Water Show which is sponsored by the City of Albany Tricentennial River Festival Committee. The purpose of this regulation is to provide for the safety of participants and spectators on navigable waters during this event.

DATES: Comments must be received on or before July 7, 1986.

ADDRESSES: Comments should be mailed to Commander (b), Third Coast Guard District, Governors Island, New York, NY 10004. The comments will be available for inspection and copying at the Boating Safety Office, Building 110, Governors Island, New York, NY. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Lucas A. Dlhopolsky, (212) 668-7974.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD3 86-14) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped, self-addressed postcard or envelope is enclosed. The rules may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process. The comment period for this proposed rulemaking is less than the normal 45 days because of the time constraints involved. Due to the shortened comment period, verbal comments submitted by telephone will be accepted.

Drafting Information

The drafters of this notice are Mr. Lucas A. Dlhopolsky, Project Officer, Third Coast Guard District Boating Safety Office, and Ms. MaryAnn Arisman, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Proposed Regulations

The Blessing of the Fleet and Water Show is an event sponsored by the City of Albany Tricentennial River Festival Committee as part of the City of Albany's three hundredth anniversary celebration. The event will be comprised of two parts. The first part is the blessing of the fleet during which the participating vessles will parade on the Hudson River from the southern end of the Port of Albany, north to the area in the vicinity of the Corning Preserve. After rounding the swing railroad bridge at mile 146.2 on the Hudson River, they will proceed back downstream and anchor near the east bank in the area between the Dunn Memorial bridge (river mile 145.4) and the swing railroad bridge to the north. The river between the railroad bridge and the I-90 highway bridge (river mile 147.2) will serve as a staging area for the parade and water show activities which form the second part of this tricentennial event. The sponsor anticipates that some 300 vessels ranging in size from 14 feet to 140 feet will participate in the blessing of the fleet parade which is scheduled to begin on Sunday, July 20, 1986 at 11:00 a.m. and last until noon that same day. A variety of activities on and over the water will make up the water show which is scheduled to take place from 12:00 noon (following the blessing of the fleet parade) to 7:00 p.m. The sponsor will provide several vessels from the Albany Police, Albany County Sheriff's and New York State Parks, Recreation and Historic Preservation Departments to assist the Coast Guard Patrol Commander in providing for the safety of the event and spectator craft. The Coast Guard intends to restrict vessel movement within the above outlined sections of the Hudson River during this event to provide for the safety of the participants and spectators on navigable waters. Vessels not participating in this marine event will not be allowed to pass through the regulated area during the effective period of this regulation except as the discretion of the Coast Guard Patrol Commander. Spectator vessels including those which participated earlier in the blessing of the fleet parade but not part of the water show activities will be directed to spectator areas near the East bank of the Hudson River prior to start of the water show. Any vessels wishing to transit the regulated area during the effective period of these regulations shall make this intention known to the Coast Guard Patrol Commander via one of the patrol craft. These vessels will be directed to waiting areas south and north of the regulated area. This regulation will be published in the Local Notice to Mariners to advise the general public and commercial users on the Hudson River of the event.

Economic Assessment and Certification

This proposed regulation is considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. This event is expected to draw a large number of spectator craft and shore spectators into the area for the duration of the celebration. This should have a favorable impact on commercial facilities providing services to the spectators. Since the Port of Albany is participating in this event, this commercial facility will not be adversely affected by this regulation. In addition, the regulated area includes the Port of Albany waterfront only for about one hour during the Blessing of the Fleet parade. As part of the Albany Tricentennial celebration this event will receive wide publication in the local news media. General marine navigation will be notified in advance through the Third Coast Guard District Local Notice To Mariners. Any vessels still wishing to transit the area will be allowed to do so at the discretion of the Coast Guard Patrol Commander when this can be safely accomplished.

Since the impact of this regulation is expected to be minimal, the Coast Guard certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 100

Marine Safety, Navigation (water).

PART 100—[AMENDED]

Proposed Regulation

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations as follows:

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. Part 100 is amended by adding a temporary § 100.35–324 to read as follows:

§ 100.35–324 Blessing of the Fleet and Water Show, Albany, New York.

(a) *Regulated Area.* During the Blessing of the Fleet parade (11 a.m. to approximately 12 noon), the regulated area includes that section of the Hudson River between the southern end of the Port of Albany turning basin and the I–90 Highway bridge at river mile 147.2. After the Blessing of the Fleet parade is completed (approximately noon) the regulated area is shortened to include only that section of the Hudson River from the Dunn Memorial Bridge, north to the I–90 highway bridge.

(b) *Effective Period.* This regulation is effective from 11:00 a.m. to 7:00 p.m. on July 20, 1986.

(c) *Special Local Regulations.* (1) All persons or vessels not registered with sponsor as participants or not part of the regatta patrol are considered spectators.

(2) No person or vessel may enter or remain in the regulated area unless participating in the event, or authorized to be there by the sponsor or Coast Guard patrol personnel.

(3) Spectator vessels must be at anchor within a designated spectator area or moored to a waterfront facility within the regulated area prior to the start of the Blessing of the Fleet parade and watershow activities as directed by the sponsor or Coast Guard Patrol Commander.

(4) All persons and vessels shall comply with the instructions of U.S. Coast Guard patrol personnel. Upon hearing five or more blasts from a U.S. Coast Guard vessel, the operator of a vessel shall stop immediately and proceed as directed. U.S. Coast Guard patrol personnel include commissioned, warrant and petty officers of the Coast Guard. Members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation and other applicable laws.

(5) For any violation of this regulation, the following maximum penalties are authorized by law:

(i) $500 for any person in charge of the navigation of a vessel.

(ii) $500 for the owner of a vessel actually on board.

(iii) $250 for any other person.

(iv) Suspension or revocation of a license for a licensed officer.

Dated: May 27, 1986.

P.A. Yost,

Vice Admiral, U.S. Coast Guard, Commander, Third Coast Guard District.

[FR Doc. 86–12804 Filed 6–4–86; 8:45 am]

BILLING CODE 4910-14-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 9

Floodplain Management and Protection of Wetlands; Temporary Relocation Assistance

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: This proposed rule exempts from the floodplain management requirement stated in 44 CFR Part 9 the placement of families in existing resources under Temporary Relocation Assistance provided under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA).

DATE: FEMA will consider all comments received by August 4, 1986.

ADDRESS: Send comments to the Rule Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, 500 "C" Street SW., Washington, DC 20472

FOR FURTHER INFORMATION CONTACT: Karen Forbes, Office of Disaster Assistance Programs, Federal Emergency Management Agency, 500 "C" Street, SW—Room 701, Washington, DC 20472, (202) 646–3807.

SUPPLEMENTARY INFORMATION: FEMA has determined that the placement of families in existing resources under Temporary Relocation Assistant (CERCLA) should be exempt from the review process because:

(1) The need for temporary relocation is often immediate and the review process would significantly delay placement;

(2) FEMA's use of existing resources in the floodplain does not cause degradation of the floodplain;

(3) Non-use of existing resources in a floodplain could result in use of resources which would be more expensive;

(4) Temporary relocation usually lasts for a short period of time.

Environmental Consideration

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, and the implementing regulations of the Council on Environmental Quality (40 CFR Parts 1500–1508), FEMA has prepared an environmental assessment covering the issuance of these proposed regulatory changes. FEMA has determined that there will be no significant impact caused by issuance of this regulation, and an environmental impact statement will not be prepared. A finding of no significant impact has been issued. Copies of the environmental assessment and finding are available from the Office of Disaster Assistant Programs, Federal Emergency Management Agency, 500 "C" Street, SW, Washington, DC 20472, and from the Rules Docket Clerk.

Executive Order 12291 "Federal Regulations"

This proposed rule is not a "major rule" within the context of Executive Order 12291. It will not have an annual effect on the economy of $100 million or more.

This rule will not have a significant economic impact on small entities within the meaning of 5 U.S.C. 605 (the Regulatory Flexibility Act). Therefore, no regulatory analysis will be prepared.

This rule does not call for the collection of any information.

Accordingly, FEMA proposes to amend Chapter 1, Part 9 of Title 44, Code of Federal Regulations as follows:

PART 9—FLOODPLAIN MANAGEMENT AND PROTECTION OF WETLANDS

1. The authority citation for Part 9 continues to read.

Authority: E.O. 11988, E.O. 11990, Reorganization Plan No. 3, 1978; E.O. 12127, E.O. 12148, 42 U.S.C. 5201.

§ 9.5 [Amended]

2. The introductory paragraph of § 9.5(c) is amended by adding in the parentheses phrase at the end of the third sentence the following "except as noted".

3. Section 9.5 is amended by adding new paragraph (c)(14) to read:

* * * * *

(14) Placement of families in existing resources and Temporary Relocation Assistance provided to those families so placed under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, Pub. L. 96–510.

* * * * *

Dated: May 30, 1986.

Julius W. Becton, Jr.,

Director.

[FR Doc. 86–12834 Filed 6–4–86; 8:45 am]

BILLING CODE 6718-01-M

FEDERAL MARITIME COMMISSION

46 CFR Part 572

[Docket No. 86–16]

Conference Service Contract Authority

AGENCY: Federal Maritime Commission.

ACTION: Availability of finding of not significant impact.

SUMMARY: The Commission has completed an environmental assessment of a proposed rule in Docket No. 86–16 and found that its final resolution of this proceeding will not have a significant impact on the quality of the human environment.

DATE: Petitions for review are due June 16, 1986.

ADDRESS: Petitions for review (original and 15 copies) to: John Robert Ewers, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573.

FOR FURTHER INFORMATION CONTACT: Edward R. Meyer, Office of Special Studies, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573.

SUPPLEMENTARY INFORMATION: Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Special Studies has determined that the Commission's proposed rule in Docket No. 86–16 will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et. seq.*, and the preparation of an environmental impact statement is not required.

In Docket No. 86–16 Commission proposes to revise its regulations governing agreements by common carriers and other persons subject to the Shipping Act of 1984.

Conferences have stated their service contract authority in a variety of ways, some so generally as to allow almost unlimited discretion with regard to any particular conduct taken in regulating service contracts. Other service contract authorities may provide for a particular method of regulating the contract, but allow for a change without filing an amendment to the agreement with the Commission. These authorities do not appear to be in keeping with the regulatory requirements of the 1984 Act.

The proposed rule would require (1) a Conference agreement that contains service contract authority to state the method by which the contract will be regulated, and (2) that any change in the method of such regulation can not be implemented prior to filing a modification with the Commission.

This Finding of No Significant Impact (FONSI) will become final within 10 days of publication of this notice in the Federal Register unless a petition for review is filed pursuant to 46 CFR 504.6 (b).

The FONSI and related environmental assessment are available for inspection upon request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, DC 20573, telephone (202) 523–5725.

By the Commission.

John Robert Ewers,
Secretary

BILLING CODE 6730–01–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 82–05; Notice 2]

Federal Motor Vehicle Safety Standards; Seating Reference Point and Driver's Eye Range

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an amendment to the definition of seating reference point in 49 CFR 571.3 which would amend the reference to the Society of Automotive Engineers (SAE) Recommended Practice J826, "Manikins for Use in Defining Vehicle Seating Accommodations," to make it clear that the SRP is independent of the length of the manikin's legs. The agency believes this change will bring the definition into line with current industry practices and promote international harmonization of standards.

This notice implements the agency's granting of a petition for rulemaking on this subject by Mercedes-Benz of North America, Inc., and follows the issuance of an advance notice for proposed rulemaking (ANPRM). This notice also terminates agency consideration of two other proposals on which the ANPRM solicited comments. The first proposal would have required vehicle manufacturers to specify the location of a vehicle's seating reference point by placing permanent reference marks or points on the vehicle structure. At this time, the agency does not believe that such marks are necessary to facilitate compliance testing.

A second proposal would have implemented NHTSA's granting of another petition by Mercedes-Benz to amend several safety standards containing visibility requirements by changing the reference to a driver's eye range from SAE Recommended Practice J941 to a more recent version, SAE Recommended Practice J941c. The agency believes that the current reference does not impose the restrictions which the petitioner attributes to it and therefore considers further rulemaking unnecessary.

A petition filed by Mercedes-Benz on Standard No. 210, *Seat Belt Assembly Anchorages*, is being addressed in a separate rulemaking proceeding. Although separate, the instant rulemaking action has issues in common with the Standard No. 210 rulemaking. Final rules in the two proceedings will be coordinated.

DATE: Comments must be received on or before August 4, 1986. The proposed effective date is the publication date of a final rule.

ADDRESS: All comments should refer to the docket number and notice number of this notice and be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. The docket hours are from 8 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Kenneth W. Rutland, Office of Crash Avoidance, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202–426–2154).

SUPPLEMENTARY INFORMATION:

Seating Reference Point

In 1980, Mercedes-Benz petitioned this agency to amend the definition of "seating reference point" (SRP). That term is defined in 49 CFR 571.3 as:

"[T]he manufacturer's design reference point which—

(a) Establishes the rearmost normal design driving or riding position of each designated seating position in a vehicle;

(b) Has coordinates established relative to the designed vehicle structure;

(c) Simulates the position of the pivot center of the human torso and thigh; and

(d) Is the reference point employed to position the two dimensional templates described in SAE Recommended Practice J826, 'Manikins for Use in Defining Vehicle Seating Accommodations.' November 1962."

The Mercedes petition, and the comments to the ANPRM issued in response to it (48 FR 9865; March 8, 1982), present several questions about the use of the SRP in the Federal motor vehicle safety standards. The first question is whether the reference to SAE J826 should be updated to refer to a later edition which specifies a manikin with the dimensions of a 95th percentile male rather than those of a 90th

percentile male. The second is whether the SRP must be determined with the seat in the rearmost position or whether it may be determined with the seat in a position ahead or the rearmost position. The third question is whether the SRP should be employed as the universal reference point for fore and aft measurement in the standards. The final question is whether fiducial marks representing the SRP should be inscribed on the vehicle. The following discussion deals with each of these questions in turn.

SAE J826

In its petition for rulemaking, Mercedes stated that the November 1962 version of SAE J826 was out of date. That version of J826 specified a two-dimensional template with upper and lower leg segments based on 90th percentile male leg measurements, while later versions of SAE J826 used 95th percentile male leg segments. Mercedes stated that the use of the longer segments would bring the definition up to date with industry practices and promote the harmonization of United States and European safety standards. Mercedes therefore requested the adoption of the January 1974 version, SAE J826b, which specified the use of the 95th percentile segments.

In the ANPRM, the agency stated that it found merit in the Mercedes request, noting that to the extent industry used the 95th percentile leg segments in designing vehicles, implementation of safety standards based on 90th percentile leg segments would require "largely duplicative, although slightly different, measurements to be made."

In response to the agency's request for comments on Mercedes' petition, the industry commenters generally supported the change to the 95th percentile leg segments. Ford Motor Company suggested the adoption of the latest version of SAE J826, issued in 1980 as SAE Standard J826 APR80, "Devices for Use in Defining and Measuring Vehicle Seating Accommodation," which continues the use of the 95th percentile leg segments. Those comments which objected to revising the reference to SAE J826 appeared to rest on the erroneous belief that the agency intended to use the revised reference to designate a specific design reference point. In fact, the agency intends to permit each manufacturer to continue to select the location of the SRP consistent with the manufacturer's design considerations.

Upon reviewing the comments, the agency has tentatively concluded that the best way to deal with the question posed by the incorporation of SAE J826 would be to limit the incorporation to aspects of SAE J826 other than leg segment length. One constant feature of SAE J826 throughout its successive editions has been the location of the template's H-point with reference to the seat cushion and seat back. This location has not varied with the changes in leg segment length, and would appear to be a uniform design consideration in the manufacturers' placement or their SRP's. The agency is accordingly proposing to limit the reference to SAE J826 in the definition of SRP, thereby excluding leg segment length as a factor in the location of the SRP.

The agency has examined the effects of variation in leg segment length for the various Federal motor vehicle safety standards which incorporate SAE J826. The leg segments of the 95th percentile template, for example, are 0.6 inches longer overall than those of the 90th percentile template. If a manufacturer had located its SRP by extending the legs of the 90th percentile template as fully as the SAE J826 procedures permit, substitution of the 95th percentile template would permit the manufacturer to move the SRP rearward by approximately 0.5 inches. The decision to move the SRP would be largely up to the manufacturer, since by bending the 95th percentile legs at the knee, a vehicle designer could keep the SRP at the same point as before.

Two groups of vehicle safety standards refer to the SRP. In the 100 series, Standards No. 103, 104, 107, and 111 define certain areas of the windshield or field of view by using the SRP, directly or indirectly, as a reference point. If a manufacturer elected to move the SRP on one of its vehicles rearward by 0.5 inches, it would thereby increase the areas of the windshield or field of view defined by these standards. Insofar as no manufacturer objected to the use of the 95th percentile dimensions, the agency infers either that the manufacturers have already employed the 95th percentile dimensions for their design purposes, as Mercedes suggests to be the case, or that they would be able to do so without significant changes in vehicle design. Among the 200 series standards, Standards No. 201, 202, 203, 207, and 210 refer to the SRP directly or indirectly. As in the case of the 100 series standards, these standards could be marginally affected by a 0.5 inch rearward movement of the SRP.

The agency has therefore tentatively concluded that the variations in the manufacturers' placement of their SRP's which are likely to occur as a result of using different leg segments would have negligible safety consequences. Comments are invited as to whether this proposal would make any difference in the design of vehicle interiors or in the compliance of planned vehicles with applicable safety standards.

The SRP in Relation to Seat Position

The second question posed by Mercedes' petition is whether the SRP should be determined with the seat in the rearmost position or with the seat in a position ahead of the rearmost position. Mercedes argues that paragraph (a) of the SRP definition, which specifies that the seat is in the "rearmost normal design driving position," should be construed to permit the SRP to lie ahead of the rearmost seat position. Mercedes has designed an elongated seat track for the convenience of occupants who want additional leg room. This track extends rearward of the position necessary to accommodate a 95th percentile male. Mercedes' concern, and the main thrust of its petition, is that the procedure in SAE J826 for positioning the two-dimensional manikin appears to assume that the seat will be adjusted to its rearmost position. If the seat must be in the rearmost position when determining the SRP, then all the measurements in the standards which reference the SRP would also have to be made from the rearmost position. This would mean that the SRP measured at the 95th percentile point would also determine the rearmost seat position, precluding the use of the elongated seat track. Mercedes' solution is to amend the definition of SRP to specify that the SRP would be measured at a point representing the specified manikin dimensions, regardless of the amount of seat track to the rear of that point.

In the ANPRM the agency responded to Mercedes by issuing an interpretation of paragraph (a) of the definition as follows:

> [the SRP] represents the rearmost design position from which manufacturers are required to meet various performance standards. It does not establish the absolute rearmost design point to which a seat may be adjusted. (47 FR at 9766)

Upon further analysis, and in the light of the comments on the ANPRM, the agency believes that the interpretation in the ANPRM was incorrect, and is modifying the interpretation as discussed hereafter. While on its face the ANPRM interpretation was favorable to Mercedes' position, it did not resolve the question presented by standards such as Standard No. 210, which uses the SRP as a reference point but states that all measurements are to be made with the seat in the rearmost

position. In its comment to the ANPRM, Mercedes included a chart to show how the safety belt anchorages under Standard No. 210 would still have to be measured with the seat in the rearmost position, regardless of what flexibility is given the manufacturers in the definition of the SRP.

The question presented by Standard No. 210 has caused the agency to reexamine its position on the SRP. The agency plans to issue a separate NPRM on Standard No. 210, responding to a petition from Mercedes.

Because Standard No. 210 uses the SRP as its reference point, the requirement that the seats be in the absolute rearmost position would dictate that the SRP be established with the seat in that position. A manufacturer could not establish two seating reference points, so that the location dictated by Standard No. 210 would prevent a manufacturer from having seat positions to the rear of the SRP. In effect, the SRP usage in Standard No. 210 would decide the question presented by Mercedes in favor of the rearmost position. The agency surveyed the location of the SRP's in the vehicles it tested during its most recent compliance testing program, and found that, without exception, the manufacturers had determined the SRP with the seat in the rearmost position.

These circumstances have led the agency to modify the SRP interpretation announced in the ANPRM. That interpretation could lead a manufacturer to conclude that a seating position rearward of the SRP could be occupied while the vehicle is in motion. However, there is test data indicating that an anchorage positioned forward of the SRP may allow for increased head movement. It is therefore the agency's opinion that the reference in the SRP definition to the "rearmost normal design driving or riding position" means the rearmost position to which a seat can be adjusted when the vehicle is in operation. To further clarify this meaning, the agency is proposing to delete the world "normal" from the SRP definition.

SRP vs. Rearmost Position

In its comment on the ANPRM, Rolls-Royce Motors stated that the interpretation that the SRP was not necessarily the rearmost position would create confusion in the interpretation of standards, in that some refer to SRP, others to "rearmost position," and some to both. The company suggested that this confusion could be resolved by amending several standards to refer to the SRP rather than to other rearward positions. In view of the modified interpretation of SRP set forth in the preceding section, the agency takes the view that such amendments are not necessary. Standard No. 104, for example, substitutes the SRP for "H point" or manikin H point" whenever those terms are used in the SAE standards and recommended practices incorporated by the standard. This substitution results in references to "SRP with seat in rearmost position" (Figure 1, SAE Recommended Practice J903a), a concept that would be internally contradictory if the SRP could be at a position other than the rearmost position. However, if the SRP must be defined with the seat at its rearmost position, the contradiction disappears. There would thus seem to be no reason to amend Standard No. 104 or the other standards which refer both to SRP and to rearmost position.

Standard No. 208, on the other hand, refers to "rearmost position" but not to the SRP. In specifying the conditions for testing, the standard provides that an adjustable seat is in the position "midway between the forwardmost and rearmost positions." Insofar as this condition refers to the position of the seat itself, and not to the location of any point or points relative to the seat, substituting "SRP" for "rearmost position" could arguably change the location of the seat for testing purposes, since the SRP itself is a point in space forward of the seat back. Because substituting "SRP" would thus not clarify Standard No. 208, the agency is not proposing the substitution.

The agency requests comments on any specific problems in vehicle design or compliance testing which may result from the continuance of the existing variety of references to seat position, or from restrictions in the existing standards that occur as a result of seating position specifications for the compliance test. However, at this time the agency is not proposing to make any change in the terms used in the standards.

Fiducial Marks

The ANPRM stated that the agency would consider proposing a requirement that manufacturers specify a vehicle's SRP in terms of accessible permanent marks or points, known as fiducial marks, on the vehicle structure. Most manufacturers opposed the use of these marks as an unnecessary burden, since the marks would be used only for the small number of vehicles actually tested by the agency. Upon review of its own test experience, the agency concludes that it has not had significant difficulty in understanding the manufacturers' descriptions of their SRP's. The agency does not believe that fiducial marks will be of significant value and has therefore, decided not to consider this issue further.

Driver's Eye Range

In a second petition for rulemaking, Mercedes-Benz sought to update the references to SAE Recommended Practice J941 in Motor Vehicle Safety Standard Nos. 104, *Windshield Wiping and Washing Systems*, and 107, *Reflecting Surfaces*. Two standards which rely on Standard No. 104's measurements, Standard No. 103, *Windshield Wiping and Washing System*, and Standard No. 111, *Rearview Mirrors*, would also be affected. Mercedes-Benz argued that the 1965 version of SAE J941 currently incorporated into these standards restricts seat back angles to the range of 22 to 28 degrees, a range which the company believed to be too narrow for modern seat designs. The petition therefore sought the substitution of a later version, SAE J941e (1979), which specifies seat back angles from 5 to 40 degrees.

The agency combined its initial response to the Mercedes-Benz petition with its response to the SRP issues. In the March 1982 ANPRM, the agency indicated that it was considering changing the reference from SAE J941 to SAE J941e, as requested by Mercedes. Most industry commenters favored adoption of the later version because of its presumed effect on seat back angles.

Upon further analysis of the aspect of SAE J941 incorporated by the vehicle safety standards, the agency has concluded that the standards do not limit the seat back angles. Although SAE J941 states in section 3, *Limitations*, that interior dimensions on the driver's side must include a seat back angle of 22 to 28 degrees, the actual procedure for locating the driver's eye range contour employs calculations based on the SRP, not on the seat back angle. Because Standard Nos. 104 and 107 incorporate only the procedure for locating the eye range contour, and not the full text of SAE J941, they should not be construed as incorporating any restrictions on the seat back angle. It is the agency's view that the broader range of seat back angles sought by Mercedes-Benz is therefore acceptable under the vehicle safety standards incorporating the 1965 version of SAE J941. A manufacturer may thus adopt seat back angles outside the 22–28 degree range without violating any provisions of the standards incorporating SAE J941. This interpretation constitutes a substantive

grant of Mercedes-Benz's petition on the question of seat back angles.

It may be that other reasons could be advanced for updating the references to SAE 1941. However, it is not clear on the present record whether the advantages of the later versions of SAE J941 would justify the more elaborate procedures those versions would impose on the manufacturers. The agency has accordingly decided not to update the references to SAE J941 at this time. If additional petitions for rulemaking on the question of SAE J941 are received, the agency will give them appropriate attention.

Costs and Other Effects

The agency has considered the costs and other effects of this proposal and has determined that the proposal would not be major within the meaning of Executive Order 12291 or significant within the meaning of the Department of Transportation's regulatory procedures. Further, the agency concludes that the economic and other consequences of the proposed amendment would be so minimal as not to require the preparation of a full regulatory evaluation. The proposed change to amend the definition of seating reference point by limiting the incorporation of SAE Recommended Practice J826 to its H-point dimensions would have little or no effect on the design or cost of vehicles.

NHTSA has also considered the impacts of this proposal under the Regulatory Flexibility Act. I hereby certify that amending 49 CFR Part 571 to amend the reference to the SAE recommended practice referred to in the paragraph above would not have a significant economic impact on a substantial number of small entities. Only motor vehicle manufacturers would be affected, few of whom are small entities. Small organizations and governmental units would not be affected since the cost of compliance would not be changed.

Finally, NHTSA has analyzed this proposal for purposes of the National Environmental Policy Act. The agency has determined that implementation of this action would not have any significant impact on the quality of the human environment.

Submission of Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must be limited not to exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submissions, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard of the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rulemaking docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

In consideration of the foregoing, Part 571 of Title 49 would be amended as follows:

1. The authority citation for Part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

2. Part 571.3 would be amended by revising the definition of "seating reference point" in paragraph (b), *Other Definitions*, to read as follows:

§ 571.3 Other definitions.

* * * * *

(b) * * *

"Seating reference point" means the manufacturer's design reference point which—

Establishes the rearmost design driving or riding position of each designated seating position in a vehicle;

Has coordinates established relative to the designed vehicle structure; and

Simulates the position of the pivot center of the human torso and thigh relative to the vehicle seat, as defined by the H-point of the two-dimensional template described in SAE Recommended Practice J826, "Devices for Use in Defining and Measuring Vehicle Seating Accommodation," November 1962.

* * * * *

Issued on May 28, 1986.

Barry Felrice,

Associate Administrator, for Rulemaking.

Notices

Federal Register
Vol. 51, No. 105
Thursday, June 5, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Flue-Cured Tobacco Advisory Committee; Meeting

In accordance with the Federal Advisory Committee Act (5 U.S.C. App. 1) announcement is made of the following committee meeting:

Name: Flue-Cured Advisory Committee.
Date: June 18, 1986.
Time: 2 p.m.
Place: Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, Flue-Cured Tobacco Cooperative Stabilization Corporation Building, 1306 Annapolis Drive, Raleigh, North Carolina 27605.

Purpose: To discuss the establishment of marketing areas, submarketing areas, selling schedules, related matters for the 1986 flue-cured tobacco marketing season.

The meeting is open to the public. Persons, other than members, who wish to address the Committee at the meeting should contact the Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, 300 12th Street SW., Washington, DC 20250, (202) 447-2567, prior to the meeting. Written statements may be submitted to the Committee prior to or at the meeting.

Dated: June 3, 1986.

William T. Manley,
Deputy Administrator, Marketing Programs.

Forest Service

Henry's Fork and Warm River Wild and Scenic Rivers Study, Targhee National Forest, Fremont County, ID; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare a legislative environmental impact statement which analyzes alternatives for including portions of the Henry's Fork of the Snake River and Warm River in the National Wild and Scenic River System.

The Targhee National Forest Land and Resource Management Plan was completed and approved on October 4, 1985. One of the management directions in the Plan was to study the suitability of portions of the Henry's Fork of the Snake River and Warm River for possible inclusion in the National Wild and Scenic River System.

A range of alternatives will be considered. One alternative will consider full designation of the river to the highest appropriate level of classification. Another alternative will consider nondesignation. Other alternative levels of designation will also be examined. The study will determine which of the proposed hydropower projects will be foregone with full designation, alternative levels of designation, or nondesignation.

Federal, State and local agencies; potential developers; and other individuals or organizations who may be interested in or affected by the decision are invited to participate in the scoping process. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environment review.
4. Determination of potential cooperating agencies and assignment of responsibilities.
5. Scoping Meetings (which will be arranged locally).

Other Federal, State, county, and local government agencies and entities will be invited to participate in the study. The U.S. Fish and Wildlife Service, Department of the Interior, will be invited to evaluate potential impacts on threatened and endangered species habitat.

Richard E. Lyng, Secretary of Agriculture, is the responsible official.

The legislative draft environmental impact statement should be available for public review in July 1987. A legislative final environmental impact statement will be released upon transmittal of the legislative proposal to Congress.

Written comments and suggestions concerning the analysis should be sent to John Burns, Forest Supervisor, Targhee National Forest, P.O. Box 208, St. Anthony, Idaho, 83445, by June 30, 1986.

Questions about the proposed action and environmental impact statement should be directed to Paul Oakes, Study Team Leader, Targhee National Forest, phone 208-624-3151.

Dated: May 29, 1986.

R. Max Peterson,
Chief.

Land and Resource Management Plan; Lake Tahoe Basin Management Unit, California and Nevada; Notification of Extention of Public Comment Period for Dratt Environmental Impact Statement and Proposed Forest Plan

The public comment period for the Tahoe Basin Management Unit proposed Land and Resource Management Plan and Draft Environmental Impact Statement is being extended. Comments must now be received by July 27, 1986.

This amends the Notice of Availability published in the Federal Register of March 21, 1986 (ER-FRL 2988-4) Volume 51 #55.

The former due date was June 27, 1986.

For Further information contact: Jon Hoefer, Planning Staff Officer, Lake Tahoe Basin Management Unit, P.O. Box 8465, South Lake Tahoe, Ca. 95731; telephone (916) 544-6420.

Dated: May 29, 1986.

Ralph C. Cisco,
Forest Supervisor.

BILLING CODE 3410-11-M

Soil Conservation Service

Cedar Run Watershed, PA

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guideliens (7 CFR Part 650); The Soil Conservation Service, U.S. Department of Agriculture, gives

notice that an environmental impact statement is not being prepared for the Cedar Run Watershed, Clinton and Centre Counties, Pennsylvania.

FOR FURTHER INFORMATION CONTACT: Mr. James H. Olson, State Conservationist, Soil Conservation Service, Federal Building, 228 Walnut Street, Harrisburg, Pennsylvania 17108, telephone (717) 782–4453.

SUPPLEMENTARY INFORMATION: The environmental evaluation of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. James H. Olson, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for watershed protection. The planned works of improvement include the installation of conservation and management practices for erosion and sediment control on 2,600 acres of cropland and agricultural waste management systems to reduce pollution to the streams.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state and local agencies, and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental evaluation are on file and may be reviewed by contacting James H. Olson.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10–904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials.)

Dated: May 29, 1986.

James H. Olson,

State Conservationist.

BILLING CODE 3410-16-M

COMMISSION ON THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

Meeting

AGENCY: Commission on the Bicentennial of the United States Constituion.

ACTION: Notice of meeting.

SUMMARY: This Notice announces a forthcoming meeting of the Commission on the Bicentennial of the United States Constitution, to be held in Washington, DC and chaired by the Commission's Chairman, Chief Justice Warren E. Burger.

Time and date: Friday, June 20, 1986 at 1:00 p.m.; Saturday, June 21, 1986 at 8:30 a.m.

Place: On June 20, from 1:00 p.m. to 3:00 p.m., in the Hall of Flags meeting room of the United States Chamber of Commerce, at 1615 H Street, NW., Washington DC 20062. Tel. (202) 659–6000. On June 21, from 8:30 a.m. to 12:00 noon, in the Executive Council Room of the AFL–CIO Building, at 815 16th Street, NW., Washington, DC 20006. Tel. (202) 637–5000.

Status: On June 20, the meeting will be a public hearing in open session; on June 21, the meeting will be an executive session, closed to the public.

Matters to be Considered

Open Session. Progress on commemorative plans and programs; announcement of project and other recognition decisions; proposed regional and national bicentennial projects; and, reception of testimony from witnesses presenting proposals and programs for consideration of the Commission.

Executive Session. Evaluations of proposed projects, programs and bicentennial activities; review of Commission financing and budgets; personnel structure and selection procedures; status of office space; pending appropriations, legislation and regulations; and negotiations involving national commenorative programs.

Statements

The Commission is interested in hearing from all persons and organizations with proposed plans, projects or programs which would enhance the bicentennial commemoration of the U.S. Constitution, the Bill of Rights or the founding of the Federal Government. All such statements which can be prepared prior to the Commission meetings on June 20 and 21 should be filed with the Commission on or before June 20, 1986, at 734 Jackson Place, NW., Washington, DC 20503. All statements will be reviewed by the Commission and its staff.

Presentations

At the public hearing on June 20, available time will permit only a few oral presentations. The Commission will notify in advance those witnesses who have been asked to appear and will limit oral presentations to those selected.

FOR FURTHER INFORMATION CONTACT: Gene Mater, Special Assistant to the Director, 734 Jackson Place, NW., Washington, DC 20503. Tel: (202) USA–1787.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to give the Commission an opportunity to review the current status of operations and to report on its activities. It also provides an opportunity for witnesses and persons filing statements to advise the Commission about proposed bicentennial plans and programs.

Dated: June 2, 1986.

Mark W. Cannon,

Staff Director.

BILLING CODE 6340-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Request for Public Comment on Bilateral Textile Consultations With the Government of Sri Lanka To Review Trade in Category 351

May 30, 1986.

On May 2, 1986, the Government of the United States requested consultations with the Government of Sri Lanka with respect to cotton textile products in Category 351 (pajamas and other nightwear). This request was made on the basis of the agreement between the Governments of the United States and Sri Lanka of May 10, 1983, as amended, relating to trade in cotton, wool and man-made fiber textile products. The agreement provides for consultations when imports, due to market disruption, or the threat thereof, threaten to impede the orderly development of trade between the two countries.

According to the terms of the bilateral agreement, if no mutually satisfactory solution is reached during consultations, the United States may establish a prorated specific limit for the period which began on May 2, 1986.

The Government of the United States has decided, pending a mutually satisfactory solution, to control imports in Category 351 exported during the 90-day consultation period which began on May 2, 1986 and extends through July 30, 1986 at the prescribed limit of 25,496 dozen.

The United States remains committed

to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Sri Lanka, further notice will be published in the Federal Register.

A summary market statement for this category follows this notice.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

Anyone wishing to comment or provide data or information regarding the treatment of Category 351 under the agreement with Sri Lanka, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. William H. Houston III, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Sri Lanka—Market Statement

Category 351—Pajamas and Other Cotton Nightwear

April 1986.

Summary and Conclusions

U.S. imports of Category 351 from Sri Lanka were 73,000 dozens during year-ending February 1986 compared with 23,000 dozens a year earlier. During full year 1985, 57,000 dozens were imported, a 160 percent increase from 1984.

The rapid growth of low valued Category 351 imports from Sri Lanka are contributing to the disruption of the U.S. cotton pajamas and nightwear market.

U.S. Production and Market Share

U.S. production of Category 351 dropped from 4.0 million dozens in 1981 to 3.8 million dozens in 1983, or 5 percent. In 1984, production rebounded moderately to 3.9 million dozens, but remained 1.5 percent below the 1981 level.

Between 1981 and 1984, the market for cotton pajamas and other nightwear grew by 502,000 dozens. However, this expansion was supplied by imports and the U.S. producers' share fell from 69 percent to 63 percent.

U.S. Imports and Import Production Ratios

With the exception of 1983 which saw a slight decline in imports, world imports of Category 351 have risen steadily. In 1985 total imports were 2.6 million dozens, up 14 percent from 1984.

The import to production ratio has correspondingly risen. From 44 percent in 1981, it jumped to 54 percent in 1982 and to 59 percent in 1984.

Import and Domestic Values

Approximately 80 percent of the recent Category 351 imports from Sri Lanka entered under the following two TSUSA numbers: 384.0925—women's, girls', infants' cotton pajamas or nightwear, lace, net or ornamented knit; 384.5226—women's, girls', infants' other cotton nightwear, yarn-dyed, not knit, not ornamented, nsp. These garments entered the U.S. at duty-paid values below U.S. producer prices for comparable items.

May 30, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultual Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, as amended, between the Governments of the United States and Sri Lanka; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 5, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Category 351, produced or manufactured in Sri Lanka and exported during the ninety-day period which began on May 2, 1986 and extends through July 30, 1986, in excess of the following limit:

Category	90-day limit [1]
351	25,406 dozen

[1] The limit has not been adjusted to account for any imports exported after May 1, 1986.

Textile products in Category 351 which have been exported to the United States prior to May 2, 1986 shall not be subject to this directive.

Textile products in Category 351 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484 (a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 10-DR-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval of Information Collection Requirements—Mattress Flammability Standard

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through May 1, 1989, of information collection requirements in the flammability standard for mattresses and mattress pads (16 CFR Part 1632). The standard is intended to reduce unreasonable risks of burn injuries and deaths from fires associated with mattresses and mattress pads. The standard prescribes a test to assure that a mattress or mattress pad will resist ignition from a smoldering cigarette. The standard requires manufacturers to perform prototype tests of each combination of materials and construction methods used to produce mattresses or mattress pads with acceptable results. Sale or distribution of mattresses or mattress pads without successful completion of the testing required by the standard violates section 3 of the Flammable Fabrics Act (15 U.S.C. 1192). An enforcement rule implementing the standard requires manufacturers to maintain records of testing performed in accordance with the standard and other information about the mattresses or mattress pads which they produce.

Additional Details About the Request for Extension of Approval of Information Collection Requirements

Agency address: Consumer Product Safety Commission, 1111 18th Street, Washington, D.C. 20207.

Title of information collection: Standard for the Flammability of Mattresses and Mattress Pads (FF 4–72, Amended); 16 CFR Part 1632.

Type of Request: Extension of approval.

Frequency of collection: Varies depending upon the number of individual combinations of materials and methods of construction used to produce mattresses or mattress pads.

General description of respondents: Manufacturers and importers of mattresses or mattress pads.

Estimated number of respondents: 800

Estimated average number of hours per respondent: 26 per year.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Andy Velez-Rivera, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503; telephone (202) 395–7340. Copies of the request for extension of approval are available from Francine Shacter, Office of Budget, Program Planning, and Evaluation, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492–6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: May 30, 1986.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Armed Forces Epidemiological Board; Open Meeting

1. In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) announcement is made of the following committee meeting:

Name of Committee: Armed Forces Epidemiological Board.

Date of Meeting: 1 July 1986.

Time: 0800–1600.

Place: Walter Reed Army Institute of Research.

Proposed Agenda: Reports by the Preventive Medicine Consultants of the Army, Navy, Air Force and Coast Guard: Human T-lymphotropic virus, Type III positivity update; therapy resistant gonorrhea infections in the Air Force; review of potential for visus transmission by jet injector guns; status, malaria vaccine trials; subcommittee reports and report by the Armed Forces Global Epidemiology Working Group.

2. This meeting will be open to the public, but limited by space accommodations. Any interested person may attend, appear before or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should advise the Executive Secretary, DASG–AFEB, Room 2D455, Pentagon, Washington, DC 20310–2300, (202) 695–0115.

Dated: 23 May 1986.

Robert A. Wells,

Col, USA, MSC, Executive Secretary.

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

Request for Public Comments on the Reauthorization of the Education Consolidation and Improvement Act of 1981

AGENCY: Department of Education.

ACTION: Notice of request for public comments on the reauthorization of the Education Consolidation and Improvement Act of 1981 (ECIA).

SUMMARY: The Secretary of Education has initiated development of a proposal by the Department for reauthorization of the ECIA. The Secretary invites written comments on the current ECIA, and suggestions for changes for consideration by the Department during development of the proposal.

DATE: Written comments must be submitted on or before July 7, 1986.

ADDRESS: Written comments should be addressed to: ECIA Reauthorization, 400 Maryland Avenue SW., Room 2189 (Mail Stop 6257), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: ECIA Reauthorization, 400 Maryland Avenue SW., Room 2189 (Mail Stop 6257), Washington, DC 20202.

SUPPLEMENTARY INFORMATION: The ECIA has two major components: Chapter 1 (formerly Title I), which provides funds to State and local educational agencies for special compensatory education services for disadvantaged children, and Chapter 2, which provides a block grant to the States for improvement of elementary and secondary education. Chapter 2 also authorizes a Secretary's Discretionary Fund for educational improvement activities of national significance.

In preparing its reauthorization bill, the Department will undertake a thorough review of the Chapter 1 and Chapter 2 evaluation data and solicit comments from and consult with those who have an interest in these programs. The Secretary wishes to ensure that there is a full and frank discussion of all the issues and that the Department's final proposal reflects the most effective means of serving educationally disadvantaged children and fostering educational improvement. The final proposal will also present a comprehensive response to problems identified with the structure or administration of the current programs.

Need for Reauthorization

The authorization for the ECIA expires on September 30, 1987. In order to contribute in a timely manner to the congressional reauthorization discussions, the Secretary is beginning a review of the ECIA at this time.

To ensure an opportunity for public participation, the Secretary invites public comments on the reauthorization effort.

Issues for Public Comment

Among the issues that the Department will consider in developing its

reauthorization proposal for Chapters 1 and 2 are:

- How compensatory education services can be focused most effectively on children who most need them;
- What educational strategies would yield the greatest benefits for disadvantaged children;
- How parents of disadvantaged children can be given greater opportunity to select appropriate educational options for their children; and
- Whether the current structure of the Chapter 2 program is best serving the goal of educational improvement.

Format for Comments

This request for comments is designed to elicit views of interested parties on how the current ECIA can most effectively serve educationally disadvantaged children and foster educational improvement.

The Secretary requests that each respondent identify his or her role in elementary and secondary education. In proposing modifications or alternatives, the respondents may want to address each issue listed under Issues for Public Comment.

The Secretary urges each commenter to be specific regarding his or her suggestions and include, if possible, the data requirements, procedures, technology, delegation of responsibility, and actual legislative language changes that the commeter suggests for the ECIA programs.

Dated: June 3, 1986.

William J. Bennett,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 86-24-NG]

Carlyle Energy, Inc.; Order Granting Blanket Authorization To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of order granting blanket authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting blanket authorization to import natural gas from Canada to Carlyle Energy Inc. (Carlyle). The order issued in ERA Docket No. 86-24-NG authorizes Carlyle to import up to 100 Bcf over a two-year period for sale in the domestic spot market.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-9478. The Docket Room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, May 30, 1986.

Barton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP86-433-000 et al.]

Southern Natural Gas Co. et al.; Natural Gas Certificate Filings

May 29, 1986.

Take notice that the following filings have been made with the Commission:

1. Southern Natural Gas Company

May 29, 1986

[Docket No. CP86-433-000]

Take notice that on April 10, 1986, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP86-433-000 an application pursuant to Section 7 of the Natural Gas Act for a limited-term certificate of pubic convenience and necessity authorizing the transportation of natural gas for Atlanta Gas Light Company (Atlanta) acting as agent for Georgia Kaolin Company, Inc. (Georgia Kaolin), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 9 billion Btu of natural gas per day for Atlanta, as agent for Georgia Kaolin, on an interruptible basis, for a one-year term. It is indicated that Georgia Kaolin would purchase the gas from Sonat Exploration Company. Applicant states that it would receive the gas for the account of Georgia Kaolin at various existing points on Applicant's system in Marion County, Mississippi, and St. Mary Parish, Louisiana. Applicant proposes to redeliver equivalent volumes of gas, less 3.25 percent for fuel and company-use gas, at existing delivery points to Atlanta in Georgia.

Applicant proposes to charge Atlanta a transportation rate of 48.2 cents per million Btu where the aggregate of the volumes transported by Applicant for Atlanta under any and all transportation agreements between Applicant and Atlanta, when added to the volumes of gas delivered under Applicant's Rate Schedule OCD, does not exceed Atlanta's daily contract demand from Applicant. For those volumes that exceed Atlanta's daily contract demand, Applicant proposes to charge 77.0 cents per million Btu. In addition Applicant proposes to collect the GRI surcharge of 1.35 cents per Mcf.

In the notice issued April 30, 1986, in Docket No. CP86-433-000, it was inadvertently stated that Applicant proposed to charge Atlanta a 34-cent take-or-pay surcharge per million Btu of gas transported for volumes for which Applicant received no credit against its take-or-pay obligations. It was stated in the notice that the proposed transportation service would increase Applicant's take-or-pay liability. However, it is stated in Applicant's application that Applicant would receive take-or-pay credit for all volumes of gas transported. It is further stated that the gas transported would be released by Applicant for resale to Georgia Kaolin and that the released gas would be subject to the pricing provisions of NGPA sections 102(c), 103 and 107. Applicant states that it would also release Section 102(d) gas subject to receipt of appropriate abandonment authorization.

Applicant also requests flexible authority to add delivery points in the event that Georgia Kaolin obtains alternative sources of supply. It is stated that the redelivery point, the recipient and the maximum daily transportation volume would remain unchanged. It is further stated that Applicant would file a report providing certain information with regard to the addition of any delivery points.

Comment date: June 16, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Southern Natural Gas Company

[Docket No. CP86-467-000]

Take notice that on April 21, 1986, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP86-467-000 an application pursuant to Section 7(c) of the Natural Gas Act, for a certificate of pubic convenience and necessity authorizing for one year the transportation of natural gas for the City of Austell Natural Gas System (Austell), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern requests a limited-term certificate of public convenience and necessity authorizing it to transport gas on behalf of Austell in accordance with the terms and conditions of a transportation agreement between Austell and Southern dated April 3, 1986 (Agreement). It is said that subject to the receipt of all necessary governmental authorizations, Southern has agreed to transport, on an interruptible basis, up to 6,500 MMBtu of gas per day purchased by Austell from SNG Trading Inc. (SNG Trading). Southern requests that the Commission issue a certificate for a term expiring one year from the date of the Commission's order issuing the requested authorization.

The Agreement, it is said, provides that Austell would cause gas to be delivered to Southern for transportation at the existing various points of delivery on Southern's contiguous pipeline system as specified in Exhibit A to the Agreement. Southern states that it would redeliver to Austell at the Austell Area Delivery Point (consisting of Meter Station No. 1 located near Mile Post 445.9 on Southern's North Main Line in Douglas County, Georgia, and Meter Station No. 2 located near Mile Post 12.67 on Southern's 12-inch Marietta Branch Line in Cobb County, Georgia), an equivalent quantity of gas less 3.25 percent of such amount which shall be deemed to have been used as compressor fuel and company-use gas (including system unaccounted-for gas losses); less any and all shrinkage, fuel or loss resulting from or consumed in the processing of gas; and less Austell's *pro-rata* share of any gas delivered for Austell's account which is lost or vented for any reason.

Southern states that Austell has agreed to pay Southern each month the following transportation rate:

(a) Where the aggregate of the volumes transported and redelivered by Southern on any day to Austell under any and all transportation agreements with Southern, when added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to Austell do not exceed the daily contract demand of Austell, the transportation rate shall be 48.2 cents per MMBtu; and

(b) Where the aggregate of the volumes transported and redelivered by Southern on any day to Austell under any and all transportation agreements with Southern, when added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to Austell exceed the daily Contract Demand of Austell, the transportation rate for the excess volumes shall be 77.6 cents per MMBtu.

Southern states further that it would collect from Austell the GRI surcharge of 1.35 cents per Mcf or any such other GRI funding unit or surcharge as hereafter prescribed.

Southern also requests flexible authority to provide transportation from additional delivery points in the event Austell obtains alternative sources of supply of natural gas. The additional transportation service, it is said, would be to the same redelivery points, the same recipient, and within the same maximum daily transportation volume of gas as stated in the application. Southern indicates that it would file periodic reports providing certain information with regard to the addition of any delivery points.

Southern states that the transportation arrangement would enable Austell to diversify its natural gas supply sources and to obtain gas at competitive prices. In addition, Southern states that it would obtain take-or-pay relief on all volumes transported pursuant to the Agreement.

Comment date: June 20, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Natural Gas Pipeline Company

[Docket No. CP86-436-000]

Take notice that on April 14, 1986, Natural Gas Pipeline Company of America (Applicant), 701 East 22nd Street, P.O. Box 1208, Lombard, Illinois 60148, filed in Docket No. CP86-436-000 an application pursuant to section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing it to transport up to a maximum of 20,000 MMBtu of natural gas per day, on an interruptible basis, for Norchem, Inc. (Norchem), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authority to provide an interruptible transportation service for Norchem for a period of two years from the date of first delivery and month-to-month thereafter. Applicant states that it would provide such service pursuant to the terms and conditions of a gas transportation agreement (Agreement) between Applicant and Norchem dated March 21, 1986.

According to Applicant, it would receive gas for Norchem's account at the following receipt points:

(1) the existing point of interconnection between the measurement facilities of Applicant and the pipeline facilities of Norchem's designee, Endevco Pipeline Company (Endevco), located in the Ignacio Sanchez Survey A-509, Nacogdoches County, Texas;

(2) the existing point of interconnection between the measurement facilities of Oasis Pipeline (Oasis) and the pipeline facilities of Applicant, located in Section 29, H&TCRR Co. Survey, Blk 34, Ward County, Texas;

(3) the existing point of interconnection between the measurement facilities of Norchem's designee, Houston Pipeline Company (HPL), and the pipeline facilities of Applicant, located in Section 11, Jose Vincente Lopez de Herrera Grant A-145 Survey, Nueces County, Texas;

(4) the existing point of interconnection between the measurement facilities of Norchem's designee HPL, and the pipeline facilities of Applicant, located in the Ruebin Holbeins Subdivision of the Las Aminas Hrs. of the Felipe de la Pena Survey, Jim Hogg County, Texas;

(5) the existing point of interconnection between the measurement facilities of Applicant and the pipeline facilities of Norchem's designee, ONG Transmission Company (ONG) located in Section 6, Township 20 North, Range 18 West, Woodward County, Oklahoma;

(6) the existing point of interconnection between the measurement facilities of Applicant and the pipeline facilities of Norchem's designee, ONG, located in Section 21, Township 13 North, Range 16 West, Custer County, Oklahoma;

(7) the existing point of interconnection between the measurement facilities of Applicant and the pipeline facilities of Norchem's designee, ONG, located in Section 23, Township 1 North, Range 4 West, Stephens County, Oklahoma; and

(8) the existing point of interconnection between the measurement facilities of Applicant and the pipeline facilities of Norchem's designee, ONG, located in Section 7, Township 4 North, Range 7 West, Grady County, Oklahoma.

Applicant proposes to redeliver equivalent volumes of gas for the account of Norchem, to Interstate Power Company (Interstate) at an existing point of interconnection between Applicant and Interstate located near Hooppole, in Henry County, Illinois, for redelivery by Interstate to Norchem at Norchem's plant in Clinton County, Iowa. Applicant states that on February 11, 1986, Interstate filed a separate petition with the Commission in Docket No. CP86-316-000, requesting a declaratory order exempting it from

Commission jurisdiction for its own transportation service.

Applicant further states that it would reduce the volumes that it redelivers to Norchem by certain percentages for fuel consumed and lost, and for gas that is unaccounted for, as provided by their agreement.

Applicant proposes to charge Norchem the following transportation rates:

Point of receipt	Point of delivery	Transportation rate per MMBtu (cents)
ONG-Woodward Co., OK	Henry Co., IL	27.0
ONG-Custer Co., OK	Henry Co., IL	28.8
ONG-Stephens Co., OK	Henry Co., IL	30.32
ONG-Grady Co., OK	Henry Co., IL	30.32
Endevco-Nacog. Co., TX	Henry Co., IL	30.22
Oasis-Ward Co., TX	Henry Co., IL	30.32
HPL-Nueces Co., TX	Henry Co., IL	30.32
HPL-Jim Hogg Co., TX	Henry Co., IL	30.32

Applicant also proposes to charge Norchem the currently-effective GRI surcharge.

Applicant reports that no new facilities would be required for its transportation service. Applicant requests authorization to add or delete additional receipt points in the future that may pertain to this service.

Comment date: June 20, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to particpate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER 86-514-000]

Arkansas Power & Light Co.; Filing

June 3, 1986.

Take notice that on May 28, 1986, Arkansas Power and Light Company (APL) submitted for filing the Eleventh Amendment to the Power Coordination, Interchange and Transportation Service Agreement between APL and Arkansas Electric Cooperative Corporation (AECC). The amendment provides for an increase in capacity at four delivery points, the transfer of capacity at one delivery point, the addition of two points of delivery, and the abandonment of four points of delivery.

APL requests that the Commission waive any requirements with which APL has not already complied.

Any person desiring to be heard or to protest the application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 16, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of the application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12881 Filed 6-4-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP86-61-001]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

June 3, 1986.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on May 22, 1986, tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, revised tariff sheets as listed in Appendix A attached hereto. According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 29, 1986.

On March 26, 1986 Texas Eastern filed revised tariff sheets to reflect a revision to the Contract Adjustment Demand rate to incorporate actual costs of facilities in accordance with Article VI of the Offer of Settlement approved by Commission order issued August 15, 1985 in Docket No. CP84-429-001. Such filing was designated Docket No. RP86-61-000.

Texas Eastern's March 26, 1986 filing was accepted subject to conditions imposed by Commission order issued May 7, 1986 in Docket No. RP86-61-000. Ordering Paragraph (A) of the May 7, 1986 order requires Texas Eastern to refile its tariff sheets submitted March 26, 1986 within 15 days of the date of issuance of the May 7, 1986 order to reflect a 14.704 percent rate of return as set forth in Texas Eastern's general rate filing in Docket No. RP85-177, *et al.* subject to refund. Such revised tariff sheets will be subject to the outcome of Docket No. RP85-177 *et al.* and are set forth in Appendix A to this filing. In addition, Texas Eastern proposes for filing herein revised tariff sheets amending the Contract Adjustment Demand rate as set forth above on all appropriate tariff sheets filed and made effective subsequent to December 31, 1985. Such tariff sheets are also set forth in Appendix A attached hereto.

The proposed effective dates for the tariff sheets listed in Appendix A are as designated at December 31, 1985, January 1, 1986, February 1, 1986 and April 1, 1986. With the exception of the December 31, 1985 date which is the date previously approved for service to commence under the Contract Adjustment Program, all other proposed effective dates are for corresponding tariff sheets previously approved by the Commission at those dates and are submitted for filing at this time solely to reflect the required revision to the

Contract Adjustment Demand rate as discussed above.

The proposed effective dates of the subject tariff sheets are as indicated on Appendix A attached hereto.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 10, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Docket No. TA86-2-17-003]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

June 3, 1986.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on May 22, 1986, tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the following sheets:

Seventh Revised Sheet No. 110
Seventh Revised Sheet No. 111

According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 28, 1986.

These tariff sheets are being filed in compliance with Ordering Paragraph (A) of the Commission Order issued May 7, 1986 in Docket Nos. TA86-2-17-002 and TA85-4-17-007, accepting tariff sheets subject to conditions requiring Texas Eastern to file revisions to its PGA clause (1) reflecting the adoption of the methodology required by the Commission for out-of-balance concurrent exchange transactions; (2) reflecting the effect of deferred taxes on the Account No 191 balance; and (3) clarifying that adjustments are made to the balance in Account No. 191 for the purpose of carrying charge and surcharge calculations.

Texas Eastern herewith submits for filing the above mentioned tariff sheets containing the revisions required by Commission order dated May 7, 1986 proposed to become effective on February 1, 1986, the date the Commission order issued May 7, 1986 accepted Texas Eastern's February 28, 1986 compliance filing to become effective subject to conditions.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 10, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TA86-2-23-002]

Eastern Shore Natural Gas Co.; Tariff Filing

June 3, 1986.

Take notice that Eastern Shore Natural Gas Company (ESNG) on May 28, 1986 tendered for filing the following proposed tariff sheets to Original Volume No. 1 of ESNG's FERC Gas Tariff:

To Be Effective May 1, 1986

Substitute 31st Revised Sheet No. 5
Substitute 31st Revised Sheet No. 6
Substitute 14th Revised Sheet No. 7
Substitute 31st Revised Sheet No. 10
Substitute 31st Revised Sheet No. 11
Substitute 31st Revised Sheet No. 12
Substitute 6th Revised Sheet No. 13
Substitute 2nd Revised Sheet No. 14

ESNG proposes to "track" Transcontinental Gas Pipe Line Corporation (Transco) rate adjustments as proposed in their amended rate filing dated May 14, 1986 in Docket No. TA86-5-29 to be effective May 1, 1986. Please refer to Appendix B, Schedule 1.

The purpose of these tariff sheets is to reflect an overall decrease of $1.5011 per dt in the commodity charge of ESNG's CD, PS, and G-1 Rate Schedules. This decrease is the net result of a 61.31 cent per dt decrease in the current gas cost portion of the commodity rates and a 88.8 cent per dt decrease in the Deferred Adjustment. Such Deferred Adjustment is incorporated herein by reference to ESNG's PGA filing of April 4, 1986 in Docket No. TA86-2-23-000. The demand charge decrease in ESNG's CD and G-1 Rate Schedules is due to the elimination of 25% of the demand charges of Transco's Canadian supplier, Sulpetro Limited, which have been previously passed through to ESNG.

ESNG requests the instant filing to be effective May 1, 1986 and, if approved, will substitute for the rates, also proposed to be effective May 1, 1986 reflected in ESNG's PGA filing of April 4, 1986 in Docket No. TA86-2-23-000 which was accepted subject to refund by Commission order issued May 7, 1986.

ESNG states that copies of the filing have been mailed to each of its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-62-002]

Northwest Pipeline Corp.; Tariff Revisions

June 3, 1986.

Take notice that on May 28, 1986, Northwest Pipeline Corporation ("Northwest") submitted for filing, to be a part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets:

Fourth Revised Sheet No. 132
First Revised Sheet No. 132-A
First Revised Sheet No. 132-B

Northwest states the purpose of the filing is to expand the language contained in section 16.11 of its General Terms And Conditions to satisfy concerns raised by the Commission in its order dated April 25, 1986 at Docket No. RP86-62-000 and to fully comply with the terms of such order.

Northwest has requested an effective date of April 28, 1986 for all tendered tariff sheets to conform to the effective date granted by the Commission in its April 25, 1986 order at the above referenced docket.

A copy of this filing has been served on all jurisdictional customers and affected state regulatory commissions and furthermore on all parties of record in Docket No. RP86-62-000.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE. Washington DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Pracitice and Procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Magnetic Fusion Advisory Committee; Renewal

This notice is published in accordance with the provisions of § 101-6.1015 of the Interim Rule on Advisory Committee Management. Pursuant to Section 14(a)(2)(A) of the Federal Advisory Committee Act, and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the Magnetic Fusion Advisory Committee has been renewed for a 2-year period ending on May 25, 1988.

The renewal of the Magnetic Fusion Advisory Committee has been determined necessary and in the public interest in connection with the performance of duties imposed upon the Department of Energy by law. The Committee will continue to operate in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. No. 92-463), the Department of Energy Organization Act (Pub. L. No. 95-91), the GSA Interim Rule on Advisory Committee Management, and other relevant rules and regulations.

Further information regarding this advisory committee may be obtained from Gloria Decker (202)-252-8990.

Issued at Washington, DC, on June 2, 1986.

Charles R. Tierney,

Advisory Committee Management Officer.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: New Collection
Title: Evaluation of IAFF/IAFC National Apprenticeship Program
Abstract: FEMA has funded since 1981 a national apprenticeship program for firefighters, fire medics, emergency medical techniciana, and paramedics through IAFF/IAFC. The questionnaires are needed to assist in this first evaluation of the program, and will be used to solicit input from approximately 3,000 firefighters
Type of respondents: Individuals or households; State or local governments
Number of respondents 3,000
Burden hours: 750.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646-2624, 500 C Street, SW., Washington, D.C. 20472.

Comments should be directed to Mike Weinstein, Desk Officer for FEMA, Office of Information and Regulatory Affairs, OMB, Rm. 3235, New Executive Office Building, Washington, D.C. 20503.

Dated: May 29, 1986.

BILLING CODE 6725–01–M

FEDERAL RESERVE SYSTEM

Hooker National Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may expres their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 27, 1986.

A. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Hooker National Bancshares, Inc.*, Hooker, Oklahoma; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank, Hooker, Oklahoma.

B. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Newell Bancshares, Inc.*, Wells, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of First State Bank, Wells, Texas.

Board of Governors of the Federal Reserve System, May 30, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Winter Park Bancshares, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that ourweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 27, 1986.

A. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Winter Park Bancshares, Inc.*, Park Falls, Wisconsin; to acquire 100 percent of the voting shares of Voyageur Development Corporation, Park Falls, Wisconsin, and thereby indirectly acquire Park Falls State Bank, Park Falls, Wisconsin, and Chippewa Valley Agency, Ltd., Winter, Wisconsin.

Applicant has also applied to acquire Chippewa Valley Agency, Ltd. Winter, Wisconsin, and thereby engage in general insurance agency activites in a town with a population of less than 5,000 pursuant to § 225.25(b)(8)(ii) of the Board's Regulation Y. These activities will be conducted in Sawyer County, Wisconsin.

Board of Governors of the Federal Reserve System, May 30, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the Federal Register.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) 86-0832—The Prospect Group, Inc.'s proposed acquisition of assets of Illinois Central Gulf Railroad Co., (IC Industries, UPE).	Apr. 27, 1986.
(2) 86-0864—Gerard P. Joyce's proposed acquisition of assets of Outdoor Advertising Associates, L.P.	May 1, 1986.
(3) 86-0866—Gerard P. Joyce's proposed acquisition of assets and voting securities of Metromedia's Foster and Kleiser Division, (John W. Kluge, UPE).	Do.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Research on the Homeless With Alcohol-Related Problems

AGENCY: National Institute on Alcohol Abuse and Alcoholism, HHS.

ACTION: Issuance of a Request for Applications for Research on the Homeless with Alcohol-Related Problems.

SUMMARY: The National Institute on Alcoholism announces the availability of a Request for Applications (RFA) for Research on the Homeless with Alcohol-Related Problems. The RFA is intended to encourage investigator interest in the area of research on the homeless with alcohol-related problems. Investigators are also encouraged to study the role of alcohol in conjunction with drug and mental health problems in the homeless. These studies are expected: (1) To develop new knowledge about the homeless with alcohol-related problems and their treatment, housing and support needs; (2) to provide identification and assessment of programs related to the care and treatment of the homeless alcoholic; and (3) to identify barriers inhibiting appropriate legal, medical psychological, and social responses to their needs. Priority will be given to grant applications for support of research focused upon epidemiology, clinical and ethnographic studies including service systems and settings. Support may be requested for up to 5 years. Applications recommended for approval by the National Advisory Council on Alcohol Abuse and Alcoholism will be considered for funding on the basis of the overall scientific and technical merit of the proposal as determined by peer review; NIAAA program needs and balance; and the availability of funds.

Receipt Date of Applications: February 1, June 1 and October 1 of each year. Applications must be received by October 1, 1986 for FY 1987 funding.

For a Copy of the Request for Applications Contact: The National Clearinghouse for Alcohol Information (NCALI), Box 2345, Rockville, Maryland 20852, Telephone (301) 468-2600.

Robert L. Trachtenberg,

Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 86-12624 Filed 6-4-86; 8:45 am]

BILLING CODE 4160-20-M

Food and Drug Administration

[Docket No. 85N-0063(DESI 5731); Formerly Docket No. FDC-D-896]

Deprol Tablets; Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs is granting a hearing on the proposal to withdraw approval of the new drug application for Deprol Tablets containing meprobamate and benactyzine. The drug's major use has been in the treatment of depression and associated anxiety.

DATES: Notices of participation shall be filed with the Dockets Management Branch no later than July 7, 1986. Disclosure of data and information and submission of narrative statement by FDA's Center for Drugs and Biologics by July 21, 1986, and by other participants by August 19, 1986. Prehearing conference on September 25, 1986, at 10:00 a.m.

ADDRESSES: Written notices of participation, disclosures, and statements to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. Submissions should be identified with the above docket number and clearly labeled "Deprol Hearing." Prehearing conference in the FDA Hearing Room, Rm. 4A-35, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert J. Rice, Jr., Division of Regulations Policy (HFC-221), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3480.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of June 27, 1974 (39 FR 23291), the Director of the Bureau of Drugs (now the Center for Drugs and Biologics) issued a notice of opportunity for hearing on a proposal to withdraw approval of the new drug application for Deprol Tablets (NDA 11-226; Wallace Laboratories, Division of Carter-Wallace, Inc., P.O. Box 1, Cranberry, NJ 08512). The Director found that there were no adequate and well-controlled clinical investigations, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5) (now 21 CFR 314.126) and 300.50 which provide substantial evidence of effectiveness of Deprol for its labeled indications.

In response to the notice, Wallace requested a hearing and submitted data and information in support of its request. The Commissioner has considered the material submitted and has concluded that a hearing should be held.

Two questions will be addressed at the hearing:

1. Whether there is evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of Deprol Tablets; and

2. Whether, on the basis of any such adequate and well-controlled investigations, it could fairly and responsibly be concluded by experts qualified by scientific training and experience to evaluate the effectiveness of drugs and Deprol satisfies the combination policy set forth in 21 CFR 300.50 and will have the effect that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling thereof. 21 U.S.C. 355(d); 21 CFR 314.125.

The parties to the hearing will be FDA's Center for Drugs and Biologics (Center) and Wallace. Any other interested persons shall be permitted to participate in the hearing as a nonparty participant (see 21 CFR 12.89) provided that they file a notice of participation pursuant to 21 CFR 12.45(a). The presiding officer will be Administrative Law Judge Daniel J. Davidson.

Under 21 CFR 12.85, the Center would normally file with the Dockets Management Branch a narrative statement setting forth its position on the hearing issues and a summary of the types of evidence to be introduced in

BEST COPY AVAILABLE

support of its position in the hearing, together with copies of data and information contained in the Center's files that relate to the issues raised herein, at the time when this notice issues. I am, under 21 CFR 10.19, modifying that requirement to the extent that the Center will be granted until July 21, 1986, to make these submissions. I have concluded that this modification of this regulation in the context of this proceeding does not prejudice any participant in the hearing, serves the ends of justice, is in accordance with law, and thus is authorized by § 10.19. The modification allows the FDA to advise the parties that a hearing is pending on this matter prior to the completion by the Center of the sometimes lengthy process of complying with the requirements of §12.85.

After it is filed, interested persons may obtain a copy of the Center's narrative statement from the Dockets Management Branch (address above). They may also examine the data on Deprol (with the exception of any data identified as confidential pursuant to 21 CFR 10.20(j)) at the Dockets Management Branch from 9:00 a.m. to 4:00 p.m., Monday through Friday.

A prehearing conference will be held at 10:00 a.m., on September 24, 1986, in the FDA Hearing Room, Rm. 4A–35, 5600 Fishers Lane, Rockville, MD 20857. The date and time of the prehearing conference may be subject to change by order of the presiding officer. Hearing participants will be notified of any such change. Others may wish to confirm the schedule for the prehearing conference by telephoning the contact person listed above shortly before the announced date. The hearing itself will also be held in the FDA hearing room on a date to be set at the prehearing conference. Written notices of participation shall be filed with the Dockets Management Branch no later than July 7, 1986. All participants are required to attend the prehearing conference and to be prepared to comply with the provisions of 21 CFR 12.92. Participants other than the Center shall disclose data and information and submit narrative statements pursuant to 21 CFR 12.85 on of before August 19, 1986. Pursuant to 21 CFR 10.20(j)(2)(ii), confidential material submitted by a participant must be segregated and clearly marked.

The hearing will be open to the public. Any participant may appear in person, or by or with counsel, or with other qualified representatives and may be heard on matters relevant to the issues under consideration.

Because this is a public hearing, it is subject to FDA's guideline concerning the policy and procedures for electronic media coverage of public agency administrative proceedings (21 CFR Part 10, Subpart C). These procedures are primarily intended to expedite media access to FDA's public proceedings, including formal evidentiary hearings conducted pursuant to Part 12 of the agency's regulations. Under this guideline, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including the testimony of witnesses in the proceeding. Accordingly, the parties and nonparty participants to this hearing, and all other interested persons, are directed to the guideline, as well as the Federal Register notice announcing issuance of the guideline (Apr. 13, 1984, 49 FR 14723), for a more complete explanation of the guideline's effect on this hearing.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052 as amended (21 U.S.C. 355)) and under authority delegated to me (21 CFR 5.10), I order that a public hearing be held on the issues set out in this notice.

Dated: May 28, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

[FR Doc. 86-12821 Filed 6-4-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 86N-0141 (Deal 12706); Formerly Docket No. FDC-D-506]

Diutensen Tablets; Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs is granting a hearing on the proposal to withdraw approval of the new drug application for Diutensen Tablets containing cryptenamine (as tannate salts) and methyclothiazide. The drug is used in the treatment of hypertension.

DATES: Notice of participation shall be filed with the Dockets Management Branch no later then July 7, 1986. Disclosure of data and information and submission of narrative statement by FDA's Center for Drugs and Biologics by September 3, 1986, and by other participants October 3, 1986. The date and time of the prehearing conference will be announced in a later notice.

ADDRESSES: Written notices of participation, disclosures, and statements to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockvile, MD 20857. Submissions should be identified with the above docket number and clearly labeled "Diutensen Hearing."

FOR FURTHER INFORMATION CONTACT: Robert J. Rice, Jr., Division of Regulations Policy (HFC–221), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3480.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of February 9, 1973 (38 FR 4008), the Food and Drug Administration (FDA) issued a notice of opportunity for hearing on a proposal to withdraw approval of the new drug application for Diutensen Tablets (NDA 12–706; now held by Wallace Laboratories, Division of Carter-Wallace, Inc., P.O. Box 1, Cranberry, NJ 08512). The FDA concluded that there was a lack of substantial evidence showing either that each component of the fixed combination drug contributes to the total effect claimed for the drug or that the drug was effective for its labeled indications. In response to the notice, a hearing was requested and data and information in support of the request were filed. The Commissioner has considered the material submitted and has concluded that a hearing should be held.

Two questions will be addressed at the hearing:

1. Whether there is evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of Diutensen Tablets; and

2. Whether, on the basis of any such adequate and well-controlled investigations, it could fairly and responsibly be concluded by experts qualified by scientific training and experience to evaluate the effectiveness of drugs that Diutensen satisfies the combination policy set forth in 21 CFR 300.50 and will have the effect that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling thereof. 21 U.S.C. 355(d); 21 CFR 314.126.

The parties to the hearing will be FDA's Center for Drugs and Biologics (Center) and Wallace. Any other interested person shall be permitted to participate in the hearing as a nonparty participant (see 21 CFR 12.89) provided that they file a notice of participation pursuant to 21 CFR 12.45(a). The presiding officer will be Administrative Law Judge Daniel J. Davidson.

Under 21 CFR 12.85, the Center would normally file with the Dockets Management Branch a narrative

statement setting forth its position on the issues for hearing and a summary of the types of evidence to be introduced in support of its position in the hearing, together with copies of data and information contained in the Center's files that relate to the issues raised herein, at the time when this notice issues. I am, under 21 CFR 10.19, modifying that requirement to the extent that the Center will be granted until September 3, 1986, to make these submissions. I have concluded that this modification of this regulation in the context of this proceeding does not prejudice any participant in the hearing, serves the ends of justice, is in accordance with law, and thus is authorized by § 10.19. The modification allows the FDA to advise the parties that a hearing is pending on this matter prior to the completion by the Center of the sometimes lengthy process of complying with the requirements of § 12.85.

After it is filed, interested persons may obtain a copy of the Center's narrative statement from the Dockets Management Branch (address above). They may also examine the data and information on Diutensen (with the exception of any material identified as confidential pursuant to 21 CFR 10.20(j)) at the Dockets Management Branch from 9:00 a.m. to 4:00 p.m., Monday through Friday.

A prehearing conference will be held in the FDA Hearing Room, Rm. 4A–35, 5600 Fishers Lane, Rockville, MD, at a date and time to be announced in a later notice. The prehearing conference may be subject to change by order of the presiding officer. Hearing participants will be notified of any such change. Others may wish to confirm the schedule for the prehearing conference by telephoning the contact person listed above shortly before the announced date. The hearing itself will also be held in the FDA hearing room on a date to be set at the prehearing conference. Written notices of participation shall be filed with the Dockets Management Branch no later than July 7, 1986. All participants are required to attend the prehearing conference and to be prepared to comply with the provisions of 21 CFR 12.92. Participants other than the Center shall disclose data and information and submit narrative statements pursuant to 21 CFR 12.85 on or before October 3, 1986. Pursuant to 21 CFR 10.20(j)(2)(ii), confidential material submitted by a participant must be segregated and clearly marked.

The hearing will be open to the public. Any participant may appear in person, or by or with counsel, or with other qualified representatives, and may be heard on matters relevant to the issues under consideration.

Because this is a public hearing, it is subject to FDA's guideline concerning the policy and procedures for electronic media coverage of public agency administrative proceedings (21 CFR Part 10, Subpart C). These procedures are primarily intended to expedite media access to FDA's public proceedings, including formal evidentiary hearings conducted pursuant to Part 12 of the agency's regulations. Under this guideline, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including the testimony of witnesses in the proceeding. Accordingly, the parties and nonparty participants to this hearing, and all other interested persons, are directed to the guideline, as well as the **Federal Register** notice announcing issuance of the guideline (Apr. 13, 1984, 49 FR 14723), for a more complete explanation of the guideline's effect on this hearing.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052 as amended (21 U.S.C. 355)) and under authority delegated to me (21 CFR 5.10), I order that a public hearing be held on the issues set out in this notice.

Dated: May 28, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

[FR Doc. 86–12620 Filed 6–4–86; 8:45 am]

BILLING CODE 4160–01–M

Health Resources and Services Administration

Availability of Funds for Four Acquired Immune Deficiency Syndrome (AIDS) Service Demonstration Projects

AGENCY: Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Bureau of Health Care Delivery and Assistance (BHCDA), Health Resources and Services Administration (HRSA) announces that Fiscal Year 1986 funds are now available for grants to projects demonstrating a comprehensive cost effective health and support system for persons with Acquired Immune Deficiency Syndrome (AIDS) and AIDS-related disorders. Grant applications are now being accepted from the four Standard Metropolitan Statistical Areas (SMSAs) with the highest concentration of AIDS cases. These SMSAs, reported by the Centers for Disease Control (CDC) as of December 18, 1985, are: New York, San Francisco, Los Angeles, and Miami.

Funds were appropriated by Pub. L. 99–178 for this purpose under the authority of Section 301 of the Public Health Service (PHS) Act (42 U.S.C. 241).

DATE: The deadline for receipt of applications is July 22, 1986.

Applications shall be considered as meeting the deadline if they are either:

(1) Received on or before the deadline date, or

(2) Postmarked on or before the deadline date, and received in time for submission to the review group. Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.

FOR FURTHER INFORMATION CONTACT: Additional information relating to technical and program issues may be obtained from: Mr. Joseph Baldi, Division of Primary Care Services, Special Programs Branch, Bureau of Health Care Delivery and Assistance, HRSA, Room 7A–55 Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–5295.

Grant application kits (Standard Form 424 approved under OMB #0348–0006) and additional information regarding business, administrative or fiscal issues related to the awarding of grants under this notice may be requested from: Mr. Waddell Avery, Grants Management Branch, Bureau of Health Care Delivery and Assistance, HRSA, Room 7A–08 Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–1440.

The original and two (2) copies of the applications must be submitted to Mr. Avery.

SUPPLEMENTARY INFORMATION:

Program Background and Objectives

Acquired immune deficiency syndrome (AIDS), a disease complex characterized by a collapse of the body's immune system, continues to grow as a major public health problem in the United State's. A retrovirus, Human T-Lymphotropic Virus Type III/Lymphadenopathy-Associated Virus (HTLV–III/LAV) is viewed as causing AIDS. It appears to be transmitted through sexual contact, use of contaminated needles, and transfusion of blood or blood products from persons who are infected with the AIDS virus. High risk groups include the following: Homosexual and bisexual men with

multiple partners, abusers of intravenous drugs, heterosexual contacts of someone with AIDS, persons with hemophilia, and infants born to mothers infected with the AIDS virus.

Through April 21, 1986, 19,816 AIDS cases were reported to the CDC, of which 10,406 have resulted in death. It is equally disturbing that of the approximately 1,000,000 people estimated to be positive for the AIDS virus, perhaps 200,000 people may develop AIDS-Related Complex (ARC) and an unknown number of those who test positive (best estimates range from 4 to 34 percent) will develop AIDS. ARC is an often debilitating syndrome of persistent node swelling, fever, weight loss, and multiple complications that occasionally prove fatal without progressing to AIDS as formally defined by CDC.

The cost of providing the full range of services to AIDS patients for the duration of their illness is very high. Hospital costs alone for each AIDS patient in the United States are estimated to be about $147,000. However, hospital costs vary greatly from city to city, with the lowest reported in San Francisco. The high average cost appears related to the high cost of providing in-patient hospital care. Moreover, it is generally recognized that the largest access problem for AIDS patients is the limited availability of ambulatory and community-based, out-of-hospital services.

Purpose

The AIDS Service Demonstration Program is intended to address the service delivery aspects of the AIDS problem. Specifically, it is intended to demonstrate the most cost effective ways of providing treatment and support for patients with AIDS in the four SMSAs with the highest concentration of persons with AIDS. It is generally recognized that there is a need for development of more innovative, alternative approaches to managing patients with AIDS, which emphasize service delivery in outpatient and community settings and reduce the amount of time spent in hospital settings. The service demonstration projects to be carried out under Section 301 of the PHS Act are intended to serve as models for other communities with significant numbers of persons with AIDS.

Availability of Funds

HRSA intends to make available approximately $15 million to be expended by grantees over a 3-year period to support AIDS Service Demonstration Program projects in the 4 SMSAs reporting the largest number of AIDS cases as of the date of the enactment of Public Law 99–178. As noted below, Public Law 99–178 was enacted on December 12, 1985, but CDC statistics as of December 16, 1985 were used as that was the closest reporting date to December 12. Only one grant award will be made in each of the 4 SMSAs. Initially $13 million will be targeted as follows:

SMSA	Number of AIDS cases reported to CDC as of Dec. 16, 1985 [1]	Percent of total AIDS cases in the 4 SMSA's	Funds targeted
New York	5012	58.7	$8,822,200
San Francisco	1721	20.2	2,741,200
Los Angeles	1308	15.3	2,221,600
Miami	498	5.8	1,214,600

[1] Statistics reported to the CDC as of 12/16/85 are those reported closest to the 12/12/85 date Public Law 99–178 went into effect.

Funds will be targeted as a result of allotting a $600,000 base figure to each SMSA and then distributing the remainder of funds based on the percent distribution of AIDS cases by SMSA.[1] The remaining funds will be held in reserve to potentially support the provision of additional services and assess the effectiveness of the 4 service demonstration grant projects. It is anticipated that the grants will be awarded for one 3-year period.

Collaboration/Coordination With Other AIDS Programs

To the maximum extent possible, HRSA's AIDS Service Demonstration Program grantees will be expected to work closely with the Robert Wood Johnson Foundation, which is the sponsor of another new AIDS program entitled the AIDS Health Services Program. Both the Foundation and HRSA grant programs share the same basic thrust—to support the establishment of specialized comprehensive AIDS health and supportive service demonstration projects. Both emphasize the development of community-based, out-of-hospital services. The primary objective of both programs is to provide more effective, compassionate care at reduced costs. Grantees supported by HRSA will be expected, to the extent possible, to coordinate their projects with other Federal, State and local programs addressing AIDS and ARC concerns, including, but not limited to, the public education and prevention programs administered by the Centers for Disease Control, and the drug clinical trial studies conducted by the National Institutes of Health.

[1] See Appendix A.

Eligible Applicants

All public and private entities, non-profit and for-profit, located in and providing services in the 4 SMSAs named above, are eligible to apply for these grant awards. Eligible entities include but are not limited to, public or private hospitals, local health departments, or consortia of health care and community organization which can develop a comprehensive AIDS services demonstration project.

The Review and Evaluation Criteria

Grant applications will be reviewed and rated by an objected review committee according to the applicant's ability to demonstrate the most cost effective ways of providing treatment and support to the largest number of AIDS and ARC patients within the four SMSAs cited above. More detailed information on the review and evaluation criteria may be found in the grant application kit.

Allowable Costs

A successful applicant under this notice must spend funds it receives according to the approved application and budget, the authorizing legislation, terms and conditions of the grant award, the regulations of the Department applicable to grants, and the applicable cost principles of OMB circulars specified for nonprofit grantees, in subpart Q of 45 CFR Part 74, and, for for-profit grantee, in subpart AA of 45 CFR Part 74 and the applicable cost principles described in 45 CFR Part 74.175.

Reporting Requirements

A successful applicant under this notice will submit reports in accordance with the provisions of the general regulation which apply under 45 CFR Part 74, Subpart J—Monitoring and Reporting of Program Performance.

The program for Acquired Immune Deficiency Syndrome (AIDS) Service Demonstration Projects has been determined to be a program which is subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs, as implemented by 45 CFR Part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packaged to be made available under this notice (Standards Form No. 424

Approved Under OMB 0348–0006) will contain a listing of States which have chosen to set up such a review system and will provide a point of contact in the States for the review. Since States are allowed 60 days for this review, applicants are advised to discuss projects with, and provide copies of their applications to State contact points as early as possible. At the latest, an applicant should provide the application to the State for review at the same time it is submitted to the regional office.

The OMB Catalogue of Federal Domestic Assistance number for the Acquired Immune Deficiency Syndrome Service Demonstration Project is Number 13.113

Dated: May 6, 1986.

John H. Kelso,

Acting Administrator.

APPENDIX A.—STANDARD METROPOLITAN STATISTICAL AREAS ELIGIBLE FOR FUNDS UNDER THE AIDS SERVICE DEMONSTRATION PROGRAM

SMSA	Cities and counties included in the SMSA
1. New York, N.Y.–N.J.	That part of the area in NY: New York City. Bronx County. Kings County. New York County. Putnam County. Queens County. Richmond County. Rockland County. Westchester County. That part of the area in NJ: Bergen County.
2. San Francisco-Oakland, CA.	San Francisco City. Oakland City. Alameda County. Contra Costa County. Marin County. San Francisco County. San Mateo County.
3. Los Angeles-Long Beach, CA.	Los Angeles City. Long Beach City. Los Angeles County.
4. Miami, FL	Miami City. Dade County.

Public Health Service

Announcement of Availability of Grants for General Family Planning Training Projects; Correction

AGENCY: Office of Family Planning, OPA, PHS.

ACTION: Notice; Correction.

SUMMARY: This document corrects a misstatement of a grant award criterion contained in the Announcement of Availability of Grants for General Family Planning Training Projects published on April 25, 1986 (51 FR 15690).

ADDRESS: Application kits may be obtained from and applications must be submitted to: Grants Management Office, Office of Population Affairs, Room 736E, HHH Building, 200 Independence Avenue SW., Washington, D.C. 20201.

DATE: Applications must be postmarked or received by close of business June 24, 1986.

FOR FURTHER INFORMATION CONTACT: Grants Management Office at area code 202/245–0146 or Program Office at area code 202/245–0151.

SUPPLEMENTARY INFORMATION: On April 25, 1986, the Office of Population Affairs announced the availability of funds for training grants under sec. 1003 of the Public Health Service Act, for family planning training projects. The notice stated that—

In making grant award decisions the Deputy Assistant Secretary for Population Affairs (DASPA) will take into consideration such factors as the following:

7. Where competing projects are of approximately equal quality and only one grant can be funded, priority will be given to grantees not previously funded by OPA.

51 FR 15697, second column. This is to advise that Item 7 is changed to read as follows:

7. Where competing projects are of approximately equal quality and only one grant can be funded, priority will be given to offerors who will maintain or expand the diversity of experience and approaches of grantees within the Title X training program.

Dated: May 29, 1986.

Jo Ann Gasper,

Deputy Assistant Secretary for Population Affairs.

BILLING CODE 4160–17–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Elko District (Nevada) Advisory Council; Meeting

In accordance with Pub. L. 92–463, the Federal Advisory Committee Act, notice is hereby given that the BLM Elko District Advisory Council will meet at 7:00 a.m. on June 30, 1986, at the new Elko District Office at 3900 East Idaho Street, Elko, Nevada.

The meeting will be a tour during which time the West Cherry Creek Allotment Management Plan will be discussed and the following aspects of the plan visited: The Paris Seeding Project, wildlife improvement projects, riparian areas, and various range improvements such as fencing and water developments.

The public is invited to attend, but must supply their own transportation. Anyone wishing to make a statement to the Council may do so, however, they should contact the District Manager, BLM, Elko District, P.O. Box 831, Elko, Nevada 89801, or call 702–738–4071 no later than June 23, 1986, so that arrangements for the time may be made.

Summary minutes of the meeting will be prepared and available for public inspection or reproduction during regular business hours within 30 days following the meeting.

Rodney Harris,

District Manager.

BILLING CODE 4310–HC–M

[A–22068]

Lease of Public Land; Arizona

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Lease of Public Land Under the Recreation and Public Purposes (R&PP) Act.

SUMMARY: The Arizona State Parks Department proposes to develop an archeological theme park along the Little Colorado River near Winslow, Navajo County on the following described 80 acres of public land:

G&SR Meridian, Arizona

T. 19 N., R. 16 E., sec. 20, E½NE¼.

The land has been examined and found suitable for classification for recreation and public purposes under the provisions of the Recreation and Public Purposes (R&PP) Act of June 14, 1926, as amended (44 Stat. 741: 43 U.S.C. 869; 869–4).

Classification of this land under the provisions of the R&PP Act segregates it on the date of publication in the **Federal Register** from all appropriations including location under the mining laws, but not from applications under the mineral leasing laws or the R&PP Act.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: May 27, 1986.

Marlys W. Jones,

District Manager.

[FR Doc. 86-12636 Filed 6-4-86; 8:45 am]

BILLING CODE 4310-32-M

[I-21338]

Exchange of Public and Private Lands, Cassia County, ID

The United States has issued an exchange conveyance document to Michael, Douglas, and Willard Cranney Jr., of Oakley, Idahol 83346, for the following-described lands under Section of the Federal Land Policy and Management Act of 1976:

Boise Meridian, Idaho

T. 13 S., R. 21 E.,
sec. 4, E½SE¼.
Comprising 80.00 acres of public land.

In exchange for these lands, the United States acquired the following-described lands:

Boise Meridian, Idaho

T. 13 S., Rs. 20 and 21 E.,
Beginning at corner No. 1 from which the west ¼ corner sec. 30, T. 13 S., R. 21 E., bears N. 0°11' E., 6.07 chs. distant.

From the initial point by metes and bounds:

N. 26°43' E., 49.13 chs to corner No. 2;
S. 75°07' E., 16.90 chs to corner No. 3;
S. 32°19' W., 04.45 chs to corner No. 4;
N. 59°19' W., 5.86 chs to corner No. 5;
N. 59°19' E., 6.51 chs to corner No. 6;
N. 26°43' E., 11.71 chs to corner No. 1, the place of beginning.
Comprising 88.88 acres of private land.

The purpose of the exchange was to acquire the non-Federal land which has high public value for recreation and wildlife habitat. The public interest was well served through completion of this exchange.

The values of the Federal public land and the non-Federal land in the exchange were both appraised at the equal value of $12,400.00.

Dated: May 22, 1986.

Jimmie Buxton,

Acting Deputy State Director for Operations.

[FR Doc. 86-12637 Filed 6-4-86; 8:45 am]

BILLING CODE 4310-GG-M

[CA 17632]

Direct Sale of Public Land—San Diego County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action—Direct sale of public land: San Diego County, California.

SUMMARY: The following described public land has been examined and found suitable for disposal by direct sale at the appraised market value of $48,000.00 pursuant to Sections 203 and 209 of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2750, 2757; 43 U.S.C. 1713, 1719). The land will not be offered for sale until 60 days after the date of this notice.

Parcel serial No.	Legal description	Acres	Appraised value
CA 17632	T. 17S., R. 6E., SBM; Sec. 20: W½SW¼.	80.00 ac±	$48,000

Purpose

The purpose of this direct sale is to dispose of a parcel of public land which became of location, lack of administrative access and small size, makes it difficult and uneconomic to manage as part of the public land and not suitable for management by another Federal agency. The public interest will be well served by offering this land for sale to the existing grazing lessee, Don Lee, Incorporated.

Publication of this notice in the **Federal Register** segregates the public land from the operation of the public land laws and the mining laws. The segregative effect shall terminate upon issuance of a patent or 270 days from the date of publication, whichever occurs first.

The land described above has no known mineral values. Conveyance of the mineral interests will occur simultaneously with the sale of the Land. Acceptance of a direct sale offer will constitute an application for conveyance of mineral interest, and a $50.00 nonrefundable filing fee must be paid as required by Sec. 209 of the Act of October 21, 1976 (43 U.S.C. 1719).

A certified check, postal money order, bank draft or cashier's check, made payable to the Department of the Interior, BLM, for not less than $4,800.00 shall be received at the place of sale—California Desert District, 1695 Spruce Street, Riverside, California 92507, by 10:00 a.m. on the sale date. The payment will be enclosed in a sealed envelope clearly marked as follows: "Public Land Sale—Direct", Parcel No. CA 17632, August 6, 1986.

The remainder of the full purchase price ($43,200.00) shall be submitted 180 days from the sale date. Failure to submit the balance of this full purchase price within the above specified time period shall result in cancellation of the sale and the deposit shall be forfeited.

The terms and conditions applicable to the sale are: The patent will reserve to the United States a right-of-way for ditches or canals constructed by the authority of the United States. Act of August 30, 1890 (43 U.S.C. 945).

Detailed information concerning the sale, including the environmental assessment/land report are available for review at the California Desert District Office, 1695 Spruce Street, Riverside, California 92507.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager at the above address. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: May 30, 1986.

Wes Chambers,

Acting District Manager.

BILLING CODE 4310-40-M

Request for OMB Extension of Approval of Use of Permit Fee Envelope

AGENCY: Bureau of Land Management, Interior.

ACTION: Information collection submitted to the Office of Management and Budget under the Paperwork Reduction Act.

SUMMARY: The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for extension of approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau of Land Management's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau of Land Management's clearance officer and to

the Office of Management and Budget Interior Department Desk Officer, Washington, D.C. 20503, telephone 202–395–7340.

Title: Permit Fee Envelope, 36 CFR Part 71.

Abstract: Respondents supply identifying information and data on the campsite number, dates camping, number in party, zip code, fee paid, vehicle license number, and primary purpose of visit. This information allows the Bureau of Land Management to determine if all users have paid the required fee, the number of users, and their state of origin.

Bureau Form Number: 1370–36.

Frequency: Whenever someone wishes to camp in a campground where fees are collected.

Description of Respondents: Individuals desiring to use the campground.

Annual Responses: 42,300.

Annual Burden Hours: 2,115.

Bureau clearance officer: Rebecca Daughtery, (202) 653–8853.

Dated: March 31, 1986.

Vincent J. Hecker,

Acting Assistant Director for Land Resources.

BILLING CODE 4310–84–M

Minerals Management Service

Royalty Management Advisory Committee, Gas Valuation Regulations Review Working Panel; Meeting

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of meeting.

SUMMARY: The Minerals Management Service (MMS), Royalty Management Program, hereby gives notice that the Gas Valuation Regulations Review Working Panel, established by the Royalty Management Advisory Committee, will meet in Lakewood, Colorado, at the location and on the dates indicated below.

On February 5, 1986, MMS published an advance notice of proposed rulemaking in the **Federal Register** making available for public comment draft regulations pertaining to the valuation of gas and associated products as well as gas processing allowances and transportation allowances. All public comments will be made available to the Royalty Management Advisory Committee and the Gas Valuation Regulations Review Working Panel. The Panel will review the draft regulations and make recommendations as to necessary clarifications and revisions.

Location and dates: The Gas Valuation Regulations Review Working Panel will meet at the Sheraton Inn Hotel, 360 Union Boulevard, Lakewood, Colorado, June 12 and 13, 1986.

The Panel will meet from 8 a.m. to 5 p.m. daily.

The public is invited to attend these meetings and make oral or written comments. A time will be set aside by the Panel chairperson during which the public will be invited to make oral comments. Written comments should be submitted by June 27, 1986, to the address listed below.

FOR FURTHER INFORMATION CONTACT: Vernon B. Ingraham, Minerals Management Service, Royalty Management Program, Office of External Affairs, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 660, Denver, Colorado 80225, telephone number (303) 231–3360, (FTS) 326–3360.

SUPPLEMENTARY INFORMATION: The Gas Valuation Regulations Review Working Panel is one of six working panels established by the Royalty Management Advisory Committee. The panels are composed of both Advisory Committee members and non-Committee members, and were established to provide the Advisory Committee with analyses of specific issues and proposed recommendations. Panel recommendations will be reviewed by the Advisory Committee, which will then decide what advice and recommendations to give to the Department of the Interior (DOI) and the MMS. Although the panels may meet with DOI or MMS staff members to obtain information they require in conducting their analyses, advice and recommendations of the panels will be made to the Advisory Committee and not to the DOI or the MMS.

Dated: May 28, 1986.

William D. Bettenberg,

Director, Minerals Management Service.

BILLING CODE 4310–MR–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-335 (Preliminary)]

Import Investigations; Tubeless Steel Disc Wheels From Brazil

AGENCY: International Trade Commission.

ACTION: Institution of a preliminary antidumping investigation and scheduling of a conference to be held in connection with the investigation.

SUMMARY: The Commission gives notice of the institution of preliminary antidumping investigation No. 731-TA-335 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Brazil of tubeless steel disc wheels,[1] provided for in item 692.32 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value. As provided in section 733(a), the Commission must complete a preliminary antidumping investigation in 45 days, or in this case by July 7, 1986.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and B (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: Bruce Cates (202-523-0369), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on May 23, 1986 by the Budd Company, Troy, Michigan.

[1] Such wheels are designed to be mounted with pneumatic tires and are suitable for use on class 6, 7, and 8 trucks, including tractors, and for use on semi-trailers.

Participation in the investigation

Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than seven (7) days after publication of this notice in the Federal Register. Any entry of appearance filed after this date will be referred to the Chairwoman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service list

Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Conference

The Director of Operations of the Commission has scheduled a conference in connection with this investigation for 10:00 a.m. on June 16, 1986, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, DC. Parties wishing to participate in the conference should contact Bruce Cates (202-523-0369) not later than June 12, 1986, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Written submissions

Any person may submit to the Commission on or before June 16, 1986, a written statement of information pertinent to the subject of the investigation, as provided in § 207.15 of the Commission's rules (19 CFR 207.15). A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

Issued: June 2, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 86-12097 Filed 6-4-86; 8:45 am]

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-19 (Sub-112)]

Baltimore & Ohio Railroad Co. et al.; Abandonment of the Georgetown Subdivision Rail Line Between Montgomery County, MD and Georgetown, District of Columbia

AGENCY: Interstate Commerce Commission.

ACTION: Notice of intent to prepare an environmental impact statement and to hold a public scoping meeting.

SUMMARY: The Interstate Commerce Commission has directed that an environmental impact statement be prepared for the above-referenced proceeding in which three railroads seek a license authorizing abandonment of the Georgetown Subdivision rail line. A preliminary scope of study is proposed within. Written comments are invited. An informal public scoping meeting also is planned.

DATE: A scoping meeting will be held on June 18, and, if necessary June 19, 1986, beginning at 7 p.m. in Hearing Room A of the Interstate Commerce Commission, 12th and Constitution Avenue NW., Washington, DC. All written comments on the scope of study must be received by July 3, 1986 at the address given below to be considered in development of the final scope of study.

ADDRESS: Interstate Commerce Commission, Section of Energy and Environment, Room 3115, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Robert Maestro, (202) 275–7918.

SUPPLEMENTARY INFORMATION: On April 9, 1986, the Baltimore and Ohio Railroad Co., Metropolitan Southern Railroad Co., and Washington and Western Maryland Railway Co. filed an application with the Interstate Commerce Commission (ICC) seeking a license authorizing abandonment of the Georgetown Subdivision rail line, which extends from Georgetown Junction, through Bethesda, Maryland to its terminus in Georgetown, District of Columbia. Upon abandonment, rail operations will cease, rails, ties and bridges will be salvaged, and other use(s) will be made of the right-of-way. additionally, coal, previously delivered by rail to a GSA heating plant in Georgetown, will move by truck from a transloading facility near the intersection of Kenilworth Avenue and Route 50, westward along New York Avenue and K Street to the heating plant.

Two documents have been prepared by the ICC's Section of Energy and Environment on the proposed abandonment. A report initiating compliance with Section 106 of the National Historic Preservation Act (NHPA) provided an initial identification of historical and archeological resources present along the rail line and proposed coal truck route and requested comments to assist us in fulfilling compliance with Section 106.[1] On May 15, 1986, the ICC served an evironmental assessment which concluded that abandonment may result in significant effects on the human environment, including historical and archeological resources; that information for a satisfactory evaluation was incomplete and inconclusive; and that an EIS was required and recommended. Copies of either document are available upon request at the address given above.

We are approaching the development of a scope of study for the draft environmental impact statement (EIS) by defining the impact-producing actions that would occur as a result of abandonment, the components of the human environment that would be affected, the nature of effect, and the degree of effect. The first three items included in this approach have been identified in our environmental assessment served on May 15, 1986 and are listed below. Also included are alternatives to the proposed action as well as measures designed to avoid or reduce adverse impacts. We are also integrating the Section 106 National Historic Preservation Act process into the environmental impact statement process.

I. Salvage Operations

A. effect on archeological resources
B. eligibility of bridges and the rail line for listing in the *National Register of Historic Places*
C. effects on rare or endangered species
D. effects on aquatic ecosystems
E. effect on the Georgetown Historic District

II. Alternative Uses of the Right-of-Way

A. conflicts with objectives of Federal, state, regional and local land use plans, policies and controls
B. effects on the C&O National Historic Park
C. effects on archeological and historical resources within and adjacent to the right-of-way
D. effects on wildlife habitats and aquatic ecosystems
E. effects on adjacent land uses

III. Truck Transport of Coal

A. effects of vibrations and air emissions on adjacent historical structures
B. effects of noise, vibrations and air emissions on adjacent residential and commercial areas
C. effects on traffic congestion and safety

IV. Possible Alternatives to the Proposed Action

A. the Commission denying a grant of abandonment authority (the no action alternative)
B. the Commission granting only discontinuance of operations
C. mitigation, including alternate truck routes, restrictions on time of day truck movements, supplementing the heating plant's demand with other interconnected GSA heating plants, heavier reliance on oil and/or natural gas at the GSA heating plant and delivery of coal by barge.

We invite input from interested individuals, organizations, and agencies to help us identify additional items that should be considered as part of each area of investigation identified above. We also request assistance in defining the appropriate level of analysis for each component of the human environment that may be affected.

Any individual, organization, or agency who wishes to make a presentation at the informal public scoping meeting must call Robert Maestro [(202) 275–7918] by June 13, 1986 for scheduling purposes. It would be extremely helpful if common concerns or interests were expressed by a single spokesperson. Written comments are also welcomed and should be submitted by or before July 3, 1986. Oral presentations are not a prerequisite to filing written comments. A final scope of study will be prepared, published in the **Federal Register** and served on all parties to the proceeding.

Anyone wishing to receive copies of the final scope, the draft EIS and all other documentation served by the ICC on this proceeding (including decisions) should call the Office of the Secretary at (202) 275–7999 and request placement on the service list as an "advice of proceedings" party for docket number AB–19 (Sub-No. 112). Those individuals who intend to participate more actively and wish, additionally, to receive all documentation submitted by all parties to the proceeding must submit a written request to the same office for listing as a "party of record".

James H. Bayne,
Secretary.

BILLING CODE 7035-01-M

[1] Section 106 of NHPA (16 U.S.C. 470f) requires that, prior to issuing any license, the Federal licensing agency must evaluate the effects of the licensed undertaking on any district, site, building, structure or object that is listed or found eligible for listing in the *National Register of Historic Places*.

[Docket No. 30786 (Sub-1)]

Missouri Pacific Railroad Co.; Construction and Operation Exemption; Ogden and San Antonio, TX

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission, under 49 U.S.C. 10505, exempts from the requirements of 49 U.S.C. 10901, the construction and operation of two connecting tracks totaling 4,207 feet at Ogden and San Antonio, TX, by Missouri Pacific Railroad Company.

DATES: The decision is effective on June 16, 1986. Petitions to reopen must be filed by June 25, 1986.

ADDRESSES: Send pleadings referring to Finance Docket No. 30786 (Sub–No. 1) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423
(2) Railroad's representative: Jeanna L. Regier, Missouri Pacific Railroad Company, 1416 Dodge Street, Omaha, NE 68179.

FOR FURTHER INFORMATION CONTACT: Donald J. Shaw, Jr., (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll free (800) 424-5403.

Decided: May 27, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,

Secretary.

[FR Doc. 86-12944 Filed 6-4-86; 8:45 am]

BILLING CODE 7035-01-M

Motor Carrier Applications To Consolidate, Merge or Acquire Control

The following applications seek approval to consolidate, purchase, merge, or lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. If the protest includes a request for oral hearing, the request shall meet the requirements of 49 CFR 1182.3 and shall include the required certification. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied. Findings:

The findings for these applications are set forth at 49 CFR 1182.6.

MC-F-17437, filed April 23, 1986. Tri-State Coach Lines, Inc. (Tri-State) (2101 West 37th Avenue, Gary, IN 46408)—Purchase—Evansville & Ohio Valley Transportation Company, Inc. (Evansville) (1420 N. Stockwell Road, Evansville, IN 47715). Representative: Robert B. Walker, Sims, Walker & Steinfield, P.C., 1275 K Street, NW, Suite 875, Washington, DC 20005. Tri-State (MC-129038), seeks authority to purchase the operating authority of Evansville contained in certificate No. MC-39305, which authorizes the transportation of passengers between (1) Evansville, IN, and Mt. Vernon, IN, over Indiana Hwy. 62, (2) Evansville, IN, and Henderson, KY, over U.S. Hwy. 41, (3) Grand View, IL, and Cannelton, IN, over Indiana Hwy. 66, (4) Evansville, IN, and Grand View, IN, over Indiana Hwy. 66, and (5) the junction of Indiana Hwys. 66 and 75 adn Owensboro, KY, over Indiana Hwy. 75 and the Owensboro Bridge; serving all intermediate points along routes (1), (2), (3) and (5), and the intermediate points of Rockport, Hatfield, Yankeetown, and Newburg, IN, along route (4). Al routes include incidental charter rights. Tri-State, a motor passenger carrier, is owned by John and Margaret Shoup, who also control Cardinal Buses, Inc. (Cardinal) (MC-187339), and Shoup Buses, Inc. d/b/a Cardinal Charter Tours (SBI) (MC-70384), both motor passenger carriers. The Shoup's control of Tri-State, Cardinal, and SBI was approved in Nos. MC-F-12459 and MC-F-15639.

Decided: May 29, 1986.

By the Commission, Motor Carrier Board, Members Berry, Johnson, and Metz (Board Member Metz not participating).

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-12 (Sub-105)]

Southern Pacific Transportation Co., Abandonment; Jefferson and Orleans Parish, LA; Findings

The Commission has found that the public convenience and necessity permit Southern Pacific Transportation Company to abandon its 2.177-mile line between Algiers (milepost 1.327) and Gretna (milepost 3.504) in Jefferson and Orleans Parish, LA.

A certificate will be issued authorizing this abandonment unless within 10 days after this publication the Commission also finds that: (1) A financially responsible person has offered assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB-OFA". Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

By the Commission, Division 1, Commissioners Sterrett, Gradison, and Lamboley. Commissioner Lamboley dissented in part with a separate expression.

James H. Bayne,

Secretary.

[FR Doc. 86-12892 Filed 6-4-86; 8:46 am]

BILLING CODE 7035-01-M

[Ex Parte No. 393 (Sub-No. 1)]

Standards for Railroad Revenue Adequacy; Decision To Expand Scope of Proceeding

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision expanding the scope of the proceeding.

SUMMARY: The Commission is expanding the scope of this proceeding to include a broad reexamination of the manner in which we presently measure and determine revenue adequacy, including our use of a current cost of capital return on investment as the sole standard for revenue adequacy. This proceeding was originally instituted to refine and improve the existing standard, adopted in Ex Parte No. 393, *Standards for Railroad Revenue Adequacy*, 364 I.C.C. 803 (1981). However, the Commission has become increasingly concerned that the annual revenue adequacy determinations made under this standard may not have provided an accurate representation of the financial condition of the railroad industry. See Ex Parte No. 463, Railroad Revenue Adequacy—1984 Determination (unpublished decision served May 5, 1986). Thus, it seeks public comment and assistance to enable the Commission to make more accurate railroad revenue adequacy findings in the future.

The Commission's decision discusses (but takes no action on) the previous proposals for refining its existing measure. It also discusses several other possible refinements, including use of depreciation accounting for road and

track structures, use of embedded cost of debt, and different treatment of deferred tax reserves as well as other possible standards for measuring revenue adequacy.

DATES: Notice of intent to participate shall be submitted to the Commission by June 16, 1986. A service list will then be prepared and served on all parties. Comments are due by August 4, 1986. Reply comments will be due by September 3, 1986. A Commission voting conference deciding the case will be scheduled for a date within 30 days of the close of the record.

ADDRESSES: Send the notice of intent to participate and an original and 15 copies of comments and replies to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 275–7489.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423; or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

This action will not significantly affect either the quality of the human environment or energy conservation. Nor will it have a significant economic impact on a substantial number of small entities.

Authority: 49 U.S.C. 10704(a).

Decided: May 30, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Vice Chairman Simmons commented with a separate expression. Commissioner Andre was absent and did not participate in this proceeding.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Quotas for Controlled Substances in Schedule II

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of Established 1986 Aggregate Production Quotas.

SUMMARY: This notice establishes 1986 aggregate production quotas for phencyclidine and 1-piperidinocyclohexanecarbonitrile.

DATE: This order is effective June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, 1405 I Street, NW., Washington, D.C. 20537, Telephone: (202) 633–1366.

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances Act (21 U.S. Code, Section 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On April 14, 1986, a notice proposing aggregate production quotas for phencyclidine and 1-piperidinocyclohexanecarbonitrile was published in the **Federal Register** (51 FR 12660). All interested persons were invited to comment on or object to the proposal on or before May 14, 1986. No comments or objections were received.

Pursuant to sections 3(c)(3) and 3(e)(2)(C) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

The Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S. Code 601, et seq. The establishment of annual aggregate production quotas for Schedules I and II controlled substances is mandated by law and by the international commitments of the United States. Such quotas impact predominantly upon major manufacturers of the affected controlled substances.

Therefore, under the authority vested in the Attorney General by section 306 of the Controlled Substances Act of 1970 (21 U.S. Code, Section 826) and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations, the Administrator hereby orders that the 1986 aggregate production quotas for phencyclidine and 1-piperidinocyclohexanecarbonitrile, expressed in grams of anhydrous base, be established as follows:

Basic class	1986 aggregate production quotas
Schedule II:	
Phencyclidine	10
1-piperidinocyclohexanecarbonitrile	35

Dated: May 28, 1986.

John C. Lawn,

Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 86–40]

Performance Review Board; Senior Executive Service; Membership

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of membership of SES Performance Review Board.

SUMMARY: The Civil Service Reform Act of 1978, Pub. L. 95–454 (Section 405) requires that appointments of individual members to a Performance Review Board be published in the **Federal Register.**

The performance review function of the Senior Executive Service in the National Aeronautics and Space Administration is being performed by the NASA Performance Review Board and the NASA Senior Executive Committee. The latter performs this function for senior executives who report directly to the Administrator or the Deputy Administrator. The following individuals have been serving on the Committee and the Board as of March 1, 1986:

Senior Executive Committee
William R. Graham, Chairperson
Ann P. Bradley
C. Robert Nysmith
Thomas P. Murphy, Assistant Chief Administrative Officer, Prince George's County Government, Maryland

Performance Review Board
Ann P. Bradley, Chairperson
Carl E. Grant, Executive Secretary
Dale L. Compton (Term expires February 1988)
Louis B. DeAngelis (Term expires November 1988)
Edward A. Frankle (Indefinite Term)
Robert C. Goetz (Term expires February 1988)
John M. Klineberg (Term expires July 1986)
John J. Quann (Term expires November 1986)
Robert Rosen (Term expires November 1989)
Jeffrey D. Rosendhal (Term expires November 1988)
Richard J. Wisniewski (Term expires February 1988)

Thomas N. Tate, Special Assistant to the Chairman, Committee on Science and Technology, House of Representatives (Indefinite Term)

James C. Fletcher,
Administrator.

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Expansion Arts Advisory Panel; Meeting; Correction

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the Expansion Arts Advisory Panel (Overview Section) to the National Council on the Arts that was to be held on June 16-17, 1986, from 9:00 a.m.-5:30 p.m. in room 714 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506 has been changed. This meeting will now be held on June 17 only, from 9:00 a.m.-5:30 p.m. in room 714 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506.

This meeting will be open to the public on a space available basis. The topics for discussion will include guidelines and policy.

If you need accommodations due to a disability, please contact the Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW, Washington DC 20506, 202/682-5532, TTY 202/682-5496 at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call 202/682-5433.

John H. Clark,
Director, Office of Council and Panel Operations, National Endowment for the Arts.

May 29, 1986.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Extension.

2. The title of the information collection: NRC Form 313M, "Application for Materials License—Medical".

3. The form nmber if applicable: NRC Form 313M.

4. How often the collection is required: For an initial license and for renewals every five years.

5. Who will be required or asked to report: Applicants for a specific license to possess and use byproduct material in humans.

6. An estimate of the number of responses: 600.

7. An estimate of the total number of hours needed to complete the requirement or request: 12,000.

8. An indication of whether section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: Applications for specific licenses to possess and use byproduct material in humans are filed on NRC Form 313M. Information submitted on the form is used to evaluate the applicant's experience, training, facilities and procedures for adequacy of protection of the public health and safety.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395-7340.

The NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland, this 29th day of May 1986.

For the Nuclear Regulatory Commission.

Patricia G. Norry,
Director, Office of Administration.

BILLING CODE 7590-01-M

[Docket No. 50-346-ML; ASLBP No. 86-525-01-ML]

Toledo Edison Co. et al.; Memorandum and Order and Designating Matters To Be Addressed at Hearing

May 29, 1986.

Before Helen F. Hoyt, Administrative Judge.

Preliminary Matters

This proceeding involves the approval by the United States Nuclear Regulatory Commission (Commission) of a request by the Toledo Edison Company (Toledo Edison or Licensee) for authorization under 10 CFR § 20.302(a) to dispose of byproduct material on the site of its Davis-Besse Nuclear Power Station, Unit 1. The materials in question are radioactively contaminated resins from the plant's secondary system demineralizer. On October 9, 1985, the NRC Staff published in the Federal Register an "Environmental Assessment and Finding of No Significant Impact" relating to Toledo Edison's request (50 FR 41265), and by letter dated October 15, 1985, approved the Licensee's request for disposal authorization. After the approval of the Licensee's request, various groups petitioned the Commission asking the Commission to rescind approval of Toledo Edison's disposal authorization request. The Commission on February 20, 1986 issued an order instituting an informal hearing in this matter and the undersigned was appointed presiding officer of February 25, 1986 by the Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

The action approved by the Commission is for the periodic disposal of low level-radioactive dredgings from the onsite settling basins onto land owned by Toledo Edison. It is the Licensee's intention to continue the current practice of transferring each year approximately 1,000 cubic feet of radioactively contaminated secondary-side clean up resins and about 5,000 cubic feet of non-radioactive wastes from the water treatment facility to onsite settling basins. About six times over the remaining operating life of the facility, *i.e.* about once every five years, the settling basins will be dredged and the removed material will be disposed of on land at a minimum thickness of two feet, covered with four inches of clean soil and seeded.

The Commission order of February 20, 1986 determined that interested persons should be afforded a hearing under section 189a of the Atomic Energy Act,

42 U.S.C. 2239(a). The Commission noted that its decision in *Kerr McGee Corp.* (West Chicago Rare Earths Facility), CLI–82–2, 15 NRC 232 (1982), aff'd, *City of West Chicago v. NRC*, 701 F2d 632 (7th Cir. 1983), had indicated that there was no entitlement to a formal trial-type hearing under either the Atomic Energy Act or NRC regulations with regard to materials licensing actions. Neither the hearing requests of the various groups or individuals nor any other information caused the Commission to exercise its discretion and grant a formal hearing under the "public interest" standard of 10 CFR §§ 2.140(a) and 2.105(a)(7).

In accordance with the Commission order of February 20, 1986 in regard to the conduct of this informal proceeding, a *Memorandum and Order* (Notice of Informal Hearing and Opportunity to Become a Party) dated March 10, 1986 was issued by me in which I invited petitions to intervene and set out the procedures to be followed in considering the proposed disposal of by-product material at Davis-Besse. By this order the following petitions to intervene are granted based upon findings that each of the named petitioners has demonstrated standing to intervene as governed by 10 CFR 2.714(d) and existing agency precedents regarding this section:

State of Ohio—Petition for leave to Intervene (submitted by Anthony J. Celebrezze, Jr., Attorney General of Ohio) filed April 14, 1986.

Toledo Coalition For Safe Energy and Susan A. Carter—filed November 6, 1985.

Western Reserve Alliance—November 10, 1985; May 13, 1986 and May 20, 1986.

Save Our State From Nuclear Waste, Consumers League of Ohio, Arnold Gleisser and Genevieve S. Cook—filed April 11, 1986.

In the conduct of this oral hearing, I hereby designate as lead intervenor. The State of Ohio, to facilitate an orderly presentation of intervenors' interests and as lead counsel for party intervenors, the Assistant Attorney General of Ohio, Jack A. Van Kley; Edward Lynch or Sharon Sigler (whose Notices of Appearance have been made on this record) will conduct the intervenor's presentations and question witnesses presented by the Licensee with the assistance of counsel or representatives of the other party participants.

Petitions to intervene from elected representatives, municipalities and others have been considered as well as the Licensee's statements concerning the standing to intervene of the individuals, organizations or governmental bodies. In reaching the decision to deny these petitions to intervene and the connotation that party participation has even in an informal proceeding, I have decided to provide each of these petitioners with an opportunity to make a sworn statement on this record of not more than ten minutes or to submit their written arguments pertaining to the questions raised by me below. These sworn statements, oral or written, will be considered by me along with other testimony given by the parties but will not be subject to cross-examination. The order of presentation below will establish time for these presentations. Notice of intent to submit the sworn testimony or statement will be given *three days* in advance of this informal hearing date.

Name of petitioner	Date of petition	Why petition denied
City of Ashtabula, Ohio.	April 15, 1986	Lacks standing as to 10 CFR 2.714(d) because it does not demonstrate injury; the town is 120 miles from Davis-Besse site. Distance precludes § 2.715(c) standing.
Lakewood, Ohio.	April 10, 1986	Lacks standing because of distance from site.
Citizens for land and water use.	April 11, 1986	Fails to identify interest of any kind to qualify for standing, or particular deficiencies in method of disposal.
George Esroch.	April 8, 1986	Petitioner alleges no injury; fails to demonstrate standing; and has not identified any issue.

Matters Within the Scope of Proceeding to be Addressed at the Hearing

The following matters are those concerns which I find are not clearly enunciated in the documents related to the Commission's action in this matter:

1. What final location on the Davis-Besse site has been selected for waste burial?

2. What will be the dimensions of the waste burial site in its final configuration (after 30 years)?

3. Is the waste burial site located within the bounds of Navarre Marsh? Provide a description of the location of the burial site relative to the Marsh.

4. What is the observed flooding frequency at the the waste burial site?

5. What soil erosion from storms has been actually observed at or near the disposal site?

6. What is the direction of groundwater flow from the burial site relating to Lake Erie, Navarre Marsh, and the Toussaint River?

7. What is the depth to bedrock of unconsolidated glacial deposits at the burial site?

8. What is the average depth and upper and lower range of the water table at the disposal site?

9. What endangered species of plant or animal have been actually observed on the Davis-Besse site? What crticial habitats for endangered species exist on the Davis-Besse site?

10. What will be the total radionuclide inventory of the burial site after 30 years of operation under expected levels of resin contamination?

11. What is the estimated dose to an individual standing on covered basin dredgings after 30 years of operation under expected levels of resin contamination?

12. What criteria will be used to decide whether resins will be buried on site or transported to a licensed burial site in the event that resins become contaminated at higher than expected levels (from steam generator tube leaks or ruptures, for example)?

13. What is the estimated upper limit of radionuclide inventory that could exist on site after 30 years under the above criteria?

14. What is the estimated upper limit of dose to the whole body for an individual standing on the burial site that could exist after 30 years under the above criteria?

15. Why has SR–90 not been included in the licensees' assessments?

16. What would be the total estimated whole body dose equivalent for an indivudal through the food ingestion pathway that could result from the final 30-year inventory of radionclides including Sr–90? Provide estimates for expected levels and upper limits of radionuclide inventory after 30 years.

17. What are the principal chemical components of the non radioactive sludge that are mixed with radioactively contaminated resins?

18. What is the rate of biological or chemcial degredation of resins?

19. What biological hazards are there from resin degredation that have been published in the scientific literature or are known from manufacturers' tests?

20. Describe the licensees' plans for site management during operation, for marking the burial site, and for recordkeeping at the burial site.

Hearing Procedure

Prior to the hearing, I will tour Toledo Edison's proposed waste disposal burial site at Davis-Besse. One representative of each of the admitted parties may accompany me.

The burial site tour is scheduled for June 23, 1986 at 2:00 p.m. The parties should report to the Visitor's Center at the Toledo Edison Davis-Besse site.

I have indicated in my March 10, 1986 Order and with this Order that the hearing will be informal. Although it was not my intention to permit cross-examination by the parties, I find that questions on the issues designated for hearing may better be phrased by the lead intervenor or the Licensee without the need to screen each question. Where a need is perceived by the parties, a request may be submitted for permission to present brief supplemental testimony designated to respond to another party's testimony. The following order of presentation is established:

June 19, 1986—Prefiled direct testimony of witnesses by Licensee and admitted intervenors due for filing and exchanged among the parties. Testimony will be limited to those issues described in the section of this Order titled Matters to be Addressed at the Hearing.

June 23, 1986—Tour of proposed low level waste site on Davis-Besse (2:00 p.m.).

June 24, 1986 through June 25, 1986—9:30 a.m. Hearing begins. Order of presentation of witnesses is as follows: Licensee's witnesses or panels will complete direct testimony. Questioning by counsel for lead intervenor will follow immediately. Licensee's counsel will be permitted rebuttal questions limited to matters disclosed through lead intervenor's questions. Lead intervenor will present direct testimony on the issue and Licensee's counsel will be permitted to question these witnesses. Lead intervenor's counsel will be permitted rebuttal questions limited to matters disclosed through questioning by Licensee's counsel.

June 25, 1986—7:00 p.m.–10:00 p.m. General Public-oral limited appearance statements for persons not a party or who have not submitted Petitions to Intervene. Each statement will deal with the position of the individual on those issues described in the section of this Order titled Matters to be Addressed at the Hearing. Statement will be limited to 5 minutes. Persons wishing to make an oral limited appearance statement may register with a designated representative at any time during these 3 days of oral hearings.

June 26, 1986—9:30 a.m. Sworn statements for those individuals or organizations who had submitted Petitions to Intervene but whose petitions were denied. These individuals will be limited to 10 minutes. When these statements are completed, the hearing will continue with the five minute limited appearance statements described above. The hearing will remain open until 5:00 p.m. when the record will be closed.

Limited appearance statements have been received from organizations and individuals described in Appendix to this Memorandum and Order. It is not necessary that those persons submit additional oral or written statements. Persons wishing to submit a written statement may do so by addressing it to U.S. Nuclear Regulatory, Office of the Secretary, Docketing and Services Branch, Attention: Docket No. 50-346-ML, 1717 H Street, NW., Washington, DC 20555.

Hearing Location

The location for the hearing is Sandusky High school, 2130 Hayes Avenue, Sandusky, Ohio.

For the Atomic Safety and Licensing Board.

Dated at Bethesda, Maryland, this 29th day of May, 1986.

Helen F. Hoyt,
Administrative Judge.

Appendix

Comments have been received from the following and are placed in Docket No. 50-346-ML in *Limited Appearance Section.*

City of Brook Park, Ohio—May 6, 1986—Resolution No. 19-1986 Opposing Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at its Davis-Besse Nuclear Power Station, and Declaring an Emergency.

City of Mentor, Ohio—December 17, 1985—Resolution 85-R-134-Resolution Requesting NRC to Rescind Approval for Disposal of Radioactive Waste at Davis-Besse Plant Site.

City of Euclid, Ohio—January 21, 1986—Resolution No. 10-1986—Expressing Opposition to City of Euclid Council to Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at its Davis-Besse Nuclear Power Station.

City of Mayfield Village, Ohio—February 17, 1986—Resolution 86-8 Opposing to Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at its Davis-Besse Nuclear Power Station.

City of Willowick, Ohio—April 15, 1986—Resolution No. 86-11 Expressing Opposition by Council of the City of to Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at its Davis-Besse Nuclear Power Station.

City of Rocky River, Ohio—April 17, 1986—Amended Resolution No. 29-86 Emergency Resolution Urging the Governor of State of Ohio to Aggressively Examine and the NRC to Hold Formal Hearings on Burial of Nuclear Waste on Site at Davis-Besse Nuclear Plant.

City of Middleburg Heights, Ohio—April 22, 1986—Resolution 1986-51 to NRC Opposing to Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at its Davis-Besse Nuclear Power Station.

City of Painesville, Ohio—April 7, 1986—Resolution Requesting NRC to Rescind Approval for Disposal of Radioactive Waste at Davis-Besse Plant Site.

League of Ohio Sportsmen and subsidary *Ohio Wildlife Federation*—Edward A. Stupka, President—April 10, 1986—Resolution 86-19X Oppose Burial of Radioactive Waste On-Site at Davis-Besse Nuclear Power Station.

Dwight Wise—Ohio House of Representatives, 85th House District—May 2, 1986—Letter to Chairman Nunzio J. Palladino urging NRC to revoke its approval of Toledo Edison's application to bury low-level radioactive waste at Davis-Besse Power Plant.

Greater Cleveland Boating Association—April 9, 1986—Resolution opposing Toledo Edison Co. application to amend its license to permit burial of radioactive sludge on the power station site and unrestricted use of the land in the future.

Lawrence J. Lucas—February 1, 1986, March 2, 1986 and April 21, 1986—Letters to U.S. NRC requesting a hearing and opposing NRC giving permission to bury waste without public participation.

City of Mayfield Heights, Ohio—February 17, 1986—Resolution 1986-12 Requesting NRC to Rescind Approval for Disposal of Radioactive Waste at the Davis-Besse Plant Site.

League of Women Voters of Rocky River, Ohio—April 10, 1986—Statement objecting to process of site selection; suitability of proposed site for low-level nuclear waste disposal; and lack of environmental impact statement for Davis-Besse Power Station burial of low-level nuclear waste.

U.S. Representative Edward Feighan—April 14, 1986—19th District of Ohio, Statement-Petition to Participate.

Elbert J. Waldorf—May 17, 1986—Letter.

Al and Irene P. Kay—May 13, 1986—Letter requesting Save Our State be allowed to intervene and opposing burial of radioactive waste in area of Great Lakes.

Paul E. Dornbusch—undated letter opposing burial of radioactive waste because it may leach into ground water.

League of Women Voters Lake Erie Basin Committee—April 10, 1986—Letter from Secretary opposing burial of low-level radioactive waste at Davis-Besse.

Ohio Radioactive Materials Users Group—April 10, 1986—Letter opposing analysis of possible impacts on burial of low-level radioactive waste at Davis-Besse. Statement to be available by August 1, 1986.

Russell M. Bimber—April 5, 1986—Letter opposing burial of nuclear waste at Davis-Besse.

Intervening Statement of Councilwoman Joan Klein (Lyndhurst, Ohio Resolution No. 66–10)—February 17, 1986—Resolution Expressing Opposition to the NRC of Council of City of Lyndhurst, Ohio to Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at Davis-Besse Nuclear Power Station.

Ohio Citizens for Responsible Energy (OCRE)—November 27, 1985 and March 25, 1986 (Susan L. Hiatt)—Limits participation to limited appearance status. OCRE urges "disposal of low-level radioactive waste at properly licensed disposal site.

City of Olmstead Falls, Ohio—April 28, 1986—Resolution 63–86 Opposing the Burial of Radioactive Sludge in Lands on Davis-Besse Nuclear Power Station Near Navarre Marsh Lands Adjacent to Lake Erie and Declaring an Emergency.

City of Seven Hills, Ohio—May 12, 1986—Resolution 15–1986 to the NRC Opposing the Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at its Davis-Besse Nuclear Power Station; and Declaring an Emergency.

City of Broadview Heights—May 20, 1986—Resolution 86–45 Opposing the Application of Toledo Edison Co. for Permission to Bury Radioactive Sludge at its Davis-Besse Nuclear Power Station and Declaring an Emergency.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) Collection title: Investigation of Claim for Possible Days of Employment.

(2) Form(s) submitted: ID–5i, ID–5R(SUP), UI–48 and UI–54.

(3) Type of request: Revision of a currently approved collection.

(4) Frequency of use: On occasion.

(5) Respondents: Individuals or households, Businesses or other for-profit, Small businesses or organizations.

(6) Annual responses: 13,700.

(7) Annual reporting hours: 1,450.

(8) Collection description: Under the RUIA, unemployment or sickness benefits are not payable for any day in which remuneration is payable or accrues to the claimant. The collection obtain information from the claimant, claims agent, railroad and non-railroad employer about work performed during the same period as unemployment benefits are claimed.

Additional Information or Comments: Copies of the proposed forms and supporting documents can be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Judy McIntosh (202–395–6880), Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Pauline Lohens,

Director of Information and Data Management.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–15113; File No. 812–6285]

Application and Opportunity for Hearing; Aetna Life Insurance and Annuity Company et al.

May 23, 1986.

Notice is hereby given that Aetna Life Insurance and Annuity Company (the "Company") and Variable Life Account B of Aetna Life Insurance and Annuity Company (the "Account B"), (collectively, "Applicants") filed an application on December 20, 1985, and an amendment thereto, on April 21, 1986, for an order of the Commission, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicants and certain transactions from sections 2(a)(32), 22(c), 26(a)(2), 27(c)(1), 27(c)(2) and 27(d) of the Act, and from Rule 6e–3(T) (b)(12), (b)(13), (c)(1), (c)(2), and (c)(4) and Rule 22c–1 thereunder, to the extent necessary to issue individual flexible premium variable life insurance contracts (the "Contracts") as defined in paragraph (c)(1) of Rule 6e–3(T) and as described in the application. All interested persons are referred to the application on file with the Commission for a statement of Applicants' representations, which are summarized below, and are referred to the Act and the rules thereunder for a statement of the relevant provisions.

Applicants state that the Company is a stock life insurance company organized under the laws of the State of Connecticut and is the sponsor-depositor for Account B, a segregated investment account of the Company registered under the Act as a unit investment trust. Applicants also state that under the Contract, net premiums are, according to the Owner's instructions, allocated between Aetna's General Account and Account B. Net premiums allocated to Account B are, in turn, allocated among its sub-accounts. Each sub-account of Account B invests exclusively in shares of a corresponding open-end management investment company: Aetna Variable Fund, Aetna Income Shares or Aetna Variable Encore Fund (the "Funds"). Applicants indicate that shares of the Funds are also sold to other separate accounts of Aetna in connection with certain variable annuity contracts. Applicants represent that net premiums allocated to the General Account earn interest at a rate determined by Aetna from time to time which will be not less than 4½%. To the extent that charges under the Contract are applicable to cash value in the General Account as well as to cash value in the Variable Account, such charges are, Applicants represent, in each instance, assessed in the same manner and computed on the same basis. Applicants state that under the Contract, the Owners can vary the frequency and amount of premium payments. Also, the death benefit may, and the cash value will, increase or decrease based upon the investment performance of amounts allocated to the subaccounts of the Account B and interest credited to the General Account. Applicants maintain that the Contracts generally allow the contractowner to increase or decrease the specified amount under the Contracts.

According to the registration statement for the Contract, which Applicants incorporate by reference into the application, at the contractowner's election, the death benefit will be either

(i) "Option 1", the greater of the specified amount or the cash value multiplied by the cash value corridor percentage required by the Internal Revenue Code, or (ii) "Option 2," the greater of the specified amount plus cash value or cash value multiplied by the cash value corridor percentage. Applicants state that optional incidental insurance benefits are available by riders to a Contract. Cash value will reflect the amount and frequency of payments, the investment experience of Account B, any partial withdrawals, any loans, and any charges and deductions under the Contracts. A Contract, Applicants assert, will remain in force, without regard to the owner making purchase payments, unless the cash value reduced by any current Surrender Charge, as described below, and any outstanding debt is insufficient to cover the periodic charges and deductions under the Contract and a grace period expires without a sufficient additional payment.

Applicants state that a general condition to the order granting the relief requested in the Application, Applicants agree that to the extent the final version of Rule 6e–3 (or any other rule adopted as the final version of Rule 6e–3(T)) imposes terms or conditions on the granting of exemptive relief of the nature requested in the Application, Applicants shall take such steps as may be necessary to comply with Rule 6e–3. Applicants assert that the relief requested in the application meets the standards of section 6(c), is well precedented, and involves technical matters and matters unforseen when Rule 6e–3(T) was adopted.

Rule 6e–3(T)(c)(1)

Applicants request exemption from Rule 6e–3(T)(c)(1), to the extent necessary to permit, in connection with the Contracts, the allocation of net permiums, and transfer of cash value to Aetna's General Account. Although Applicants do not necessarily agree that the right under the Contracts to allocate or transfer monies to the General Account results in the Contracts not falling within the definition in Rule 6e–3(T)(c)(1), of a "flexible premium variable life insurance contract," Applicants request relief from Rule 6e–3(T)(c)(1) to resolve any question concerning their ability to rely on the rule.

Applicants state that, while Rule 6e–3(T)(c)(1) defines a "flexible premium variable life insurance contract" as a contract "funded by a separate account" and providing for a "cash value which varies to reflect the investment experience of the separate account," it does not require that the contract be exclusively funded by such a separate account, or that the contract provide for a cash value that exclusively varies to reflect the investment experience of the separate account. Applicants assert that the Commission's use of the word "exclusively" elsewhere in Rule 6e–3(T), but not in paragraph (c)(1), suggests it did not intend to require exclusive funding by a separate account, or require cash value that varies exclusively to reflect the investment experience of a separate account. Thus, Applicants submit that the Commission intended to permit allocation of premiums, and transfer of cash value, to general accounts as well as separate accounts.

Applicants further argue that the requested relief is consistent with the Commission's administration of the Act in the context of flexible premium variable life insurance prior to and after the adoption of Rule 6e–3(T), scheduled premium variable life insurance under Rule 6e–2 under the Act, and variable annuities. Applicants recognize that it is the position of the Commission staff that any Commission order granting exemptive relief in this regard will not constitute a judgment of the Commission as to, nor will any such order extend to, the propriety or impropriety of registration or non-registration of either interests in the General Account as securities under the 1933 Act or the General Account as an investment company under the Act.

Rule 6e–3(T)(c)(2) and 6e–3(T)(c)(4)(vii)

Applicants request exemption from paragraphs (c)(2) and (c)(4)(vii) of Rule 6e–3(T) to the extent that the Greater of Monthly Deduction or Basic Premium Benefit (the "Rider") option under the Contract may not be deemed to meet the definition of "incidental insurance benefits" in that paragraph. Applicants state that the Rider provides that, in the event of disability of the insured, as defined therein, the Company will waive during the period of disability the greater of (i) the monthly cost of insurance charge, any expense charges and any rider charges or (ii) the basic premium. The monthly cost of insurance charge can vary with the investment experience of the Variable Account in certain respects. Nevertheless, Applicants argue that the benefits, i.e., the waiver of the monthly cost of insurance and rider charges, is predominantly a fixed benefit. Applicants represent that these charges are waived regardless of how much the cash value and the net amount at risk may vary. Similarly, Applicants argue that the waiver of the basic premium is fixed insofar as the amount waived does not depend on the investment experience of Account B. Thus, Applicants submit that the Rider should be treated as "fixed" for purposes of Rule 6e–3(T).

Sections 2(a)(32), 22(c), (26)a(2), 27(c)(l), 27(c)(2), and 27(d) and Rules 6e–3(T)(b)(12), 6e–3(T)(b)(13)(iii), and 22c–1

Applicants request exemption from sections 2(a)(32), 22(c), 26(a)(2), 27(c)(1), 27(c)(2) and 27(d) and Rule 6e–3(T)(b)(12), (b)(13)(iii), and 22c–1 to the extent necessary to permit an administrative charge for expenses incurred in connection with the issuance of a Contract or the increase of specified amount to be deducted on a contingent deferred basis upon surrender or lapse of the Contract.

Applicants state that the Contract provides for the calculation of the amount of a contingent deferred surrender charge ("Surrender Charge") upon the issuance of the Contract and upon an increase in specified amount. Applicants represent the Surrender Charge set upon the issuance of the Contract has two elements: 30% of the charge is sales load and the remainder is a reimbursement to Aetna for administrative costs it incurs in issuing the Contract. An additional Surrender Charge is set in the event a Contract's specified amount is increased. Applicants state that the amount of the surrender charge (as set forth in surrender charge tables in the prospectus and the Contract) varies depending upon issue age, sex and smoker/non-smoker status of the insured. Applicants also maintain that the Surrender Charge calculated upon an increase in specified amount will be entirely to reimburse Aetna for administrative expenses incurred in processing the increase in the Specified Amount, and will not contain any sales load component.

Applicants state that the administrative charge component of the Surrender Charge is designed to reimburse Aetna for the cost of processing applications, or increases in specified amount, conducting medical examinations, determining insurability and the insured's risk class, and establishing or revising records relating to the Contract. Applicants represent that the Surrender Charge will be deducted only if all or part of cash value of the Contract is withdrawn, or if it lapses after a grace period. Even then no Surrender Charge will be deducted at all for Contracts that stay in force ten years after the issuance of the Contract or increase in specified amount. For each

additional full year that the Contract stays in force subsequent to the fifth anniversary of the issuance or increases, as appropriate, the charge is reduced so that it is eliminated on the tenth anniversary of, as applicable, the issuance or increase in specified amount. The charge imposed on partial surrenders is calculated on a pro rate basis.

Applicants submit that imposition of this administrative charge in the form of a contingent deferred charge, as described above, is much more favorable to the contractowner than would be a charge that is deducted entirely from premiums in the first Contract Year. First, the amount of the contractowner's investment in the Account B is not reduced as it would be if this charge were taken in full in the first Contract year. Second, the total amount charged to an contractowner is not greater than if this charge were taken in full in the first Contract year, and it is less for contractowners who do not lapse or surrender during the first five Contract years. Third, even contractowners who lapse or withdraw during the first five Contract years are benefited because the cost of insurance charges deducted monthly from the amounts credited to them in Account B will be lower than they would have been had this administrative charge for issuance expenses been deducted in full during the first year or upon an increase in specified amount. Fourth, in the event the death benefit is paid under the Contract, no such charge is deducted from the amount payable, thereby increasing the amount otherwise payable. Finally, Applicants argue that under Death Benefit Option 2, the fact that the Surrender Charge has not been deducted will favorably affect the amount of the Death Benefit since cash value will be greater.

Applicants also represent that the administrative charge element of the Surrender Charge does not take into account the time-value of money (which would increase the charge to factor in the investment cost to Aetna of deferring the charge) or the likelihood that not all contractowners will incur the charge (which would increase the charge for those surrendering or lapsing over what they would have paid had all contractowners been required to pay this administrative charge).

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 18, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to: Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Rel. No. 34-23266; File No. SR-MSRB-85-8 Amdt. 1]

Self-Regulatory Organizations; Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Arbitration

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that the Municipal Securities Rulemaking Board ("Board") filed with the Securities and Exchange Commission on March 5, 1985, and amended on May 21, 1986, a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

A. The Municipal Securities Rulemaking Board (the "Board") is filing amendments to rule G-35 relating to arbitration (hereafter referred to as the "proposed rule change") as follows: [1]

Rule G-35. Arbitration

Sections 1 to 4. No change.

Section 5. Initiation of Proceedings

Except as otherwise provided herein, an arbitration proceeding under this Arbitration Code shall be instituted as follows:

(a) No change.

(b) (1) No change.

(2)(i)-(ii) No change.

(iii) A respondent, responding claimant, cross-claimant or third party respondent who fails to file an answer within 20 business days from receipt of service, or unless the time to answer has been extended pursuant to subsection (e) below, may, in the discretion of the arbitrators, be barred from presenting any matter, arguments or defenses at the hearing.

(c) through (f) No change.

Sections 6 to 11. No change.

Section 12. Designation of Number of Arbitrators.

(a) Controversies Involving Persons Other Than Municipal Securities Brokers of Municipal Securities Dealers.

(1) Except as otherwise provided in this Arbitration Code, in all arbitration matters in which a person other than a municipal securities broker or municipal securities dealer is involved and where the matter in controversy does not exceed the amount of [$100,000] *$500,000,* or where the matter in controversy does not involve or disclose a money claim or the amount of damages cannot be readily ascertained at the time of commencement of the proceeding, the Director of Arbitration shall appoint an arbitration panel which shall consist of no less than three nor more than five arbitrators, at least a majority of whom shall not be associated with a broker, dealer or municipal securities dealer unless such person requests a panel consisting of a majority of arbitrators associated with a broker, dealer or municipal securities dealer.

(2) In all arbitration matters in which a person other than a municipal securities broker or municipal securities dealer is involved, and where the amount in controversy exceeds [$100,000] *$500,000,* the Director of Arbitration shall appoint an arbitration panel which shall consist of five arbitrators, *unless the parties agree in writing to a panel of three arbitrators,* at least three of whom shall not be associated with any broker, dealer or municipal securities dealer unless such person requests a panel consisting of a majority of arbitrators associated with a broker, dealer or municipal securities dealer.

(b) No change.

Sections 13 to 19. No change.

Section 20. Adjournments.

(a) The arbitrators may, in their discretion, adjourn any hearing either upon their own initiative or upon the request of any party to the arbitration.

(b) A party requesting an adjournment after arbitrators have been appointed, if said adjournment is granted, shall pay a fee equal to the deposit of costs but not

---

[1] Italics indicate new language; [brackets] indicate deletions.

mroe than $100. The arbitrators may waive this fee or in their award may direct the return of this adjournment fee.

Sections 21 to 35. No change.

* * * * *

B. Not applicable.
C. Not applicable.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) The Uniform Arbitration Code (the "Uniform Code") was developed by the Securities Industry Conference on Arbitration ("SICA"), which is composed of the representatives of the Board, nine other self-regulatory organizations, four public members, and the Securities Industry Association. The Uniform Code, as implemented by the various self-regulatory organizations, has established a uniform system of arbitration procedures throughout the securities industry.

The proposed rule change is intended to conform the provisions of the Board's arbitration code, contained in rule G–35, to recent amendments to the Uniform Code approved by SICA.

a. *Section 5. Initiation of Proceedings.* The current rule does not address instances in which an answer is not submitted within the 20-business-day time limitation required by the rule. The failure to file a timely answer or request an extension of time within which to file an answer with the Director of Arbitration causes delays in arbitration procedures and may operate unfairly against the Claimant.

The proposed rule change would amend section 5(b)(iii) to empower the panel of arbitrators to bar Respondents from presenting any matter, arguments or defenses at the hearing if the answer was not filed within the required time limitation. The proposed rule change would not apply to replies to counterclaims. Such replies are not required and rate filled at the pleasure are not required and are filed at the pleasure of the Claimant.

b. *Section 12. Designation of Number of Arbitrators.* Under the current rule, a panel of five arbitrators is required in cases involving public customers in which the amount in controversy is $100,000 or more. The proposed rule change would amend section 12(a) to give the Director of Arbitration the discretion, when appropriate, to appoint a panel of three or five arbitrators if the amount in controversy is less than $500,000. The ability to choose a panel of three arbitrators would promote economy of efforts and facilitate the scheduling of hearings. This becomes increasingly important in cases which require multiple hearing sessions. The proposed rule change also provides that, if the amount in controversy is $500,000 or more, the parties may agree in writing to a panel of three, rather than five, arbitrators.

Amending this section would make it more consistent with the provision empowering the Director of Arbitration to appoint three of five arbitrators in inter-industry disputes over $100,000. Panels of three have been successfully used in the vast majority of these cases. In addition, it should be noted that the securities industry is the only arbitration forum which appoints larger panels of arbitrators as the amount in controversy increases. The use of smaller panels has been successful in other industry forums.

c. *Section 20. Adjournments.* The proposed rule change would amend section 20 to impose a fee, not to exceed $100, on any party who requests and is granted an adjournment after the arbitrators have been appointed. Its purpose is to discourage frivolous, last-minute requests for postponements of hearing dates in cases in which a panel of arbitrators already has been appointed. Such adjournments frustrate efforts to provide expeditious conclusions to cases.

Under the proposed rule change, the party requesting the adjournment must submit such request in writing and include a check in the amount of the fee. The adversary party would be notified of the request and be given an opportunity to oppose it. The request and any opposition would be submitted to the panel of arbitrators for its consideration. If the request were granted, the panel may, in its discretion, waive the adjournment fee at the time of the request or in its final award.

The proposed rule change is not intended to apply to claims filed under the small claims procedures. It should be noted that it is the standard practice of other arbitration forums to impose adjournment fees.

b. (2) The Board has adopted the proposed rule change pursuant to Section 15B(b)(2)(C) and 15B(b)(2)(D) of the Securities Exchange Act of 1934. Section 15B(b)(2)(C) requires in pertinent part that the Board's rules be designed

> to promote just and equitable principles of trade . . . to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest. . . .

Section 15B(b)(2)(D) states that the Board shall, if it deems appropriate

> provide for the arbitration of claims, disputes, and controversies relating to transactions in municipal securities: Provided, however, That no person other than a municipal securities broker, municipal securities dealer, or person associated with such a municipal securities broker or municipal securities dealer may be compelled to submit to such arbitration except at his instance and in accordance with section 29 of this title.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board does not believe that the proposed rule change will effect any burdens on competition in the municipal securities industry because the proposed rule change will be equally applicable to all participants in the industry.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Board has neither solicited nor received comments on the proposed rule change. The proposed rule change was the subject of extensive discussions by SICA which approved the provisions as part of the Uniform Code.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission

and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 26, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 30, 1986.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 8010-01-M

[Rel. No. 34-23285; File No. SR-MSRB-86-9]

Self-Regulatory Organizations; Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Uniform Practice and Customer Confirmations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 19, 1986, the Municipal Securities Rulemaking Board ("Board") filed with the Securities and Exchange Commission a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

A. The Municipal Securities Rulemaking Board ("Board") is filing amendments to rules G-12(c)(vi)(C) and G-15(a)(iii)(C) relating to inter-dealer and customer confirmation disclosures (hereafter referred to as the "proposed rule change"), as follows:

Rule G-12. Uniform Practice[1]

(a)-(b) No change.

(c) Dealer Confirmations.

(i)-(v) No change.

(vi) In addition to the information required by paragraph (v) above, each confirmation shall contain the following information, if applicable:

(A)-(B) No change.

(C) if the securities are identified by the issuer or sold by the underwriter as subject to federal taxation, a designation to that effect;

[(C)-(G)] renumbered (*D*)-(*H*) (d)-(1) No change.

* * * * *

Rule G-15. Confirmation, Clearance and Settlement of Transactions with Customers [1]

(a) Customer Confirmations.

(i)-(ii) No change.

(iii) In addition to the information required by paragraphs (i) and (ii) above, each confirmation to a customer shall contain the following information, if applicable:

(A)-(B) No change.

(C) if the securities are identified by the issuer or sold by the underwriter as subject to federal taxation, a designation to that effect;

[(C)-(H)] renumbered (*D*)-(*I*) (b)-(e) No change.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.

(a) Municipal securities are defined in Section 3(a)(29) of the Securities Exchange Act as:

> Securities which are direct obligations of, or obligations guaranteed as to principal or interest by, a State or any political subdivision thereof, or any agency or instrumentality of a State or any political subdivision thereof, or any municipal corporate instrumentality of one or more States, any security which is an industrial development bond (as defined in section 103(c)(2) of the Internal Revenue Code of 1954) the interest on which is excludable from gross income under section 103(a)(1) of such Code if, by reason of the application of paragraph (4) or (6) of section 103(c) of such Code (determined as if paragraphs (4)(A), (5) and (7) were not included in such section 103(c)), paragraph (1) of such section 103(c) does not apply to such security.

Section 3(a)(2) of the Securities Exchange Act contains identical language concerning industrial development bonds.

The definition turns on whether the security is an obligation of a state or political subdivision of a state, and not whether income derived from the security is taxable. Board rules, therefore, would apply to transactions in taxable municipal securities.

Recently, there have been several "taxable" issues of municipal securities brought to market. Moreover, under certain proposed revisions to the federal tax code, certain categories of municipal securities may no longer be exempt from federal taxation.

Although under rule G-17, on fair dealing, a dealer should orally advise customers of the taxable status of municipal securities at the time of or prior to execution of a transaction in such securities, the Board's confirmation rules currently have no disclosure requirements regarding transactions in such securities. The Board has determined that such disclosure would be appropriate since the majority of municipal securities likely will continue to be tax-exempt and dealers and customers may find it necessary to preserve a record of transactions in "taxable" municipal securities.

(b) The Board has adopted the proposed rule change pursuant to section 15B(b)(2)(C) of the Securities Exchange Act of 1934, which requires in pertinent part that the Board's rules be designed

> to promote just and equitable principles of trade . . . to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest. . . .

B. Self-Regulatory Organization's Statement on Burden on Competition.

The Board does not believe that the proposed rule change will effect any burdens on competition in the municipal securities industry because the proposed rule change will apply equally to all industry participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others.

The Board has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

---

[1] Italics indicate new language; [brackets] indicate deletions.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 26, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

May 30, 1986.

BILLING CODE 8010-01-M

[Rel. No. 34-23263; File No. SR-NASD-86-10]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change

The National Association of Securities Dealers, Inc. submitted on April 17, 1986 copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to amend Article II, section 1 of the NASD Rules of Fair Practice to change the guidelines for fees that NASD member firms may charge issuers for forwarding proxy and other materials to the issuer's shareholders.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 34-23173) April 24, 1986) and by publication in the Federal Register (51 FR 16124, April 30, 1986). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section 15A and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority. 17 CFR 200.30-3(a).

BILLING CODE 4910-62-M

Aviation Proceedings; Order Adjusting the Standard Foreign Fare Level Index

The International Air Transportation Competition Act (IATCA), Pub. L. 96-192, requires that the Department, as successor to the Civil Aeronautics Board, establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically by percentage changes in actual operating costs per available seat-mile. Order 80-2-69 established the first interim SFFL and Order 86-4-19 set the currently effective two-month SFFL applicable through March 31, 1986.

In establishing the SFFL for the two-month period beginning June 1, 1986, we have projected nonfuel costs based on the year ended March 31, 1986 data, and have determined fuel prices on the basis of the latest experienced monthly fuel cost levels as reported to the Department.

By Order 86-5-102 fares may be increased by the following adjustment factors over the October 1, 1979, level:

Atlantic	1.0288
Latin America	1.1915
Pacific	1.2447
Canada	1.2560

For further information contact: Julien P. Schrenk (202) 472-5126.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared for a proposed highway improvement in Walworth County, Wisconsin.

FOR FURTHER INFORMATION CONTACT: Mr. Michael M. Moravec, Environmental Coordinator, Federal Highway Administration, 4502 Vernon Boulevard, Madison, Wisconsin 53705. Telephone (608) 264-5947.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Wisconsin Department of Transportation, will prepare an EIS for transportation improvements to State Trunk Highway (STH) 120 in Walworth County, Wisconsin. The study area is located north of the Illinois-Wisconsin state line, extending approximately four miles from County Trunk Highway BB in the Town of Linn, northerly through the City of Lake Geneva to STH 36. Planning, environmental, and engineering studies are underway to develop transportation improvement alternatives. The EIS will assess the need, location, and environmental impacts of alternatives including: (1) The no-build alternative; (2) Reconstruction of the existing roadway; and (3) A bypass to the east of the existing route

The section of STH 120 under study has a high accident rate due to its limited vehicular capacity, poor roadway geometrics, and heavy traffic. For many years, there has been interest in improving safety and relieving congestion in this transportation corridor.

Coordination and scoping activities will begin soon and will involve agencies that are identified as having an interest in or jurisdiction by law regarding the proposed action. Agencies will be notified by mail of the date of the formal scoping meeting. In addition, coordination will continue with local units of government, private interest groups, and local citizens, including public meetings.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified. Comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued on May 27, 1986.

Frank M. Mayer,

Division Administrator.

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

Petitions for Exemption From the Vehicle Theft Prevention Standard; Volkswagen of America, Inc.

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Grant of petition for exemption.

SUMMARY: Volkswagen of America, Inc. petitioned the agency for an exemption from the marking requirements of the vehicle theft prevention standard for the Audi 5000S passenger car line, pursuant to the provisions of section 605 of the Motor Vehicle Information and Cost Savings Act. The agency has determined that the antitheft device which the petitioner intends to install on that line as standard equipment is likely to be as effective in reducing and deterring motor vehicle theft as would compliance with the parts marking requirements of the standard. Therefore, the agency grants the petition.

DATE: The exemption granted by this notice will become effective beginning with the 1987 model year.

SUPPLEMENTARY INFORMATION: On December 13, 1985, Volkswagen of America, Inc. (VWoA) petitioned the agency for an exemption from the parts marking requirements of the vehicle theft prevention standard (49 CFR Part 541), pursuant to section 605 of the Motor Vehicle Information and Cost Savings Act. On January 7, 1986 (51 FR 706), NHTSA published an interim final rule establishing requirements to be followed by manufacturers in preparing and submitting petitions for exemption during model year 1987 (49 CFR Part 543). VWoA submitted supplemental information in a letter dated February 4, 1986, to meet the requirements for petitions in Part 543, and requested an exemption for the Audi 5000S passenger car line. The agency reviewed the material submitted by VWoA with its letters and concluded that VWoA had met the requirements for petitions in Part 543.5, as of February 5, the date on which the last VWoA letter was received by the agency. Accordingly, the 120-day period for processing VWoA's petition began on that date since, as provided by section 543.7, the processing of a petition does not begin until the petition is complete.

In its petition, VWoA described an antitheft device that is activated by removing the key from the ignition and locking the driver's door. These two steps render the starter motor non-functional. They also arm an audible alarm which is triggered by sensors in the doors, trunk, engine hood and radio.

The agency has determined that installation of VWoA's device in the Audio 5000S is likely to be as effective as that line's compliance with the parts marking requirements of Part 541 in reducing and deterring vehicle theft. This determination is based on the information submitted by VWoA with its petition and on other available information. The agency believes that the device will provide the types of performance listed in § 543.6(a)(2), i.e.,

BEST COPY AVAILABLE

promote activation, attract attention to unauthorized entries, prevent defeating or circumventing of the device by unauthorized persons, prevent operation of the vehicle by unauthorized entrants, and ensure the reliability and durability of the device.

As required by section 605(b) of the statute and § 543.6(b), the agency also thinks that VWoA has provided viable reasons for its belief that the antitheft device will reduce and deter theft. This conclusion is based on VW's discussion of the National Crime Information Center (NCIC) theft data and this agency's Preliminary Regulatory Evaluation analysis of theft date for the Nissan 280 ZX/300 ZX car lines. The standard equipment antitheft device in both the 1984 Nissan 300 ZX and the Audi 5000S care lines have very similar methods of encouraging activation and preventing defeat. The NCIC data shows that the theft rate for the 1984 Nissan 300 ZX cars is approximately 50 percent less than that of the 1983 280 ZX models which lacked the antitheft devices. VW state that its antitheft device contains additional protective features, which VW believes will result in its device reducing and deterring theft to the same degree as the Nissan device.

As an aside, the agency notes that the limited and apparently conflicting data on the effectiveness of the pre-standard parts marking programs makes it difficult in this first year of the theft legislation's implementation to compare the effectiveness of an antitheft device with the effectiveness of compliance with the theft prevention standard. The statute clearly requires such a comparison, which the agency has made on the basis of the limited data available.

For the reasons stated above, the agency grants VWoA's petition for exemption from the parts marking requirements of Part 541 for the Audi 5000S care line based on substantial evidence that this standard equipment antitheft device is likely to be as effective in reducing and deterring theft of this line as compliance with Part 541 would be. This exemption will become effective beginning with the 1987 model year.

NHTSA notes that if VWoA wishes in the future to modify the device on which this exemption is based, the company may have to submit a petition to modify the exemption. Section 543.7(c) provides that an exemption granted under Part 543 applies only to vehicles which are equipped with the antitheft device on which the exemption of the line including those vehicles was based. Further § 543.9(b)(2) provides for the submission of petitions "(t)o modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in that exemption."

The agency wishes to minimize the administrative burden which § 543.9(b)(2) could place on exempted vehicle manufacturers and itself. The agency does not believe that Congress intended, in providing for the exemption process, to require the submission of a modification petition for every change, no matter how insubstantial, in the components or design of an antitheft device. The significance of many such changes could be *de minimis*. Therefore, NHTSA reserves the authority to consider as *de minimis* any changes whose effects might be so characterized, and to advise a manufacturer that a modification petition is not required.

(15 U.S.C. 2025, delegation of authority at 49 CFR 1.50)

Issued on June 2, 1986.

Diane K. Steed,

Administrator.

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Supplement to Department Circular—Public Debt Series—No. 20-86]

Treasury Notes, Series K-1991

Washington, May 29, 1986.

The Secretary announced on May 28, 1986, that the interest rate on the notes designated Series K-1991, described in Department Circular—Public Debt Series—No. 20-86 dated May 21, 1986, will be 7-⅛ percent. Interest on the notes will be payable at the rate of 7-⅛ percent per annum.

John A. Kilcoyne,

Acting Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

UNITED STATES INFORMATION AGENCY

A Grants Program for Private Not-For-Profit Organizations in Support of International Educational and Cultural Activities

The United States Information Agency (USIA) announces a program of selective assistance and limited grant support to non-profit activities of United States institutions and organizations in the Private Sector. The primary purpose of the program is to enhance the achievement of the Agency's international public diplomacy goals and objectives by stimulating and encouraging increased private sector commitment, activity, and resources. The information collection involved in this solicitation is covered by OMB Clearance Number 3116-0175, entitled "A Grants Program for Private Organizations," expiration date January 31, 1987.

Private sector organizations interested in working cooperatively with USIA on the following concept are encouraged to so indicate:

Transition from Military to Civilian Democratic Rule: The Office of Private Sector Programs, Initiative Grants/Bilateral Accords Division will develop a series of seven-day international workshops on the transition of military-dominated political systems to enduring civilian democratic governments. The first workshop will examine the transition issue with special reference to the analytical factors which contributed to the development of civilian democratic government in South America and the Iberian peninsula. Tentatively scheduled for the fall 1986, the first workshop will take place either in the United States or in South America.

Your submission of a letter indicating interest in the above project concept begins the consultative process. This letter should further explain why your organization has the substantive expertise and logistical capability to sucessfully design, develop and conduct the above project. While not restricted by region, USIA would prefer proposals from U.S. non-profit institutions located in the southern part of the U.S., or from institutions which demonstrate their ability to conduct the first workshop in South America through strong logistical support from a Latin American cosponsoring institution.

Emphasis during the preliminary consultative process will be on identifying organizations able to meet the above criteria. Furthermore, USIA is most interested in working with organizations that show promise for innovative and cost-effective programming; and with organizations that have potential for obtaining third-party private-sector funding in addition to USIA support. Organizations must also demonstrate a potential for designing programs which will have a lasting impact on their participants. In your response, you may also wish to include other pertinent background information. To be eligible for consideration, organizations *must*

BEST COPY AVAILABLE

postmark their general letter of interest within 20 days of the date of this notice.

This is not a solicitation for grant proposals. After consultation, selected organizations will be invited to prepare proposals for the financial assistance available.

Office of Private Sector Programs, Bureau of Educational and Cultural Affairs (Attn: Initiative Grants/ Bilateral Accords Division), United States Information Agency, 301 4th Street SW., Washington, D.C. 20547.

Dated: May 23, 1986.

Albert Ball,

Deputy Director, Office of Private Sector Programs.

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains a request for an extension and revison of a form and lists the following information: (1) The department or staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) how often the form must be filled out, (5) who will be required or asked to report, (6) an estimate of the number of responses, (7) an estimate of the total number of hours needed to fill out the form, and (8) an indication of whether section 3504 (h) of Pub. L. 96-511 applies.

ADDRESSES: Copies of the form and supporting documents may be obtained from Nancy C. McCoy, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 389-2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503, (202) 395-7316.

DATES: Comments on the information collections should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: May 30, 1986.

By direction of the Administration.

Jack J. Sharkey,

Director, Office of Data Management and Telecommunications.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT:

STATUS: Closed/open meetings.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Wednesday, May 21, 1986.

CHANGE IN THE MEETINGS: Deletion/rescheduling.

A closed meeting scheduled for Wednesday, May 28, 1986, at 2:30 p.m., to consider the following items, has been cancelled.

Settlement of administrative proceedings of an enforcement nature.
Institution of administrative proceedings of an enforcement nature.
Report of investigation.

An open meeting scheduled for Thursday, May 29, 1986, at 3:30 p.m., has been rescheduled for Thursday, June 12, 1986, at 2:30 p.m.

The Commission will hear oral argument on appeals by Rooney Pace, Inc., a registered broker-dealer, Randolph K. Pace, its president, and the Commission's Division of Enforcement, from an administrative law judge's initial decision. For further information, please contact R. Moshe Simon at (202) 272-7400.

The subject matter of the closed meeting scheduled for Thursday, May 29, 1986, has been rescheduled for Thursday, June 12, 1986, following the 2:30 p.m. open meeting.

Post oral argument discussion.

Commissioner Fleischman, as duty officer, determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kathryn Natale at (202) 272-3195.

Shirley E. Hollis,
Acting Secretary.
June 2, 1986.

Part II

Department of Housing and Urban Development

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

Housing Development Grant Program; Notices

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-86-1603; FR-2236]

Housing Development Grant Program

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Invitation for applications.

SUMMARY: This Notice invites any unit of general local government, including cities, counties, towns or townships, parishes, villages or other general purpose political subdivisions of a State, and any State, acting on behalf of, and with the concurrence of, units of general local government, to submit applications for grants under HUD's Development Grant Program. The Grant funds awarded under the program will be used to support the construction or substantial rehabilitation of residential rental, cooperative or mutual housing in which at least 20 percent of the units will be occupied by lower income families. Applicants that responded to the June 20, 1984, or February 13, 1985, Invitation for Applications must reapply to be considered for funding. A revised or a new proposal may be submitted which is consistent with the guidance provided in this Invitation for Applications, the revised (May, 1986) Application Packet and the List of Designated Eligible Areas published in this **Federal Register** issue. Neither Fiscal Year 1986 funds, nor recaptured or cancelled funds from previously awarded grants will be set aside to fund projects which were submitted in response to previous Invitations for Applications.

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Jessica Franklin, Acting Director, Housing Development Grant Division, Room 6110, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, Telephone (202) 755-6142 (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: The statutory authority for the Housing Development Grant Program is provided by Section 17 of the U.S. Housing Act of 1937. Section 17 was added to the U.S. Housing Act of 1937 by Section 301 of the Housing and Urban-Rural Recovery Act of 1983 (Pub. L. 98-181) which was enacted on November 30, 1983. On June 14, 1984, HUD published interim implementing regulations for the new program (see 49 FR 24634). The interim regulations were effective on August 7, 1984, and continue to apply to this program.

Program Funds

HUD has been authorized to provide $72,175,000 in Housing Development Grant funds during Fiscal Year 1986. Funds recaptured or cancelled from previously awarded projects will be added to this new authorization. An estimate of these funds is not available at this time. HUD estimates that the authorized funds will be adequate to support applications for approximately 4,000 units of rental, cooperative or mutual housing.

Nature of and Limits on Program Assistance

Under the Housing Development Granf Program, HUD provides grants to units of general local government, including cities, counties, towns, townships, parishes, villages, or any other general purpose political subdivision of a State, and to States, acting on behalf of, and with the concurrence of, units of general local government. These grantees, in turn, may use the grant funds to provide either grants, loans, interest reduction payments, rental assistance payments, or other forms of assistance to promote the construction or substantial rehabilitation of residential rental, cooperative or mutual housing. The maximum grant that may be approved for a project is limited to an amount sufficient to produce decent rental housing of modest design that is affordable by families and individuals without other reasonable and affordable housing alternatives in the private market. Grant assistance may not exceed 50 percent of the total costs associated with the rehabilitation or construction of the project, normally excluding the cost of acquisition, debt service and operating deficit reserves, working capital, sponsor profit and risk allowance, and relocation costs in excess of an amount that HUD determines to be reasonable. Under certain limited circumstances, HUD may permit the cost of acquisition to be included in the base amount to which the 50 percent limitation is applied. The program regulations and the application packet to be distributed to prospective applicants provide guidance on the circumstances under which the inclusion of acquisition cost may be permitted.

Eligible Applicants/Grantees

Any unit of general local government, or any State, acting on behalf of, and with the concurrence of, units of general local government is eligible to apply for and receive grant assistance under the Housing Development Grant Program. For purposes of qualifying as an eligible applicant under this program, the term "unit of general local government" means any city, county, town, township, parish, village or other general purpose political subdivision of a State; any Indian tribe as defined in section 102(a)(17) of the Housing and Community Development Act of 1974; and the District of Columbia, Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States. Entities that qualify as "States" include each of the several States and the Commonwealth of Puerto Rico. Applications from "State" applicants must be signed by the Governor. Housing Finance Agencies are not eligible to apply.

Previously Submitted Applications

Applications submitted under this program in response to the June 20, 1984, or February 13, 1985, Invitation for Applications will not be considered for funding. A revised or a new proposal may be submitted which is consistent with the guidance provided in this Invitation for Applications, the revised (May, 1986) Application Packet and the List of Designated Eligible Areas published in this **Federal Register** issue. Neither Fiscal Year 1986 funds, nor recaptured or cancelled funds from previously awarded grants will be set aside to fund projects which were submitted in response to previous Invitations for Applications.

Eligible Types of Applications

There are three types of applications eligible for submission under this program:

(1) *Eligible Area Application*—This is an application for a project located in an area determined by HUD, on the basis of statutorily prescribed factors, to be experiencing a severe shortage of decent rental housing opportunities for families and individuals without other reasonable and affordable alternatives in the private market. Notwithstanding the determination of a rental housing shortage based upon statutorily prescribed factors, any city shall also be designated as an eligible area if (a) according to the most recent data compiled by the U.S. Bureau of the Census, such city has a population of not less than 450,000; and (b) the percentage of the total rental units in such city that are vacant and available for rent is less than 10 percent. HUD's

list of designated eligible areas (i.e., units of general local government, including cities, counties, towns or townships, parishes, villages or other general purpose political subdivision of a State) is published elsewhere in today's issue of the Federal Register.

(2) *Special Housing Need Application*—This is an application for a project that is not located in a designated eligible area, but is intended to meet a special housing need that cannot be met through the moderate rehabilitation of housing stock located in the project neighborhood. A special need application must address either a special renter group need (e.g., need for housing to accommodate large families), or a special need resulting from a rapid change or other dislocation in the housing market that has occurred since the taking of the 1980 Census (e.g., need resulting from rapid population growth or dislocation) provided the current rental vacancy rate is less than seven (7) percent.

(3) *Neighborhood Preservation Purpose Application*—This is an application for a project that is not located in a designated eligible area, but is intended to advance a particular neighborhood preservation purpose that cannot be advanced through moderate rehabilitation of housing stock located in the project neighborhood. The proposed project must be located in a neighborhood preservation area in which concentrated housing, physical development, and public service activities are being carried out in a coordinated manner pursuant to a locally developed strategy for neighborhood improvement, conservation, or perservation.

Project Eligibility

To be eligible for assistance under the Housing Development Grant Program, a project must involve new construction or substantial rehabilitation. For purposes of this program, "substantial rehabilitation" is defined as repairs, replacements and improvements, (a) the cost of which exceeds the greater of 15 percent of the property's value after rehabilitation or $6,500 per dwelling unit (adjusted by an appropriate supportable local high cost factor), or (b) which entail the replacement of more than one major building component (e.g., roof structure; ceiling, wall or floor structures; plumbing system; or electrical system). Projects must be designed primarily for nontransient, residential rental use and may not contain special purpose space (e.g., medical facilities) requiring specialized features which increase the cost of construction. Generally, not more than 10 percent of the gross floor area of a project may be utilized for commercial purposes. HUD may approve commercial space of up to 20 percent of the gross floor area if special conditions warrant exceeding the 10 percent limit. (This restriction applies to all functionally related facilities on the project site notwithstanding the fact that the commercial space is separated from the residential units by condominium ownership.) Cooperative and mutual housing projects are eligible under this program, but must be controlled to assure the continued availability and affordability of at least 20 percent of the units to lower income households. For a project with two or more sites, all sites must be located within the same neighborhood and within a three block radius of each other. Further, each site must contain both lower income and market rate units.

The lower income units must be of the same construction type, but need not contain the same amount of floor space or interior amenities as the market rate units. The exterior of the lower income units must be indistinguishable from the exterior of the market rate units. The estimated value of a project after construction or substantial rehabilitation may not exceed the amount of mortgage that could be insured for the project under Section 207 of the National Housing Act based on the sum of the statutory per-unit limits (adjusted by the appropriate supportable local high-cost factor) and an allowance determined by HUD for costs not attributable to dwelling use (including costs for commercial space).

Projects currently assisted (or for which assistance is anticipated) under any other Federal housing assistance program or which were formerly owned by HUD are ineligible for assistance under this program.

Minimum and Maximum Project Size Limitations

Applications may not be submitted in response to this IFA for projects containing fewer than 20 or more than 200 dwelling units.

Applicability of Gautreaux Consent Decree

Applications for projects to be developed within the Chicago, Illinois SMSA must comply with all applicable requirements of the Gautreaux Consent Decree. For further information on such requirements, prospective applicants should contact the HUD Chicago Regional Office (Attention: Ms. Mary Anderson) by calling (312) 353–6616. (This is not a toll-free number.)

Other Program Requirements

The following are additional requirements of the Housing Development Grant Program which are not mentioned elsewhere in this Notice:

(1) *Lower Income Units.* At least 20 percent of the units in any project assisted under the Housing Development Grant Program must be occupied, or available for occupancy, by lower income households (i.e., families or individuals whose incomes do not exceed 80 percent of the area median income, with adjustments, determined by HUD) during the period beginning when the project is initially available for occupancy and ending 20 years from the date on which 50 percent of the project units are first occupied. Owners must reexamine the income of each household occuping a lower income unit at least once a year.

(2) *Lower Income Unit Rents.* Rents (including utilities) charged for the units designated for lower income occupancy may not exceed 30 percent of the adjusted income for a family whose income equals 50 percent of the area median income, as determined by HUD with adjustments for smaller and larger families. HUD will provide the median income data and standard income adjustments to be used by owners in establishing the maximum rents for lower income units.

(3) *Restriction on Conversions.* During the 20 year period starting when the project is initially available for occupancy, owners may not convert units to condominium ownership or any form of cooperative ownership which would be ineligible for assistance under the Housing Development Grant Program.

(4) *Marketing and Tenant Selection.* In renting units, owners may not discriminate against prospective tenants because of their eligibility for, or receipt of, housing assistance under any Federal, State or local housing assistance program, or because they have children (unless the units in a project are designated for occupancy only by the elderly). An owner must have a HUD-approved Affirmative Fair Housing Marketing Plan and must carry out all marketing activities in accordance with HUD's Affirmative Fair Housing Marketing Regulations at 24 CFR Part 200, Subpart M.

(5) *Displacement/Relocation.* A project may not be assisted under the Housing Development Grant Program if its development will cause the involuntary displacement of very low-income households from the project site by households which are not very low-

income. The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 and HUD's implementing regulations (24 CFR Part 42) apply to any displacement resulting from acquisition by a State agency, as defined in 24 CFR 42.85. Note that revised Uniform Relocation Act regulations took effect on May 1, 1986. See 51 FR 7010, February 27, 1986. In any case where there will be project-related displacement or relocation and the Uniform Act is not applicable, the following requirements apply:

(a) The applicant (grantee) must have a written tenant assistance policy;

(b) No tenant may be required to move permanently unless provided adequate advance written notice and appropriate advisory services;

(c) Lower income tenants required to move permanently must receive adequate advance notice, appropriate advisory services, and financial assistance sufficient to obtain decent, safe, sanitary, and affordable replacement housing;

(d) Lower income tenants required to move temporarily must be provided with: decent, safe and sanitary temporary housing; financial assistance to cover reasonable moving expenses and any increase in monthly housing costs during the temporary relocation period; and an opportunity to occupy a unit in the newly constructed or substantially rehabilitated project at rent levels determined by 24 CFR 813.107(a).

(6) *Construction and Design Standards.* The HUD Multifamily Minimum Property Standards will not apply to projects under the Housing Development Grant Program unless they are HUD-insured. All projects must, however, meet applicable State and local building codes.

(7) *Environmental Standards.* Projects are subject to Section 104(f) of the Housing and Community Development Act of 1974, the National Environmental Policy Act of 1969, and will be subject to HUD's implementing regulations at 24 CFR Part 58. Under this program, the applicant/grantee, not HUD, is responsible for performing an environmental assessment of the proposed project, as necessary, in accordance with the requirements of 24 CFR Part 58. Certifications of compliance must be submitted with the application.

(8) *Labor Standards.* Projects consisting of 12 or more units are subject to the prevailing wage requirements of the Davis-Bacon Act and the provisions of the Contract Work Hours and Safety Standards Act. (Since the minimum project size is 20 units, all HDG projects are subject to these Acts.)

(9) *HAP Consistency.* A proposed project must be consistent with any applicable local Housing Assistance Plan approved by HUD.

(10) *OMB Circulars.* The policies, guidelines and requirements of OMB Circulars A–102 Revised (Uniform Administrative Requirements for Grants-in-Aid to State and Local Governments), A–122 (Cost Principles for Non-profit Organizations), A–87 (Cost Principals Applicable to Grants, Contracts and Other Agreements with State and Local Governments), and 24 CFR Part 44 implementing A–128 (Single Audit Act) apply to this program.

(11) *Intergovernmental Review.* The provisions of Executive Order 12372 and HUD's implementing regulations at 24 CFR Part 52 apply to this program. Applicants are required to submit applications directly to the reviewing body.

(12) *Debarred, Suspended or Ineligible Contractors.* HUD's regulations at 24 CFR Part 24 relating to the use of debarred, suspended or ineligible contractors or subcontractors apply to this program. Grantees will be responsible for assuring that such contractors or subcontractors are not used for projects assisted under this program during any period of debarment, suspension or placement in ineligibility status.

(13) *Flood Insurance.* No site proposed for a project to be assisted under this program may be located in an area that has been identified by the Federal Emergency Management Agency (FEMA) as having special flood hazards, unless the community in which the area is situated is participating in the National Flood Insurance Program, or less than a year has passed since FEMA notification regarding such hazards, and the applicant (grantee) will assure that flood insurance on the structure is obtained in compliance with Section 102(a) of the Flood Disaster Protection Act of 1973.

(14) *Nondiscrimination and Equal Opportunity.* Grantees and owners must comply with the requirements of Title VIII of the Civil Rights Act of 1968, 42 U.S.C. 3601–19 (Pub. L. 90–284) and implementing regulations, Executive Order 11063 and implementing regulations at 24 CFR Part 107, and Title VI of the Civil Rights Act of 1964 (Pub. L. 88–352) and implementing regulations at 24 CFR Part 1. Under Title VI and 24 CFR Part 1, no determination regarding the selection of a site or location of a Federally assisted project may be made with the purpose of or effect of excluding individuals from, or denying them the benefits of, or subjecting them to discrimination on the basis of race, color, or national origin, or with the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of Title VI or 24 CFR Part 1. Grantees and owners must also comply with prohibitions against discrimination on the basis of age under the Age Discrimination Act of 1975 (42 U.S.C. 6101–07) and the prohibitions on discrimination against handicapped individuals under Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794); the requirements of Executive Order 11246 and the regulations issued under the Order at 41 CFR Chapter 60; and the requirements of Section 3 of the Housing and Urban Development Act of 1968.

(15) *Minority and Women's Business Enterprise Opportunity.* The grantee and owner must prepare, implement and maintain a minority and women-owned business development plan which shall contain specific and measurable goals and an affirmative strategy to promote awareness and participation by such businesses in the contracting and procurement activities generated by the project.

(16) *Administrative Costs.* Grant funds may not be used for administrative costs incurred by an applicant/grantee in carrying out its responsibilities under the Housing Development Grant Program. Such administrative costs include, but are not limited to, staff and consultant salaries and operating expenses of the applicant/grantee.

(17) *Construction Start Deadline.* Project construction or rehabilitation must commence within 24 months of HUD's notice of application selection.

(18) *Owner-Grantee Agreement.* The owner and grantee must enter into an agreement requiring the owner to comply with certain statutory and regulatory restrictions (e.g., items (1), (2), and (3) above). The grantee will be responsible for assuring that the owner complies with the agreement even if the grantee delegates responsibility for administration of the project to another entity. Any Housing Development Grant assistance provided to the owner will constitute a debt payable in the event of failure to comply with the Agreement. In the event of an uncorrected violation, the owner will be required to pay the grantee an amount equal to the total amount of the grant assistance (plus interest thereon at a rate determined by HUD based on the Federal Government's borrowing rate) less 10 percent for each year in excess of 10

years from the effective date of the agreement. The owner's contingent debt must be secured by a security instrument (e.g., a lien against the property). The owner(s) and lender(s) must agree that the requirements of 24 CFR 850.151 (b), (c), (d) and (e) will be imposed as covenants running with the land or deed restrictions for the Project Term as defined in the Grant Agreement.

Application Submission Requirements

The application submission requirements are described in general terms in § 850.33 of the program regulations. The Application Packet that HUD will make available to prospective applicants will describe in much greater detail the required contents of an application and will contain detailed guidance to assist applicants in preparing acceptable applications.

HUD Review and Selection of Applications

Applications will be reviewed both by HUD Headquarters and by HUD Field Offices. Filed Offices will be responsible for making review comments and recommendations, but all selections will be made by Headquarters. HUD may request clarification of information in the application after the deadline for submission has passed. Where there is no documentation or the documentation provided is clearly insufficient to make appropriate determinations, the application may be rejected.

To be considered eligible for ranking and possible selection, an application must meet all threshold requirements. The threshold requirements are specified in the program regulations at 24 CFR 850.37.

HUD will rate and rank applications on the basis of the following factors (maximum number of points to be awarded for each factor is shown in parentheses).

(1) *Shortage of decent affordable housing (28 points).* HUD will consider two separate elements under this factor. More favorable consideration will be given to those projects that are located in areas with lower rental vacancy rates in the jurisdiction as a whole and in all lower income census tracts in the jurisdiction (or where requested in the application and approved by HUD, in the market area).

(2) *Leveraging ratios (20 points).* HUD will consider two separate elements under this factor. More favorable consideration will be given to projects with higher project leveraging ratios (i.e., total private and non-Federal public financial resources committed to the project divided by the requested grant amount) and higher private project leveraging ratios (i.e., total private financial resources committed to the project divided by the requested grant amount).

(3) *Neighborhood development and mitigation of displacement (2 points).* HUD will consider two separate elements under this factor. More favorable consideration will be given to those projects that have a more favorable effect on neighborhood development and that cause little or no displacement or that provide for effective mitigation of displacement.

(4) *Demonstrated performance and capacity (2 points).* HUD will consider the applicant's record of performance in meeting its assisted housing needs and the applicant's capacity to commence and carry out the project in a timely manner. More favorable consideration will be given to those with the better record of performance in meeting annual and three-year Housing Assistance Plan goals and administering programs of federally assisted housing.

(5) *Efficient use of grant funds (10 points).* HUD will consider the extent to which the housing development grant requested will provide the maximum number of units for the least cost to the Federal government. More favorable consideration will be given to projects wih the better performance in achieving this result, and where the grant is to be repaid to the Grantee under conditions specified in the Application Packet. HUD has developed least cost ratios to account for differences in unit size (number of bedrooms), types of tenants being served, financing alternatives, construction costs, and project type.

(6) *Rent affordability (3 points).* HUD will consider two elements under this factor. More favorable consideration will be given to projects that provide a more effective mechanism for assuring that rents for lower income units meet the rent requirements of § 850.151(e) of the program regulations, and that provide the greater amount of assistance, if any, to assure that rents are affordable for very low-income households.

(7) *Financial feasibility (10 points).* All projects must present adequate documentation of firm financial commitments. However, the strength of these commitments, e.g., the level of documentation and absence of qualifying conditions above and beyond the minimum threshold, will determine the points earned in this subcategory. Another subcategory of determination will be based upon project rents, costs and expenses. Projects will be rated as to (a) feasibility of rents, reasonableness of costs and expenses, and (b) financial feasibility over the Project Term.

(8) *Family housing (15 points).* More favorable consideration will be given to projects that provide the greater number of units for families and for large families with children. Assisted units with an average bedroom size of 3 or more and projects with the highest overall average bedroom size above 2 will receive the maximum points.

(9) *Minority and women's business enterprise (5 points).* Points will be awarded to applications that include a certification that controlling project ownership will be vested in, and exercised by, minority persons and women.

(10) *Promoting nondiscrimination and equal opportunity (5 points).* HUD will take into account the present pattern of assisted housing location and occupancy. Favorable consideration will be given to projects that are located (a) outside areas of minority concentration where the current pattern shows most assisted projects in minority areas, or (b) in areas where there is no other assisted housing, or (c) in areas undergoing revitalization through public or private investment and in which rental opportunities for lower income households are declining.

Priority Projects/Bonus Points

In making selections, HUD will give priority (up to 15 bonus points) to projects located in areas where waiting lists for housing assistance are relatively long and where Section 8 certificate-holders require an excessive length of time to find housing, provided that more than 25 percent of the units will be made available for occupancy by lower-income families.

More specific information on how HUD will rate applications on the selection criteria and apply the selection priority will be provided to prospective applicants in the Application Packet.

Where To Obtain Application Packets

Beginning on June 16, 1986, Application Packets containing all required application forms and exhibits, detailed application instructions, and pertinent program guidance may be obtained from the HUD Field Offices listed in Appendix A of this Notice. Each prospective applicant should obtain and carefully review an application packet before attempting to prepare an application for submission to HUD.

Deadline for Submission of Applications

The deadline for application submission is July 21, 1986, at both

Headquarters and the local HUD field office covering the jurisdiction in which the project is located. Close of business for Headquarters in Washington, DC is 5:15 p.m. EDT. The addresses, locations and commercial telephone numbers of each local field office are included in Appendix A of this publication. Obtain information on the official close of business directly from the respective office.

Announcements and Awards

Grant awards will be announced no later than September 30, 1986. Projects that do not win an award will receive written notification.

Other Information

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the office of the General Counsel, Rules Docket Clerk, at the above address.

The collection of information requirements referenced in this notice have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB control number 2502-0523.

The Catalog of Federal Domestic Assistance program number for this program is 14.174.

Authority: Sec. 17(d), United States Housing Act of 1937 (42 U.S.C. 1437(o)); Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: May 28, 1986.

Silvio J. DeBartolomeis,

General Deputy Assistant Secretary for Housing.

BILLING CODE 4210–27–M

[Docket No. N–86–1809; FR–2248]

Housing Development Grant Program; List of Designated Eligible Areas

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: In accordance with 24 CFR 850.13, this Notice lists those entities that the Secretary has determined meet the minimum standards for designated eligible areas under the Housing and Urban Development Grant Program.

FOR FURTHER INFORMATION CONTACT: Jessica Franklin, Acting Director, Housing Development Grant Division, Room 6110, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000, telephone (202) 755–6142. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Section 301 of the Housing and Urban-Rural Recovery Act of 1983 (Pub. L. 98–181, approval November 30, 1983) added a new section 17 to the United States Housing Act of 1937 (the 1937 Act) (42 U.S.C. 1437(o)) which, among other things, established the Housing Development Grant Program.

Under the Program, HUD is authorized to make grants to cities, counties and other general purpose political subdivisions of a State, or to a State, acting on behalf of units of general local government, to be used to support the new construction or substantial rehabilitation of primarily residential rental projects. An application must fall within one of three categories to receive consideration for funding. The application must be (1) from an applicant located in a designated eligible area (2) meet a special housing need, or (3) advance a particular neighborhood preservation purpose. This Notice concerns designated eligible areas, which section 17(d)(2) of the 1937 Act defines as areas determined by HUD to be experiencing a severe shortage of decent rental housing opportunities for families and individuals without other reasonable and affordable housing alternatives in the private market.

Section 17(d)(2) of the 1937 Act requires HUD to establish minimum standards for determining designated eligible areas, taking into account certain statutory conditions and other objectively measurable conditions specified by the Secretary. These conditions are set out in 24 CFR 850.13(b) which also provides that from time to time HUD will publish a Notice in the **Federal Register** listing those areas that have been so determined. This Notice is published in accordance with this requirement.

Areas which are not designated eligible areas may still be considered for Housing Development Grants for projects that meet special housing needs or advance neighborhood preservation purposes (see the HDG Application Packet, Revised, May, 1986 for instructions on how to apply under these circumstances. Cities, counties, towns, townships, parishes, villages, cities and other general purpose subdivisions of a State may submit applications under the special needs or neighborhood preservation criteria on their own behalf. States may also submit such applications on behalf of, and with the concurrence, of units of general local government (see 24 CFR 850.15)).

The following is a list of those areas that have been determined by HUD, based upon current U.S. Census estimates, to be designated eligible areas. Because of Census updates, many of the areas that were designated eligible in the June 20, 1984, Notice will not be eligible in this Notice. However, such areas, with the exception of Urban Counties, may submit an application under the special housing needs or neighborhood preservation procedures. Urban Counties are no longer eligible to apply in accordance with the current statute. Counties, on the other hand, are eligible. Many counties appear in this Notice as designated eligible areas. With the exception of eligible counties, all eligible areas may be found by identifying first the state, second the county in which the desired area is located and finally the community (city, town, village, etc). Eligible counties, by State, are found on a separate listing at the end of the list for all other areas.

Briefings on How To Use the Federal Register—
For information on briefings in Seattle, WA, and San Francisco, CA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

VOL 51 ISS 109 JE 6 1986 UMI

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium, Fourth Floor, Federal Building, 915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:

Seattle 206-442-0570
Tacoma 206-383-5230
Portland 503-221-2222

SAN FRANCISCO, CA

WHEN: July 24; at 1:30 pm.

WHERE: Room 2007, Federal Building, 450 Golden Gate Avenue, San Francisco, CA.

RESERVATIONS: Call the San Francisco Federal Information Center, 415-556-6600

Rules and Regulations

Federal Register
Vol. 51, No. 109
Friday, June 6, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 26

Determination of World Price for Certain Commodities; Upland Cotton

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to (1) prescribe a formula by which the Secretary of Agriculture will determine the prevailing world market price (adjusted to United States quality and location) for the 1986 through 1990 crops of upland cotton (hereinafter referred to as the "adjusted world price") and (2) provide a mechanism by which such adjusted world price will be announced periodically. These actions are required by section 103A(a)(5)(E)(i)–(iii) of the Agricultural Act of 1949, as amended by the Food Security Act of 1985.

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Charles V. Cunningham, Deputy Director, Commodity Analysis Division, USDA–ASCS, Room 3741 South Building, P.O. Box 2415, Washington, DC 20013 or call (202) 447–7954.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512–1 and has been designated as "not major". It has been determined that these provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local governments, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The titles and numbers of the Federal Assistance Programs to which this final rule applies are: Commodity Loans an Purchases—10.051 and Cotton Production Stabilization—10.052 as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is applicable to the provisions of this rule and a final Regulatory Flexibility Analysis has been completed and is available upon request.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Section 103A(a)(5)(E)(i) of the Agricultural Act of 1949, as amended (hereinafter referred to as the "Act"), provides that the Secretary of Agriculture shall prescribe by regulation:

(a) A formula to define the prevailing world market price for cotton; and

(b) A mechanism by which such prevailing world market price shall be announced periodically.

The prevailing world market price for upland cotton, adjusted to U.S. quality and location (hereinafter referred to as the "adjusted world price"), as determined in accordance with the formula set forth in this final rule, shall be utilized under several provisions of the upland cotton program for the 1986 through 1990 crops.

A notice of proposed rulemaking was published in the Federal Register on March 11, 1986, at 51 FR 8330, requesting comments with respect to the proposed formula for determining the adjusted world price for upland cotton and the proposed mechanism for periodically announcing such price. The proposed rule provided for a 15-day comment period which ended March 26, 1986.

The Department received a total of 10 comments with respect to the proposed rule. The Department has considered all comments received in developing this final rule. All comments received are on file and available for public inspection in Room 3741, South Building, 14th and Independence Avenue SW., Washington, DC 20250.

Discussion of Comments

Four respondents opposed the provision in the proposed rule which provided for the use of a single day northern Europe price quotation as the basis for determining the prevailing world market price for upland cotton. Instead, they proposed that a longer period be used. The respondents asserted that use of a longer period would help smooth out aberrations in prices. After reviewing the comments submitted on this issue, it has been determined that § 26.2 of the proposed rule should be changed to provide for the use of a 5-day average of the northern Europe price quotations as the basis for determining the prevailing world market price for upland cotton.

In addition, § 26.2 of the proposed rule provided that if no price quotations of the northern Europe price were available for any Thursday, the prevailing world market price would be based upon the latest available price quotations. It has been determined that this would not provide the Secretary sufficient flexibility to adjust the prevailing world market price to accurately reflect changing market conditions if no northern Europe price quotations are available. Therefore, § 26.2 of the proposed rule has been changed to provide that if no northern Europe price quotations are available during any Friday through Thursday period, the prevailing world market price shall be based upon the best available world price information, as determined by the Secretary.

Three respondents suggested that price quotations for a 156-week period, rather than for a 52-week period, should be used to adjust the Northern Europe price to average designated U.S. spot market location. The respondents felt that the use of a longer period would smooth out aberrations in the adjustment and would more nearly reflect the anticipated costs of transporting cotton during the 1986/87 marketing year. After reviewing the comments received on this issue, it has been determined that § 26.3(b)(1) of the proposed rule should be changed to

provide that price quotations for a 156-week period will be used to adjust the Northern Europe price to average designated U.S. spot market location.

Two respondents requested that price quotations for the period when the northern Europe quotations for Memphis territory and California/Arizona territory cotton are being changed from old crop price quotations to new crop price quotations be disregarded in the calculation of the adjustment in the Northern Europe price to average designated U.S. spot market location.

The northern Europe price quotations for Memphis territory and California/Arizona territory change from old crop to new crop price quotations in the period immediately preceding August 1, the beginning of the new crop marketing year. U.S. designated spot market quotations are for current shipment of upland cotton. The respondents assert that price data from weeks when shipment periods do not correspond should be disregarded in calculating the adjustment in the Northern Europe price to average designated spot market location. After reviewing the comments submitted on this issue, it has been determined that price quotations during June, July and August will be disregarded in making this adjustment. It has been determined that it is necessary to exclude these months from the calculation in order to ensure that the transition from old crop price quotations to new crop price quotations does not cause undue aberrations in the adjustment calculation.

Six respondents recommended an additional adjustment for qualities of upland cotton which are distinctly lower in grade and shorter in staple than Middling (M) 1⅛s inch cotton. They suggested that the adjusted world price be further adjusted in order to make U.S. growths of such cotton competitive in world markets. They suggested that the additional adjustment be made by deducting the difference between the Northern Europe price and the prices quoted for the three lowest-priced growths of the growths quoted for "coarse count" cotton C.I.F. northern Europe (Northern Europe coarse count price) on the same day. The quality differential so determined would be adjusted to reflect the price of the U.S. base quality by deducting the difference between the applicable loan rate for a crop of upland cotton for M1$^{3}/_{32}$ inch (micronaire 3.5 through 4.9) cotton and the loan rate for a crop of upland cotton of the base quality.

After reviewing the comments submitted on this issue, it has been determined that § 26.3 of the proposed rule should be changed to provide for an additional adjustment to be made in the adjusted world price for any grade of upland cotton with a staple length of one inch or shorter or for any length of upland cotton with a grade which has a price support loan discount of 8.0 cents per pound or higher based upon the Schedule of Premiums and Discounts for Grade and Staple Length as announced in accordance with the upland cotton price support loan program for a crop of upland cotton. Grade and staple length must be determined by an official classification issued by USDA's Agricultural Marketing Service (AMS). The additional adjustment will not be made if no such official classification is available. Such additional adjustment shall be made by deducting from the adjusted world price the difference between the Northern Europe price and the average of the price quotations for the corresponding Friday through Thursday period of the Northern Europe "coarse count" price, from which there has been subtracted the difference between the applicable loan rate for a crop of upland cotton M 1⅛s inch (micronaire 3.5 through 4.9) cotton and the loan rate for a crop of upland cotton for Strict Low Middling (SLM) 1 inch (micronaire 3.5 through 4.9) cotton. The additional adjustment will not be made if the amount of the adjustment is less than 1.0 cent per pound.

In determining the Northern Europe coarse count price, if no quotes are available for one or more days of the five-day period, the available quotes will be used, except that if quotes for three growths are not available for any day in the five-day period, that day will not be taken into consideration. In addition,if quotes for three growths are not available for at least three days in the five-day period, that week will not be taken into consideration, in which case the adjustment determined for the latest available week will continue to be applicable.

One respondent urged that the Northern Europe price and the components from which it is derived be made publicly available at the earliest possible opportunity in order to avert potential market disruption stemming from early access to the components of the Northern Europe price. After reviewing the comments submitted on this issue, it has been determined that § 26.3 of the proposed rule should be changed to provide that the adjusted world price and the new additional adjustment for any grade of upland cotton with a staple length of 1-inch or shorter or for any staple length of upland cotton with a grade which has a price support loan discount of 8.0 cents per pound or more will be announced as soon as possible after 4:00 p.m. Eastern time each Thursday beginning July 3, 1986 instead of on or before 10:00 a.m. Eastern time each Friday beginning August 1, 1986.

One respondent felt that the proposed formula would result in too much of an adjustment thereby resulting in unjustified Government expenditures. The respondent generally disagreed with most components of the proposed world price formula and suggested instead a different set of adjustments. After reviewing this comment, it has been determined that the formula set forth in this final rule will result in the best possible approximation of the world market price for upland cotton.

No further changes have been made in the proposed rule.

List of Subjects in 7 CFR Part 26

Upland cotton, World market price.

Final Rule

Accordingly, 7 CFR Subtitle A is amended by adding a new Part 26—Determination of World Market Price for Certain Commodities as follows:

PART 26—DETERMINATION OF WORLD MARKET PRICE FOR CERTAIN COMMODITIES

Subpart A—Determination of World Market Price for Upland Cotton

Sec.
26.1 Applicability.
26.2 Determination of the prevailing world market price for upland cotton.
26.3 Adjusted world price for upland cotton.

Authority: Sec. 103A(a)(5)(E), Pub. L. 81-439, 639 Stat. 1031, as amended, (7 U.S.C. 1444-1(a)(5)(E)).

Subpart A—Determination of World Market Price for Upland Cotton

§ 26.1 Applicability.

This subpart sets forth the procedures for determining the prevailing world market price for upland cotton and the mechanisms for periodically announcing such price as required by section 103A(a)(5)(E) of the Agricultural Act of 1949, as amended (hereinafter referred to as the "Act").

§ 26.2 Determination of the prevailing world market price for upland cotton.

The prevailing world market price for upland cotton shall be determined by the Secretary of Agriculture based upon the average of the quotations for the preceding Friday through Thursday for the five lowest-priced growths of the growths quoted for Middling one and three-thirty-second inch (M1$^{2}/_{32}$ inch) cotton C.I.F. (cost, insurance, and

freight) northern Europe (hereinafter referred to as the "Northern Europe price"). If quotes are not available for one or more days in the five-day period, the available quotes during the period will be used. If no quotes are available during the Friday through Thursday period, the prevailing world market price shall be based upon the best available world price information, as determined by the Secretary.

§ 26.3 Adjusted world price for upland cotton.

(a) The prevailing world market price for upland cotton, adjusted to average U.S. quality and location (hereinafter referred to as the "adjusted world price"), determined in accordance with paragraph (b) of this section, shall be applicable to the programs of the Department of Agriculture for the 1986 through 1990 crops of upland cotton as provided in section 103A of the Act.

(b) The adjusted world price for upland cotton shall equal the Northern Europe price as determined in accordance with § 26.2, adjusted to average U.S. quality and location as follows:

(1) The Northern Europe price shall be adjusted to average designated U.S. spot market location by deducting the average difference in the immediately preceding 156-week period between:

(i) The average of price quotations from the U.S. Memphis territory and the California/Arizona territory as quoted each Thursday from M1⅛s inch cotton C.I.F. Northern Europe; and

(ii) The average price of M1⅛s inch (micronaire 3.5 through 4.9) cotton as quoted each Thursday in the designated U.S. spot markets.

(2) The price determined in accordance with paragraph (b)(1) of this section shall be adjusted to reflect the price of Strict Low Middling (SLM) 1⅛s inch (micronaire 3.5 through 4.9) cotton (hereinafter referred to as the "U.S. base quality") by deducting the difference, as announced by the Secretary of Agriculture, between the applicable loan rate for a crop of upland cotton for M 1⅛s inch (micronaire 3.5 through 4.9) cotton and the loan rate for a crop of upland cotton of the U.S. base quality.

(3) The price determined in accordance with paragraph (b)(2) of this section shall be adjusted to average U.S. location by deducting the difference between the average loan rate for a crop of upland cotton of the U.S. base quality in the designated U.S. spot markets and the corresponding crop year national average loan rate for a crop of upland cotton of the U.S. base quality, as announced by the Secretary of Agriculture.

(c) In determining the average difference in the 156-week period as provided in paragraph (b)(1) of this section:

(1) Price quotations made during the months of June, July and August of each year will not be taken into consideration; and

(2) If Thursday price quotations are not available for either the Northern Europe or the spot market quotations for any week, that week will not be taken into consideration.

(d) The adjusted world price for upland cotton, as determined in accordance with paragraph (b) of this section and the amount of the additional adjustment, as determined in accordance with paragraph (e) of this section, shall be determined weekly by the Secretary of Agriculture and shall be announced as soon as possible after 4:00 p.m. Eastern time each Thursday, beginning July 3, 1986, and continuing through the last Thursday of July 1991. In the event that Thursday is a nonworkday, the determination will be announced the next workday.

(e)(1) The adjusted world price, as determined in accordance with paragraph (b) of this section, shall be subject to further adjustments as provided in this subsection with respect to any grade of upland cotton with a staple length of 1 inch or shorter or for any staple length of upland cotton with a grade which has a price support loan discount of 3.0 cents per pound or higher based upon the Schedule of Premiums and Discounts for Grade and Staple Length as announced in accordance with the upland cotton price support loan program for a crop of upland cotton. Grade and staple length must be determined by an official classification issued by USDA's Agricultural Marketing Service (AMS). If no such official classification is presented, the adjustment shall not be made.

(2) The adjustment for upland cotton provided for by paragraph (e)(1) of this section shall be determined by deducting from the adjusted world price:

(i) The difference between the Northern Europe price and the average of the quotations for the corresponding Friday through Thursday for the three lowest-priced growths of the growths quoted for "coarse count" cotton C.I.F. northern Europe (hereinafter referred to as the "Northern Europe coarse count price"), minus

(ii) The difference between the applicable loan rate for a crop of upland cotton for M 1⅛s inch (micronaire 3.5 through 4.9) cotton and the loan rate for a crop of upland cotton for SLM 1 inch (micronaire 3.5 through 4.9) cotton.

(3) With respect to the determination of the Northern Europe coarse count price in accordance with paragraph (e)(2)(i) of this section:

(i) If no quotes are available for one or more days of the five-day period, the available quotes will be used;

(ii) If quotes for three growths are not available for any day in the five-day period, that day will not be taken into consideration; and

(iii) If quotes for three growths are not available for at least three days in the five-day period, that week will not be taken into consideration, in which case the adjustment determined in accordance with paragraph (e)(2) of this section for the latest available week will continue to be applicable.

(4) If the difference determined in accordance with paragraph (e)(2)(i) of this section is not more than 1.0 cent higher than the difference determined in accordance with paragraph (e)(2)(ii) of this section, the adjustment provided for by this paragraph shall not be made.

(f) The adjusted world price, determined in accordance with paragraph (b) of this section, shall be subject to further adjustments, as determined by the Executive Vice President, Commodity Credit Corporation, based upon the Schedule of Premiums and Discounts and the location differentials applicable to each warehouse location as announced in accordance with the upland cotton price support loan program for a crop of upland cotton.

Signed at Washington, DC on May 19, 1986.

Richard E. Lyng,

Secretary.

BILLING CODE 3410-05-M

Agricultural Marketing Service

7 CFR Part 908

[Valencia Orange Regulation 266]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 266 establishes the quantity of such fruit that may be shipped to market during the period June 6–12, 1986. The regulation is needed to provide for orderly marketing of fresh Valencia oranges for the period specified due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: Regulation 366 (§ 908.666) is effective for the period June 8–12, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone: 202/447–5697.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities for their own benefit. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 123 handlers of Valencia oranges are subject to regulation under the marketing order and that the great majority of these handlers may be classified as small entities. While regulations issued may impose some costs on affected handlers and the number of such firms may be substantial, the added burden on small entities, if present at all, is not significant.

The regulation is issued under Marketing Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Valencia Orange Administrative Committee (VOAC) and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

The regulation is consistent with the marketing policy for 1985–86. The committee met publicly on June 3, 1986, to consider the current and prospective conditions of supply and demand and recommended the quantity of Valencia oranges deemed advisable to be handled during the specified week. The committee reports that the market for Valencia oranges is fair.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because there is insufficient time between the date when information upon which this regulation is based became available and the effective date necessary to effectuate the declared policy of the act. Interested persons were given opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared policy of the act, it is necessary to make the regulatory provisions effective as specified, and handlers have been notified of the regulation and the effective date.

List of Subjects in 7 CFR Part 908

Marketing agreements and orders, California, Arizona, Oranges, Valencias.

1. The authority citation for 7 CFR Part 908 continues to read:

Authority: (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

2. Section 908.666 is added to read as follows:

§ 908.666 Valencia Orange Regulation 366.

The quantities of Valencia oranges grown in California and Arizona which may be handed during the period June 8, 1986, through June 12, 1986, are estblished as follqws:

(a) District 1: 360,000 cartons;
(b) District 2: 390,000 cartons;
(c) District 3: Unlimited cartons.

Dated: June 4, 1986.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–8–FRL–3022–7]

Air Quality; Approval and Promulgation of State Implementation Plans; Montana; Visibility

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: In this action, EPA is approving the New Source Review (NSR) and monitoring plan for visibility as a revision to the Montana State Implementation Plan (SIP). This action results from rulemaking on October 23, 1984, (49 FR 42670) in which EPA proposed to disapprove SIPs of states not complying with the provisions of 40 CFR 51.305 (Visibility Monitoring) and 51.307 (Visibility NSR).

The Governor of Montana submitted a SIP Revision for Visibility Protection and the Visibility Regulation on August 21, 1985. EPA proposed to approve the Montana Visibility SIP and regulations for NSR and monitoring on January 2, 1986, at 51 FR 38. No comments were received. Review of the plan and regulations indicates that Montana has

met the criteria of 40 CFR 51.305 and 51.307.

DATE: This action will be effective July 7, 1986.

ADDRESSES: Copies of the revision are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the following offices:

Environmental Protection Agency, Region VIII, Air Programs Branch, One Denver Place, Suite 1300, 999 18th Street, Denver, Colorado 80202

Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street, SW., Washington, DC 20460

The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC

FOR FURTHER INFORMATION CONTACT: Lee Hanley, Air Programs Branch, Environmental Protection Agency, One Denver Place, Suite 1300, 999 18th Street, Denver, Colorado 80202, (303) 293–1757.

SUPPLEMENTARY INFORMATION:

Background

Section 169A of the Clean Air Act, 42 U.S.C. 7491, requires visibility protection for mandatory Class I Federal areas where EPA has determined that visibility is an important value. ("Mandatory Class I Federal areas" are certain national parks, wilderness areas, and international parks, as described in section 162(a) of the Act, 42 U.S.C. 7472(a), 40 CFR 81.400–437.) Section 169A specifically directs EPA to promulgate regulations requiring certain states to amend their State Implementation Plans (SIPs) to provide for visibility protection.

On December 2, 1980, EPA promulgated the required visibility regulations at 45 FR 80084, codified at 40 CFR 51.300 *et seq.* These regulations required the states to submit revised SIPs to satisfy such provisions no later than September 2, 1981. (See 45 FR 80081, codified at 40 CFR 51.302(a)(1).) That rulemaking resulted in numerous parties seeking judicial review of the visibility regulations. In March 1981, a judicial stay was granted pending EPA action on related administrative petitions for reconsideration of the visibility regulations.

In December 1982, the Environmental Defense Fund (EDF) filed suit in the U.S. District Court for the Northern District of California alleging that EPA failed to perform a nondiscretionary duty under section 110 of the Act to promulgate visibility SIPs. A settlement agreement between EPA and EDF outlined a schedule for the promulgation of visibility SIPs. It required EPA to incorporate Federal regulations in states where SIPs were found deficient with respect to the 1980 Visibility New Source Review and monitoring regulations, 40 CFR 51.307 and 51.305, respectively. However, the settlement did allow an opportunity to avoid Federal promulgation if the state submitted a SIP no later than May 6, 1985. Montana is one of the states listed in 49 FR 42670 as having an inadequate New Source Review (NSR) and monitoring plan for visibility protection.

On August 21, 1985, the Governor of Montana submitted a Visibility SIP and regulations for visibility monitoring and New Source Review.

The SIP declares that the States will implement a comprehensive visibility protection program in order to meet the objectives of the Clean Air Act. The SIP is to be reviewed from time-to-time (but not less frequently than three years) for the purpose of assessing progress toward meeting the national goal of visibility protection.

On January 2, 1986, 51 FR 38, EPA proposed to approve the Montana SIP and regulations for visibility monitoring and new source review. No comments were received.

The monitoring strategy section of this Visibility SIP consists of a statement of goals, a list of monitoring objectives, and the provision for future plan revisions.

The Montana Plan combines new visibility rules and existing regulations to meet the requirements of 40 CFR 51.307. A new rule, ARM 16.8.1001, Visibility Requirements Applicability, incorporates existing permit regulations and clearly states that the visibility requirements apply to major sources locating in any attainment or nonattainment area. The incorporated regulations, Administrative Rules of Montana, Title 16, Chapter 8, Subchapters 9 (PSD) and 11 (Permits), specify the standard requirements for any permit application and permit approval.

The Visibility Regulation provide for the Department (Montana Bureau of Air Quality permit issuing authority) to consider any analysis performed by the State and the FLM and to deny a permit if the proposed source or modification would have adverse impact in any Federal Class I area.

If the Department does not agree with the FLM that adverse impact will result, it will provide written notification to the effected FLM within 5 days of its final decision on the permit. The notification will include an explanation of the Department's decision or give notice as to where the explanation can be obtained. Notification to the public is originally made by the applicant; the Department will then notify the applicant and interested parties of its determination and the location of the analysis of the application.

The State of Montana has afforded the FLM (through the National Park Service (NPS) and the Forest Service (FS)) opportunities to participate and comment on its visibility SIP and regulations. Comments by the NPS and FS were considered and incorporated where applicable. The State has commited in the SIP to consult continually with the FLM on the review and implementation of the visibility program. As appropriate, the plan may be modified in accordance with proper public review in order to attain and maintain the national goal. The State has agreed to notify the FLM of any advance notification or early consultation with a major new or modified source that may affect Federal Class I area visibility; such notification will be made prior to the submission of the permit application.

Summary of action

The August 21, 1985 submittal by the Governor of Montana includes an adequate visibility plan and regulation to meet the requirments of 40 CFR 51.305 and 51.307 and the criteria discussed in 49 FR 42670. (One should reference **Federal Register** notices on October 23, 1984, 49 FR 42670, July 12, 1985, 50 FR 28544, and January 2, 1986, 51 FR 38, for additional information).

The SIP is deficient for all the other requirements of Subpart P (except 51.305 and 51.307). See 51 FR 3046, January 23, 1986.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 5, 1986. This action may not be challenged later in proceedings to enforce its requirements (See 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

[A–6–FRL–3026–9]

Delegation of Authority to the State of New Mexico for New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Delegation of authority.

SUMMARY: On October 18, 1984, the State of New Mexico requested a delegation of authority for the implementation and enforcement of the New Source Performance Standards (NSPS) and the National Emission Standards for Hazardous Air Pollutants (NESHAP). EPA has reviewed the laws of New Mexico and the rules and regulations of the New Mexico Environmental Improvement Division (NMEID) and has determined that the State's regulations and resources are adequate for the implementation and enforcement of the Federal standards. Based on this evaluation, EPA granted the authority to the State as requested, applicable in certain areas of the State. This delegation of authority does not apply to the sources located in the Bernalillo County, New Mexico, or to the sources on Indian governed lands as specified in the delegation agreement and in this notice.

EFFECTIVE DATE: March 15, 1985.

ADDRESSES: The related material in support of these delegations may be requested by writing to one of the following addresses:

Chief, SIP New Source Section (6T–AN), Air Programs Branch, U.S. Environmental Protection Agency, 1201 Elm Street, Dallas, Texas 75270

Chief, Air Quality Bureau, New Mexico Environmental Improvement Division, P.O. Box 968, Crown Building, Santa Fe, New Mexico 87504–0968

All other requests, reports, applications and such other communications which are required to be submitted under 40 CFR Part 60 and 40 CFR Part 61 (including the notifications required under Subpart A of the regulations) for the affected facilities in New Mexico should be sent directly to the State of New Mexico at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. J. Rehnam, P.E., SIP New Source Section, Air Programs Branch, United States Environmental Protection Agency, Region 6, 1201 Elm Street, Dallas, Texas 75270, telephone (214) 767–9870.

SUPPLEMENTARY INFORMATION: On August 17 and August 30, 1982, partial delegation authority was granted to New Mexico by EPA for the technical and administrative portions of the NSPS and NESHAP programs. On October 19, 1984, New Mexico requested full delegation authority for the implementation and enforcement of NSPS through March 14, 1984, and NESHAP through December 9, 1983. The State also requested partial delegation of authority for the technical and administrative review of new or amended NSPS and NESHAP in the October 19 letter. These delegation requests were granted to the State subject to the conditions and limitations specified in the delegation agreement which is reprinted in this notice.

Introduction

On October 19, 1984, the Governor of New Mexico requested that the U.S. Environmental Protection Agency (EPA) delegate full authority to New Mexico for the New Source Performance Standards (NSPS) program and for the National Emission Standards for Hazardous Air Pollutants (NESHAP) program. The Governor based his request upon the adoption by the New Mexico Environmental Improvement Board of Air Quality Control Regulation 750 (New Source Performance Standards), and Air Quality Control Regulation 751 (Emission Standards for Hazardous Air Pollutants) on July 13, 1984.

Under the New Mexico Air Quality Control Act, the City of Albuquerque and Bernalillo County have established a program for the local administration and enforcement of the Air Quality Control Act, in lieu of the New Mexico Environmental Improvement Board. The authority delegated in this document excludes all sources located within the boundaries of Bernalillo County.

Full Delegation

EPA has reviewed the Governor's request, Air Quality Control Regulations 750 and 751, and all other available information on the New Mexico Environmental Improvement Division (NMEID), including its implementation of the partial delegation of these programs. EPA finds that the NMEID has an adequate and effective procedure for implementing and enforcing the NSPS and NESHAP programs in the State of New Mexico, except for Indian lands, as defined at 18 U.S.C. 1151. Therefore, EPA hereby delegates the following authority for the implementation and enforcement of the NSPS and NESHAP to the State of New Mexico, subject to the conditions and limitations specified below:

1. Authority for all sources located in the State of New Mexico, outside Indian lands, subject to the NSPS promulgated in 40 CFR Part 60 through March 14, 1984.

2. Authority for all sources located in the State of New Mexico, outside Indian lands, subject to the NESHAP promulgated in 40 CFR Part 61 through December 9, 1983.

Conditions and Limitations

1. Implementation and enforcement of NSPS and NESHAP in the State of New Mexico, outside Indian lands, will be the primary responsibility of the NMEID. If the State of New Mexico or the NMEID determines that such implementation or enforcement is not possible or feasible, either with respect to an individual source, a class of sources, or generally, the NMEID shall, within 30 days, notify EPA Region 6 of such impossibility or infeasibility so that EPA may timely exercise its concurrent authority with respect to sources within the State of New Mexico.

2. Acceptance of this delegation constitutes agreement by the State of New Mexico and the NMEID to follow all interpretations, past and future, made by EPA of 40 CFR Parts 60 and 61, including determinations of applicability. Prior EPA concurrence shall be obtained on any matter involving the interpretation of sections 111 or 112 of the Clean Air Act or 40 CFR Parts 60 or 61 to the extent that application, implementation, administration, or enforcement of these sections have not been covered by prior EPA determinations or guidance.

3. The State of New Mexico and the NMEID are not authorized to approve or disapprove any application, exemption, variance, or grant waiver of compliance with any provision of 40 CFR Part 61. The State of New Mexico or the NMEID are, however, authorized to receive, review, evaluate, and recommend to EPA approval or disapproval of an application, exemption, variance or waiver.

4. The Federal NSPS regulations in 40 CFR Part 60, as amended, do not have provisions for granting waivers by class of testing requirements or variances, hence this delegation does not convey to the State of New Mexico or the NMEID authority to grant waivers by class of testing requirements or variances from NSPS regulations.

5. The State of New Mexico and the NMEID shall utilize the methods specified in applicable Appendices and Subparts of 40 CFR Parts 60 or 61 in determining compliance with the regulations, including requiring tests at the times required by the regulations.

Authority is delegated to approve minor modifications to the reference test methods in 40 CFR Parts 60 and 61, during either a pre-test meeting or the actual sampling period. These minor modifications would have to produce results essentially identical to the reference method results. Approval of these minor modifications should be based on sound engineering judgment. Under no circumstances are modifications to be used which might result in the non-uniform application of the standards.

6. If at any time there is a conflict between any State regulation and any provision of 40 CFR Parts 60 and 61, the Federal regulation must be applied to the extent that it is more stringent than that of the State. If the State of New Mexico or the NMEID does not have the authority to enforce the more stringent Federal regulation, the NMEID shall immediately notify EPA Region 6 pursuant to Condition 1 above. This delegation may be revoked by EPA, in whole or in part, in the event any such conflict makes implementation or enforcement of NSPS or NESHAP administratively impractical.

7. If a claim of confidentiality or any other reason should ever legally prevent the State of New Mexico and the NMEID from providing to EPA any or all information required by or pertaining to the implementation of NSPS and NESHAP, the NMEID shall, upon request, assist EPA Region 6 in obtaining the information directly from the source. At a minimum, such assistance shall consist of providing to EPA an identification of the nature of the information which the State cannot provide. In the absence of such a legal reason, the State and the NMEID shall make available to any designated representative of EPA upon request all records, reports, or information provided to, or otherwise obtained by, the State in accordance with the provisions of 40 CFR Parts 60 or 61.

8. All matters in process at the time of delegation of authority may be processed through to completion by EPA Region 6, at the request of the NMEID and at the discretion of EPA, be transferred to the NMEID for completion. Appropriate reproduction of pertinent file material in the EPA Region 6 files in relation to source regulation under NSPS and NESHAP shall be provided through mutual cooperation of the staffs of the respective offices.

9. Existing monthly reports normally submitted to EPA Region 6 for the Compliance Data System (CDS) shall be expanded to contain pertinent information relating to the status of sources subject to 40 CFR Parts 60 or 61. As a minimum, the following information must be provided to EPA: The name, address, type and size of each facility; date that operation at the facility commenced and dates of most recent compliance test; the compliance status of each facility with accompanying explanations of noncompliance where applicable; notice of enforcement actions brought against facilities because of violations of 40 CFR Parts 60 or 61; surveillance actions undertaken for each facility; and the results of all reports relating to emissions data, including excess emissions reports.

10. Emission data, as defined in 40 CFR 2.301(a)(2), shall be made available to the public. Emission data is to be correlated with applicable emission limitations or other measures in such a manner as to show the relationship between measured or estimated amounts of emissions and the amounts of such emissions which are allowable under the applicable emission limitations. If any information which is defined as emission data is found to be not available to the public by reason of State law or other legal requirement, the NMEID shall so notify EPA, Region 6, so that EPA may take the action necessary to release such data.

11. No authority is granted to the State or the NMEID to take any action which would require rulemaking by EPA. This limit on authority includes the grant of a waiver of testing requirements for any class of sources.

Partial Delegation

The NMEID has requested that it have partial delegation for sources for which new regulations or revised regulations are promulgated, except for sources in Indian lands, as defined at 18 U.S.C. 1151. EPA hereby delegates the following partial authority for the implementation of the NSPS and NESHAP to the State of New Mexico subject to the following conditions and limitations:

1. Authority for all sources located in the State of New Mexico, outside Indian lands, subject to NSPS promulgated in 40 CFR Part 60 after March 14, 1984, for which full delegation has not been granted above.

2. Authority for all sources located in the State of New Mexico, outside Indian lands, subject to NESHAP promulgated in 40 CFR Part 61 after December 9, 1983, for which full delegation has not been granted above.

3. Authority for all sources located in the State of New Mexico, outside Indian lands, subject to NSPS for which full delegation is granted above, when part or all of that NSPS has been revised after March 14, 1984.

4. Authority for all sources located in the State of New Mexico, outside Indian lands, subject to NESHAP for which full delegation is granted above, when part or all of that NESHAP has been revised after December 9, 1983.

Conditions and Limitations

1. The NMEID shall conduct only the technical and administrative review including determination of applicability, review and evaluation of NSPS and NESHAP applications, review and evaluation of requests for waivers of compliance under 40 CFR 61.11 and/or waivers of emission tests under 40 CFR 61.13, performance and evaluation of inspections, and observance and evaluation of compliance tests and continuous emission monitoring tests.

2. All conditions and limitations specified above for full delegation apply also to this partial delegation.

Effective immediately, all reports required pursuant to the Federal NSPS and NESHAP [40 CFR Part 60 and 40 CFR Part 61] by sources located in the State of New Mexico should be

submitted directly to the New Mexico Health and Environment Department, Environmental Improvement Division, Air Quality Bureau, P.O. Box 968, Crown Building, Santa Fe, New Mexico, 87504-0968. Any such reports which may be received by EPA, Region 6, after the effective date of this delegation will be promptly transmitted to the NMEID.

The Office of Management and Budget has exempted this information notice from the requirements of section 3 of Executive Order 12291.

This delegation is issued under the authority of sections 111(c) and 112(d) of the Clean Air Act, as amended [42 U.S.C. 7411(c) and 7412(d)].

List of Subjects:

40 CFR Part 60

Air pollution control, Aluminum, Ammonium sulfate plants, Cement industry, Coal, Copper, Electric power plants, Fossil-fuel fired steam generators, Glass and glass products, Grain, Iron, Lead, Metals, Motor vehicles, Nitric acid plants, Paper and paper products industry, Petroleum, Phosphate, Fertilizer, Sewage disposal, Steel, Sulfuric acid plants, Waste treatment and disposal, Zinc.

40 CFR Part 61

Air pollution control, Asbestos, Benzene, Beryllium, Hazardous materials, Mercury, Radionuclides, Vinyl chloride.

Dated: May 23, 1986.

47 CFR Part 73

[MM Docket No. 85-60; RM-5063]

Television Broadcasting Services; Kansas City, MO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document assigns UHF Television Channel 32 to Kansas City, Missouri, in response to comments filed by Dr. Sam Walters. The assignment could provide for a seventh commercial television broadcast service for Kansas City. With this action, this proceeding is terminated.

EFFECTIVE DATE: June 27, 1986.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 85-60, adopted April 23, 1986, and released May 21, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Miscellaneous Changes to the AID Acquisition Regulation

AGENCY: Agency for International Development, IDCA.
ACTION: Final rule.

SUMMARY: The AID Acquisition Regulation is being amended to reflect revised office titles.

EFFECTIVE DATE: June 6, 1986.

FOR FURTHER INFORMATION CONTACT: M/SER/PPE, Mr. James M. Kelly, telephone (703) 235-9655.

SUPPLEMENTARY INFORMATION: We have determined that the changes being made by this Notice are not significant or major changes as defined by FAR 1.301(b), or FAR 1.501, or E.O. 12291.

As required by the Regulatory Flexibility Act, it is hereby certified that this Notice will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 48 CFR Parts 702, 731, 752, and Appendices

Government procurement.

For the reasons set out in the preamble, Chapter 7 of Title 48 of the Code of Federal Regulations is amended as follows:

1. The authority citations in Parts 702, 731, 752, and the Appendices to Chapter 7 are unchanged and continue to read as follows:

Authority: Sec. 621, Pub. L. 87-195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 FR 56673, 3 CFR Part 1979 Comp., p. 435.

PART 702—DEFINITIONS OF WORDS AND TERMS

Subpart 702.170—Definitions

702.170-3 [Amended]

2. In section 702.170-3, *Contracting activities*, paragraph (a) is amended by removing the reference to "Office of Acquisition and Assistance Management", replacing it with a reference to "Office of Procurement".

702.170-10 [Amended]

3. In section 702.170-10, *Head of the contracting activity*, paragraph (a) is amended by removing the reference to "Director, Office of Acquisition and Assistance Management", replacing it with a reference to "Director, Office of Procurement", and by removing the reference to "M/SER/AAM approved forms", replacing it with a reference to "M/SER/PPE approved forms".

PART 731—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 731.1—Applicability

731.109 [Amended]

4. Section 731.109, *Advance agreements*, is amended by removing the reference to "Office of Acquisition and Assistance Management", replacing it with a reference to "Office of Procurement".

Subpart 731.2—Contracts With Commercial Organizations

731.205-6 [Amended]

5. In section 731.205-6, *Compensation for personal services*, paragraph (b)(2) is amended by removing the reference to "Office of Acquisition and Assistance Management" appearing at the end of the paragraph, replacing it with a reference to "Office of Procurement."

Subpart 731.3—Contracts With Educational Institutions

731.371 [Amended]

6. In section 731.371, *Compensation for personal services*, paragraph (a) is amended by removing the reference to "Office of Acquisition Assistance Management" appearing at the end of the paragraph, replacing it with a reference to "Office of Procurement".

Subpart 731.7—Contracts With Nonprofit Organizations

731.770 [Amended]

7. In section 731.770, *OMB Circular A-122*, Cost Principles for Nonprofit Organizations; AID implementation, paragraph (a) is amended by removing all references to "Office of Acquisition Assistance Management", replacing it with a reference to "Office of Procurement".

PART 752—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 752.70—Texts of AID Contract Clauses

752.7002 [Amended]

8. In section 752.7002, *Travel and transportation*, paragraph (d), *Alternate 73*, the contract clause titled *"Travel Expenses and Transportation and Storage Expenses"* is amended by:

a. Changing the date of the clause from "(Nov. 1985)" to "(May 1986)"; and

b. Amending subparagraph (o)(i) of the clause to remove the reference to "Office of Acquisition and Assistance Management", replacing it with a reference to "Office of Procurement".

752.7004 [Amended]

9. In section 752.7004, *Source and Nationality Requirements*, the contract clause titled *"Source and Nationality Requirements for Procurement of Goods and Services"* is amended by:

a. Changing the date of the clause from "(Nov. 1985)" to "(May 1986)"; and

b. Amending paragraph (b)(2) of the clause to remove the reference to "Office of Acquisition and Assistance Management", replacing it with a reference to "Office of Procurement".

APPENDICES TO CHAPTER 7

Appendix B—Notice to Cost-Reimbursement Type Contractors of Changes in Applicable Standardized Government Regulations

10. Paragraph 5, *Duties and Responsibilities*, of Appendix B, is amended as follows:

a. Subparagraph 5(a)(1) is amended by removing the reference to "the Office of Acquisition and Assistance Management Acquisition Support Division, Support Services Branch (SER/AAM/A/SUP)", replacing it with a reference to "the Office of Procurement, Procurement Support Division, Support Services Branch (SER/OP/PS/SUP)";

b. Subparagraph 5(b) is amended by changing the subparagraph title from "*SER/AAM/A/SUP*" to "*SER/OP/PS/SUP*";

c. Subparagraph 5(c) is amended by removing the reference "SER/AAM/A/SUP", replacing it with a reference to "SER/OP/PS/SUP"; and

d. Subparagraphs 5(c)(2) and 5(c)(3) are amended by removing the references to "SER/AAM/A/SUP", replacing them with references to "SER/OP/PS/SUP".

Appendix C—Logistic Support Overseas to AID-Direct Contractors

11. Subparagraph 2(b)(3) of Appendix C is amended by removing the reference to "SER/AAM", appearing in the last sentence, replacing it with a reference to "SER/OP".

Appendix F—Use of Collaborative Assistance Method for AID-Direct Contracts for Technical Assistance

12. Subparagraph 4(d)(3)(iii) of Appendix F is amended by removing the reference to "AAM/A/OCC", replacing it with a reference to "OP/PS/OCC".

Appendix G—Approval and Reporting Procedures for Contractor Salaries

13. Appendix G is amended as follows:

a. Subparagraph 1(c) is amended by removing the reference to "SER/AAM/A/SUP", replacing it with a reference to "SER/OP/PS/SUP";

b. Paragraph 3 is amended by removing the references to "SER/AAM" appearing in the paragraph title and the second sentence of the paragraph, replacing them with references to "SER/OP" and by removing the reference to "SER/AAM/A/SUP", replacing it with a reference to "SER/OP/PS/SUP"; and

c. Paragraph 4 is amended by removing the reference to "the Office of Acquisition and Assistance Management.", replacing it with a reference to "the Office of Procurement".

Appendix H—Responses to Audit Recommendations

14. Appendix H is amended as follows:

a. References to "SER/AAM", appearing in paragraphs 2 and 6, and in subparagraphs 5(b), 5(b)(1)(b), 5(b)(1)(c), 5(b)(2)(a), 5(b)(2)(b), 5(b)(2)(c)(iii), 5(b)(4)(a), and 7(a) are removed and replaced with references to "SER/OP"; and

b. References to "AAM/A/SUP", appearing in subparagraphs 5(b)(1)(b), 5(b)(1)(c), 5(b)(1)(d), 5(b)(2)(a), 5(b)(2)(b), 5(b)(2)(c)(iii), and 5(b)(4)(a), and in paragraph 6, are removed and replaced with references to "OP/PS/SUP".

Dated: May 27, 1986.

John F. Owens,

AID Procurement Executive.

BILLING CODE 8116-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 675

[Docket No. 60586-6086]

Foreign Fishing, Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule.

SUMMARY: The North Pacific Fishery Management Council (Council) has determined, and the Secretary of Commerce (Secretary) has concurred, that an emergency exists in the groundfish fishery in the Bering Sea. This emergency results from extremely low abundance of the Tanner crab species *Chionoecetes bairdi* and the red king crab, *Paralithodes camtschatica*. Incidental catches of these crab species in the trawl fisheries for yellowfin sole and other flatfish could depress the populations of these crab species to dangerously low levels and retard their population growth to levels capable of sustaining productive commercial fisheries. This rule (1) closes an area of the exclusive economic zone (EEZ) in the Bering Sea to all commercial fishing with trawl gear; (2) sets incidental catch limits for *C. bairdi* Tanner crabs in the foreign and domestic commercial trawl fisheries and for red king crabs in the domestic trawl fisheries operating in other parts of the Bering Sea; and (3) requires that fishing be terminated if and when the incidental catch limits are achieved. The incidental catch limits established by this action reflect a compromise between the need to curtail commercial fishing effort detrimental to depressed crab populations while achieving the optimum yield from the domestic trawl fishery. This action is necessary to provide the Council and the Secretary additional time to evaluate alternative long-term solutions. The intended effect of this action is to provide immediate interim conservation protection for the crab species identified while allowing continued commercial fishing to the maximum extent practicable.

EFFECTIVE DATES: June 3, 1986 until September 2, 1986. Public comments are invited for the duration of this rule.

ADDRESS: Copies of documents supporting this action may be requested from Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. Comments may be sent to the same address.

FOR FURTHER INFORMATION CONTACT: Jay J.C. Ginter (Resource Management Specialist, NMFS) 907-586-7229.

SUPPLEMENTARY INFORMATION: Domestic and foreign groundfish fisheries in the EEZ (coterminous with the fishery conservation zone) in the Bering Sea and Aleutian Islands area are managed in accordance with the Fishery Management Plan for the Groundfish Fishery in the Bering Sea and Aleutian Islands Area (FMP). The FMP was developed by the Council under authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act) and is implemented by regulations appearing at 50 CFR 611.93 and Part 675.

At its meeting of January 15-17, 1986, the Council determined that two species of commercially important crabs in Bering Sea Area I are at dangerously low levels of population abundance. Concern was expressed that commercial trawl fishing for groundfish, particularly yellowfin sole and flounder species, is contributing to Tanner and king crab mortality through incidental catches in trawl nets and mutilation from trawl gear as it passes over the sea bottom. Additional concern was expressed about incidental catches of halibut from

trawl fishing. Although regulations governing foreign trawl fishing in this area provide certain closed areas and prohibited species catch (PSC) limits for Tanner and king crabs and halibut, domestic trawl fishing vessels have not been similarly restricted. Domestic trawl fishing for groundfish includes U.S. vessels working in joint ventures with foreign processing vessels (JVP) and U.S. vessels processing their catch on board or delivering it to U.S. processors (DAP). Together, JVP and DAP fisheries account for the domestic annual harvest (DAH).

The Council recommended emergency regulations that would close a part of Bering Sea Area I to all commercial trawling with an exception for trawl fishing for Pacific cod, establish PSC limits for Tanner crab (*C. bairdi*), red and blue king crabs, and halibut, close a fishery that achieves a PSC limit, and provide for NMFS-approved observers on domestic fishing vessels in certain areas. Because the council voted not unanimous, the Secretary has discretion in implementing the recommended emergency regulations under section 305(e)(2)(B) of the Magnuson Act. Accordingly, this emergency rule provides for the following restrictions on commercial trawling for groundfish.

1. Closed Area

Domestic and foreign trawl fishing is not permitted in the EEZ north of the Alaska Peninsula, south of 58° N. latitude, west of 160° W. longitude, and east of 162° W. longitude (area B in Figures 1 and 2). The Secretary may allow domestic trawl fishing for Pacific cod in a portion of this area lying south of a line generally conforming to the 25-fathom depth contour, provided that such fishing is conducted under a data gathering program approved by the Regional Director after consultation with the Council. The program would be designed to provide data useful for management of the trawl and Tanner and king crab fisheries, and would be monitored to prevent overfishing of Tanner and king crab stocks in the area. All such trawl fishing would cease when a PSC limit of 12,000 red king crabs had been taken in the area.

This part of the rule is as originally recommended by the Council with one exception. The Council originally recommended an exception to the ban on trawl fishing in the area for Pacific cod trawling in waters shallower than 25 fathoms by any domestic vessel carrying an observer approved by NMFS, subject to an incidental catch rate of 2 red king crabs per metric ton of groundfish (for a total estimated incidental mortality of 12,000 king crabs). When it proved impracticable to provide the observer coverage that was envisioned in this exception, the Council recommended that the ban be implemented without any exceptions.

There is some possibility that an alternative means may be found to provide additional data and to provide sufficient monitoring to prevent overfishing of Tanner and king crab stocks in the area by Pacific cod trawlers. In order to provide for this, the rule authorizes the Secretary to allow such trawling in the area under the conditions described above. If data will not be obtained from each participating vessel, the Secretary will consult with the Council when considering whether to authorize trawling for Pacific cod.

The area closed by this rule contains the highest concentrations of legal male and large female *C. bairdi* Tanner crabs and red king crabs. The closure will protect about 70 percent of the female spawning stock of red king crabs, according to NMFS scientists, and will effectively keep the incidental fishing mortality rate of these crabs to a minimum.

Finally, the foreign trawling prohibition in the Bristol Bay "pot sanctuary" (described at § 611.93(c)(2)(ii)(A)) is expanded to encompass the area closed by this rule. This is to ensure protection of crab stocks to the full extent envisioned by the Council.

2. Incidental Catch Limits

The PSC limits for *C. bairdi* Tanner crabs and red king crabs implemented by this rule are as recommended by the Council and apply equally to JVP and DAP fisheries.

The DAH fishery for yellowfin sole and other flatfish is limited to a PSC of 80,000 *C. bairdi* Tanner crabs and to a PSC of 135,000 red king crabs in the EEZ north of the Alaska Peninsula, south of 58° N. latitude, and east of 165° W. longitude, which is zone 1 (area A in Figure 2).

The area described as zone 1 is important to directed fishing for yellowfin sole and other flatfish, especially during April, May, and June when sea ice prevents fishing farther north. Although the area closed by this rule protects the highest concentration of legal male and large female *C. bairdi* Tanner crabs and red king crabs, significant numbers of these crabs occur outside of the closed area but east of 165° W. longitude. The PSC limit for this larger area will provide necessary additional protection for these crabs. Foreign fishing with trawl gear is already prohibited in a large portion of this area known as the "pot sanctuary" under § 611.93(c)(2)(ii).

A PSC limit of 326.00 *C. bairdi* Tanner crabs applicable to the domestic fishery for yellowfin sole and other flatfish is established in the area of the EEZ bounded by straight lines beginning at 54°30′ N. latitude and 165° W. longitude, extending north to 58° N. latitude, west to 58° N. latitude and 171° W. longitude, north to 60° N. latitude, west to 179°20′ W. longitude, south to 50°25′ N. latitude, then extending on a diagonal straight line southeast to the intersection of 167° W. longitude and 54°30′ N. latitude, and then extending eastward along 54°30′ N. latitude to 165° W. longitude, which is zone 2 (area C in Figure 2).

This zone 2 encompasses a large majority of the population of small female and pre-recruit male *C. bairdi* Tanner crabs. The combined PSC limits for zones 1 and 2 (406,000 *C. bairdi* Tanner crabs) will provide protection for 86 percent of the *C. bairdi* stocks.

A PSC limit of 64,000 *C. bairdi* Tanner crabs applicable to the foreign directed fisheries for yellowfin sole and other flatfish is established in the combined areas of zones 1 and 2 (areas A and C in Figure 1). This PSC will provide greater protection to *C. bairdi* Tanner crabs specifically taken by the foreign fishery for flounder than is provided by the less restrictive Bering Sea and Aleutian Islands area-wide PSC for Tanner crabs contained in § 611.93(c)(2)(ii)(E) of the foreign fishing regulations.

3. Closure Due to Catch Limits

Continued fishing by the domestic and foreign fisheries for yellowfin sole and other flatfish is not allowed in any area after the fishery has achieved its fishery-specific PSC limit and foreign directed fishing for these species is not allowed in zone 1 (area A in Figures 1 and 2) after it is closed to domestic fishing due to achievement of the PSC limit for red king crabs.

Domestic and foreign directed fishing for yellowfin sole and other flatfish in any area in which a fishery-specific PSC limit is achieved is prohibited, as the Council recommended, by this rule. An exception is provided to give the Secretary some discretion in carrying out closures due to PSC limits. This will allow some management latitude in imposing restrictions on domestic fishermen in areas and under circumstances where continued fishing can be determined to have insignificant deleterious effects on either crab stock. This discretionary authority is designed to strike a balance between conservation of depressed crab stocks and excessive regulatory burden on the

domestic groundfish fishery. Allowing continuation or resumption of domestic fishing for yellowfin sole and other flatfish in an area that is otherwise closed due to a PSC limit will permit the domestic industry to use groundfish resources more fully. However, a thorough assessment and consideration of existing conditions within domestic fisheries and the biological and socioeconomic risks involved will be made and relevant findings published before this discretionary authority can be fully exercised. This authority does not extend to foreign fisheries. If a closure of the DAH fishery occurs in zone 1 due to the red king crab PSC limit, then this rule also provides for closing foreign directed fishing for yellowfin sole and other flatfish when domestic fishing for these species is closed.

The closure of either or both zones 1 and 2 (areas A and C in figures 1 and 2) due to achievement of a PSC limit will not preclude either the domestic or the foreign fishery from continuing to fish for yellowfin sole and other flatfish in the remainder of the Bering Sea and Aleutian Islands Management Area, which has no domestic PSC limits.

Prohibiting foreign fishing with trawl gear in the area defined at § 611.93(c)(2)(ii)(F) (area B in Figure 1) effectively extends the existing closure to foreign trawlers in the Bristol Bay "pot sanctuary" (area D in figure 1) under § 611.93(c)(2)(ii)(A). The purpose of this rule is to close the entire area specified by the Council (south of 58° N. latitude, between 160° and 162° W. longitude, and north of Alaska Peninsula) to all commercial groundfish trawling. Failure to extend the "pot sanctuary" closure in this rule would unfairly allow foreign fishing in an area closed to domestic fishing and undermine the conservation of *C. bairdi* Tanner crabs and red king crabs in the area of their greatest concentration.

The Council's recommendations for halibut PSC limits are not included in this rule because they cannot be justified as a conservation emergency in light of the 19 percent increase in the halibut quota from 1985 to 1986 by the International Pacific Halibut Commission. This omission does not deny the concern that uncontrolled incidental catches of halibut by the growing JVP and DAP fishing fleets could result in decreased halibut abundance in the future. In the absence of a well-documented resource emergency involving halibut, the question of halibut PSC limits should bear the analysis and discussion of a regular amendment to the FMP.

These restrictions of fishing vessels trawling for yellowfin sole and other flatfish species are intended to reduce the deleterious effects of this fishing on *C. bairdi* Tanner crab and red king crab stocks. Recent data suggest that *C. bairdi* and red king crabs have declined to extremely low abundances (Report to Industry on the 1985 Eastern Bering Sea Crab Survey, NMFS Northwest and Alaska Fisheries Center Processed Report 85–20, November 1985). A summary of these data follows:

1. C. Bairdi Tanner Crabs

The abundance of this species has declined to its lowest level since 1975. The number of legal-sized male crabs is estimated to have decreased from about 210 million in 1975 to about 4.4 million in 1985, the lowest historical record. The estimated abundance of legal-sized males declined 24 percent between 1984 and 1985, continuing an almost steady trend over the past decade. The decrease in abundance from 1984 to 1985 was more severe in other segments of the population. Between these years the abundance of sublegal males, mature females, and immature females declined by 56 percent, 55 percent, and 77 percent, respectively. Preliminary data from the commercial fishery indicate that 3.2 million pounds of *C. bairdi* was landed in 1985. Based on the NMFS crab survey, the 1986 harvest would be in the range of 2.0 to 5.0 million pounds, had it occurred. These harvest levels are substantially below the optimum yield range of 5.0–28.5 million pounds specified for *C. bairdi* in the fishery management plan for Tanner crabs. For this reason, the Secretary delayed indefinitely the scheduled January 15 opening of the 1986 commercial fishing season for *C. bairdi* (51 FR 2892, January 22, 1986).

2. Red King Crabs

The abundance of legal-sized male red king crabs is low. Estimated numbers have dropped 93 percent from 1980 through 1985. Sublegal male crabs have decreased in abundance an estimated 50 percent during the same period. The estimated abundance of female crabs also is at a record low. The abundance of mature female crabs declined from about 17.6 million to 6.8 million from 1984 to 1985. This estimated abundance is substantially below the range of 20 million to 40 million fecund females considered optimal for future fishery production. Commercial catches of red king crabs in Bristol Bay reflect the declining abundance estimates. In 1980, 130 million pounds was landed. This harvest decreased to 34 million pounds in 1982. The Alaska Department of Fish and Game closed the commercial red king crab fishery in Bristol Bay in 1983 due to low abundance estimates. The fishery was reopened in 1984 and landed 4.2 million pounds. However, abundance estimates of legal males decreased again from 1984 to 1985 by 14 percent.

The 1985 fishery opened September 25 on an estimated legal stock of 12.5 million pounds (approximately 2.5 million crabs). The fishery closed October 2 with final landings exceeding 4.1 million pounds. These data show that from 1984 to 1985, the abundance of pre-recruit and legal males decreased by 17 percent and 14 percent, respectively, and that the 1985 legal male abundance was the second lowest since 1969.

In addition to commercial catches in the directed Tanner and king crab fisheries, incidental catches in other fisheries also contribute to fishing mortality of these species. For example, observer data indicate that 700,000 to 800,000 female red king crabs would have been captured during the *C. bairdi* fishery. These king crabs would be subject to handling mortality as they are removed from pots and returned to the sea. Consequently, the Secretary intends to keep closed the 1986 fishery for *C. bairdi* in Bristol Bay south of 58° N. latitude and east of 164° W. longitude to preclude this source of mortality. Substantial numbers of crabs are taken also in the JVP trawl fishery. About 814,000 Tanner crabs (*C. bairdi* and *C. opilio*) and 970,000 king crabs (all species) were harvested incidentally in the 1985 JVP trawl fishery in Bering Sea Area I. Despite being returned immediately to the sea, most of these incidentally harvested crabs probably die, especially if caught during the molting period when their shells are soft. The actual number of crabs killed may be higher, considering those struck and run over by non-capturing portions of the trawl gear.

For these reasons, the Council has determined and the Secretary has concurred that an emergency exists involving the *C. bairdi* Tanner crab and red king crab species and directed fishing for yellowfin sole and other flatfish in the Bering Sea Area, and that emergency action is required under section 305(e) of the Magnuson Act. This emergency rule will be effective for 90 days from its effective date and may be extended for an additional 90 days if emergency conditions persist. This rule places additional restrictions on all foreign and domestic commercial trawl fisheries in Bering Sea Area to some extent. Commercial fisheries for Tanner and king crabs either have been or likely will be further restricted by other

management actions. Other commercial fisheries using nets, pots, or longline gear are not apt indirectly to catch Tanner and king crabs.

For purposes of enforcing a prohibition against directed fishing for yellowfin sole and "other flatfish" after a PSC limit is reached, a definition of directed fishing is added to § 611.93.

3. Classification

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), has determined that this rule is necessary to respond to an emergency situation and that it is consistent with the Magnuson Act and other applicable law.

The Assistant Administrator also finds that the reasons justifying promulgation of this rule on an emergency basis also make it impracticable and contrary to the public interest to provide notice and opportunity for prior comment or to delay for 30 days its effective date under section 553 (b) and (d) of the Administrative Procedure Act. The Secretary will consider comments on this rule during its effective period. He also will consider comments from the Council and public during the Council meeting scheduled for June 25–27, 1986.

The Assistant Administrator has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of the State of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

This emergency rule is exempt from the normal review procedures of Executive Order 12291 as provided in section 8(a)(1) of that order. This rule is being reported to the Director of the Office of Management and Budget with an explanation of why it is not possible to follow the usual procedures of that order.

The Assistant Administrator prepared an environmental assessment (EA) for this rule and concluded that there will be no significant impact on the human environment. A copy of the EA is available from the Regional Director at the address above.

This rule does not contain a collection of information for purposes of the Paperwork Reduction Act.

The Regulatory Flexibility Act does not apply to this rule because, as an emergency rule, it was not required to be promulgated as a proposed rule and the rule is issued without opportunity for prior public comments. Since notice and opportunity for comment are not required to be given under section 553 of the Administrative Procedure Act, and since no other law requires that notice and opportunity for comment be given for this rule, under sections 603(a) and 604(a) of the Regulatory Flexibility Act no initial or final regulatory flexibility analysis has to be or will be prepared.

List of Subjects

50 CFR Part 611

Fisheries, Foreign relations.

50 CFR Part 675

Fisheries.

Dated: June 3, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For reasons set out in the preamble, 50 CFR Parts 611 and 675 are amended as follows:

1. The authority citation for Parts 611 and 675 continues to read as follows:

Authority: 16 U.S.C. 1801 et seq.

PART 611—[AMENDED]

2. Section 611.93 is amended by adding new paragraphs (b)(1)(iii), (c)(2)(ii)(E)(*2*)(*iv*), and (c)(2)(ii) (F) and (G), and figure 1 to be effective from June 3, 1986 to September 2, 1986 read as follows:

§ 611.93 Bering Sea and Aleutian Islands groundfish fishery.

* * * * *

(b) * * *

(1) * * *

(iii) *Directed fishing*, with respect to any species, stock, or other aggregation of fish, means fishing that is intended or can reasonably be expected to result in the catching, taking, or harvesting of quantities of such fish and amount to 20 percent or more of the total amount by weight of fish or fish products on board at any time. It will be a rebuttable presumption that, when any species, stock, or other aggregation of fish comprises 20 percent or more by weight of the catch, take, or harvest, or 20 percent or more of the total amount by weight of fish or fish products on board at any time, such fishing was directed fishing for such fish.

* * * * *

(c) * * *

(2) * * *

(ii) * * *

(E) * * *

(*2*) * * *

(*iv*) When, during the fishing year, the trawl vessels of foreign nations conducting directed fishing for yellowfin sole and "other flatfish" in either zone 1 or zone 2 (areas A and C in Figure 1) catch the PSC limit of 64,000 *C. bairdi* Tanner crabs, the Regional Director will publish a notice in the **Federal Register** prohibiting foreign trawling for yellowfin sole and "other flatfish" in both of these areas for the remainder of the fishing year. For this purpose, zone 1 is defined as that part of the management area south of 58° N. latitude and east of 165° W. longitude exclusive of other closed areas specified under this part (area A in Figure 1), and zone 2 is defined as that part of the management area bounded by straight lines connecting the following coordinates in the order listed and exclusive of other closed areas specified under this part (area C in Figure 1):

54°30′ N. latitude, 165°00′ W. longitude;
58°00′ N. latitude, 165°00′ W. longitude;
58°00′ N. latitude, 171°00′ W. longitude;
60°00′ N. latitude, 171°00′ W. longitude;
60°00′ N. latitude, 179°20′ W. longitude;
59°25′ N. latitude, 179°20′ W. longitude;
54°30′ N. latitude, 167°00′ W. longitude;
54°30′ N. latitude, 165°00′ W. longitude;

(F) At all times in the area enclosed by straight lines connecting the following coordinates: 57°30′ N. latitude, 162°00′ W. longitude; 58°00′ N. latitude, 162°00′ W. longitude; 58°00′ N. latitude, 160°30′30″ W. longitude (area B in Figure 1).

(G) When the domestic fishery for yellowfin sole and other flatfish is prohibited under § 675.21(a) of this chapter, the directed fishery for yellowfin sole and "other flatfish" is prohibited in the same area specified in § 675.21(a) exclusive of other closed areas specified under this part.

PART 675—[AMENDED]

3. In § 675.7, paragraph (g) is redesignated as paragraph (h) and a new paragraph (g) is added, to read as follows:

§ 675.7 General prohibitions.

* * * * *

(g) Use a vessel (1) to fish with trawl gear in Area B of Figure 2 unless the owner or operator of such vessel has agreed with the Secretary to comply with an approved data gathering program; or (2) to fish with trawl gear in the area at any time when no approved data gathering program exists or after such a program has been terminated; or (3) to fish with trawl gear in that area without complying fully with an approved data gathering program; or

* * * * *

4. In § 675.20, paragraph (c)(1) is suspended from June 3, 1986 to September 4, 1986, a new paragraph (e) is added, to be effective from June 3, 1986 to September 4, 1986, to read as follows:

§ 675.20 General limitations.

* * * * *

(e) *Prohibited species.* (1) Prohibited species, for the purpose of this part, means any species of fish caught while fishing for groundfish in the Bering Sea and Aleutian Islands management area, the retention of which is prohibited by other applicable law. Any catch of Pacific halibut by fishing vessels regulated under this part is a catch of a prohibited species, unless retention is authorized by regulations of the International Pacific Halibut Commission. Any catch of Tanner crab, king crab, or salmon by vessels regulated under this part is a catch of a prohibited species.

5. A new § 675.21 and Figure 2 are added, to read as follows:

§ 675.21 Prohibited species catch (PSC) limitations.

(a) *Tanner crab (C. bairdi).* (1) If, during the year, the Regional Director determines that vessels of the United States will catch the PSC limit of 80,000 *C. bairdi* Tanner crabs while conducting directed fishing for yellowfin sole and "other flatfish" in the Bering Sea subarea south of 58°00′ N. latitude and east of 165°00′ W. longitude, which is zone 1 (area A in Figure 2), he will publish a notice in the Federal Register prohibiting a directed fishery by vessels of the United States for yellowfin sole and "other flatfish" for the remainder of the year, subject to paragraph (c) of this section.

(2) If, during the year, the Regional Director determines that vessels of the United States will catch the PSC limit of 326,000 *C. bairdi* Tanner crabs while conducting directed fishing for yellowfin sole and "other flatfish" in the Bering Sea subarea bounded by straight lines connecting the following coordinates in the order listed, which is zone 2 (area C in Figure 2), he will publish a notice in the Federal Register prohibiting a directed fishery in zone 2 by vessels the of United States for yellowfin sole and "other flatfish" for the remainder of the year, subject to paragraph (c) of this section:

54°30′ N. latitude, 165°00′ W. longitude;
58°00′ N. latitude, 165°00′ W. longitude;
58°00′ N. latitude, 171°00′ W. longitude;
60°00′ N. latitude, 171°00′ W. longitude;
60°00′ N. latitude, 179°20′ W. longitude;
58°25′ N. latitude, 179°20′ W. longitude;
54°30′ N. latitude, 167°00′ W. longitude;
54°30′ N. latitude, 165°00′ W. longitude.

(b) *Red king crab.* If, during the year, the Regional Director determines that vessels of the United States will catch the PSC limit of 135,000 red king crabs while conducting directed fishing for yellowfin sole and "other flatfish" in the Bering Sea subarea south of 58°00′ N. latitude and east of 165°00′ W. longitude, which is zone 1 (area A in Figure 2), he will publish a notice in the Federal Register prohibiting a directed fishery in zone 1 by vessels of the United States for yellowfin sole and "other flatfish" for the remainder of the year, subject to paragraph (c) of this section.

(c) When the fishing vessels of the United States to which a PSC limit applies have caught an amount of prohibited species equal to that PSC limit (but less than an amount which would constitute overfishing), the Secretary may allow some or all of those vessels to continue or resume directed fishing for yellowfin sole and "other flatfish" under conditions which will limit fishing by permissible gear, areas, times, and other appropriate factors, and subject to other provisions of this part. Such other factors may include delivery of a vessel's catch to United States fish processors. In authorizing and conditioning such continued or resumed directed fishing by those vessels, the Secretary will take into account the following considerations:

(1) A determination by the Regional Director of the risk of biological harm to Tanner and king crab stocks and of socioeconomic harm to authorized crab users posed by authorizing continued or resumed directed fishing for yellowfin sole and "other flatfish";

(2) A determination by the Regional Director of the extent of incidental catches of Tanner and king crabs in specific areas;

(3) A determination by the Regional Director of the accuracy of the estimates of incidental catches of Tanner and king crabs;

(4) A determination by the Regional Director that adherence to the prescribed conditions can be assured in light of available enforcement resources; and

(5) A determination by the Regional Director that continued or resumed directed fishing for yellowfin sole and "other flatfish" will not lead to overfishing of prohibited species.

B. Closed area defined at §675.22.

C. Zone 2 area defined at §675.21(a)(2).

BILLING CODE 3510-22-C

6. A new § 675.22 is added, to read as follows:

§ 675.22 Time and area closures.

(a) No fishing with trawl gear is allowed at any time in that part of the Area I of the Bering Sea subarea that is south of 58°00' N. latitude, east of 162°00' W. longitude and west of 160°00' W. longitude (area B in Figure 2).

(b) The Secretary may allow fishing for Pacific cod with trawl gear in that portion of the area described in paragraph (a) of this section that lies south of a straight line connecting the coordinates 58°43' N. latitude, 160°00' W. longitude, and 58°00' N. latitude, 162°00' W. longitude, provided that such fishing is in accordance with a data gathering program approved by the Regional Director after consultation with the Council designed to provide data useful in the management of the trawl fishery and the Tanner crab and king crab fishery and which will be monitored to prevent overfishing of the Tanner and king crab stocks in the area.

(c) The owner or operator of each vessel which fishes in Area B pursuant to an approved data gathering program must agree with the Secretary to comply with all requirements of that program.

(d) If the Regional Director determines that vessels fishing with trawl gear in the area described in paragraph (a) of this section will catch the PSC limit of 12,000 red king crabs, he will immediately close all fishing with trawl gear in that area by notice in the Federal Register and will make reasonable attempts to notify all parties to each agreement referred to in paragraph (c) that the program has terminated.

50 CFR Part 672

[Docket No. 60587-6087]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule; and request for comments.

SUMMARY: The Secretary of Commerce (Secretary) has determined that an emergency exists in the groundfish fishery of the Gulf of Alaska resulting from the current regulatory requirement that he close all fishing for groundfish in any regulatory area when the optimum yield (OY) for any groundfish species or that portion of the sablefish OY allocated to any gear type is achieved. The 1986 sablefish OYs in all areas are expected to be achieved within a few weeks. Closure of these areas upon the achievement of the sablefish OYs would cause irreparable harm to the domestic groundfish fishing industry by denying them access to substantial quantities of other groundfish species. This rule authorizes the Secretary: (1) To close a regulatory area or district of the Gulf of Alaska to directed fishing for sablefish by any specific gear type prior to achievement of the share of the sablefish OY that has been allocated to that gear type, thereby providing for bycatch, and (2) to allow continued fishing for other groundfish species in a regulatory area or district when the OY of any groundfish species has been reached, if the Director, Alaska Region, NMFS (Regional Director), determines that the resulting mortality inflicted on the species for which the OY had been reached would not constitute overfishing. Public comments are invited on this emergency rule and will be considered in the promulgation of a final rule permanently implementing these measures. The emergency rule is necessary to promote the full utilization of all groundfish species without biological harm to any one species and without inhibiting the development of fisheries that are dependent on sablefish and other groundfish species. It is intended as a conservation and management measure to optimize groundfish yields from the fishery in 1986 and subsequent years.

EFFECTIVE DATE: June 3, 1986, until September 2, 1986. Written comments on this rule and its supporting documents must be received on or before July 3, 1986.

ADDRESS: Comments should be mailed to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802, or delivered to Room 453, Federal Building, 709 West Ninth Street, Juneau, Alaska. Copies of this rule and its supporting documents may be obtained from Mr. McVey.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Biologist, NMFS), 907-586-7230.

SUPPLEMENTARY INFORMATION:

Background

The domestic and foreign groundfish fishery in the fishery conservation zone (3-200 miles offshore) of the Gulf of Alaska is managed under the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP). The FMP was developed by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and is implemented by regulations at 50 CFR Part 672.

At its January 15-17, 1986, meeting, the Council reviewed regulations at §§ 672.20(b) and 672.24(b) with respect to the FMP's objectives for groundfish management, and recommended to the Secretary that these regulations be amended in two ways. First, § 672.20(b) should be amended to authorize the Secretary to allow fishing for other species to continue if the OY for a single species in a regulatory area or district has been reached, on the condition that such fishing will not result in overfishing of the single species. Second, § 672.24(b) should be amended to reduce the potential for exceeding sablefish OYs by allowing the Secretary to close directed fishing for sablefish by pot, hook-and-line, or trawl vessels prior to their taking the share of the sablefish OY assigned to any gear type for any year and any area or district, leaving an amount of sablefish available for bycatch in fishing other species. Upon such closure, sablefish could continue to be landed by that gear type only as an incidental catch until that portion of the OY allocated to it had been acheived, after which sablefish would be treated as a prohibited species. Each of the Council's recommendations and the action taken by the Secretary is discussed below:

Recommendation To Amend 50 CFR 672.20

Ten species (or species groups) of groundfish are managed under the FMP, which establishes OYs for each species. Each OY represents the best estimate of an annual harvest level for that species, taking into account biological, ecological and economic factors. Since the FMP was implemented, OYs for each species have constituted a "cap" above which additional fishing would not be allowed. Such management has been in response to: (1) Management Objective A of the FMP, "Rational and optimal use, in both the biological and socioeconomic sense, of the region's fishery resources as a whole", and (2) National Standard 1 of the Magnuson Act, "Conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery". Overfishing is considered to be the level of fishing mortality that jeopardizes the capacity of a stock to recover to a level at which it can produce maximum biological or economic value on a long-term basis under prevailing biological and environmental conditions.

Both the foreign and domestic regulations implementing the FMP at §§ 611.92(c)(2)(ii) and 672.20(b)(1)

contain measures that require closure of entire regulatory areas or districts to all fishing whenever an OY for any species is reached, with the exception that foreign hook-and-line fisheries for Pacific cod and sablefish may continue until the OY for each of these species is achieved.

Both domestic and foreign regulations recognize that hook-and-line gear takes few, if any, target groundfish species of other fisheries, thereby justifying continued fishing with this gear when the OYs for those target species have been reached. Only when the OYs for Pacific cod or sablefish have been reached is hook-and-line gear in a regulatory area also prohibited, at which time all fishing would finally be prohibited.

The Council did not recommend that the emergency rule amend the foreign fishing regulations. Most of the groundfish resources in the Gulf of Alaska are being fully utilized, or will be fully utilized, by U.S. fishermen in wholly domestic (DAP) or joint venture (JVP) operations. As a result, directed foreign trawling in the Gulf of Alaska has greatly diminished since 1978 and none is expected in 1986. Foreign hook-and-line fishing for Pacific cod could be eliminated in future years.

Certain species groups, such as sablefish, are available only in relatively small amounts each fishing year which, depending on market demand, could be fully harvested within a short period of time. In 1985, the OYs for sablefish in all regualtory areas and districts were reached a few weeks after active sablefish fishing began. The required closure of the entire area or district to all fishing would have created a severe economic hardship on fishermen who otherwise could have continued to fish for underutilized species. In the Central Regualtory Area, the economic hardship would have been especially severe, because the sablefish OY was reached on June 8. Domestic fishermen had almost six months of fishing time left in which they potentially could have harvested about 117,000 metric tons (mt) of other groundfish in DAP fisheries and 49,600 mt in JVP fisheries. To avoid making U.S. fishermen forego these amounts, the Secretary promulgated an emergency rule under section 305(e) of the Magnuson Act that amended the applicable rules on an interim basis to authorize the prohibition of fishing for a species for which the OY had been reached in an area or district and declare that species to be a prohibited species (50 FR 28560, July 15, 1985). That emergency rule expired on December 31, 1985.

The original regulations are again in effect for the 1986 fishing year and could result in U.S. hook-and-line and trawl vessels being denied access to large amounts of available groundfish species. Pot vessels are expected to harvest only sablefish and would not be affected similarly once the pot vessel share of sablefish had been reached. Gross revenues lost by hook-and-line and trawl vessels could be substantial. These revenues are estimated in the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA), using actual numbers of vessels and price data from 1985. The EA/RIR/IRFA shows that, in the extreme, each of 46 trawl vessels targeting on pollock, Pacific cod, flounders, and the trawl share of the sablefish OY could potentially forego gross revenues of $129,000, $471,000, $79,000, and $37,000, respectively, from these catches. Each of 440 hook-and-line vessels targeting on Pacific ocean perch, rockfish, thornyhead rockfish, and their share of sablefish could potentially forego gross revenues of $7,000, $11,000, $10,000 and $34,000, respectively from catches of each species. Processing, wholesale, and retail industries would also suffer losses in revenues. Because the total amount earned at these three levels is three to five times the exvessel value, more revenues would be foregone by the U.S. fishing industry.

The EA/RIR/IRFA contains data on the size of bycatches expected in the various target fisheries. Although DAP catches are by themselves too small to provide adequate information, data from JVP fisheries do yield adequate information. In the JVP fishery for pollock, in the Shelikof Strait, off-bottom trawl gear is known to take relatively small amounts of other groundfish species. On-bottom trawl gear used to harvest pollock and Pacific cod takes larger numbers of other species, but the bycatches are still relatively small. However, when bottom trawl gear is used to harvest flounders, bycatches of other groundfish species can be quite large. Bycatches of "other rockfish", thornyhead rockfish, and squid are low whether on- or off-bottom gear is used during any month of the year. After reviewing the bycatch rates of all groundfish species in the various fisheries, the Secretary has determined that certain groundfish fisheries take small to insignificant amounts of other groundfish species as bycatch. He has also determined that further bycatches of such species for which the OY had already been attained, in most cases, would not necessarily constitute overfishing under the Magnuson Act. He has concluded, therefore, that prohibiting all fishing in a regulatory area or district, or part thereof, when the OY for a single species is reached is not justified in all cases, and that such unqualified closures would impose unacceptable, negative economic effect on the fishing industry.

The likelihood of unqualified closures early in 1986 is great. The 1986 sablefish season for hook-and-line gear throughout the Gulf of Alaska and for pot gear in the Western and Central Regulatory Areas of the Gulf of Alaska started on April 1. The season for trawl gear started on January 1. Substantial fishing effort for sablefish by all gear types should harvest the OYs in each area/district within a few weeks, forcing the Secretary to impose general and unqualified closures.

Secretarial Action

The Secretary, therefore, is promulgating this emergency rule to amend, on an interim basis, the current rules at § 672.20(b) to authorize species-specific fishery closures. The Secretary requests public comment on this rule because he anticipates effecting this change permanently by a subsequent final rule.

Recommendation To Amend 50 CFR 672.24

Amendment 14 to the FMP (50 FR 43193, October 24, 1985) contained seven parts. One part established that legal commercial fishing gear types for use in the directed sablefish fishery are pots, hook-and-line, and trawls. This part also allocates percentages of the sablefish OY for each regulatory area and district to each gear type and establishes a schedule for phasing out pot gear (Table 1).

TABLE 1.—PERCENTAGES OF SABLEFISH ALLOCATED BY YEAR AMONG HOOK-AND-LINE (H AND L), POT, AND TRAWL GEAR USERS FOR EACH REGULATORY AREA IN THE GULF OF ALASKA

Regulatory area	Year				
	1986	1987	1988	1989	1990

Pot	25	25	25	0	[c]
Trawl	20	20	20	20	[c]

[a] 1987 and subsequent years—same as 1986.
[b] 1988 and subsequent years—same as 1987.
[c] 1990 and subsequent years—same as 1989.

Under current regulations implementing Amendment 14, when the share of the sablefish OY assigned to any gear type for any year and any area or district has been taken, the Regional Director is required to close that regulatory area or district to all fishing for groundfish with that gear type for the remainder of that year. The Council considered the effects that this measure would have on other segments of the groundfish industry and determined that the potential negative economic effects on the industry are of the same type as discussed above under the recommendation to amend § 672.20. The Council, on a recommendation from its Advisory Panel, recommended that directed fishing should be prohibited for sablefish by any gear type prior to full attainment of the portion of the OY allocated to that gear type to assure that a portion of the sablefish OY would remain to support an adequate bycatch of sablefish in fisheries for other groundfish species. Thus, the Council recommended that the Regional Director close directed fishing for sablefish by any gear type in a regulatory area or district if he determines that the share of sablefish OY assigned to that gear type in that regulatory area or district may be taken before the end of the year. "Directed fishing" is defined at § 672.2 to mean fishing that is intended or can reasonably be expected to result in the catching, taking, or harvesting of quantities of such fish that amount to 20 percent or more of the catch, take, or harvest, or to 20 percent or more of the total amount of fish or fish products on board at any time. Sablefish could continue to be landed only as incidental catch until the portion of the OY allocated to that gear type is achieved. At that time, further sablefish catches by that gear type would have to be treated as a prohibited species under this section, unless closure of all fisheries were necessary to prevent overfishing of sablefish. Again, the likelihood that a specific gear type will harvest all of its sablefish allocation early in 1986 is great. The season for trawl gear started on January 1. Over half of the sablefish OY allocated to trawlers in the Central Regulatory Area has already been harvested. The 1986 sablefish season for hook-and-line gear throughout the Gulf of Alaska and for pot gear in the Western and Central Regulatory Areas of the Gulf of Alaska started on April 1. Substantial fishing effort for sablefish by each gear type could harvest the OYs in each area or district within a few weeks, forcing the Regional Director to impose general area or district closures on any gear type that had reached its sablefish allocation.

Secretarial Action

The Secretary, therefore, is promulgating this emergency rule to amend, on an interim basis, the current rules at § 672.24 to authorize closure of the directed fishery for sablefish by any legal gear type prior to reaching its share of the OY and retaining a portion of the sablefish OY for bycatch to support groundfish fishing for other species with that gear type. The Secretary also requests public comment on this rule because he anticipates effecting this change permanently by a subsequent final rule.

Summary of the EA/RIR/IRFA

The amendment to § 672.20 recommended by the Council and implemented by this emergency rule is superior among alternatives considered, because certain fisheries for other groundfish species could be allowed to continue after the OY for a single species had been reached, providing that overfishing would not occur. Although the nature of the Gulf of Alaska groundfish fisheries is changing, target fisheries by each gear type in 1986 are expected to be similar to those in 1985. Fisheries using trawl gear will target primarily on pollock, Pacific cod, flounder, and sablefish, and possibly Atka mackerel. Fisheries using hook-and-line gear will target primarily on sablefish, Pacific ocean perch, rockfish, and thornyhead rockfish. Pot gear might target primarily on sablefish.

Benefits under the proposed action presented in Table 2 below are those accruing to fishermen on a per-boat basis by gear type as a result of being able to fully harvest OYs for all groundfish species, as estimated for 1986, using 1985 price data and 1986 available amounts of groundfish. Independent price effects are assumed.

Processing, wholesale, and retail industries also earn income. Because the total amount earned at these three levels is three to five times the exvessel value, i.e. the value paid to fishermen, additional revenues would accrue to the U.S. fishing industry if the Secretary implements this alternative.

Without this measure, U.S. fishermen might be forced to forego earnings equal to the amounts of available groundfish multiplied by the exvessel values of fish unharvested as a result of a regulatory area's being closed after the OY for any one species had been reached (Table 2); existing and newly developing fisheries in the Gulf of Alaska could be substantially harmed.

TABLE 2.—MAXIMUM POTENTIAL GROSS EXVESSEL REVENUE ON A PER-BOAT BASIS OF TARGET SPECIES BY HOOK-AND-LINE AND TRAWL GEAR

[1] Price data not available.

The amendment to § 672.24 recommended by the Council and implemented by this emergency rule would allow the Regional Director to prohibit directed fishing for sablefish by a gear type in order to provide sufficient amounts of the sablefish OY to support a bycatch of sablefish in target fisheries for other groundfish species. Bycatch amounts of sablefish could still be retained and sold. The same total amount of sablefish would be harvested by each gear type as was assigned to that gear type as its share of the sablefish OY. In 1986, the gear types that receive shares of the sablefish OYs in the management areas are hook-and-line gear, trawl gear, and pot gear. On a per-boat basis, each vessel could potentially realize the maximum returns (assuming independent price effects) for sablefish, as shown in the table above. For purposes of this analysis, however, fishing for each species is considered independent of fisheries for other species. Besides targeting on sablefish, vessels using trawl gear might target primarily on pollock, Pacific cod, flounder, and possibly Atka mackerel. Vessels using hook-and-line gear might target primarily on Pacific ocean perch, rockfish, and thornyhead rockfish. Vessels using pot gear will, however, target only on sablefish.

Without this measure, each trawler, which might have targeted on pollock, Pacific cod, or flounder in the Western Area, could forego a maximum of $111,000 (for pollock in the combined Western/Central Area), $188,000, and $29,000, respectively, or a total of $328,000. Each trawler that might have targeted on Pacific cod or flounder in the Central Area would forego a maximum of $207,000, and $27,000, respectively, or a total of $234,000 per vessel. Each hook-and-line vessel that might have targeted on Pacific ocean perch would forego a maximum $2,000 in the Western Area and $3,000 in the Central Area. If each vessel targeted on other rockfish, it would forego about $10,000 in the Gulf and $1,000 in the Central Southeast Outside District. If each vessel targeted on thornyhead rockfish, it would forego about $10,000. Each pot vessel will likely have targeted only on sablefish and would not be expected to forego any additional revenues after it has reached its share of the sablefish OY.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is necessary to respond to an emergency situation and that it is consistent with the Magnuson Act and other applicable law. This rule is implemented for 90 days under section 305(e) of the Magnuson Act.

The Assistant Administrator also finds for good cause that the reasons justifying promulgation of this rule on an emergency basis also make it impractical and contrary to the public interest to provide prior notice and opportunity for comment or to delay for 30 days its effective date, as required by section 553 (b) and (d) of the Administrative Procedure Act. Early implementation of this rule will benefit groundfish fishermen who otherwise might have to forego substantial amounts of other groundfish species if the OY for a species is caught. Similarly, sablefish fishermen might have to forego substantial amounts of other groundfish species if the share of the OY allocated to a legal gear type is reached.

The Regional Director prepared an environmental assessment for this rule as part of the EA/RIR/IRFA, and concluded that no significant impact on the human environment would result from this rule, either from implementing it for the interim under section 305(e) or for subsequently amending it permanently by final rule under section 305(g). You may obtain a copy of this document from the address above.

The Administrator of NOAA determined that this emergency rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination was based on the socioeconomic analysis contained in the EA/RIR/IRFA, which is summarized above. This emergency interim rule is exempt from the normal review procedures of Executive Order 12291 as provided in section 8(a)(1) of that order. It is being reported to the Director of the Office of Management and Budget, with an explanation of why it is not possible to follow the regular procedures of that order.

The Alaska Region, NMFS, prepared an initial regulatory flexibility analysis as part of the regulatory impact review, which concludes that this rule, if adopted permanently, would potentially have significant beneficial economic effects on small entities. You may obtain a copy of this analysis at the address above. The socioeconomic analysis contained in the EA/RIR/IRFA upon which the determinations that this rule is a non-major and significant were based is summarized above. The Regulatory Flexibility Act does not apply to this rule because, as an emergency rule, it was not required to be promulgated as a proposed rule and the rule is issued without opportunity for prior public comment. Since notice and opportunity for comment are not required to be given under section 553 of the Administrative Procedure Act, and since no other law requires that notice and opportunity for comment be given for this rule, under section 604(a) of the Regulatory Flexibility Act no final regulatory flexibility analysis has to be or will be prepared.

This rule contains no collection of information for purposes of the Paperwork Reduction Act.

The Assistant Administrator has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of the State of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

List of Subjects in 50 CFR Part 672

Fisheries.

Dated: June 2, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Part 672 is amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation of Part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 672.20, paragraph (b) is suspended from June 3, 1986 until September 2, 1986 and a new paragraph (f) is added to be effective from June 3, 1986 until September 2, 1986 to read as follows:

§ 672.20 Optimum yield.

* * * * *

(f) *Notices.*

(1) If the Regional Director determines that the OY for any species in any regulatory area or district in Table 1 of paragraph (a) of this section has been or will be reached, the Secretary will issue a notice of closure under § 672.22(a) closing fishing for that species in that area or district, or part thereof, declaring that species in that area or district to be a prohibited species for purposes of paragraph (d) of this section. During the time that such a notice is in effect, the operator of every vessel regulated by this part must minimize its catch of that species in the area or district, or part thereof, to which the notice applies.

(2) When the Regional Director determines that continued fishing for other groundfish species in an area or district, or part thereof, may lead to overfishing of a species for which an OY has been or will be reached, the Secretary will, by notice in the **Federal Register**, close or limit such fishing for other groundfish species by methods, including time, area, or gear adjustments, that will prevent overfishing of the species for which the OY is taken.

(3) When making closures or imposing limitations under paragraph (f)(1) of this section, the Regional Director will take into account the following considerations and may allow continued fishing with certain gear types, issuing findings relevant to these considerations:

(i) The risk of biological harm to a groundfish species for which the OY has been reached;

(ii) The risk of socioeconomic harm to authorized users of the groundfish for which the OY has been reached;

(iii) The impact that a continued closure might have on the socioeconomic wellbeing of other domestic fisheries.

* * * * *

3. In § 672.24, paragraphs (b)(1) and (b)(2) are suspended from June 3, 1986 until September 2, 1986 and new

paragraphs (b)3), (b)(4), and (b)(5) are added, to be effective from June 3, 1986 until September 2, 1986 to read as follows:

§ 672.24 Gear limitations.

* * * * *

(b) *Sablefish gear restrictions and allocations.*

* * * * *

(3) *Eastern Area.* No person may use any gear other than hook-and-line and trawl gear when fishing for groundfish in the Eastern Area. No person may use any gear other than hook-and-line gear to engage in directed fishing for sablefish. When vessels using trawl gear have harvested as bycatch 5 percent of the OY for sablefish during any year, further trawl catches of sablefish must be treated as a prohibited species as provided by paragraph (b)(5)(ii) of this section.

(4) *Central and Western Areas.* During 1986 in the Central Area, and during 1986, 1987, and 1988 in the Western Area, hook-and-line gear may be used to take up to 25 percent of the sablefish OY and trawl gear may be used to take up to 20 percent of that OY. After the years specified above, hook-and-line gear may be used to take up to 80 percent of the sablefish OY in each area and trawl gear may be used to take up to 20 percent of that OY. No person may use any gear other than hook-and-line, pot, or trawl gear in fishing for groundfish in these areas during the years specified above. After those years, no person may use any gear other than hook-and-line or trawl gear in fishing for groundfish in the Gulf of Alaska.

(5) *Sablefish bycatch amounts.* (i) When the Regional Director determines that the share of the sablefish OY assigned to any type of gear for any year and any area or district under this paragraph may be taken before the end of that year, the Regional Director, in order to provide adequate bycatch amounts to ensure continued groundfish fishing activity by that gear group, will, by notice in the **Federal Register**, prohibit directed fishing for sablefish by persons using that type of gear for the remainder of that year.

(ii) If the share of the sablefish OY assigned to any type of gear for any year and any area or district under this paragraph is reached, further catches of sablefish must be treated as a prohibited species by persons using that type of gear for the remainder of that year.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 51, No. 108
Friday, June 6, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 907 and 908

[Docket Nos. AO-245-A9 & AO-229-A7]

Navel Oranges Grown in Arizona and Designated Part of California; Valencia Oranges Grown in Arizona and Designated Part of California; Notice of Hearing on Proposed Amendment of Marketing Orders 907 and 908, Both as Amended

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of public hearing on proposed rulemaking.

SUMMARY: Notice is hereby given of a public hearing to consider amending Marketing Order No. 907 (7 CFR Part 907) and Marketing Order No. 908 (7 CFR Part 908). These marketing orders regulate handlers of navel and Valencia oranges grown in Arizona and part of California, respectively, and are hereinafter referred to collectively as the "orders."

The purpose of the hearing is to receive testimony on proposals to amend those provisions of the orders concerning the structure of the committees established to administer the programs.

DATE: The hearing will begin at 9:00 a.m., June 10, 1986.

ADDRESS: The hearing will be held at the Holiday Inn, 9000 West Airport Drive, Visalia, California 93722.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250; telephone: (202) 447-5697 or David B. Fitz, Officer-In-Charge, Fresno Marketing Field Office, 5150 N. 6th St., Suite 180, Fresno, California 93710; telephone: (209) 487-5837.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of section 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Regulatory Flexibility Act (Pub. L. 96-354), effective January 1, 1981, seeks to ensure that within the statutory authority of a program, the regulatory and informational requirements are tailored to the size and nature of small businesses. Interested persons are invited to present evidence at the hearing on the possible regulatory and informational impact of the proposals on small business.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*) and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR Part 900).

The hearing is being held to receive testimony on proposals to amend those provisions of the orders concerning the structure of the Navel Orange Administrative Committee and the Valencia Orange Administrative Committee. These committees are established under their respective order for the purpose of administering the programs. Proposals under consideration concern committee composition, eligibility to serve, nomination and selection procedures, procedures for filling committee vacancies, order definitions relevant to committee structure, or order provisions directly affected by committee structure such as quorum requirements and number of concurring votes required to carry committee motions.

Proposals have been received from the Sequoia Orange Company, Mr. R.E. Herrick of Belridge Farms and Packing Company, the Naval Orange Administrative Committee, and Valencia Orange Administrative Committee. These proposals have not received the approval of the Secretary of Agriculture.

The public hearing is for the purpose of: (i) Receiving evidence about the economic and marketing conditions which relate to the proposed amendments of the orders concerning committee structure; (ii) determining whether there is a need to amend those provisions of the orders concerning committee structure; and (iii) determining whether the proposed amendment concerning committee structure or appropriate modifications of them will tend to effectuate the declared policy of the Act.

All persons wishing to submit written material in evidence at the hearing should be prepared to submit four copies of such material at the hearing and should have prepared testimony available for presentation at the hearing.

List of Subjects in 7 CFR Parts 907 and 908

Marketing agreements and orders, California, Arizona, Oranges (Navel), (Valencia).

1. The authority citation for 7 CFR Parts 907 and 908 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Testimony is invited on the following proposals or appropriate alternatives or modifications to such proposals:

PARTS 907 AND 908—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA, VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

PROPOSALS SUBMITTED BY SEQUOIA ORANGE COMPANY

Proposal No. 1

Amend § 907.20 as follows:

Section 907.20 Establishment and membership

(a) There is hereby established a Navel Orange Administrative Committee consisting of 13 members, for each of whom there shall be one alternate. Reference to "member" hereafter shall be deemed to include "alternate" and "additional alternate" unless the context indicates otherwise. Nine of the members shall be growers. Three of the members shall be handlers, employees of handlers, or employees of central marketing organizations. The grower and handler members shall represent the prorate districts in which they were nominated. One member of the committee and an alternate shall be know as the "public" member of the committee.

(b) Except as otherwise provided by § 907.22(j), the grower and handler members of the committee shall be nominated by prorate district and group, in accordance with the following schedule:

S-074999 0001(00)(05-JUN-86-13:09:37)

	Major co-op marketing organizations		All other co-op marketing organization		Nonaffiliated growers—	
	Grower	Handler	Grower	Handler	Grower	Handler
Districts 1 and 4	3	1	2	1	2	1
Districts 2 and 3	1					1

Proposal No. 2

Amend Section 907.21 by adding the following two sentences at the end of §907.21:

The failure of any member to maintain the qualifications required for nomination and selection shall result in disqualification of the member and his position shall become vacant. Such vacancy shall be filled as provided in § 907.28.

Proposal No. 3

Amend Section 907.22 as follows:

Section 907.22 Nominations.

(a) With respect to paragraphs (c) and (d) of this section, the time and manner of nominating members of the committee shall be prescribed by the Secretary. With respect to paragraph (c) of this section, the Secretary shall adopt procedural rules and regulations to be observed for (1) the nomination of candidates for member, alternate member, and additional alternate member, and (2) the conducting of such nominations by mail balloting.

(b) Grower and handler members shall be nominated from each prorate district by the growers in that district and the number nominated from each district shall be in direct proportion to the average of the volume of fresh domestic shipments in each district handled during the two preceding fiscal years, *provided however,* that in each district with 8% or more of the total fresh domestic shipments, at least one member shall be nominated. A district having less than 8% of total fresh domestic, shipments shall be combined, for purposes of nomination and representation, with a district having the most comparable production and marketing conditions.

(c) The major cooperative marketing organization, or the growers affiliated therewith, which handled, during the fiscal year in which nomination for members are made:

(1) 50 percent or more of the total fresh domestic shipments may nominate five grower and one handler member of the committee; or

(2) More than 40 but less than 50 percent of the total fresh domestic shipments may nominate four grower and one handler member of the committee; or

(3) More than 30 but less than 40 percent of the total fresh domestic shipments may nominate three grower and one handler member of the committee.

(d) All cooperative marketing organizations, or the growers affiliated therewith, which market oranges and which are not qualified under paragraph (c), and which together handled, during the fiscal year in which nomination for members and alternates are made:

(1) 50 percent or more of the total fresh domestic shipments may nominate five grower and one handler member of the committee; or

(2) More than 40 but less than 50 percent of the total fresh domestic shipments may nominate four grower and one handler member of the committee; or

(3) More than 30 but less than 40 percent of the total fresh domestic shipments may nominate three grower and one handler member of the committee; or

(4) More than 20 but less than 30 percent of the total fresh domestic shipments may nominate two grower and one handler member of the committee; or

(5) More than 10 but less than 20 percent of the total fresh domestic shipments may nominate one grower and one handler member of the committee; or

(6) More than 3 but less than 10 percent of the total fresh domestic shipments may nominate one member of the committee; or

(7) 3 percent or less of the total fresh domestic shipments shall be deemed to be non-affiliated growers.

(e) All growers which are not qualified under paragraphs (c) and (d) of this section shall nominate that portion of the nine grower and three handler members and alternates not nominated by cooperative marketing organizations.

(f) In order to qualify as a nominee from a district such nominee must be a grower with a growing operation in that district or be employed by a first handler operating in that district.

(g) When voting for nominees from each district, each grower not affiliated with a cooperative marketing organization shall be entitled to cast one vote for each position, which vote shall be cast on behalf of himself, his agents, subsidiaries, affiliates, and representatives. Such vote shall be weighted in accordance with the volume of fresh domestic shipments in each district in the fiscal year in which nominations are made. The votes of cooperative marketing organizations under paragraph (d) of this section shall be weighted in accordance with the volume of fresh domestic shipments in each district in the fiscal year in which nominations are made. *Provided,* that, to the extent practicable, each cooperative marketing organization shall be entitled to have representation on the committee.

(h) The public member (and alternate) of the committee shall be selected by the Secretary pursuant to § 907.23 and shall not be a grower or handler, or employee, agent, or representative of a grower or handler (other than a charitable or educational institution which is a grower or handler), or of a central marketing organization.

(i) A cooperatively owned packinghouse shall not be considered a cooperative marketing organization.

(j) The Secretary, upon recommendation of the committee, or upon other information, shall reapportion the number of grower or handler members, or both, to be nominated pursuant to this section and may realign the number of grower or handler members in and between districts. Any such change shall be based, insofar as practicable, upon the proportionate amounts during the fiscal year of domestic fresh shipments of the respective groups, domestic fresh shipments from each district, and the number of marketing organizations within each group.

Proposal No. 4

Amend Section 904.23 as follows:

Section 907.23 Selection.

From the nominations made pursuant to §§ 907.22 (c), (d), and (e), or from other qualified growers and handlers, the Secretary shall select from the district nominations nine grower and three handler members of the committee and their alternates. The Secretary shall select one public member and one alternate public member of the committee from qualified persons suggested by the committee, the public, and industry at large.

Proposal No. 5

Amend Section 907.29 by deleting paragraph (n).

Proposal No. 6

Amend Section 907.30 as follows:

Section 907.30 Procedure.

(a) A majority of the committee shall constitute a quorum and any action of the committee shall require at least seven concurring votes, *provided however*, that eight concurring votes shall be required in order to recommend size or volume regulation, and ten concurring votes shall be required to recommend size or volume regulation for any week following ten consecutive weeks of size or volume regulation. In any vote to recommend regulation, only the votes of members whose districts are to be regulated by the proposed regulation shall be counted. In this event a majority plus one concurring votes of those eligible to vote shall be required in order to recommend size or volume regulation, and a majority plus two concurring votes of those eligible to vote shall be required to recommend size or volume regulation for any week following ten consecutive weeks of size or volume regulation.

(b) Except to recommend size or volume regulation, the committee may vote by telegraph, telephone or any other means of communication; and any votes so cast shall be confirmed promptly in writing. *Provided*, that if an assembled meeting is held, all votes shall be cast in person.

Proposal No. 7

Proposals 1, 2, 3, 4, 5, and 6 to amend the Navel Orange Marketing Order shall also apply to the Valencia Orange Marketing Order, except for the schedule in Proposal 1 which is revised as follows:

	Major co-op marketing organizations		All other co-op marketing organizations		Nonaffiliated growers	
	Grower	Handler	Grower	Handler	Grower	Handler
District 1	2		1			
District 2	2	1	1	1	1	1
District 3	1					

PROPOSALS SUBMITTED BY R.E. HERRICK OF SELRIDGE FARMS AND PACKING COMPANY

Proposal No. 8

Amend § 907.20 as follows:

Section 907.20 Establishment and membership.

(a) There is hereby established a Navel Orange Administrative Committee consisting of 13 members, for each of whom there shall be one alternate. Reference to "members, hereafter shall be deemed to include "alternate" and "additional alternate" unless the context indicates otherwise. Nine of the members shall be growers or employees of growers. Three of the members shall be handlers, employers of handlers, or employees of central marketing organizations. The grower and handler members shall represent the prorate districts in which they were nominated. One member of the committee and an alternate shall be known as the "public" member of the committee.

(b) Except as otherwise provided by § 907.22(k), the grower and handler members of the committee shall be nominated by prorate district and group, in accordance with the following schedule:

	Major co-op marketing organizations		All other co-op marketing organizations		Nonaffiliated growers	
	Grower	Handler	Grower	Handler	Grower	Handler
District 1 and 4	3	1	2	1	2	1
District 2 and 3	1					1

Proposal No. 9

Amend § 907.21 by adding the following two sentences at the end of § 907.21:

The failure of any member to maintain the qualifications required for nomination and selection shall result in disqualification of the member and his position shall become vacant. Such vacancy shall be filled as provided in § 907.26.

Proposal No. 10

Amend § 907.22 as follows:

907.22 Nominations.

(a) With respect to paragraphs (c) and (d) of this section, the time and manner of nominating members of the committee shall be prescribed by the Secretary. With respect to paragraph (a) of this section, the Secretary shall adopt procedural rules and regulations to be observed for (1) the nomination of candidates for member, alternate member, and additional alternate member, and (2) the conducting of such nominations by mail balloting.

(b) Grower and handler members shall be nominated from each prorate district by the growers in that district and the number nominated from each district shall be in direct proportion to the average of the volume of fresh domestic shipments in each district handled during the two preceding fiscal years, provided however, that in each district with 8% or more of the total fresh domestic shipments, at least one member shall be nominated. A district having less than 8% of total fresh domestic shipments shall be combined, for purposes of nomination and representation, with a district having the most comparable production and marketing conditions.

(c) The cooperative marketing organization, or the growers affiliated therewith, which handled the largest percentage of the total fresh domestic shipments handled by all cooperative marketing organizations during the fiscal year in which nomination for members are made, shall nominate members in accordance with the following schedule. Such major cooperative marketing organization which handled:

(1) 50 percent or more of the total fresh domestic shipments may nominate five grower and one handler member of the committee; or

(2) More than 40 but less than 50 percent of the total fresh domestic shipments may nominate four grower and one handler member of the committee; or

(3) More than 30 but less than 40 percent of the total fresh domestic shipments may nominate three grower and one handler member of the committee.

(d) All cooperative marketing organizations, or the growers affiliated therewith, which market oranges and which are not qualified under paragraph (c), and which together handled, during the fiscal year in which nomination for members and alternates are made:

(1) 50 percent or more of the total fresh domestic shipments may nominate

five grower and one handler member of the committee; or

(2) More than 40 but less than 50 percent of the total fresh domestic shipments may nominate four grower and one handler member of the committee; or

(3) More than 30 but less than 40 percent of the total fresh domestic shipments may nominate three grower and one handler member of the committee; or

(4) More than 20 but less than 30 percent of the total fresh domestic shipments may nominate two grower and one handler member of the committee; or

(5) More than 10 but less than 20 percent of the total fresh domestic shipments may nominate one grower and one handler member of the committee; or

(6) More than 3 but less than 10 percent of the total fresh domestic shipments may nominate one member of the committee; or

(7) 3 percent but less of the total of the total fresh domestic shipments shall be deemed to be non-affiliated growers.

(e) All remaining growers which together accounted, during the fiscal year in which nominations for members and alternates are made, for:

(1) 50 percent of more of the total fresh domestic shipments may nominate five grower and one handler member of the committee; or

(2) More than 40 but less than 50 percent of the total fresh domestic shipments may nominate four grower and one handler member of the committee; or

(3) More than 30 but less than 40 percent of the total fresh domestic shipments may nominate three grower and one handler member of the committee; or

(4) More than 20 but less than 30 percent of the total fresh domestic shipments may nominate two grower and one handler member of the committee; or

(5) More than 10 but less than 20 percent of the total fresh domestic shipments may nominate one grower and one handler member of the committee; or

(6) 10 percent or less of the total fresh domestic shipments may nominate one member of the committee.

(f) If the nominations pursuant to paragraphs (c), (d) and (e) of this section result in less than 12 in number, additional nominees shall be nominated as follows: If one additional member is to be nominated, the right to make such nomination shall go to the group in paragraph (c), (d), and (e) which has the percentage of domestic fresh shipments close to qualifying for an additional nomination. If a second additional member is to be nominated, the right to make such nomination shall go to the group which was second closest to qualifying for an additional nomination. If a third additional member is to be nominated, the right to make such nomination shall go to the group which was third closest to qualifying for an additional nomnation. Any further additional nominees shall be nominated in the above sequence.

(g) In order to qualify as a nominee from a district such nominee must be a grower with a growing operation in that district, an employee of such grower, or be employed by a first handler operating in that district.

(h) When voting for nominees from each district, each grower not affiliated with a cooperative marketing organization shall be entitled to cast one vote for each position, which vote shall be cast on behalf of himself, his agents, subsidiaries, affiliates, and representatives. Such vote shall be weighted in accordance with the volume of fresh domestic shipments in each district in the fiscal year in which nominations are made. The votes of cooperative marketing organizations under paragraph (d) of this section shall be weighted in accordance with the volume of fresh domestic shipments in each district in the fiscal year in which nominations are made. *Provided*, that, to the extent practicable, each cooperative marketing organization shall be entitled to have representation on the committee.

(i) The public member (and alternate) of the committee shall be selected by the Secretary pursuant to § 907.23 and shall not be a grower or handler, or employee, agent, or representative of a grower or handler (other than a charitable or educational institution which is a grower or handler), or of a central marketing organization.

(j) A cooperatively owned packinghouse shall not be considered a cooperative marketing organization.

(k) The Secretary, upon recommendation of the committee, or upon other information, shall reapportion the number of grower or handler members, or both, to be nominated pursuant to this section and may realign the number of grower or handler members in and between districts. Any such change shall be based, insofar as practicable, upon the proportionate amounts during the fiscal year of domestic fresh shipments of the respective groups, domestic fresh shipments from each district, and the number of marketing organizations within each group.

Proposal No. 11

Amend § 907.23 as follows:

Section 907.23 Selection.

From the nominations made pursuant to §§ 907.22 (c), (d), and (e), or from other qualified growers and handlers, the Secretary shall select from the district nominations nine grower and three handler members of the committee and their alternates. The Secretary shall select one public member and one alternate public member of the committee from qualified persons suggested by the committee, the public, and industry at large.

Proposal No. 12

Amend § 907.29 by deleting paragraph (n).

Proposal No. 13

Amend § 907.30 as follows:

Section 907.30 Procedure.

(a) A majority of the committee shall constitute a quorum and any action of the committee shall require at least seven concurring votes, *provided however*, that eight concurring votes shall be required in order to recommend size or volume regulation, and ten concurring votes shall be required to recommend size or volume regulation for any week following ten consecutive weeks of size or volume regulation. In any vote to recommend regulation, only the votes of members whose districts are to be regulated by the proposed regulation shall be counted. In this event a majority plus one concurring votes of those eligible to vote shall be required in order to recommend size or volume regulation, and a majority plus two concurring votes of those eligible to vote shall be required to recommend size or volume regulation for any week following ten consecutive weeks of size or volume regulation.

(b) Except to recommend size or volume regulation, the committee may vote by telegraph, telephone, or any other means of communication; and any votes shall be confirmed promptly in writing. *Provided*, that if an assembled meeting is held, all votes shall be cast in person.

Proposal No. 14

Proposals 1, 2, 3, 4, 5, and 6 to amend the Navel Orange Marketing Order shall also apply to the Valencia Orange Marketing Order, except for the schedule in Proposal 1 which is revised as follows:

	Major co-op marketing organizations		All other co-op marketing organizations		Nonaffiliated growers	
	Grower	Handler	Grower	Handler	Grower	Handler
District 1	2		1		1	1
District 2	1	1	1	1	1	
District 3	1					

PROPOSALS SUBMITTED BY THE NAVEL ORANGE ADMINISTRATIVE COMMITTEE

Proposal No. 15

Amend § 907.20 to read as follows:

Section 907.20 Establishment and membership.

There is hereby established a Navel Orange Administrative Committee consisting of 11 members, for each of whom there shall be one alternate, and for each grower and handler member an additional alternate. Ten of the members and their respective alternates shall be growers, employees of growers, handlers, or employees of handlers or of central marketing organizations. One member of the committee and an alternate of such member shall be nominated as provided in § 907.22(g).

Proposal No. 16

Amend § 907.21 to read as follows:

Section 907.21 Term of office.

(a) The term of office of each member and alternate member of the committee shall be for a period of two years, and such terms shall begin on October 1 of each even-numbered year: *Provided,* That such members and alternates shall serve in such capacities for the portion of the term of office for which they are selected and qualify and until their respective successors are selected and have qualified. The consecutive terms of office of members, not including alternate members or additional alternate members, shall be limited to three terms. No person having served three consecutive terms as a member of the committee shall serve as a member, alternate member, or additional alternate member for the next succeeding term of office.

(b) A member, alternate member and additional alternate member, including persons nominated in accordance with § 907.22(g), shall be disqualified if such person ceases to be affiliated as a grower or an employee of a grower or handler, or as an employee of a handler or central marketing organization with the group that nominated him or her.

Proposal No. 17

Amend § 907.22 to read as follows:

Section 907.22 Nominations.

(a) Nominations for member, alternate member, and additional alternate member positions on the committee may be made by the following entities only:

(1) The cooperative marketing organization, or the growers affiliated therewith, which handled the largest percentage of the total volume of navel oranges handled by all cooperative marketing organizations in all outlets during the fiscal year preceding the period for which nominations are being made.

(2) A handler or declared handler grouping not affiliated with the organization eligible to nominate under (a)(1) of this section.

(3) The body of growers affiliated with those handlers not participating in the nominations proceedings referred to herein.

(b)(1) The number of nominations which any nominating entity may make shall be determined by its volume percentage, as follows:

Nominating entity's percentage of total volume of navel oranges handled by all handlers in all outlets during previous fiscal year	Number of members, plus alternates and additional alternates, which may be nominated
0.00 to 9.99	(1)
10.00 to 19.99	1
20.00 to 29.99	2
30.00 to 39.99	3
40.00 to 49.99	4
50.00 or above	5

[1] See Subsection (b)(2).

Provided, that if any nominating entity's percentage exceeds 50%, percentage figures in the above schedule shall change according to the following formula:

$$\frac{50\% - (\text{excess over } 50\%)}{5} = \text{Percentage required to nominate one member plus alternates}$$

Provided further, that no handler may participate as a member of more than one nominating group.

(2) A handler or declared handler grouping not affiliated with the organization referred to in paragraph (a)(1) and which did not handle a sufficient quantity of oranges to meet the requirement to nominate under paragraph (b)(1) shall be considered for eligibility to nominate under paragraph (b)(3).

(3) If nominations for member positions pursuant to paragraph (b)(1) total less than ten in number, eligibility to make the remaining nominations shall be determined as follows: If one additional member, plus alternates, is to be nominated under this section, the right to make such nominations shall go to that nominating entity which comes the closest to qualifying for the right to make the additional nomination. If a second member, plus alternates, is to be nominated under this subsection, the right to make such nominations shall go to that nominating entity which is second closest to qualifying for the right to make an additional nomination, and so forth.

(c)(1) Nominating procedures shall be in accordance with rules and regulations adopted by the committee with the approval of the Secretary.

(2) Each nomination made by an entity authorized by paragraph (a)(2) to nominate must be approved by growers. Approval shall be determined by mail balloting. To be eligible to participate in the approval process, a grower must have delivered oranges to one or more of the entity's handlers in the then-current fiscal year and must be committed to deliver oranges to one or more of said handlers in the following fiscal year. A nomination shall be deemed to have the requisite grower approval if it is approved by the growers of more than 50% of the total quantity of oranges handled for participating eligible growers in the then-current fiscal year by the handler or handlers comprising the nominating entity.

(3) Nominations authorized by paragraph (a)(3) shall result from the conduct of mail balloting proceedings wherein candidates for committee membership are voted on by the growers.

(d) Nominations by the entities authorized by paragraphs (a)(1) and (a)(2) to nominate shall be submitted no later than September 1 of each even-numbered year. Thereafter, the Secretary shall determine the

percentage applicable to the nominating entity referred to in paragraph (a)(3), shall determine the eligibility of the various entities to make the remaining nominations, and shall administer the mail balloting proceedings referred to in paragraphs (c)(2) and (c)(3).

(e)(1) Persons nominated under this section shall be nominated as grower members or handler members, according to the following schedule:

Number of members nominated by a nominating entity	Type of membership
1	Grower.
2	1 Grower, 1 Handler.
3	2 Growers, 1 Handler.
4	2 Growers, 2 Handlers.
5	3 Growers, 2 Handlers.

(2) Nominees for grower positions shall be growers or employees of growers. Nominees for handler positions shall be handlers, employees of handlers, or employees of central marketing organizations.

(f) The committee shall notify each handler by August 1 of each even-numbered year of the handling percentages that are to be ascribed under paragraph (b)(1) to: (1) The cooperative marketing organization qualifying under paragraph (a)(1); and (2) the handler receiving the notice.

(g) The members of the committee selected by the Secretary pursuant to § 907.23 shall meet on a date designated by the Secretary and shall nominate a member and an alternate member of the committee, which persons shall not be growers or handlers, or employees, agents, or representatives of a grower or handler (other than a charitable or education institution which is a grower or handler), or of a central marketing organization.

Proposal No. 18

Amend § 907.23 to read as follows:

Section 907.23 Selection.

From the nominations made pursuant to § 907.22 (a) through (f) or from other qualified growers and handlers, the Secretary shall select ten members of the committee, and an alternate and additional alternate for each member. From the nominations made pursuant to § 907.22(g) or from other qualified persons, the Secretary shall select one member of the committee and an alternate to such member.

Proposal No. 19

Amend § 907.24 to read as follows:

Section 907.24 Failure to Nominate.

If nominations are not made within the time and in the manner specified pursuant to § 907.22, the Secretary may, without regard to nominations, select the members and alternate members of the committee on the basis of the representation provided for in § 907.23.

Proposal No. 20

Amend § 907.25 to read as follows:

Section 907.25 Acceptance.

Any person selected by the Secretary as a member or as an alternate member of the committee shall qualify by filing a written acceptance with the Secretary within ten days after being notified of such selection.

Proposal No. 21

Amend § 907.26 to read as follows:

Section 907.26 Vacancies.

To fill any vacancy occasioned by the failure of any persons selected as a member or as an alternate member of the committee to qualify or in the event of the death, removal, resignation, or disqualification of any member or alternate member of the committee, a successor to the unexpired term of such member or alternate member of the committee shall be selected by the Secretary from nominations made in the manner specified in § 907.22 by the same nominating entity which nominated such person for the term, or from other qualified persons. If the names of nominees to fill any such vacancy are not made available to the Secretary within fifteen days after such vacancy occurs, the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of representation provided for in § 907.22.

Proposal No. 22

Amend § 907.27 to read as follows:

Section 907.27 Alternate members.

An alternate member of the committee, during the absence or at the request of the member for whom he is an alternate, shall act in the place and stead of such member: *Provided,* That a member may designate any alternate member to serve in the place and stead of such member, if the alternate member so designated was selected from the same group which was authorized to nominate the member; unless another alternate member is so designated by a grower member, his alternate shall act for the member and, in the absence of such alternate, the additional alternate shall so act. In the event of death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor for such member is selected and has qualified.

Proposal No. 23

Delete § 907.29(n) Duties.

Proposal No. 24

Amend § 907.30 to read as follows:

Section 907.30 Procedure.

(a) A majority of the committee shall constitute a quorum and any action of the committee shall require at least six concurring votes.

(b) The committee may vote by telegraph, telephone, or other means of communication; and any votes so cast shall be confirmed promptly in writing: *Provided,* That if an assembled meeting is held, all votes shall be cast in person.

(c) A grower member or producer member, including an alternate, is eligible to vote on a volume regulation recommendation under § 907.51 only if such member produces or handles oranges, or is an employee of a producer, handler, or central marketing organization which produces or handles oranges, in one or more districts in which volume regulation is being recommended or for which volume regulation was considered in developing such recommendation. An alternate member nominated from the same entity which was authorized to nominate the member and who is eligible to cast a vote on recommendations for volume regulation shall act for the member when such member is not eligible to vote on such recommendations.

PROPOSAL SUBMITTED BY THE VALENCIA ORANGE ADMINISTRATIVE COMMITTEE

Proposal No. 25

Amend § 908.20 to read as follows:

Section 908.20 Establishment and membership.

There is hereby established a Valencia Orange Administrative Committee consisting of 11 members, for each of whom there shall be one alternate, and for each grower and handler member an additional alternate. Ten of the members and their respective alternates shall be growers, employees of growers, handlers, or employees of handlers or of central marketing organizations. One member of the committee and an alternate of such member shall be nominated as provided in § 908.22(g).

Proposal No. 26

Amend § 908.21 to read as follows:

Section 908.21 Term of office.

(a) The term of office of each member and alternate member of the committee

shall be a period of two years, and such terms shall begin on February 1 of each even-numbered year: *Provided*, That such members and alternates shall serve in such capacities for the portion of the term of office for which they are selected and qualify and until their respective successors are selected and have qualified.

(b) A member, alternate member and additional alternate member, including persons nominated in accordance with § 908.22(g), shall be disqualified if such person ceases to be affiliated as a grower or an employee of a grower or handler, or as an employee of a handler or central marketing organization with the group that nominated him or her.

Proposal No. 27

Amend § 908.22 to read as follows:

Section 908.22 Nominations.

(a) Nominations for member, alternate member, and additional alternate member positions on the committee may be made by the following entities only:

(1) The cooperative marketing organization, or the growers affiliated therewith, which handled the largest percentage of the total volume of Valencia oranges handled by all cooperative marketing organizations in all outlets during the fiscal year preceding the period for which nominations are being made.

(2) A handler or declared handler grouping not affiliated with the organization eligible to nominate under paragraph (a)(1) of this section.

(3) The body of growers affiliated with those handlers not participating in the nominations proceedings referred to herein.

(b)(1) The number of nominations which any nominating entity may make shall be determined by its volume percentages, as follows:

Nominating entity's percentage of total volume of valencia oranges handled by all handlers in all outlets during previous fiscal year	Number of members, plus alternates and additional alternates, which may be nominated
0.00 to 9.99	(1)
10.00 to 19.99	1
20.00 to 29.99	2
30.00 to 39.99	3
40.00 to 49.99	4
50.00 or above	5

[1]See subsection (b)(2).

Provided, That if any nominating entity's percentage exceeds 50%, percentage figures in the above schedule shall change according to the following formula:

$$\frac{50\% - (\text{excess over } 50\%)}{5} = \text{percentage required to nominate one member plus alternates.}$$

Provided Further, That no handler may participate as a member of more than one nominating group.

(2) A handler or declared handler grouping not affiliated with the organization referred to in paragraph (a)(1) and which did not handle a sufficient quantity of oranges to meet the requirements to nominate under paragraph (b)(1) shall be considered for eligibility to nominate under paragraph (b)(3).

(3) If nominations for member positions pursuant to paragraph (b)(1) total less than ten in number, eligibility to make the remaining nominations shall be determined as follows: If one additional member, plus alternates, is to be nominated under this subsection, the right to make such nominations shall go to that nominating entity which comes the closest to qualifying for the right to make the additional nomination. If a second member, plus alternates, is to be nominated under this subsection, the right to make such nominations shall go to that nominating entity which is second closest to qualifying for the right to make an additional nomination, and so forth.

(c)(1) Nominating procedures shall be in accordance with rules and regulations adopted by the committee with the approval of the Secretary.

(2) Each nomination made by an entity authorized by paragraph (a)(2) to nominate must be approved by growers. Approval shall be determined by mail balloting. To be eligible to participate in the approval process, a grower must have delivered oranges to one or more of the entity's handlers in the then-current fiscal year and must be committed to deliver oranges to one or more of said handlers in the following fiscal year. A nomination shall be deemed to have the requisite grower approval if it is approved by the growers of more than 50% of the total quantity of oranges handled for participating eligible growers in the then-current fiscal year by the handler or handlers comprising the nominating entity.

(3) Nominations authorized by paragraph (a)(3) shall result from the conduct of mail balloting proceedings wherein candidates for committee membership are voted on by the growers.

(d) Nominations by the entities authorized by paragraphs (a)(1) and (a)(2) to nominate shall be submitted no later than January 1 of each even-numbered year. Thereafter the Secretary shall determine the percentage applicable to the nominating entity referred to in paragraph (a)(3), shall determine the eligibility of the various entities to make the remaining nominations, and shall administer the mail balloting proceedings referred to in paragraphs (c)(2) and (c)(3).

(e)(1) Persons nominated under this section shall be nominated as grower members or handler members, according to the following schedule:

Number of members nominated by a nominating entity	Type of membership
1	Grower.
2	1 Grower, 1 Handler.
3	2 Growers, 1 Handler.
4	2 Growers, 2 Handlers.
5	3 Growers, 2 Handlers.

(2) Nominees for grower positions shall be growers or employees of growers. Nominees for handler positions shall be handlers, employees of handlers, or employees of central marketing organizations.

(f) The committee shall notify each handler by December 1 of each odd-numbered year of the handling percentages that are to be ascribed under paragraph (b)(1) to : (1) The cooperative marketing organization qualifying under paragraphs (a)(1); and (2) the handler receiving the notice.

(g) The members of the committee selected by the Secretary pursuant to § 907.23 shall meet on a date designated by the Secretary and shall nominate a member and an alternate member of the committee, which persons shall not be growers or handlers, or employees, agents, or representatives of a grower or handler (other than a charitable or educational institution which is a grower or handler), or of a central marketing organization.

Proposal No. 28

Amend § 908.23 to read as follows:

Section 908.23 Selection.

From the nominations made pursuant to § 908.22 (a) through (f) or from other qualified growers and handlers, the Secretary shall select ten members of the committee, and an alternate and additional alternate for each member. From the nominations made pursuant to § 908.22(g) or from other qualified persons, the Secretary shall select one member of the committee and an alternate to such member.

Proposal No. 29

Amend § 908.24 to read as follows:

Section 908.24 Failure to Nominate.

If nominations are not made within the time and in the manner specified pursuant to § 908.22, the Secretary may, without regard to nominations, select the members and alternate members of the committee on the basis of the representation provided for in § 908.23.

Proposal No. 30

Amend § 908.25 to read as follows:

Section 908.25 Acceptance.

Any person selected by the Secretary as a member or as an alternate member of the committee shall qualify by filing a written acceptance with the Secretary within ten days after being notified of such selection.

Proposal No. 31

Amend § 908.26 to read as follows:

Section 908.26 Vacancies.

To fill any vacancy occasioned by the failure of any person selected as a member or as an alternate member of the committee to qualify or in the event of the death, removal, resignation, or disqualification of any member or alternate member of the committee, a successor to the unexpired term of such member or alternate member of the committee shall be selected by the Secretary from nominations made in the manner specified in § 908.22 by the same nominating entity which nominated such person for the term, or from other qualified persons. If the names of nominees to fill any such vacancy are not made available to the Secretary within fifteen days after such vacancy occurs the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of representation provided for in § 908.22.

Proposal No. 32

Amend § 908.27 to read as follows:

Section 908.27 Alternate members.

An alternate member of the committee, during the absence or at the request of the member for whom he is an alternate, shall act in the place and stead of such member: *Provided,* That a member may designate any alternate member to serve in the place and stead of such member, if the alternate member so designated was selected from the same group which was authorized to nominate the member; unless another alternate member is so designated by a grower member, his alternate shall act for the member and, in the absence of such alternate, the additional alternate shall so act. In the event of death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor for such member is selected and has qualified.

Proposal No. 33

Delete § 908.29(n) Duties.

Proposal No. 34

Amend § 908.30 to read as follows:

Section 908.30 Procedure.

(a) A majority of the committee shall constitute a quorum and any action of the committee shall require at least six concurring votes.

(b) The committee may vote by telegraph, telephone, or other means of communication; and any votes so cast shall be confirmed promptly in writing: *Provided,* That if an assembled meeting is held, all votes shall be cast in person.

(c) A grower member or producer member, including an alternate, is eligible to vote on a volume regulation recommendation under Section 908.51 only if such member produces or handles oranges, or is an employee of a producer, handler, or central marketing organization which produces or handles oranges, in one or more districts in which volume regulation is being recommended or for which volume regulation was considered in developing such recommendation. An alternate member nominated from the same entity which was authorized to nominate the member and who is eligible to cast a vote on recommendations for volume regulation shall act for the member when such member is not eligible to vote on such recommendations.

PROPOSAL SUBMITTED BY THE FRUIT AND VEGETABLE DIVISION, AGRICULTURAL MARKETING SERVICE

Proposal No. 35

Make such changes as may be necessary to make both marketing orders conform with any amendment thereto that may result from the hearing.

Dated: June 4, 1986.

William T. Manley,

Deputy Administrator, Marketing Programs.

[FR Doc. 86-12818 Filed 6-5-86; 8:45 am]

BILLING CODE 3410-02

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 257

[SWH-FRL-3027-1]

Solid Waste Disposal; Public Meeting on Revisions to Criteria

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meeting.

SUMMARY: Environmental Protection Agency (EPA) will hold a public meeting on the issues and options being considered by the Agency in the development of the revisions to the "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR Part 257). These revisions, which are mandated by the Hazardous and Solid Waste Amendments (HSWA) of 1984, will apply to solid waste disposal facilities that receive household and small quantity generator hazardous wastes, including municipal waste landfills.

DATES: The public meeting will be held on June 27, 1986, from 9:00 a.m. to 4:00 p.m. The meeting will be adjourned earlier if there are no remaining comments. Written comments on the material presented at the meeting should be submitted on or before July 18, 1986.

ADDRESSES: The public meeting will be held at the Vista International Hotel, 1400 M Street, SW., Washington, DC (202) 429-1700. A block of rooms has been reserved at the Vista for the convenience of attendees requiring lodging. When making reservations, indicate that you will be attending the EPA Solid Waste Meeting.

Written comments on the issues and options presented at the meeting should be submitted to: Michael Flynn, Office of Solid Waste (WH-565E), U.S. EPA, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline, toll free at (800) 424-9346 or at (202) 382-3000, or Ms. Geraldine Wyer, Office of Solid Waste (WH-562), U.S. EPA, 401 M Street, SW., Washington, DC 20460, (202) 382-7388. For technical information, contact Allen Maples, Office of Solid Waste (WH-565E), U.S. EPA, 401 M Street, SW., Washington, DC 20460, (202) 382-4663.

SUPPLEMENTARY INFORMATION: In 1979, under the authority of sections 1008(a)(3) and 4004(a) of Subtitle D of the Resource Conservation and

Recovery Act (RCRA), EPA promulgated the "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR Part 257). These Criteria include environmental performance standards that are used for determining which solid waste disposal facilities and practices pose a reasonable probability of adverse effects on human health or the environment. Those facilities that violate the Criteria are deemed "open dumps." The Criteria are currently enforced by the States or through citizen suits.

In 1984, Congress passed the Hazardous and Solid Waste Amendments (HSWA), which include several major provisions regarding the solid waste regulatory program. The Amendments require the Agency, by November 8, 1987, to submit a report to Congress addressing whether the current Criteria (40 CFR Part 257) are adequate to protect human health and the environment, and recommending whether additional authorities are needed to enforce the Criteria. Further, EPA is required to revise the Criteria, by March 31, 1988, for facilities that may receive household hazardous waste or small quantity generator (SQG) hazardous waste. These revisions must include, at a minimum, ground-water monitoring, location criteria, and corrective action, as appropriate. HSWA also requires the States to have a permit program for the existing Criteria by November 1987 and to have a revised permit program 18 months after the revised Criteria are promulgated.

In response to these Congressional mandates, the Agency is currently gathering extensive data for both the report to Congress and the Criteria revisions. In addition, the Agency is evaluating numerous issues and developing options for the Criteria revisions. In order to meet the statutory deadline for the Criteria revisions of March 31, 1988, EPA's schedule calls for publication of proposed revisions by March 1987.

The purpose of this public meeting is to brief the public on the issues and options EPA is considering in the development of the revised Criteria, and to solicit comment on these issues and options. Due to the potential significant impacts of this rulemaking, EPA is particularly interested in early public input on the direction of this program.

The morning session of the meeting will include a briefing by EPA Officials on the issues and options developed to date on the revised Criteria. In the afternoon session, an opportunity will be provided for the public to present oral comments, and time will also be provided for questions and answers. Those wishing to make oral comments should contact Ms. Geraldine Wyer in writing at the above address.

EPA is currently evaluating numerous general and specific issues regarding the revised Criteria. The key general issues EPA is considering include:

1. What overall regulatory approach should be taken in the revised Criteria (e.g., risk-based, performance, or design and operating standards, or combination)?

Recognizing the importance of site-specific factors, EPA is considering several alternative regulatory approaches that would allow for various levels of control depending on site-specific conditions. These alternative approaches will be presented and discussed in detail at the meeting. Included in this presentation will be a discussion of issues pertaining to how various site-specific factors, such as quality and usage of ground water, may be addressed in the revisions.

2. What should be the scope of the revised Criteria?

HSWA of 1984 requires that the revised Criteria include, at a minimum, ground-water monitoring, location criteria, and corrective action, as appropriate. It is expected that the revised Criteria will also include certain of the basic requirements (or modified version of these requirements), such as landfill gas control, now contained in the existing Criteria. EPA is evaluating the need to include additional requirements in the revisions. Additional regulatory areas being considered include waste restrictions (including liquids), closure, post-closure care, financial responsibility, liners, and run-on and run-off controls.

3. What approach should be taken to new, existing, and closed waste management units?

EPA is evaluating whether different regulatory approaches should be taken for new versus existing waste management units. For example, certain requirements, such as any liner requirement that may be included, may only apply to new units. Also, the Agency is considering whether any requirements should apply to solid waste disposal units (that received household or SQG hazardous wastes) that close or stop receiving these wastes prior to the effective date of the rule.

4. What approach should be taken to different types of solid waste land disposal facilities?

HSWA requires that the revised Criteria apply to those solid waste disposal facilities that receive household hazardous waste and SQG hazardous waste. This universe includes municipal waste landfills (which receive household hazardous wastes and, in some cases, SQG hazardous wastes), as well as industrial landfills, surface impoundments, land application units, and waste piles that receive SQG hazardous waste. The Agency is evaluating whether different regulatory approaches should be taken for municipal waste landfills versus industrial facilities that receive SQG hazardous waste.

5. Should the revised Criteria be phased in over time?

EPA is examining whether some or all of the requirements in the revised Criteria should be phased in over a period of time. The issue depends, to a large extent, on the resolution of the issues pertaining to the overall approach to the rule and the scope of the rule.

The Agency is also evaluating many significant issues in each of the following specific regulatory areas:

Ground-water protection standards
Ground-water monitoring
Corrective action
Location criteria
Landfill gas
Liners
Waste restrictions/liquids management
Closure and post-closure care
Financial responsibility

The key issues pertaining to ground water (ground-water protection standard, ground-water monitoring, and corrective action) and landfill gas are identified below. The issues in the remaining areas, as well as the options being considered in all of the above areas, will be presented at the public meeting.

The key questions pertaining to ground water and landfill gas include:

Ground-Water Protection Standard

- What constituents should be included in the ground-water protection standard?
- What should be the limits for the constituents in the grtound-water protection standard?
- Where should the ground-water protection standard be applied?

Ground-Water Monitoring Program

- What should be the overall structure of the ground-water monitoring program? (i.e., include three phases?)
- What regulatory approach should be taken to the selection of indicator parameters for detection monitoring?
- What regulatory approach should be taken to determine the number and placement of wells, monitoring frequency, and sample size?

- What regulatory approach should be taken to specify how long groundwater monitoring should be conducted during the post-closure period?
- How should statistical evaluations be addressed in the revised Criteria?

Corrective Action

- When, and to what extent, should corrective action be required?

Landfill Gas

- Are there constituents of concern other than explosive gases (i.e., methane)?
- What should the limits be for the constituents of concern?
- To what extent should monitoring of landfill gas be required?
- What type of monitoring standards are appropriate?
- What requirements should be placed on the disposal of landfill gas condensate?

EPA will provide at the public meeting written material that outlines issues in all of the above areas and describes the various options being considered for each issue. Comments on this material will be accepted for a limited time following the meeting. The deadline and mailing address for these comments are identified above.

List of Subjects in 40 CFR Part 257

Waste treatment and disposal.

Dated: May 30, 1986.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Child Support Enforcement

Child Support Enforcement Program; Prohibition of Federal Funding of Costs of Incarceration and Counsel for Indigent Absent Parents

45 CFR Part 304

AGENCY: Office of Child Support Enforcement (OCSE), HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would amend 45 CFR 304.23 to reflect longstanding agency policy that Federal funding under the Child Support Enforcement (IV–D) program for costs of incarceration of absent parents in child support enforcement cases and costs of counsel for indigents in IV–D actions is not available. In addition, 45 CFR 304.27, which concerns Federal funding prior to December 31, 1975, would be deleted because it is obsolete.

DATES: Consideration will be given to comments received by August 5, 1986.

ADDRESSES: Send comments to Director, Office of Child Support Enforcement, Department of Health and Human Services, Room 1010, 6110 Executive Boulevard, Rockville, Maryland 20852. Comments will be available for public inspection Monday through Friday, 8:30 a.m. to 5:00 p.m. in Room 1010 of the Department's office at the above address.

FOR FURTHER INFORMATION CONTACT: Joyce Linder or Betsy Matheson (301) 443–5550.

SUPPLEMENTARY INFORMATION:

Background

Costs of Incarceration and Providing Counsel for Indigent Absent Parents

The Senate Committee on Finance, in its report on H.R. 4325, which became the Child Support Enforcement Amendments of 1984, stated: "It is not the intent of the Congress to match all costs that might be related to operating a child support enforcement program. For example, the Committee believes Federal matching should not be available for expenditures related to incarceration of delinquent obligors and providing defense counsel for absent parents." (See S. Rep. No. 98–387, 98th Cong., 2d Sess., p. 23.)

Periodically, through the years, States have requested that the costs of incarceration of delinquent obligors and of defending indigent absent parents in IV–D cases should be reimbursed. OCSE's policy since the inception of the program has been that costs of incarceration of delinquent obligors and costs of defense counsel are not necessary and reasonable costs associated with the proper and efficient administration of the title IV–D program, are a general expense of State or local governments, and therefore do not meet the cost principles found in OMB Circular No. A–87, Attachment A, section C.1.a. (Cost Principles for State and Local Governments). Furthermore, there is no statutory authority for payment of such costs. Because program regulations do not explicitly include this longstanding policy, we propose to modify those regulations to incorporate this policy.

Federal Funding in the Operation of the Child Support Enforcement Program in the Absence of an Assignment

Current regulations at 45 CFR 304.27 make Federal funding available at the 70 percent rate for expenditures made under an approved IV–D State plan until December 31, 1975, irrespective of the requirement of an assignment of rights to support. Furthermore, § 304.27(b) states that this section remains in effect until December 31, 1975. Because it was repealed as of the close of business on that date, we propose to delete this obsolete section.

Statutory Authority

This regulation is proposed under the authority granted to the Secretary by section 1102 of the Social Security Act (the Act). Section 1102 requires the Secretary to publish the regulations that may be necessary for the efficient administration of the functions for which he is responsible under the Act.

Regulatory Provisions

In enacting title IV–D of the Act in 1975, Congress did not intend that every expense incurred by the State in enforcing child support obligations would be reimburseable by Federal funding. In fact, Congress expected "the States to continue to devote to this purpose [law enforcement] at least as much non-Federal funding as they currently provide." S. Rep. No. 93–1356, 93rd Cong., 2nd Sess., p. 50. Incarceration is a punishment for violation of State and local laws in general, not just those related to child support enforcement. Imposing a jail sentence for wilful refusal to abide by a court order to pay support promotes respect for the laws and the judicial decisions of the State and its courts. Therefore, we believe that payment for the costs of incarceration is entirely a responsibility of State and local governments and should not be subject to Federal funding under the IV–D program.

Title IV–D of the Act was enacted for the purpose of enforcing the support obligations owed by absent parents. Nowhere in the Act nor in any legislative history explaining the IV–D program is there language providing funding for costs incurred in connection with the defense of absent parents who have failed to support their children. In fact, as stated previously, Congress indicated in connection with the Child Support Enforcement Amendments of 1984 that Federal funding should not be available for these costs. Such funding would be antithetical to the purpose of the program, i.e., to ensure that children receive the support to which they are entitled. A defense attorney's function is to promote the best interests of the client, which may actually be to limit or avoid imposition of support liability.

To make these policies explicit, we are amending 45 CFR 304.20 by adding a new paragraph (i) which would prohibit Federal funding for expenditures resulting from the jailing of absent parents in IV–D cases and a new paragraph (j) which would prohibit Federal funding for costs of counsel for indigent defendants in IV–D actions.

We are deleting 45 CFR 304.27, Federal financial participation in the operation of the Child Support Enforcement Program in the absence of an assignment, because it is obsolete.

Paperwork Reduction Act

This regulation contains no information collection requirements that are subject to OMB review under the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Regulatory Flexibility Analysis

The Secretary certifies, under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that this regulation will not result in significant impact on a substantial number of small entities. The primary impact is on State governments and political subdivisions and we believe that this impact will be nominal because the proposal merely puts in regulation longstanding OCSE policy.

Executive Order 12291

The Secretary has determined, in accordance with Executive Order 12291, that this rule does not constitute a "major" rule. A major rule is one that is likely to result in:

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or
- Significant adverse effects on competitions, employment, investment productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

The proposal is expected to have an insignificant impact on State and Federal expenditures because it only specifies in regulation current OCSE policy.

List of Subjects in 45 CFR Part 304

Child welfare, Grant programs/social programs.

PART 304—[AMENDED]

For the reasons discussed above, 45 CFR Part 304 is proposed to amended as follows:

1. The authority citation for Part 304 continues to read as forth below:

Authority: 42 U.S.C. 651 through 658, 660, 664, 666, 667, 1302, 1396a(a)(25), 1396(d)(2), 1396b(a), 1396b(p), 1396(k).

2. 45 CFR 304.23 is amended by adding introductory text and new paragraphs (i) and (j) to read as follows:

§ 304.23 Expenditures for which Federal financial participation is not available.

Federal financial participation at the applicable matching rate is not available for:

* * * * *

(i) Any expenditures for jailing of parents in child support enforcement cases.

(j) The costs of counsel for indigent defendants in IV–D actions.

§ 304.27 [Removed and reserved]

3. 45 CFR 304.27 is removed and reserved.

BILLING CODE 4150–11–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86–186, RM–5083]

Radio Broadcasting Services; Greenwood, IN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Morgan County Broadcasters, Inc. proposing to allot FM Channel 294A to Greenwood, Indiana as that community's first FM channel.

DATES: Comments must be filed on or before July 14, 1986, and reply comments on or before July 29, 1986.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Samuel J. Buffone, Buffone & Privitera, P.C., 1302 18th Street, NW., Suite 303, Washington, DC 20036 (Counsel to Petitioner).

FOR FURTHER INFORMATION CONTACT: D. David Weston, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 86–186, adopted April 29, 1986, and released May 23, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230) 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

47 CFR Part 97

[PR Docket No. 86-207; RM-5208; FCC 86-262]

Amateur Radio Service; Proposed Amendment To Permit the Transmission of Emission F8E on Frequency Band 0.35 Meters and Above (1240 Mhz and Above)

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The proposed rule would allow amateur operators to use emission F8E on frequency band 0.35 meters and above (1240 MHz and above. The proposed rule is necessary so that amateur operators can experiment with a new transmission mode and utilize the spectrum more efficiently. The effect of the proposed rule is to permit several different channels of information to be transmitted simultaneously from one location to another.

DATES: Comments must be filed on or before August 15, 1986, and reply comments on or before September 15, 1986.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Maurice J. DePont, Federal Communications Commission, Private Radio Bureau, Washington, DC 20554, (202) 632-4984.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, adopted May 20, 1986 and released May 27, 1986 (RM-5208). The full text of this Commission decision including the proposed rule change is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The full text of this decision including the proposed rule change may also be purchased from the Commission's copy contractor, International Transcription Services Inc., (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

1. In response to a petition for rule making filed by the Southern California Repeater and Remote Base Association (SCRRBA), the FCC proposes to amend the Amateur Rules to allow the use of frequency modulated complex emission F8E on amateur frequencies in the 0.35-meter band and above (1240 MHz and above). Authorization of F8E emission would serve the dual purpose of permitting amateur operators to experiment with a new transmission mode on these frequencies, and to utilize the spectrum efficiently when several different channels of information must be transmitted simultaneously from one location to another. The proposed rule is set forth at the end of this document.

2. This is a non-restricted notice and comment rule making proceeding. See § 1.1231 of the Commission's Rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

3. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities because such entities may not use the Amateur Radio Service for commercial radio communication and because use of the proposed additional emission for frequencies in the 0.35-meter band and above is optional rather than mandatory.

4. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or

record retention requirements; and will not increase or decrease burden hours imposed on the public.

5. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before August 15, 1986 and reply comments on or before September 15, 1986. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

6. This Notice of Proposed Rule Making is issued under the authority of 47 U.S.C. 154(i) and 303 (g) and (r).

7. A copy of the Notice of Proposed Rule Making will be served on the Chief Counsel for Advocacy of the Small Business Administration.

Ordering Clause

8. Rule Making petition RM–5209 filed by SCRRBA is granted.

William J. Tricarico,

Secretary.

PART 97—[AMENDED]

Part 97 of Title 47 of the Code of Federal Regulations would be amended as follows:

9. The authority citation for Part 97 would continue to read as follows:

Authority: 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply 48 Stat. 1064–1068, 1081–1105, as amended; 47 U.S.C. 151–155, 301–609, unless otherwise noted.

10. Section 97.61(c) would be revised to read as follows:

§ 97.61 Authorized emissions.

* * * * *

(c) *Above 144.1 MHz:* Amateur stations are authorized to transmit the following emissions on amateur frequencies above 144.1 MHz. N0N, A1A, A2A, A2B, A3E, A3C, A3F, F1B, F2B, F2A, F3E, G3E, F3C, F3F, H3E, J3E, and R3E. P0N emission (the emission letters "K, L, M, Q, V, W, and X" may also be used in place of the letter "P" for pulsed radars) may be transmitted on all amateur frequencies above 2300 MHz, except in the 10.0–10.5 GHz band. F8E emission may be used on amateur frequency band 0.35 meters and above.

BILLING CODE 6712–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting; Supplemental Proposals for Migratory Game Bird Hunting Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Supplemental proposed rule.

SUMMARY: In the March 21, 1986, Federal Register (51 FR 9654) the public was notified that the U.S. Fish and Wildlife Service (hereinafter the Service) proposes to establish hunting regulations for certain migratory game birds during 1986–87, and provided information on certain proposed regulations. This proposed rulemaking provides supplemental proposals for the early- and late-season migratory bird hunting regulations frameworks and a proposal to amend 50 CFR Part 20 by revising the authority citation to include the Alaska Game Act of 1925.

The early hunting seasons open prior to October 1 and include seasons on mourning doves; white-winged doves; white-tipped doves; band-tailed pigeons; woodcock; common snipe; rails, moorhens and gallinules; teal; sea ducks; experimental early duck seasons in Florida, Iowa, Kentucky, and Tennessee; an experimental early goose season in a portion of Michigan; a special sandhill crane-Canada goose season in southwestern Wyoming; sandhill cranes in the Central Flyway and Arizona; migratory bird hunting seasons in Alaska, Hawaii, Puerto Rico and the Virgin Islands; and extended falconry seasons. Late seasons open about October 1 or later and include those for most waterfowl, and seasons not previously selected for other species. The Service annually prescribes hunting regulations frameworks within which the States select specific seasons. The effect of this proposed rule is to facilitate establishment of early- and late-season migratory bird hunting regulations for the 1986–87 season.

DATES: The comment period for proposed migratory bird hunting season frameworks for Alaska, Hawaii, Puerto Rico and the Virgin Islands will end on June 19, 1986; that for other early-season framework proposals will end on July 14, 1986; that for late-season framework proposals on August 25, 1986; and that for the proposal to revise the authority citation of 50 CFR Part 20 will end on July 18. Public hearings on proposed early- and late-season frameworks will be held on June 19 and August 1, 1986, respectively (51 FR 9654).

ADDRESS: Send comments to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building, Room 536, Washington, DC 20240. The public hearings will be held in the Auditorium of the Department of the Interior Building on C Street, between 18th and 19th Streets NW., Washington, DC. Notice of intention to participate in either hearing should be sent in writing to the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the interior, Matomic Building, Room 536, Washington, DC 20240.

Comments received on this supplemental proposed rulemaking will be available for public inspection during normal business hours in Room 536, Matomic Building, 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building—Room 536, Washington, DC 20240 (202–254–3207).

SUPPLEMENTARY INFORMATION: The annual process for developing migratory game bird hunting regulations deals with regulations for early and late seasons. Early seasons include those which open before October 1, while late seasons open about October 1 or later. Regulations are developed independently for early and late seasons. The early-season regulations cover mourning doves; white-winged doves; white-tipped doves; band-tailed pigeons; rails; moorhens and gallinules; woodcock; common snipe; sea ducks in the Atlantic Flyway; teal in September in the Central and Mississippi Flyways; experimental early duck seasons in Florida, Iowa, Kentucky, and Tennessee; an experimental early goose season in a portion of Michigan; sandhill cranes in the Central Flyway and Arizona; a special sandhill crane-Canada goose season in southwestern Wyoming; doves in Hawaii; migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; and some extended falconry seasons. Late seasons include the general waterfowl seasons; special seasons for scaup and goldeneyes; extra scaup and teal in regular seasons; coots, moorhens and gallinules, and snipe in the Pacific Flyway; and other extended falconry seasons.

Certain general procedures are followed in developing regulations for the early and late seasons. Initial regulatory proposals are announced in a Federal Register document published in

March and opened to public comment. These proposals are supplemented, as necessary, with additional Federal Register documents. Following termination of comment periods and after public hearings, the Service further develops and publishes proposed frameworks for times of seasons, season lengths, shooting hours, daily bag and possession limits, and other regulatory elements. After consideration of additional public comments, the Service publishes final frameworks in the Federal Register. Using these frameworks, State conservation agencies then select hunting season dates and options. Upon receipt of State selections, the Service publishes a final rule in the Federal Register, amending Subpart K of 50 CFR Part 20, to establish specific seasons, bag limits, and other regulations. The regulations become effective upon publication. States may prescribe more restrictive seasons than those provided in the final frameworks.

The regulations schedule for this year is as follows: On March 21, 1986, the Service published in the Federal Register (51 FR 9854) a proposal to amend 50 CFR Part 20, with public comment periods ending as noted above. The proposal dealt with establishment of seasons, limits and other regulations for migratory game birds under §§ 20.101 through 20.107, 20.109 and 20.110 of Subpart K. This document is the second in a series of proposed, supplemental, and final rules for migratory game bird hunting regulations. All comments on the March 21 proposal received through May 2, 1986, have been considered in developing this document. Comment periods on this second document are specified above under "DATES". Final regulatory frameworks for migratory game bird hunting seasons for Alaska, Puerto Rico, and the Virgin Islands are scheduled for Federal Register publication on or about July 18, 1986, and those for early seasons in other areas of the United States on August 4, 1986; and those for late seasons on September 11, 1986.

On June 19, 1986, a public hearing will be held in Washington, DC, as announced in the Federal Register of March 21, 1986 (51 FR 9854), to review the status of mourning doves, woodcock, band-tailed pigeons, white-winged and white-tipped doves, rails moorhens and gallinules, common snipe, and sandhill cranes. Proposed hunting regulations will be discussed for these species and migratory game birds in Alaska, Puerto Rico and the Virgin Islands; September teal seasons in the Mississippi and Central Flyways; experimental September waterfowl seasons in designated States; special sea duck seasons in the Atlantic Flyway; and extended falconry seasons. Statements or comments are invited.

On August 1, 1986, a public hearing will be held in Washington, DC, as announced in the Federal Register of March 21, 1986 (51 FR 9854), to review the status and proposed hunting regulations for waterfowl not previously discussed at the June 19 public hearing.

On January 24, 1986, in *Alaska Fish and Wildlife Federation and Outdoor Council, Inc., et al. v. Jantzen, et al.*, No. J84-013 CIV, the U.S. District Court in Alaska ruled that:

> Until such time as the Secretary of the Interior adopts regulations pursuant to section 3(h)(2) of the Fish and Wildlife Improvement Act, the Congress has authorized Alaska Natives to harvest migratory waterfowl under the Alaska Game Act of 1925 (as amended) during any season of the year, including but not limited to spring and summer months, when they or members of their family are in need of food and other sufficient food is not available.

In that ruling, the court found that Congress intended the 1925 Game Act to comprehensively regulate all game and bird hunting in Alaska and replace the Migratory Bird Treaty Act as a source of authority for issuing regulations in Alaska. As a result of the court's finding, the Service finds need to propose to amend Title 50 Code of Federal Regulations Part 20—Migratory Bird Hunting by revising the authority citation to include the Alaska Game Act of 1925, as amended.

As noted in the March 21, 1986, Federal Register (at 51 FR 9858), the Service is assessing the District court's decision in order to determine what action is needed for the 1986 and 1987 spring and summer subsistence hunting seasons in Alaska. The Service will announce any actions to be taken in a future Federal Register notice(s).

This supplemental proposed rulemaking describes a number of changes which have been proposed by commentors on the original framework proposals published on March 21, 1986, in the Federal Register.

Review of Public Comments and the Service's Response

Written Comments Received

As of May 2, 1986, the Service had received comments on proposals published in the March 21, 1986, Federal Register (51 FR 9854) from 10 correspondents, including three individuals, three State agencies and four waterfowl flyway councils. In some instances, the communications did not specifically mention the open comment period or the regulatory proposals; however, because they were received during the comment period and generally relate to migratory game bird hunting regulations, they are treated as comments. The comments are discussed below with particular attention to new proposals and modifications or clarifications to previously described proposals. Wherever possible, they are discussed under headings corresponding to the numbered items in the March 21, 1986, Federal Register. Comments received subsequent to May 2, 1986, as well as those received at the June 19, 1986, public hearing will be addressed in the next supplemental proposal to be published in the Federal Register in early July.

General Comments

The Central Flyway Council has recommended adoption of the proposed basic regulations frameworks for 1986–87 hunting seasons on webless and waterfowl species pertinent to the Central Flyway except for specific recommendations given in the numbered headings that follow.

The Pacific Flyway Council has recommended that no change be made in frameworks for waterfowl and sandhill crane seasons in Alaska and for mourning dove, white-winged dove and band-tailed pigeon seasons pertinent to the Western Management Unit and the Pacific Flyway from those of 1985–86 except as identified below. The Council also recommended that in order to accommodate hunting and depredation control of ravens and magpies, 50 CFR 20.133 "Hunting regulations for crows" be amended by adding ravens and magpies, and § 21.43 "Depredation order for blackbirds, cowbirds, grackles, crows and magpies" be amended by adding ravens. The Service solicits comments on these recommended amendments to § 20.133 and 21.43 and requests the Council provide justifications for both amendments.

2. *Frameworks for ducks in the conterminous United States—outside dates, season length and bag limits.* (a) The Central Flyway Council has recommended that the 1986–87 framework opening date for duck hunting in the Flyway be returned to the Saturday nearest to October 1. The Mississippi Flyway Council's Upper Region Regulations Committee has recommended that the 1986–87 framework opening and closing dates for duck hunting be the Saturday nearest October 1 and the Sunday nearest January 20, respectively, with the exception that Wisconsin would always

employ a fixed October 1 opening date, and that in subsequent years no changes be made to these framework dates without full discussion through the flyway council process. The Council's Lower Region Regulations Committee has recommended that the 1985–87 framework opening and closing dates for duck hunting be October 1 and January 20, respectively, and the Committee reaffirmed the Council's 1985 position that changes in harvest opportunities be made equitably among flyways.

Response. Floating framework dates are of long standing in the Pacific and Central Flyways and have been a feature of the Mississippi Flyway opening framework date since 1979, but the Atlantic Flyway has always operated under fixed framework dates. However, in 1985 the framework dates were compressed and established as fixed dates in all flyways as one element of generally restrictive duck hunting regulations.

The Service notes the recommendations from the Central and Mississippi Flyway Councils for a return to outside framework dates similar to 1984 but extended compared to the framework dates of 1985. Although there was considerable objection to the compressed framework dates in 1985, the Service notes that shortened framework dates were used during a previous drought cycle in the 1960s and notice was given in the Federal Register dated February 15, 1985 (50 FR 6366), that framework dates were one of the tools available for managing harvest. The Service intends to retain this harvest management option.

The Service will not make a decision on framework dates until the 1986 status information for ducks is available, reviewed and considered during the late-season regulations cycle. However, in order to provide maximum notice the Service announces it is considering uniform framework dates (for ducks) for the four flyways. States may of course be more restrictive but not more liberal.

(b) The Central Flyway Council has also recommended that the Service require that the extra duck hunting days allowed in the High Plains Mallard Management Unit be taken beginning no earlier than the Saturday nearest to December 10, and that the Service give stronger consideration to comparative biological data and equitability among flyways in any future deliberations to construct regulations to reduce the harvest of ducks than was exhibited for mallard and pintail drake regulations for the 1985–86 season.

Response. The Service proposes to require that the extra days allowed in the High Plains Mallard Management Unit be taken starting no earlier than the Saturday nearest December 10. The Service intends to utilize all available biological data in the development of equitable harvest regulations for the 1986–87 waterfowl season.

(c) Massachusetts has requested that in order to provide 40 days of waterfowl hunting in the State, the Service allow compensatory waterfowl hunting season days for those season days lost because of the State's prohibition on Sunday hunting.

Response. The Service notes that the loss of hunting days because of a ban on Sunday hunting is the result of a regulation imposed by the State rather than the Federal Government. Therefore, the Service feels it is the responsibility of Massachusetts to remove the restriction as it is the State's action that is causing the loss of hunting opportunity.

(d) A sportsman from New York requested the duck season length be increased from the 40 days permitted in 1985–86 to 75 days in 1986–87.

Response. As noted in an earlier response, the Service will not make a decision on duck season frameworks until the 1986 status information for ducks is available, reviewed and considered during the late-seasons regulations cycle. At that time, the request from the New York sportsman and all other requests/comments received will be brought to the attention of the Service Regulations Committee.

(e) During the 1985–86 regulations development process the Atlantic Flyway Council and several member States requested the establishment of a Northeast Management Unit in the Flyway. They argued that many ducks in the requested Unit originate from more eastern breeding grounds, that several of the ducks important in the harvest there, are species for which annual breeding ground harvest information is limited or not available, and that mallard numbers in the Unit are increasing.

Response. The Service weighed those arguments against evidence that many ducks in the requested unit are transients and subjected to hunting pressure there and elsewhere in the Flyway and that two species important in the harvest presently warrant concern and are covered by restrictive regulations, and subsequently established a Northeast Management Unit, consisting of Maine, New Hampshire, Vermont, Massachusetts and Rhode Island, on an experimental basis. The Service did not accept the Council's request to include Connecticut and parts of New York and New Jersey in the Unit.

Although the Service established the Unit, it noted that in the coming year (1986) the Flyway Council and Service must strive to better define the management objectives and boundaries of the Unit. The Atlantic Flyway Council is again reminded to develop and submit to the Service a detailed proposal, before the late-season regulations meetings, that provides justification, management objectives and an evaluation plan for a Northeast Management Unit. The Service solicits additional information and/or comments from all sources regarding a Northeast Management Unit in the Atlantic Flyway.

3. *American black ducks.* The Atlantic Flyway Council has recommended that black duck harvest restrictions initiated in the Flyway in 1983 to reduce black duck harvest 25 percent from the 1977–81 average harvest level be continued, but that additional black duck harvest restrictions be developed for those States that have not achieved an average 25 percent reduction (1983–85) from the 1977–81 level.

Response. In the March 21, 1986, **Federal Register** (at 51 FR 9861) the Service noted its intent to assess the effect of the black duck harvest management program in the Atlantic and Mississippi Flyways, and indicated that the strategies of those States that have not reached the program's harvest reduction goal will be reviewed and additional restrictions imposed.

8. *Experimental September duck seasons.* The Mississippi Flyway Council's Upper Region Regulations Committee has recommended continuation of the experimental September duck season in Iowa in 1986. The Council's Lower Region Regulations Committee has recommended continuation of the experimental September duck hunting seasons in Kentucky and Tennessee in 1986, with modification if deemed necessary after evaluation of the final reports.

Response. As noted in the March 21, 1986, **Federal Register** (at 51 FR 9862), the Service proposes to continue the September duck seasons in Iowa, Kentucky, Tennessee and Florida as experimental in 1986–87 unless final or progress reports provide evidence of a detrimental effect on any segment of the duck resource.

12. *Canvasback and redhead ducks.* In the March 21, 1986, **Federal Register** (at 51 FR 9862) the Service indicated that when the 1986 canvasback breeding population survey data and the harvest data from the 1985–86 hunting season become available, the Service, in coordination with the flyway councils,

will consider specific changes, including a closure on hunting, in the 1986–87 regulations frameworks for canvasbacks. New Jersey has indicated it favors canvasback regulations that provide for a limited harvest in traditional canvasback areas rather than a return to regulations based on an area closure system.

Response. New Jersey's comments will be considered during the development of the 1986–87 regulations frameworks for hunting canvasbacks.

13. *Duck zones.* The Upper Region Regulations Committee of the Mississippi Flyway Council has endorsed requests from Michigan, Indiana and Missouri for duck zone boundary changes as follows:

Michigan

North Zone: The Upper Peninsula.
South Zone: That portion of the Lower Peninsula south of a line running east from the western shore of Lake Michigan along Highway M–20 to U.S. Highway 10; east on U.S. Highway 10 to the mouth of the Saginaw River
Middle Zone: The remainder of the State.

Indiana

North Zone: That portion of the State north of a line running east from the Illinois border on State Highway 18 to U.S. Highway 31; north on U.S. Highway 31 to U.S. Highway 24; east on U.S. Highway 24 to Highway 224 at Hunnington; southeast on U.S. Highway 224 to the Ohio border.
Ohio River Zone: That portion of the State south of a line running east from the Illinois border on Interstate 64 to State Route 62 at New Albany; east on State Route 62 to State Route 56; east on State Route 56 to State Route 156 at Vevay; northeast on State Route 156 to State Route 56; north on state Route 56 to U.S. Highway 50; northeast on U.S. Highway 50 to the Ohio border.
South Zone: That portion of the State between the North and Ohio River Zone boundaries.

Missouri

North Zone: That portion of the State north of a line running west from the Illinois border on Missouri Highway 34 to Interstate 55; south on Interstate 55 to U.S. Highway 60; west on U.S. Highway 60 to Missouri Highway 21; north on Missouri 21 to Missouri Highway 72; west on Missouri Highway 72 to Missouri Highway 32; west on Missouri Highway 32 to U.S. Highway 65; north on U.S. Highway 65 to U.S. Highway 54; west on U.S. Highway 54 to the Kansas border.
South Zone: The remainder of the State.

Response. In the March 21, 1986, **Federal Register** (at 51 FR 9962) the Service gave notice that it believes present duck hunting zones should not be modified and no new duck hunting zones should be initiated until some better informed judgments regarding their cumulative effect on the resource can be made.

14. *Frameworks for geese and brant in the conterminous United States—outside dates, season length and bag limits.* (a) The Atlantic Flyway Council has recommended that frameworks be developed that permit Georgia to establish, in cooperation with the Service, a Canada goose hunting season on Eufaula National Wildlife Refuge (NWR) concurrent with the State's duck hunting season and governed by refuge-specific regulations for migratory game birds on Eufaula NWR.

Response: The Service understands this hunt is based almost entirely on the annual recruitment from a group of resident Canada geese introduced on the Refuge beginning in 1985. The Service defers final action until the late-seasons regulations cycle.

(b) Delaware has requested approval to conduct an experimental 10-day snow goose hunt in certain coastal marshes in October to disperse early migrants and thereby reduce destruction of marsh habitat by snow geese. The 10-day experimental season would be in addition to the State's regular 90-day snow goose season.

Response: The Service notes this request should receive Atlantic Flyway Technical Section and Council reviews and recommendations. However, the Service believes the existing frameworks for a 90-day snow goose hunting season, an opening date of October 1 and the option to split the season provide Delaware ample opportunity to test its dispersal proposal without resorting to an experimental season or additional days of hunting.

(c) The Central Flyway Council has recommended that a 3-year experimental snow goose hunting season (107 days, 5 snow geese daily and 20 in possession) and management unit with the following description be established in New Mexico: the Central Flyway portion of New Mexico that lies west of a line beginning at the intersection of U.S. Highway 54 and the New Mexico-Texas State line, north on U.S. Highway 54 to its intersection with U.S. Highway 60; thence west on U.S. Highway 60 to its intersection with U.S. Highway 285; thence north on U.S. Highway 285 to its intersection with the New Mexico-Colorado State line.

The Council indicated that the size of the population of snow geese (70,000 to 80,000) now using the Middle Rio Grande Valley (MRGV) far exceeds the available habitat, and severe crop depredations by the geese continue in New Mexico. The Council expects the increase in season length will provide additional protection against crop depredations and along with the possession limit increase (plus ten geese), may slow the growth of the MRGV snow goose population.

Response: The Service seeks additional comment and information on this recommendation. Final action is deferred until the late-seasons regulations cycle.

(d) The Mississippi Flyway Council's Upper Region Regulations Committee has endorsed requests from Illinois for (a) five additional days to its 20-day goose season in the Tri-County Area as part of the State's giant Canada goose management efforts. The season would open concurrently with the duck season in the State's Central Duck Zone in October prior to the peak migration of Mississippi Valley Population (MVP) Canada geese through the zone; and (b) two 9-day Canada goose hunting seasons in the northeastern nine counties of Illinois (McHenry, Lake, Kane, Cook, Du Page, Kendall, Will, Grundy and Kankakee counties) to harvest local giant Canada geese. The first season would open in early October or possibly late September while the second season would open in late December-early January. The bag limit would be 2 Canada geese daily during both seasons. The seasons are timed to avoid migrant Canada geese.

Response: The Service notes there is concern that late-September and early-October seasons aimed at giant Canada geese may result in the harvest of MVP Canada geese. The Service seeks additional information and/or comment on Illinois' request. Of particular interest would be survey information relating to goose numbers in Illinois by area during the September-December period.

(e) The Upper Region Regulations Committee has also endorsed Michigan's request for a 9-day early-September (6th–14th) Canada goose season. The daily bag limit would be 3 geese. The purpose of the hunt is to provide control over local giant Canada goose populations. The season would be statewide with the exceptions of the Allegan and Shiawassee River State Game Areas and the Fish Point Wildlife Area.

Response: The Service questions inclusion of such a large area in the proposal to harvest giant Canada geese. The Service defers action on the Michigan request and solicits additional

comment. It is noted that early-September seasons need to be considered during the early-season regulations development cycle.

(f) The Mississippi Flyway Council's Lower Region Regulations Committee has recommended that the framework closing date for snow and white-fronted goose hunting seasons in Arkansas be extended from January 20 to January 31.

Response. The Service seeks additional comment on this recommendation.

(g) Massachusetts has requested the following changes in the State's frameworks for Canada goose hunting: The framework closing date be extended from January 20 to January 31; season length be increased from 70 days to 90 days; and the daily bag limit be increased from 3 daily to 5 daily for those days of the season after January 15. The State indicated that the major purpose of its request is to harvest locally produced Canada geese and therefore aid in population control of nuisance flocks.

Response. Service action on this request is deferred pending its review by the Atlantic Flyway Council's Technical Section and receipt of a recommendation from the Council.

(h) A sportsman from Michigan has requested the Service provide for a 55-day Canada goose season in Michigan in 1986–87.

Response. A decision on regulations frameworks for goose hunting seasons will not be made until the 1986 waterfowl status and the 1985–86 goose harvest information have become available and regulations recommendations from the flyway councils have been received. At that time, the request from the Michigan sportsman and all other requests/comments received will be brought to the attention of the Service Regulations Committee for consideration.

(i) The Service notes that with the increasing numbers of resident flocks of Canada geese in the United States there has been an increase in nuisance complaints and/or reports of crop depredations by these geese. As a result, requests from States for special hunting seasons to control these geese are becoming more frequent. The Service endorses sport hunting as a management strategy to control resident Canada geese; however, the endorsement is conditional. First and foremost, the Service believes that sport hunting of resident Canada geese that can be accommodated within the regular season frameworks should take precedence over the establishment of frameworks for a special hunting season on resident Canada geese in addition to a State's regular Canada goose season. Second, the potential adverse impact of special, resident-goose hunting seasons on geese migrating into or through the area is of concern to the Service. In addition, there is a practical limit to the number of seasons and/or areas for hunting migratory birds that can be described in the Federal Register. There also is a limit to the number of experimental hunting programs that can be evaluated by the Service and States. Pending development of criteria for special resident-goose seasons, the Service will require that prior to approval of such a season, the requesting State must provide in its proposal acceptable evidence (survey data, neck collar observations, etc.) that the area to be hunted does not receive appreciable numbers of migrant geese; or if migrant geese use the area they would not be expected during the special season. If approved by the Service, the respective State will be required to monitor the season by gathering goose population and harvest data.

16. *Sandhill cranes.* (a) The Central Flyway Council has endorsed New Mexico's request for a 16-day sandhill crane hunting season between October 10 and November 5 with daily bag and possession limits of 3 and 6 cranes, respectively, within the following boundary:

The part of the Rio Grande Valley bounded on the north by the south boundary of Isleta Pueblo; on the west by Interstate 25, but including all portions of Bosque del Apache and Sevilleta National Wildlife Refuges lying west of I–25; on the south by the southern boundary of Bosque del Apache NWR; on the east by the Bosque del Apache NWR boundary from I–25 southeast then north to the refuge's northeast corner, then by a dirt road running southeast approximately 0.5 miles from that corner to the western boundary of the White Sands Missile Range Extension Co-Use area (WSMREC), then by the WSMREC boundary north then east to the southeastern corner of Sevilleta NWR, then by the eastern boundary of Sevilleta NWR north to U.S. 60, by U.S. 60 west to N.M. 47, and then by N.M. 47 north to the south boundary of Isleta Pueblo.

The hunting season will be an additional management method for controlling crop depredations by sandhills and will aid in the control of an increasing crane population that now exceeds management objectives.

Response. The Service notes the Central and Pacific Flyway Councils share management responsibilty for these cranes. Action is deferred on this request pending receipt of a proposal supported by both Councils.

(b) The Central and Pacific Flyway Councils have endorsed Wyoming's request for a 14-day sandhill crane/Canada goose hunting season between September 1 and September 22 in the Eden-Farson Agricultural Project in Sweetwater and Sublette Counties in western Wyoming. Bag limits will be 3 sandhill cranes and 1 Canada goose per season—75 permits will be issued for the hunt.

Response. The Service seeks comments on Wyoming's request and notes that pending completion of harvest guidelines for the Rocky Mountain Population of greater sandhill cranes, any such season would be regarded as being an experimental expansion of the operational season in Lincoln County.

(c) The Pacific Flyway Council also recommended no change in either the 1986–87 sandhill crane hunting season in Arizona on the operational sandhill crane/Canada goose hunting season in Wyoming from the 1985–86 seasons.

Response. The Service proposes to continue these two hunting seasons without change.

21. *Woodcock.* (a) New Jersey has requested exemption from the 10-day penalty in season length normally taken by them for selecting zoning as a woodcock harvest strategy, or that at the very least the penalty be only 7 days in order to remove what the State views as a disproportionate penalty when compared to other Atlantic Flyway States.

Response. The Service notes that the option to select zones as a woodcock harvest strategy is only available to New Jersey. As stated in the July 5, 1985, Federal Register (at 50 FR 27642) the 10-day penalty taken by New Jersey for selecting its option to zone is long-standing and the Service feels it should be continued. In view of the long-term decline in woodcock in the eastern region and the restrictions of recent years designed to reduce harvest opportunity on these birds, the Service questions the wisdom of continuing to offer the option to zone New Jersey for woodcock hunting.

(b) In 1985 the Service initiated a program whereby the hunting regulations for woodcock in the Atlantic Flyway were adjusted to bring harvest opportunities to a level commensurate with the current woodcock population status. A sportsman from Maine has indicated he does not object to the restricted bag limit but he does take exception to the delayed framework opening date and the decrease in season

length because from his personal hunting experiences the past 25 years, he feels that the status of the woodcock population is good.

Response. The Service notes that the number of woodcock in the Atlantic Flyway has significantly declined since the 1960s and reiterates the statement made in the March 21, 1986, Federal Register (at 51 FR 9964) that no changes in seasons and bag limits for woodcock from those in effect in 1985–86 are anticipated at this time pending an evaluation of the restrictive changes implemented in the Atlantic Flyway.

22. *Band-tailed pigeons.* The Pacific Flyway Council has recommended that the mandatory permit requirement for hunting band-tailed pigeons in Nevada be removed.

Response. the Service believes the requirement for a permit in previous years established the fact that bandtail seasons in Nevada had little or no impact on the resource. Therefore the Service concurs with the Pacific Flyway Council's recommendation and proposes to remove the mandatory permit requirement for band-tailed pigeon hunting in Nevada.

24. *White-winged and white-tipped doves.* The Central Flyway Council has recommended that the 1986–87 regulations for white-winged doves provide for resumption of a 4-day white-winged dove season in the special white-winged dove area of Texas' South Dove Zone. The Council indicated that continuing recovery of citrus nesting habitat and the anticipated recovery of the white-winged dove breeding population during the 1986 nesting season warrants a return from the 2-day special season permitted in 1985–86 to a 4-day season in 1986–87.

Response. In the March 21, 1986, Federal Register (at 51 FR 9965) the Service noted that the normal 4-day white-winged dove season in Texas' special white-winged dove area of its South Zone was shortened to 2 days in 1985 because of declines in white-winged dove numbers as a result of reduced citrus nesting habitat. The Service defers a decision on a 4-day season in 1986 pending receipt of additional status information on whitewings and their nesting habitat.

Public Comment Invited

Based on the results of migratory game bird studies now in progress and with due consideration for any data or views submitted by interested parties, the possible amendments resulting from this supplemental rulemaking will specify open seasons, shooting hours, and bag and possession limits for designated migratory game birds in the United States, including Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned governmental agencies, and private interests on these proposals and will take into consideration the comments received. Such comments, and any additional information received, may lead the Director to adopt final regulations that differ from these proposals.

Special circumstances are involved in the establishment of these regulations which limit the amount of time which the Service can allow for public comment. Specifically, two considerations compress the time in which the rulemaking process must operate: the need, on the one hand, to establish final rules at a point early enough in the summer to allow affected State agencies to appropriately adjust their licensing and regulatory mechanisms, and, on the other hand, the unavailability before mid-June of specific, reliable data on this year's status of some migratory shore and upland game bird populations. Therefore, the Service believes that to allow comment periods past the dates specified earlier is contrary to the public interest.

Comment Procedure

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may participate in the rulemaking process by submitting written comments to the Director, U.S. Fish and Wildlife Service, MBMO—Matomic Building, Room 536, Washington, DC 20240. Comments received will be available for public inspection during normal business hours at the Service's office in Room 536, Matomic Building, 1717 H Street, NW., Washington DC.

All relevant comments on proposals will be considered provided those for Alaska, Hawaii, Puerto Rico, and the Virgin Islands are received no later than June 19, 1986; those on early-season proposals (except Alaska, Hawaii, Puerto Rico, and the Virgin Islands) are received no later than July 14, 1986; those on late season proposals are received by August 25, 1986; and those on the proposal to revise the authority citation of 50 CFR are received by July 18, 1986.

Flyway Council Meetings

Department of the Interior representatives will be present at the following meetings of flyway councils:

Atlantic Flyway—Williamsburg, Virginia (Williamsburg Lodge) July 27–30

Mississippi Flyway—Des Moines, Iowa (Holiday Inn South) July 28–29

Central Flyway—Tulsa, Oklahoma (Hilton Inn) July 28–30

Pacific Flyway—Reno, Nevada (Sundowner Hotel—Casino) July 28

Although agendas are not yet available, these meetings usually commence at 8:30 to 9 a.m. on the days indicated.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality of June 6, 1975, and notice of availability was published in the Federal Register on June 13, 1975 (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement. Copies of these documents are available from the Service at the address indicated above.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act provides that the Secretary "shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act," and shall take "such action necessary to insure that any action authorized, funded, or carried out . . . is not likely to jeopardize the continued existence of such endangered or threatened species or result in the destruction or modification of habitat of such species . . . which is determined to be critical."

Section 7 consultation are presently underway regarding both the early- and late-season regulatory proposals. It is possible that the findings from the consultation, which will be included in a biological opinion, may cause modification of some of the regulatory measures proposed in this document. Any modifications that may be desirable will be reflected in the final frameworks for Alaska, Puerto Rico, and the Virgin Islands, scheduled for publication in the Federal Register on or about July 18, 1986; those for other early seasons on or about August 4, 1986; and for later seasons on or about September 11, 1986.

Hunting regulations are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species and their habitats.

The Service's biological opinions resulting from its consultation under Section 7 are considered public documents and are available for public inspection in the Office of Endangered Species, and the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, DC. 20240.

Regulatory Flexibility Act and Executive Order 12291

In the Federal Register dated March 21, 1986, (51 FR 9654), the Service reported measures it has undertaken to comply with requirements of the Regulatory Flexibility Act and the Executive Order. These included preparing a Determination of Effects and an updated Final Regulatory Impact Analysis, and publication of a summary of the latter. This information is included in the present document by reference. As noted in the above Federal Register publication, the Service plans to issue its Memorandum of Law for the migratory bird hunting regulations at the same time the first of the annual hunting rules is finalized. This rule does not contain any information collection requiring approval by OMB under 44 U.S.C. 3504.

Authorship

The primary author of this supplemental proposed rulemaking is Morton M. Smith, Office of Migratory Bird Management, working under the direction of Rollin D. Sparrowe, Chief.

List of Subjects in 50 CFR Part 20

Hunting, Wildlife, Exports, Imports, Transportation.

Accordingly, it is proposed to amend Part 20 of Chapter 1 of Title 50 of the Code of Federal Regulations as set forth below:

PART 20—[AMENDED]

1. The authority citation for Part 20 would be revised to read as follows and the authority citations following their sections in part 20 would be removed:

Authority: Migratory Bird Treaty Act, sec. 3, Pub.L. 95–186, 40 Stat. 755 (16 U.S.C. 701–709h); sec. 3(h), Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712); Alaska Game Act of 1925, 43 Stat. 739, as amended, 54 Stat. 1103–04.

Dated: June 6, 1986.

William P. Horn,

Assistant Secretary for Fish and Wildlife and Parks.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 17-86]

Foreign-Trade Zone 22, Chicago, IL; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Illinois International Port District, grantee of Foreign-Trade Zone 22, requesting authority to expand its zone to include a site located in Manteno Township, Kankakee County, Illinois, adjacent to the Chicago Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 15, 1986.

On October 29, 1975, the Board authorized the Chicago Regional Port District to establish a foreign-trade zone in the Lake Calumet Harbor area of Chicago, Illinois (Board Order 108, 40 FR 51242, Nov. 4, 1975). The project currently covers a 25-acre industrial park site within the 2,250-acre Lake Calumet Harbor area, within the Chicago Customs port of entry.

The proposed expansion involves a 578-acre planned industrial/commercial complex, located on Bernard Road at County Highway 9 in Manteno Township, Kankakee County, some 18 miles south of Chicago. The facility would be operated by the Illinois Diversatech Campus Corporation.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Joseph E. Lowry (Chairman), Foreign-Trade Zones Staff, U.S Dept. of Commerce, Washington, DC 20230; Larry Shirk, Assistant District Director, U.S. Customs Service, North Central Region, 610 S. Canal St., Chicago, IL 60607; and Lt. Col. Frank R. Pinch, District Engineer, U.S Army Engineer District Chicago, 219 S. Dearborn St. Chicago, IL 60604–1797.

Comments concerning the proposed expansion are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before July 11, 1986.

A copy of the application is available for public inspection at each of the following location:

U.S. Department of Commerce District Office, 1406 Mid Continental Plaza Building, 55 East Monroe Street, Chicago, IL 60603

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th & Pennsylvania Ave., NW., Washington, DC 20230.

Dated: June 2, 1986.

Dennis Puccinelli,
Acting Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[Docket No. 1614-02]

Anatoli Tony Maluta, Respondent; Order

On May 21, 1986, the Administrative Law Judge issued his Decision and Order in the matter of Anatoli Tony Maluta, which was referred to me pursuant to section 13(c) of the Export Administration Act of 1979, 50 U.S.C. app. 2401–2420 (1982), as amended by the Export Administration Amendments Act of 1985, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.8(a) for final action.

Pursuant to a charging letter of August 5, 1983, Anatoli Tony Maluta was charged with multiple violations of the Export Administration Act of 1979. He was found to have shipped illegally a variety of controlled electronic equipment to the Federal Republic of Germany and to the Netherlands, having failed to obtain the required validated licenses. He had also submitted export control documents containing false representations of material facts.

Pursuant to the findings of the Administrative Law Judge, Anatoli Tony Maluta is hereby denied all export privileges for a period of 20 years. In addition, a civil penalty of $110,000 is imposed which is suspended for 5 years. This suspension is conditioned upon his committing no further violations of the Export Administration Act or any of its successors. If no further violation occurs, then this civil penalty will be vacated.

Having reviewed the record and based on the facts addressed in this case, I affirm the Order of the Administrative Law Judge. This constitutes final agency action in this matter.

Dated: June 2, 1986.

Paul Freedenberg,
Assistant Secretary, for Trade Administration.

Initiation of Antidumping and Countervailing Duty Administrative Reviews

Correction

In FR Doc. 86-11270 beginning on page 18475 in the issue of Tuesday, May 20, 1986, make the following correction:

On page 18475, in the third column, the table of Countervailing duty Proceedings should read as follows:

Countervailing duty Proceedings	Period to be reviewed
Wool from Argentina	01/85–12/85.
Leather Wearing Apparel from Colombia	07/84–12/85.
Leather Wearing Apparel from Mexico	07/84–12/85.

BILLING CODE 1505-01-M

Semiconductor Technical Advisory Committee; Partially Closed Meeting

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on January 10, 1986 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

Time and place: June 25, 1986 at 9:30 a.m., Herbert C. Hoover Building, Room 3407, 14th Street and Constitution Ave. NW., Washington, DC.

Agenda

General Session

1. Opening remarks by the Chairman.

2. Presentation of papers or comments by the public.
3. Action items underway.
4. New Business.
5. Action items due at next meeting.

Executive Session

6. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Public Participation

The General Session will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: A Notice of Determination to close meetings or portions of meetings of the Committee to the public on the basis of 5 U.S.C. 552b(c)(1) was approved on January 10, 1986, in accordance with the Federal Advisory Committee Act. A copy of this Notice is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone: 202–377–4217. For further information or copies of the minutes call 202–377–2583.

Dated: June 3, 1986.

Margaret A. Cornejo,

Director, Technical Support Staff, Office of Technology and Policy Analysis.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amending the Restraint Limits for Certain Cotton and Man-Made Fiber Textiles Produced or Manufactured in Thailand

June 3, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on June 9, 1986. For further information contact Kathy Davis, International Trade Specialist Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

In consultations held in April 1986, the Governments of the United States and Thailand agreed, under the terms of their Bilateral Cotton, Wool and Man-Made Fiber Textile Agreements of July 27 and August 8, 1983, as amended, on the disposition of charges for overshipments in the cotton and man-made fiber apparel group (Categories 330–359 and 630–659), which occurred during the previous agreement period. Accordingly, in the letter which follows this notice, the Chairman of CITA directs the Commissioner of Customs to reduce the cotton and man-made fiber apparel group limit, established for imports during the thirteen-month period which began on December 1, 1985, from 90,423,480 square yards equivalent to 89,379,567 square yards equivalent. The new limit includes the transfer of 1,625,000 square yards equivalent from the limit established for wool textile products in Categories 410–425 and 431–459, as a group, reducing that limit to 1,625,000 square yards equivalent for the thirteen-month period. The Commissioner of Customs is further directed to reduce the import charges to the restraint limits established for man-made fiber textile products in Categories 631, 640, and 647/8, produced or manufactured in Thailand and exported during the thirteen-month agreement period.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

June 3, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of November 27, 1985 which established limits for certain categories of cotton, wool and man-made fiber textile products, produced or manufactured in Thailand and exported during the thirteen-month period which began on December 1, 1985 and extends through December 31, 1986.

Effective on June 9, 1986, the directive of November 27, 1985 is hereby amended to reduce the following group limits as indicated below:

Category	13-mo restraint limit [1]
330–359 and 630–659	89,379,567 square yards equivalent.
410–425 and 431–459	1,625,000 square yards equivalent.

[1] The limits have not been adjusted to reflect any imports exported after November 30, 1985.

Also effective on June 9, 1986, you are directed to reduce the import charges made to the limits previously established for man-made fiber textile products in Categories 631, 640 and 647/648 as follows:

Category	Amount of reduction
631	82,400 dozen pairs.
640	114,024 dozen.
647/648	97,974 dozen.

The Committee for the Implementation of Textile Agreements had determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Establishing an Import Limit for Certain Cotton Textile Products Produced or Manufactured in Mauritius

May 30, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on June 9, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

On February 19, 1986, a notice was published in the Federal Register (51 FR 6025) which announces that, on January 31, 1986, the Government of the United States had requested the Government of Mauritius to enter into consultations concerning exports to the United States of cotton trousers in Category 347/348, produced or manufactured in Mauritius and exported during the twelve-month period which began on January 31, 1986 and extends through January 30, 1987. Inasmuch as no solution was reached during consultations between the two governments, the United States Government has decided to control imports in Category 347/348, exported during the twelve-month period which began on January 31, 1986 and extends through January 30, 1987 at a level of 331,332 dozen.

The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Mauritius, which are anticipated but not yet scheduled, further notice will be published in the Federal Register.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff

Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

May 30, 1986.

Committee for The Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 9, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 347/348, produced or manufactured in Mauritius and exported during the twelve-month period which began on January 31, 1986 and extends through January 30, 1987, in excess of 331,332 dozen.[1]

Textile products in Category 347/348 which have been exported to the United States prior to January 31, 1986 shall not be subject to this directive.

Textile products in Category 347/348 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-12760 Filed 6-5-86; 8:45 am]

BILLING CODE 3510-DR-M

[1] The limit has not been adjusted to account for any imports exported after January 30, 1986.

Establishing an Import Limit for Certain Cotton Textile Products Produced or Manufactured in Mauritius

May 30, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on June 9, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212.

Background

On March 26, 1986, a notice was published in the Federal Register (51 FR 10421) which announced that, on February 28, 1986, the Government of the United States had requested the Government of Mauritius to enter into consultations concerning exports to the United States of woven cotton blouses and shirts in Category 341, produced or manufactured in Mauritius and exported during the twelve-month period which began on February 28, 1986 and extends through February 27, 1987. Inasmuch as no solution has been reached in consultations on a mutually satisfactory limit for this category, the United States Government has decided to control imports in Category 341, exported during the twelve-month period which began on February 28, 1986, at a level of 118,584 dozen.

The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Mauritius, further notice will be published in the Federal Register.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

May 30, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 9, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 341, produced or manufactured in Mauritius and exported during the twelve-month period which began on February 28, 1986 and extends through February 27, 1987, in excess of the following level of restraint:

Category	12-mo restraint level [1]
341	118,584 dozen.

[1] The level has not been adjusted to account for any imports exported after February 27, 1986.

Textile products in Category 341 which have been exported to the United States prior to February 28, 1986 shall not be subject to this directive.

Textile products in Category 341 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On February 21, 1986, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (50 FR 6295) of proposed additions to Procurement List 1986, October 15, 1985 (50 FR 41609).

Addition

After consideration of the relevant matter presented, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77 and 41 CFR 51-2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the commodity listed.

c. The action will result in authorizing small entities to produce the commodity procured by the Government.

Accordingly, the following commodity is hereby added to Procurement List 1986:

Mat, Sleeping, Cold weather
8465-01-109-3369.

C.W. Fletcher,
Executive Director.

BILLING CODE 6820-33-M

Procurement List 1986; Proposed Additions and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to and deletion from Procurement List.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1986 commodities to be produced by and services to be provided by workshops for the blind or other severely handicapped.

DATE: Comments must be received on or before: July 9, 1986.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and services to Procurement List 1986, October 15, 1985 (50 FR 41609):

Commodities

Smock, Medical Assistant's
8532-00-117-7467
8532-00-117-7542
8532-00-117-7543
8532-00-117-7546

Vest, Ammunition Carrying
8415-00-146-1667
8415-00-146-1668

Belt, Trousers
8440-01-167-7246
8440-01-175-7851
8440-01-175-7853
8440-01-175-7850
8440-01-304-3810
8440-01-175-7854
8440-01-175-7852
8440-01-181-4410
8440-01-181-4411

Tray, Canvas
PS Item No. 0-1046-T

Services

Mailing Service, U.S. Department of Interior, Bureau of Land Management, Oregon State Office, Portland, Oregon.

Repair of Air Cargo Pallet Top and Side Nets, Norton Air Force Base, California.

Reproduction Service, Army Material Command Headquarters, Alexandria, Virginia.

Deletion

It is proposed to delete the following commodities from Procurement List 1986, October 15, 1985 (50 FR 41609):

Liner, Coat, Cold Weather
8415-00-782-2866
8415-00-782-2867
8415-00-782-2868
8415-00-782-2869
8415-00-782-2850
8415-00-082-0879

(All Government requirements except for the Mechanicsburg Depot, Mechanicsburg, Pennsylvania)

C.W. Fletcher,
Executive Director.

BILLING CODE 6820-33-M

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 86-1]

Johnson & Johnson Baby Products Company, Inc.; Publication of Complaint

AGENCY: Consumer Product Safety Commission.

ACTION: Publication of a Complaint under the Federal Hazardous Substances Act.

SUMMARY: Under Provisions of its Rules of Practice for Adjudicative Proceedings (16 CFR Part 1025), the Consumer Product Safety Commission must publish in the Federal Register Complaints which it issues under the Federal Hazardous Substances Act 16 CFR 1025.11(c).

Printed below is a Complaint issued in the matter of Johnson & Johnson Baby Products Company, Inc., a corporation.

Dated: June 3, 1986.

Sheldon D. Butts,
Deputy Secretary, Consumer Product Safety Commission.

Consumer Product Safety Commission

[CPSC No. 86-1]

In the matter of Johnson & Johnson Baby Products Co., Inc., a corporation.

Complaint Nature of Proceedings

1. This is an administrative adjudicative proceeding pursuant to section 15 of the Federal Hazardous Substances Act (hereinafter, the "FHSA"), as amended, 15 U.S.C. 1274, Pub. L. 98-491, 98 Stat. 2289 (Oct. 17, 1984), for public notification and remedial action to protect the public from substantial risks of injury presented by children's toys (hereinafter, "toys"). This proceeding is governed by the Rules of Practice for Adjudicative Proceedings before the Consumer Product Safety Commission, 16 CFR Part 1025.

Jurisdiction

2. The Consumer Product Safety Commission (hereinafter, the "Commission" or "CPSC") has jurisdiction over the subject matter of

this proceeding pursuant to section 15 of the FHSA, 15 U.S.C. 1274.

Respondent

3. Respondent Johnson & Johnson Baby Products Company, Inc. (hereafter, Johnson & Johnson) is a corporation organized and existing under the laws of the State of New Jersey, with corporate offices located at Grandview Road, Skillman, New Jersey, 08558 and 1 Johnson & Johnson Plaza, New Brunswick, New Jersey 08933.

4. Respondent imported and introduced into commerce toys known as "Soft Triplets" (hereafter, "Triplets"), "Piglet Crib Gym" (hereafter, "Piglets"), and "Triplets Marching Band" (hereafter, "Marching Band"), and sold them in interstate commerce within the meaning of 15 U.S.C. 1261(b) and 1274.

5. Respondent is a "manufacturer" of the toys as that term is defined in section 15(f) of the FHSA, 15 U.S.C. 1274(f).

Articles Intended for Use by Children

6. The Triplet and Marching Band toys consist of three soft figures attached together by means of elastic with a plastic ring at each end. The Piglet toy is constructed in the same way, but has, in addition, two attachment devices of plastic and elastic bands that can be separated from, but are supplied with the toy. (See Exhibits 1, 2, and 3.)

7. All of the toys were sold for use by children from birth to 24 months. All of the toys were sold as multi-use toys. All of the toys can be hung across a crib or playpen.

8. Between 1979 and 1986, Respondent imported and distributed in interstate commerce approximately 1.6 million Triplets; 62,000 Piglets; and 3,000 Marching Band toys.

9. The Triplets were sold by mail and Respondent has the names and addresses of purchasers with the exception of approximately 250,000.

10. The toys are "toys" or "other articles intended for the use of children" within the meaning of 15 U.S.C. 1274(c), as amended.

Substantial Risks of Injury

11. Children can become caught on the toy itself or entangled in the strings or cords that may be used to hang or tie it over a crib or playpen and strangle or suffer serious injury.

12. In October, 1984, a ten month old boy strangled to death when he became entangled in cords used to tie a Triplet toy to his crib.

13. In December of 1985, a seven month old girl was asphyxiated when she became caught on the Triplet toy which was hung over the crib.

14. The toys contain a defect or defects which, because of the pattern of defect, the number of defective toys distributed in commerce, the severity of the risk of injury or otherwise, create a substantial risk or risk of injury to children within the meaning of section 15(c) of the FHSA, 15 U.S.C. 1274(c).

Relief Sought

Wherefore, Complaint Counsel requests that the Commission:

A. Determine that the toys contain a defect or defects which create a substantial risks or risks of injury to children within the meaning of section 15 (c)(1) and (c)(2) of the FHSA, 15 U.S.C. 1274 (c)(1) and (c)(2).

B. Determine that public notification under section 15(c)(1) of the FHSA, 15 U.S.C. 1274(c)(1), is required to adequately protect the public from the toys.

C. Order Respondent under section 15(c)(1), FHSA, 15 U.S.C. 1274(c)(1), to

(1) Give public notice that the toys contain a defect or defects which create a substantial risk or risks of injury to children and of the remedies available to remove the risk(s) of injury.

(2) Mail such notice to each person who is a manufacturer, distributor, or dealer of the toy.

(3) Mail such notice to every person to whom Respondent knows the toy was delivered or sold.

D. Specify the form and content of any notice required to be given.

E. Determine in accordance with section 15(c)(2), FHSA, 15 U.S.C. 1274(c)(2), that it is in the public interest to repair the toys so that they will not contain a defect which creates a substantial risk of injury to children, to replace the toys with a like or equivalent product which is not defective, or to refund to consumers the purchase price of the toys.

F. Order Respondent under section 15 (c) (2) FHSA, 15 U.S.C. 1274 (c)(2), to repair the toys so that they do not contain a defect which creates a substantial risk of injury to children; replace the toys with a like or equivalent toy or article which is not defective; or refund to consumers the purchase price of the toys.

G. Specify that refunds must be made to consumers if refunds are given.

H. Order Respondent to make no charge to consumers and to reimburse them for any reasonable and foreseeable expenses incurred in availing themselves of any remedy provided under any order issued under section 15(c) FHSA, 15 U.S.C. 1274(c), as provided for in section 15(d)(1) of the FHSA, 15 U.S.C. 1274(c)(1).

I. Order Respondent to reimburse distributors and dealers for expenses in connection with carrying out any orders issued under sections 15 (c)(1) or (c)(2) with regard to the toys as provided for in section 15(d)(2) of the FHSA, 15 U.S.C. 1274(d)(2).

J. Prohibit Respondent from manufacturing the toys; from selling and distributing the toys in commerce; and from importing the toys into the customs territory of the United States, in accordance with section 15(c)(2) of the FHSA, 15 U.S.C. 1274 (c)(2).

K. Order Respondent to submit a plan satisfactory to the Commission within 15 days of the issuance of the Final Order directing the actions specified in paragraphs C through J above in accordance with section 15(c)(2) of the FHSA, 15 U.S.C. 1274(c)(2).

L. Order Respondent to keep records of their actions taken to comply with paragraphs C through K above, and to supply these records to the Commission staff for a period of three years after entry of a Final Order issued by the Commission requiring notice and remedial action, for the purpose of monitoring compliance with the Final Order.

M. Order Respondent to notify the Commission at least 60 days prior to any change in their business (such as incorporation, dissolution, assignment, sale, or by petition for bankruptcy) that results in, or is intended to result in, the emergence of a successor corporation, the creation or dissolution of subsidiaries, the dissolution of the corporation, going out of business, or any other change that might affect compliance obligations under a Final Order issued by the Commission requiring notice and corrective action for a period of three years after issuance of said Final Order.

N. Grant such other and further relief as the Commission deems necessary to protect the public health and safety and to implement the FHSA.

Dated: May 29, 1986.

Issued by order of the Consumer Product Safety Commission.

David Schmeltzer,

Associate Executive Director for Compliance and Administrative Litigation.

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of meeting: Monday-Friday, 23-27 June 1986.

Times of meeting: 0800-1630.

Places: Fort Rucker, Alabama.

Agenda: The Army Science Board Ad Hoc Subgroup on Helicopter Lift Capabilities in Europe will meet to review Army models and processes for determination of requirements and capabilities of helicopters. This meeting will be closed to the public in accordance with section 552(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably interwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Procurement and Assistance Management Directorate

AGENCY: Department of Energy, DOE.

ACTION: Notice of restricted eligibility for grant award.

SUMMARY: DOE announces that it plans to award a grant in the amount of $25,000 for fiscal year 1987, as the first of three projected awards of $25,000 each in partial support of the United Nations Institute for Training and Research. Pursuant to § 600.7(b) of the DOE Financial Assistance rules, 10 CFR Part 600, DOE has determined that eligibility for this grant award shall be limited to the United Nations Institute for Training and Research.

Procurement request number: 01-86FE60820.000.

SUPPLEMENTARY INFORMATION: The United Nations Institute for Training and Research (UNITAR/UNDP) is preparing to publish the Catalogue of Heavy Crude and Tar Sands Resources, and World Legislation on Heavy Crude Oil.

UNITAR is the organization in the world dedicated to promoting international cooperation concerning heavy crude and tar sands resources and developing and distributing related information. The DOE is vitally interested in helping meet the world's demands of the future.

Therefore, the DOE has determined that this award to the UNITAR/UNDP on a restricted eligibility basis is appropriate.

FOR FURTHER INFORMATION CONTACT: Shirley Jones/Glen R. Taranto, MA-452.1, U.S. Department of Energy, Office of Procurement Operations, 1000 Independence Ave. SW., Washington, DC 20585, [202] 252-4065.

Issued in Washington, DC, on May 30, 1986.

David G. Newman,

Director, Office of Procurement Operations.

BILLING CODE 6450-01-M

National Petroleum Council, Economic and Environmental Impacts Task Group; Meeting

Notice is hereby given that the Economic and Environmental Impacts Task Group will meet in June 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Economic and Environmental Impacts Task Group will evaluate the impact of the 1970's energy crises on the U.S. economics—economic growth, employment, inflation, oil and gas industry cash flow, capital investment, international trade, the financial markets (U.S. and international), real interest rates, etc. This Task Group will also analyze the potential future economic impact of the factors on issues indentified by the other Task Groups.

The Economic and Environmental Impacts Task Group will hold its third meeting on Friday, June 20, 1986, starting at 10:00 a.m., in the Odessa Room of the DuPont Hotel, DuPont Conference Center, Eleventh and Market Street, Wilmington, Delaware.

The tentative agenda for the Economic and Environmental Impacts Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.

2. Review the factors affecting petroleum supply and demand.

3. Discuss the Group assignments.

4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Economic and Environmental Impacts Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Economic and Environmental Impacts Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 29, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines, After Partial Wellhead Decontrol (Cranberry Pipeline Corp.; Order Denying Request for Clarification

Issued: June 2, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt, and C. M. Naeve.

On March 20, 1986, Cranberry Pipeline Corporation (Cranberry) filed a request for clarification to confirm that its transportation arrangement on behalf of Columbia Gas Transmission Corporation would qualify under the transitional rules of Order No. 436. We deny Cranberry's request.

Cranberry is an intrastate pipeline company in the State of West Virginia and an affiliate of Cabot Corporation (Cabot). On February 28, 1962, pursuant to a reorganization plan approved by the Public Service Commission of West Virginia, Cabot was authorized to convey its gathering and pipeline facilities to Cranberry. Cranberry became an intrastate pipeline, and Cabot shed its intrastate pipeline functions and became a local distribution company.

Cabot has a producer certificate [1] and a transportation rate schedule on file at this Commission. Under color of that authority it has transported gas for Columbia Gas Transmission Corporation (Columbia). Cabot received the gas at its Big Creek Compressor Station in McDowell County, West Virginia and redelivered equivalent quantities to Columbia in Wyoming County, West Virginia. In an effort to continue this transportation service for Columbia, on April 9, 1985 Cranberry executed and agreement with Columbia to transport, under section 311 of the Natural Gas Policy Act (NGPA), 6,000 MMBtu of natural gas per day, for redelivery in Wyoming or Kanawha Counties, West Virginia. However, the effectiveness of the transportation agreement was made contingent upon: (1) Cabot's obtaining Commission approval in Docket No. G-5236 to abandon the similar transportation service Cabot previously provided for Columbia, and (2) Cranberry's obtaining Commission approval to transport for Columbia on a long-term basis under then effective § 284.127 of the Commission's Regulations.

[1] Docket No. G-5236, order issued October 24, 1956.

On June 4, 1985, Cabot filed an application seeking Commission approval to abandon its certificate in Docket No. G-5236-006. Cranberry, filing concurrently with Cabot, applied for Commission authorization pursuant to section 311(a)(2) of the NGPA and § 284.127 of the Commission's Regulations for authorization to transport on behalf of Columbia. As of October 9, 1985, neither application had been acted upon. As to that date, Cranberry was not transporting gas pursuant to section 311 and Part 284, and neither was Cabot.

Cranberry argues that it should be accorded transition treatment because Cranberry's corporate parent, Cabot was transporting gas on behalf of Columbia long before the issuance of Order No. 436. Cranberry argues that it should be construed as a successor in interest to Cabot. We disagree.

Section 284.105 specifically limits transitional treatment to transportation arrangements that were authorized and commenced on or before October 9, 1985. As of that date, Cranberry had not commenced transportation. Cranberry's "successor in interest" argument is devoid of merit. Cranberry cannot substitute itself for Cabot in any event [2] and, more to the point, Cabot performed the transportation for Columbia pursuant to a certificate under the Natural Gas Act, not pursuant to section 311 and Part 284. Therefore, there is no basis for any claim of a right to transitional treatment; as of October 9, 1985, there was no section 311 transportation arrangement in existence, and therefore nothing to be accorded transitional treatment.

By the Commission.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86-12782 Filed 6-5-86; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Natural Gas Pipeline Co. of America); Order Granting Request for Clarification

Issued: June 2, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt, and C.M. Naeve.

On January 17, 1986, Natural Gas Pipeline Company of America (Natural) filed a request for clarification of § 284.223(g)(1) of the regulations adopted in Order No. 436.[1] specifically, Natural seeks clarification that the volume of high-priority end-use gas eligible for continued transportation authorization under the transitional provisions of § 284.223(g)(1) is the highest daily volume of gas actually transported for high-priority end uses prior to October 9, 1985. In other words, Natural seeks clarification that this high-priority "peak" is the permissible level of transportation service for high-priority gas under § 284.223(g)(1). Natural also seeks clarification that it may rely on "later-in-time affidavits" from its high-priority end users to establish this "peak" or permissible volume of transportation under § 284.223(g)(1). We grant the clarification request.

Natural reports that it halted transportation of certain transactions originally authorized under former § 157.209(e) (which authorized transportation for any end use regardless of priority) as of November 1, 1985, because of uncertainty as to whether those transactions would be "grandfathered" pursuant to § 284.223(g)(1). Natural states that under some of those transportation arrangements, both high-priority and low-priority end-use volumes were transported. However, the percentage of gas transported for high-priority end uses did not remain constant and may have fluctuated on daily basis.

In the order granting rehearing in *Midwest Solvents Company*, 33 FERC ¶ 61,395 (December 19, 1985), we determined that transportation for high-priority end users qualifies for continuing authorization under § 284.223(g)(1), even though originally applied for under § 157.209(e), because such high-priority transportation was automatically authorized under former § 157.209(a)(1). In a subsequent *Southern Natural Gas Company* clarification order, 33 FERC ¶ 61,444 (December 27, 1985), we stated that gas which would have qualified for transportation under former § 157.209(a)(1) for high-priority end use, and for which transportation had commenced prior to October 9, 1985, was eligible for the transitional provisions of § 284.223(g)(1) to the extent of the high-priority use, even though not all of the gas flowing to the end user was for such high-priority uses.

The transitional provisions limit transactions qualifying thereunder to the operative terms and conditions that

[2] *See, e.g.*, Regulations of Natural Gas Pipelines After Partial Wellhead Decontrol [Hadson Gas Systems, Inc.], 33 FERC ¶ 61,142 (issued October 30, 1985); *see also*, Berkshire Gas Company), 33 FERC ¶ 61,378 (issued December 13, 1985).

[1] 33 FERC ¶ 61,007 (1985), 50 FR 42408 (October 18, 1985).

existed on October 9, 1985.[2] The transitional rule for high-priority transportation arrangements (18 CFR 284.223(g)(1)) states:

> In the case of transportation authorized under § 157.209(a)(1) which commenced on or before October 9, 1985, such transportation is deemed to be authorized under this section for the full term originally certificated subject to the provisions of § 284.7 of this chapter. *In all other respects, the terms and conditions existing prior to November 1, 1985, shall continue for this period.* (Emphasis added.)

The purpose of this provision was to allow a transporter to continue its high-priority transportation service as that service existed on and prior to October 9, 1985. Transporters, like Natural, which have transactions where an end user consumed gas for both high-and low-priority uses, are authorized under the transitional rule to continue their high-priority transportation at pre-October 10, 1985 levels.

We grant Natural's request for clarification that the highest daily volume of gas actually transported for a high-priority use prior to October 10, 1985, may be used to measure the volume eligible for continuation under § 284.223(g)(1). Further, Natural's proposal to accept "Later-in-time affidavits" supplied by those end users to verify the highest daily volume of high-priority gas actually transported prior to October 10, 1985, is acceptable.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12783 Filed 6-5-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines, After Partial Wellhead Decontrol (Natural Gas Pipeline Co. of America—Texoma); Order Denying Petition for Clarification

Issued: June 2, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt, and C. M. Naeve.

On March 12, 1986, Natural Gas Pipeline Company of America filed a petition for clarification or waiver of Order Nos. 436 and 436-A to enable it to elect to perform transportation services under Order No. 436 on a physically isolated segment of its system without subjecting the rest of its system generally to the requirements of Order No. 436. This order denies the petition.

Specifically, Natural states that it has acquired 39 miles of pipeline that is physically isolated from Natural's system.[1] The pipeline segment was part of a crude oil pipeline purchased and converted to gas service by Houston Pipeline Company (HPL), Transok, Inc., and Natural (or their affiliates). The remaining portions other than the 39-mile segment are owned and operated by Transok as part of its Oklahoma intrastate system and by HPL as part of its Texas intrastate system.[2] Natural further states that in the October 18, 1984 order authorizing it to acquire and operate the 39-mile segment, the Commission established an initial rate based on the incremental cost of service of that segment. That order also requires Natural to keep all costs associated with that segment separate from its integrated system costs, to maintain separate accounts and to support all costs if Natural later seeks to integrate that segment into its general system.

Natural states that, based on the foregoing, this segment is physically isolated from its general system. It has separate customers, tariffs and gas supplies, none of Natural's own system supply gas is transported through this segment, and no sales are made by Natural from this segment. Natural therefore contends that it should be permitted to obtain a blanket transportation certificate under Subpart G of Part 284 limited to this segment without affecting Natural's general system or customers on that system. It requests that the Commission clarify or waiver Order Nos. 436 and 436-A to assure Natural that it may provide Order No. 436 transportation through this 39-mile segment without subjecting its general system to the requirements of Order No. 436.

On April 16, 1986, Transok filed a statement supporting Natural's petition. Transok states that as an intrastate pipeline, it has already submitted its system to the open access provisions of Order No. 436, and that granting Natural's petition will broaden Transok's access to transportation transactions under section 311 of the Natural Gas Policy Act of 1978.

We deny Natural's petition. When we issued Order No. 436, we contemplated that pipelines would file blanket certificate applications for their entire systems and not merely some parts of their systems.[3]

Natural cites our order in *Midwestern Gas Transmission Company*, 34 FERC ¶ 61,007 (1986) as support for its application. In that decision, we permitted Midwestern to perform transportation services under Order No. 436 on its Northern System without subjecting its Southern System to the requirements of Order No. 436. However, we made clear in that order that Midwestern's application was unique in that these two systems had been treated as two separate pipelines since their inception in 1959. Moreover, Midwestern's bifurcated system came into existence only after the Commission rejected an earlier Midwestern proposal to construct a single, integrated pipeline from Tennessee to the Canadian border. That application was rejected because, as the Commission stated at that time, "the system was not designed so that the two sources of supply [one Canadian, the other domestic] could be used alternatively for the greater part of the customer at either end."[4]

The history and design of Natural's system is significantly different than that of Midwestern's. Unlike *Midwestern*, connection of the 39-mile segment to Natural's general system was contemplated when Natural first sought authorization to acquire and operate this segment.[5] As Natural notes in its petition, Natural currently has pending an application in Docket No. CP85-600-000 to interconnect its Amarillo and Gulf coast mainline systems to the new Texoma pipeline, thereby physically intergrating the 39-mile segment (and the remaining portion of the oil pipeline) with its gerneral

---

[2] Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol, Order Denying Request For Clarification (J. R. Simplot Company), 33 FERC ¶ 61,379 (December 13, 1985).

[1] The Commission authorized Natural's acquisition, operation and transportation of gas through that facility in its October 18, 1984 order. Natural gas Pipeline Company of America, 29 FERC ¶ 61,073 (1984).

[2] Natural states that an application is currently pending in Docket No. CP85-601-000 for a new partnership, Texoma Interstate Pipeline Company, to acquire and operate portions of the converted pipeline, including the 39-mile segment, as a separate interstate pipeline company. As discussed below, Natural has also filed an application in Docket No. CP85-600-000 to interconnect its Amarillo and Gulf Coast mainline systems to the new Texoma pipeline.

[3] Indeed, there was some concern that some pipelines might attempt to circumvent the conditions of Order No. 436 by seeking blanket certificate authorization only for part of their systems while exempting the remaining portions of their systems, and thereby disadvantage some of their customers. 50 FR 42408, 42432 (1985), Order No. 436, *mimeo* at IV. A. 41.

[4] *See Midwestern*, 34 FERC ¶ 61,007 (1986).

[5] *See* Docket No. CP84-433-000, Letter from Henry S. May, Jr. to Robert J. Capina, September 24, 1984, with attached agreement among Houston Natural Gas Corp., Transok, Inc. and Midcon, Inc. dated April 3, 1984. In that agreement, Midcon (Natural's parent company) explicitly reserves "the right to interconnect the Amarillo system and the Gulf Coast system of Natural to the interstate segment" as part of a Phase II expansion plan of its acquisition.

system. In light on Natural's demonstrated intent to connect the systems physically as soon as approval can be obtained, and in light of the fact that one jurisdictional entity currently comprises both systems, we see no justification for treating the systems separately for purposes of Order No. 436.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Tennessee Gas Pipeline Co., a Division of Tenneco, Inc.); Order Denying Petition for Extension

Issued: June 2, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On April 30, 1986, Tennessee Gas Pipeline Company, a division of Teneco, Inc., filed a petition for extention of time to correct imbalances arising from certain transportation services. In United Gas Pipeline Company, *et al.*, 34 FERC ¶ 61,207 (1986), we established, among other things, (1) an April 30, 1986 deadline for correcting imbalances for inactive contracts (contracts which have terminated or ceased to be authorized under the transition rules, beyond October 31, 1985), and (2) a deadline for correcting imbalances for active contracts (contracts authorized under §§ 284.105 and 284.223(g)) of 90 days from the date the transportation arrangement terminates.[1]

Tennessee contends that this rolling time period is unnecessarily brief and inconsistent with current industry practice. Tennessee contends that, due to the time involved in receiving, compiling, verifying and analyzing raw data, time is required to allow for confirmation of imbalances and negotiation of a method to eliminate the imbalances. With respect to volumes transported by other pipelines, Tennessee states that data becomes available from 45 days to 105 days after the month in which the activity occurs, depending on the complexity of the agreements. In view of the complexity and difficulties associated with correcting imbalances, Tennessee requests that (1) the April 30, 1986 deadline be extended until June 30, 1986, for inactive contracts, and (2) that the 90 day rolling period for active contracts be extended to 180 days from the date the transportation arrangement terminate.

We are denying Tennessee's petition. We established the current deadlines in the *United* order based on requests filed by United Gas Pipeline Company and Natural Gas Pipeline Company. Both petitioners in that proceeding requested a rolling time period of approximately 90 days for active contracts. For inactive contracts, United requested a deadline until March 31, 1986, and Natural requested a deadline until April 30, 1986. We granted both requests, and in order to give the industry the benefit of the doubt, we permitted corrections for inactive contracts until April 30, 1986.

That order was issued on February 18, 1986, and Tennessee did not seek rehearing. Now, on the day of the April 30 deadline and more than two months after its issuance, Tennessee complains that "[c]urrent industry practice requires longer periods of time." Based on the statement in both Statements in both United's and Natural's earlier petitions which resulted in our February 18, 1986 order, we see no compelling reason to grant Tennessee's petition. If the current deadlines are satisfactory not only to these two pipelines, but also other pipelines that did not file petitions for extension of time, we fail to understand why the "current industry practice" is any different for Tennessee. Nor does Tennessee set forth any compelling reasons unique to it that justify a waiver of the deadline. Absent a compelling reason to extend the current deadlines, we see no reason to modify our *United* order.

For the reasons stated above, Tennessee's petition is denied.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (TransAmerican Natural Gas Corp.; Order dismissing Request for Waiver

Issued: June 2, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On February 7, 1986, TransAmerican Natural Gas Corporation (TransAmerican) filed a request for waiver of the restrictions in the transitional provisions of § 284.105(a) of the regulations adopted in Order No. 436.[1] TransAmerican seeks the waiver to permit the transportation of gas by Natural Gas Pipeline Company (Natural) on behalf of TransAmerican until such time as Natural is issued a certificate, pursuant to section 7 of the Natural Gas Act, authorizing the transportation of gas for TransAmerican. On November 1, 1985, Natural filed an application for the certificate in Docket No. CP86-131-000. On May 1, 1986, the Commission issued a certificate to Natural in that docket.[2] We are, therefore, dismissing TransAmerican's request for waiver as moot.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (U.S. Steel); Order Denying Rehearing

Issued: June 2, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On February 13, 1986, the Commission issued an order denying a request by U.S. Steel Corporation for clarification and waiver of Order No. 436. On March 14, 1986, U.S. Steel filed a request for rehearing. This order denies the petition.

In our February 13, 1986 order, we denied U.S. Steel's petition for clarification or waiver to permit Natural Gas Pipeline Company of America to continue transporting gas under the transition provisions of Order No. 436. Briefly, U.S. Steel's transportation contract references transportation authorization under § 157.209(e)(1) and (e)(2) of the Commission's regulations, even though the transportation qualified for high priority authorization under § 157.209(a). The February 13, 1986 order denied U.S. Steel's petition on the basis that U.S. Steel's contract authorized transportation for 120 days from the date of first delivery, and for a period of two years after receiving prior authorization under §157.209(e). Since neither U.S. Steel nor Natural filed for § 157.209(e) authorization, we concluded that the two year provision of the contract never took effect and that the transportation was only authorized for 120 days.

---

[1] Tennessee states that the *United* order did not expressly include exchanges, but that Tennessee assumes that the discussion therein of the deadlines for correcting imbalances also applies to imbalances arising out of exchanges. Tennessee's interpretation is correct.

[1] 35 FERC ¶ 61,007 50 FR. 42408 (October 18, 1985).

[2] 35 FERC ¶ 61,142 (issued May 1, 1986).

On rehearing, U.S. Steel has raised a number of arguments why the transportation should be authorized for the full two year term. First, it argues that the issuance of Order No. 436 constituted a condition of *force majeure* as defined in the contract and that this event suspended the contract. Since the agreement was never terminated, but was in effect on November 1, 1985, U.S. Steel contends that the transportation qualifies for transitional treatment under § 284.223(g).

We decline to decide whether the issuance of Order No. 436 constituted a *force majeure* event as defined in U.S. Steel's contract since it is irrelevant. We denied U.S. Steel's petition on the basis that the two year provision never took effect because neither U.S. Steel nor Natural filed the prior notice application required by their contract to extend its term. Thus, the contract terminated after the expiration of the 120 day period. However, even if the contract had been suspended by the issuance of Order No. 436 as U.S. Steel contends, neither U.S. Steel nor Natural could activate the two year provision since the provisions in § 157.209(e) are no longer effective. In either case, it is irrelevant whether Order No. 436 constituted a *force majeure* event because the condition precedent to activate the two year provision was not, and cannot now, be satisfied.

U.S. Steel further contends that the intent of the parties was to have a contract for a term of two years, once the necessary regulatory approval was secured. It cites a number of cases and treaties for the proposition that contracts should be interpreted to effectuate the intent of the parties and that the Commission should therefore permit the two year term to take effect.

The parties may well have intended to have a two year transportation arrangement. However, in order for the two year term to take effect, we would have to ignore the clear language of the condition the parties inserted as a predicate. In our view, it would be inappropriate in these circumstances to ignore one provision in the contract merely to permit another provision to take effect, or to rewrite a contract to conform it to our presumption of what the parties may have intended.

U.S. Steel argues that Natural's subsequent actions ratified their transportation agreement and that the agreement has therefore remained in effect. Specifically, U.S. Steel contends that on October 31, 1985, the same day Natural ceased transportation to U.S. Steel, Natural filed an application for section 7(c) authority to transport gas to the Gary Works plant. That application was based on the same transportation agreement at issue in this clarification. U.S. Steel contends that by filing the section 7(c) application based on the same transportation contract, Natural ratified its agreement with U.S. Steel and that the contract therefore remains in effect beyond the 120 day period.

We are not convinced by this argument. It seems to us a matter of semantics whether the contract is no longer in effect, or whether the contract remains in effect but the two year authorization is not effective because the condition precedent has not been satisfied. In either case, there is no contractural authorization to continue transportation. While Natural's application for a section 7(c) certificate indicates its willingness to transport gas for U.S. Steel, the fact remains that, under the transition provisions, this contract does not provide that authorization.

In a similar vein, U.S. Steel contends that even if the Commission's interpretation is correct, the Commission should grant relief because both Natural and U.S. Steel made a mutual mistake of fact—that a prior notice application would be filed in a timely manner. U.S. Steel contends that when such a mistake goes to a material term of the contract—in this case, the duration—the Commission should reform the contract to accommodate the intent of the parties to the extent that other parties would not be unfairly affected.

The problem with this argument is that U.S. Steel requests us to reform the contract to the extent that other parties are not unfairly affeced. However, the means for determining whether any party is unfairly affected is the prior notice procedure, the condition U.S. Steel requests us to waive. If we were to reform the contract to effectuate the two-year term without the prior notice procedure, there would be no way of knowing whether other parties would be unfairly affected.[1]

For the reasons stated above, U.S. Steel's petition for rehearing is denied.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12787 Filed 6-5-86; 8:45 am]

BILLING CODE 6717-01-M

[1] We note that this denial does not result in economic harm to U.S. Steel's plant in Gary, Indiana. On May 1, 1986, the Commission issued an order authorizing Natural to transport gas under section 7(c) of the Natural Gas Act to the Gary plant. 35 FERC ¶ 61,142 (1986). That authorization extends for one year from the date of issuance. While we are denying U.S. Steel's petition, U.S. Steel will still be able to receive its required gas supplies.

[Docket No. RP86-90-000]

Black Marlin Pipeline Co.; Proposed Changes in FERC Gas Tariff

June 4, 1986.

Take notice that Black Marlin Pipeline Company (Black Marlin) on *May 30, 1986*, tendered for filing as part of its FERC Gas Tariff, the following Tariff Sheets:

Original Volume No. 1

Cover Sheet

1st Revised Sheet No. 1
2nd Revised Sheet No. 3
1st Revised Sheet No. 102
1st Revised Sheet No. 105
1st Revised Sheet No. 106
Original Sheet No. 106A
Original Sheet No. 109
Original Sheet No. 110
Original Sheet No. 111
Original Sheet No. 112
Original Sheet No. 113
Original Sheet No. 114
1st Revised Sheet Nos. 115–119
Original Sheet No. 219
1st Revised Sheet Nos. 220–299

Original Volume No. 2

Cover Sheet

Revised Cover Sheets to both volumes of Black Marlin's FERC Gas Tariff are being filed to change the name to whom communications concerning the tariff should be addressed.

Sheet Nos. 1 and 3 are being revised to update the Table of Contents and the system map, respectively.

Sheet 102 is being revised to delete references to Original Sheet No. 104 which has been suspended.

Sheet Nos. 105 and 106, are being revised and Sheet Nos. 106A and 109 are being submitted to make service rendered under existing Rate Schedule T–2 equal to service rendered under new Rate Schedule T–3 for the purpose of allocation of available capacity, and to provide for Maximum and Minimum Rates.

Sheet Nos. 219 and 220–299 are being revised to update the index showing delivery points and shippers.

The remaining tariff sheets are being in order to implement a new Rate Schedule T–3, which is applicable to existing transportation service rendered by Black Marlin pursuant to Part 284, Subpart G, of 18 CFR, Chapter I, as such Subpart G was effective prior to November 1, 1985 (hereinafter referred to as "Subpart G").

On October 9, 1985, the Federal Energy Regulatory Commission in Docket No. RM85–1–000 (Parts A–D), issued Order No. 436 (Final Rule). § 284.105 of the Commission's

Regulations provides for the "grandfathering" of self-implementing transportation service authorized and commenced under Subparts B and G prior to October 9, 1985. The applicable regulations also provide that such services may continue after that date, without additional filings, until the earlier of (1) the expiration of the original term of the transportation agreement as it was in effect on October 9, 1985, or (2) October 9, 1987. The Final Rule provides that the § 284.7 rate conditions apply to previously authorized transactions by interstate pipelines but that a pipeline could utilize the rates in existence in October 9, 1985 on an interim basis. The Final Rule also requires pipelines offering transportation service pursuant to Subpart B, G of Part 284 (including grandfathered transportation arrangements) to file rates to be effective no later than July 1, 1986 in conformance with the rate conditions of § 284.7.

Prior to October 9, 1985, Black Marlin commenced transportation service for Florida Gas Transmission Co. pursuant to § 284.221 of 18 CFR, Chapter I. The rate applicable to this service was established in Black Marlin's in Docket No. RP81-67-000. Black Marlin has, however, never filed a rate schedule applicable to such transportation arrangement.

Also prior to October 9, 1985, black Marlin commenced transportation service for Lone Star Gas Co. and Humble Gas Transmission Company under Rate Schedule T-2 pursuant to section 311(a)(1) of the Natural Gas Policy Act of 1978 ("NGPA").

Black Marlin is a Nonmajor natural gas company whose transmission system consists of a fifty-four (54) mile sixteen-inch (16") pipeline extending from a point near Texas City, Texas to the Shell Offshore, Inc. platform in HI Block 136 and a thirteen (13) mile sixteen-inch (16") extension from the Shell Platform in HI Block A-6 to the point of interconnection with the mainline in HI Block 137. Black Marlin' system does not include any mainline compressor facilities. (Black Marlin also owns a two mile, two-inch gathering system in Webb County, Texas used to deliver company owned production to Transco which is not a part of its transmission system). Because of the nature of its system and the services it renders, Black Marlin experiences no material variation in the cost of providing service whether the service is provided during peak or off-peak periods nor are there significant differences in cost in providing transportation over the entire length of its system or only a portion thereof. Also, primarily because of the absence of compression facilities, Black Marlin has no material variable costs which can be segregated and identified to establish a minimum rate as provided for in § 284.7. However, for the purpose of complying with the requirement contained in § 284.7(d)(5)(i) that any rate schedule filed under this section must state a meximum rate and a minimum rate, Black Marlin proposes to establish one cent (1¢) per Mcf as the minimum rate to be charged under Rate Schedule T-2 and T-3. Black Marlin at this minimum rate, would not be charging less than the average variable costs incurred to provide the transportation service.

Black Marlin proposes that the revised tariff sheets filed herein become effective on July 1, 1986, which date is not less than thrity (30) days after receipt of this filing by the Commission.

By Order issued April 29, 1986 in *Black Marlin Pipeline Company*, Docket No. CP80-397-003, the Commission amended its Order of May 28, 1981 in Docket No. CP80-397 (15 FERC ¶ 61,183), which authorizes Black Marlin to transport up to 25,000 Mcf of natural gas per day for Northern Natural gas Company ("Northern") from Galveston Area Block 99, Offshore, Texas, so as to authorize Black Marlin to include up to 15,000 Mcf of gas per day within the existing 25,000 Mcf/d contract quantity for transportation from High Island Area Block 171, Offshore Texas. Accordingly, black Marlin is filing an executed Service Agreement dated May 1, 1986 between Black Marlin and Northern which covers the transportation of up to 25,000 Mcf/d for Northern from Galveston Area Block 99 and High Island Area Block 171 (including up to 15,000 Mcf/d from High Island Block 171) andf supersedes the previously effective Service Agreements dated July 13, 1982 between the parties, covering the transportation for Northern of up to 25,000 Mcf/d from Galveston Area Block 99.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-95-000]

Canyon Creek Compression Co.; Change in FERC Gas Tariff

June 3, 1986.

Take notice that on May 30, 1986, Canyon Creek Compression Company (Canyon) submitted for filing Second Revised Sheet No. 4 and Original Sheet Nos. 9 and 10 as part of its FERC Gas Tariff, Original Volume No. 1, to be effective July 1, 1986.

Canyon states that the purpose of this filing was to (i) establish transportation rates, to be effective July 1, 1986, which comply with § 284.7(b)(2) of the Commission's Regulations; and (ii) submit initial Rate Schedule T-1 (Transitional Transportation) govening transitional interruptible transportation service provided pursuant to Part 284 of the Commission's Regulations. Implementation of Rate Schedule T-1 will allow Canyon to continue its existing grandfatherd transportation agreements pursuant to 18 CFR 284.105.

The maximum rate Canyon will charge for interruptible transportation will be based on a 100% load factor of its Rate Schedule C transportation rate. The minimum transportation rate will be each interruptible Customer's allocated share of Canyon's variable electric power costs incurred during the month. Canyon proposes to continue to dispose of any interruptible transportation revenue as provided for by Commission Order issued April 23, 1984, Docket No. CP82-538-002.

A copy of this filing was mailed to Canyon's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

BILLING CODE 6717-01-M

[Docket No. TA86-2-12-000, 001]

Distrigas Corp., Distrigas of Massachusetts Corp.; Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

June 3, 1986.

Take notice that Distrigas Corporation (Distrigas) on May 30, 1986 tendered for filing Nineteenth Revised Sheet No. 1 to its FERC Gas Tariff and Distrigas of Massachusetts Corporation (DOMAC) on the above date tendered for filing Nineteenth Revised Sheet No. 3A.

Nineteenth Revised Sheet No. 1 and Nineteenth Revised Sheet No. 3A are being filed pursuant to Distrigas' and DOMAC's purchased LNG cost adjustment provision set forth in their respective tariffs. The Distrigas rate change is being filed to reflect in its sales rate to DOMAC a redetermination (decrease) of the price paid for the purchase of LNG together with an amortization over the six-month period, July 1, 1986 through December 31, 1986, of the balance of the unrecovered purchased LNG cost account.

The DOMAC rate change is being filed to reflect the Distrigas rate change in DOMAC's rates for resale to its distribution customer companies and the amortization over the six-month period, July 1, 1986 through December 31, 1986, of the balance in DOMAC's unrecovered purchased LNG cost account and the GRI Surcharge.

Distrigas and DOMAC request that the proposed tariff sheets become effecive July 1, 1986.

A copy of this filing is being served on all affected parties and interested State commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA86-4-2-000, 001]

East Tennessee Natural Gas Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

June 3, 1986.

Take notice that on May 30, 1986, East Tennessee Natural Gas Company (East Tennessee) tendered for filing Nineteenth Revised Sheet No. 4 and Sixth Revised Sheet No. 122 to Original Volume No. 1 of its FERC Gas Tariff, to be effective July 1, 1986.

East Tennessee states that the purpose of these revised tariff sheets is to reflect PGA rate adjustments based on its anticipated cost of purchased gas and reflects (1) a rate change filed by Tennessee Gas Pipeline Company, a Division of Tenneco Inc. in Docket No. TA86-3-0 and (2) purchases from various local suppliers. East Tennessee respectfully requests that the Commission grant any waivers of its regulations required in order to make these tariff sheets effective as proposed.

East Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accord with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determing the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP-84-000]

Florida Gas Transmission Co.; Notice of Proposed Changes in FERC Gas Tariff

June 4, 1986.

Take notice that Florida Gas Transmission Company (FGT) on May 30, 1986 tendered for filing as part of its FERC Gas Tariff, Original Volume No. 3 the following tariff Sheets:

Original Sheet No. 657
Original Sheet No. 658
Original Sheet No. 659
Original Sheet No. 660
Original Sheet No. 661

The above listed tariff sheets are being filed in order to implement a new Rate Schedule WDTS (Western Division Transportation Service), which is applicable solely to existing "grandfathered" self-implementing transportation service rendered by FGT under Part 284 of the Federal Energy Regulatory Commission's (Commission) Regulations in effect on October 8, 1985.

On October 9, 1985, the Commission in Docket No. RM85-1-000 issued Order No. 436 (Final Rule) which substantially changed Commission Regulation of interstate natural gas transportation. Pursuant to § 284.105, the Commission provided for the "grandfathering" of self-implementing transportation service rendered under Part 284. Such service could continue after that date, without additional filings, until the earlier of (1) the expiration of the original term of the transportation agreement as it was in effect October 9, 1985, or (2) October 9, 1987. The Final Rule provided that the rate conditions of § 284.7 will apply to previously authorized transactions by interstate pipelines provided however, that any person offering transportation service pursuant to Subpart B, G or H of Part 284 (including grandfathered transportation arrangements) must file rates to be effective no later than July 1, 1986 pursuant to such rate conditions of § 284.7. Also, under §284.7, FGT is required to have an appropriate rate schedule on file with the Commission for such service not later than July 1, 1988.

Over the past several years, FGT has provided transportation service in the Western portion of its system (facilities west of FGT's mainline compressor No. 12 located in Santa Rosa County, Florida) for various parties pursuant to Part 284. The rates charged for this service have been established in FGT's various rate proceedings. Terms and conditions of the transportation service have been pursuant to individual

contracts, rather than to any filed rate schedule.

FGT's currently effective rates for transportation service in the Western portion of its system were established pursuant to FGT's Stipulation and Agreement in Docket No. RP83–104. Such rates became effective on January 1, 1984 and, with the addition of a minimum rate as set forth below, conform substantially to the requirements of § 284.7. Such rates are volumetric in form and consist of a Facility Charge (12.6¢/MMBTU) designed to recover the non-mileage costs allocated to the service and a Service Charge (4.0¢/MMBTU/100 miles of forward haul) designed to recover the mileage costs allocated to the service. Such rates were designed to recover on a per unit basis the cost allocated to such service on the basis of projected units of service.

The Service Charge component of the rate is based upon the actual distance the gas is transported. There is no material variation in the cost of providing the service due to peak or off-peak periods.

The rates set forth in Rate Schedule WDTS do provide for a maximum and minimum rate. The maximum rates is the currently effective rate established in Docket No. RP83–104. The minimum rate was derived based upon the average variable costs which were allocated to the service in Docket No. RP83–104. Accordingly, Rate Schedule WDTS and the rates set forth therein are tendered for filing pursuant to the requirements of §284.7, to be applicable only to transportation services which are "grandfathered" under Order Nos. 436, *et seq.*

The proposed effective date of the above tariff sheets is July 1, 1986.

Copies of the filings were served on FGT's customers receiving gas under its FERC Gas Tariff, First Revised Volume No. 1 and Original Volume Nos. 2 and 3 and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA84–1–53–017]

K N Energy, Inc.; Proposed Change in FERC Gas Tariff

June 3, 1986.

Take notice that K N Energy, Inc. ("K N") on May 30, 1986, tendered for filing a proposed change in its FERC Gas Tariff to adjust the rates charged to its jurisdictional customers in compliance with the Commission's February 23, 1984 order issued in Docket No. TA84–1–53. The filing results from the expiration, as of June 30, 1986, of the 31 month "Mid-La Surcharge" collection period which commenced December 1, 1983. The proposed change would decrease the commodity rate under each of K N Energy's jurisdictional rate schedules by 15.78¢ per Mcf.

Copies of the filing were served upon K N's jurisdictional customers and interested public bodies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 12796 Filed 6–5–86; 8:45 am]

BILLING CODE 6710-01-M

[Docket No. RP86–79–000]

Northern Natural Gas Co., Division of Enron Corp.; Tariff Filing

May 27, 1986.

Take notice that Northern Natural Gas Company, Division of Enron Corp. (Northern) on May 21, 1986, tendered for filing proposed changes to its FERC Gas Tariff. Such changes have been filed to comply with §§ 284.7(a) and 284.7(b)(2) of the Commission's regulations, all as more fully explained in the filing which is available for public inspection.

Northern currently provides transportation services under the transitional provisions of Order No. 436 (grandfathered services). It is stated that, pursuant to § 284.7(b)(2) of the Commission's regulations, Northern must file rates in accordance with § 284.7(a) to be effective not later than July 1, 1986, in order to continue providing such services after that date. In this filing, Northern is proposing to charge rates, for its grandfathered services, equivalent to the rates filed in Northern's Offer of Settlement and Stipulation and Agreement of Settlement (S&A) in Docket No. RP85–206, for interruptible transportation service under Rate Schedule IT–1. These rates are proposed to become effective on July 1, 1986, and to remain in effect until rates filed in the S&A are approved to become effective by a final nonappealable order of the Commission.

Copies of the filing were served upon all of Northern's jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of 18 CFR. All such motions or protests should be filed by June 3, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP86–91–000]

Midwestern Gas Transmission Co., Rate Change and Tariff Revisions

June 4, 1986.

Take notice that on May 30, 1986, Midwestern Gas Transmission Company (Midwestern) filed the following revised tariff sheets to Original Volume No. 1 of its FERC Gas Tariff, to be effective July 1, 1986.

Substitute Nineteenth revised Tariff Sheet No. 5

Twenty-first Revised Tariff Sheet No. 6

Third Revised Tariff Sheet No. 32
Fourth Revised Tariff Sheet No. 33
Fourth Revised Tariff Sheet No. 34
Third Revised Tariff Sheet No. 120

Midwestern states that these tariff sheets are filed (1) pursuant to § 284.7 of the Commission's regulations in order to reflect maximum and minimum rates for service under Midwestern's Rate Schedules IT-1 and IT-2, and (2) to delete those sections of Rate Schedule IT-1 which reference a now-expired provision of the Settlement Agreement dated February 5, 1985, in *Tennessee Gas Pipeline Company, Division of Tenneco Inc.* Docket Nos. RP83-8 and CP84-441-002.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA86-3-5-000, 001]

Midwestern Gas Transmission Co.; Filing Pursuant to Tariff Rate Adjustment Provisions

June 3, 1986.

Take notice that on May 30, 1986, Midwestern Gas Transmission Company (Midwestern) filed Nineteenth Revised Sheet No. 5, Eleventh Revised Sheet No. 7, and Third Revised Sheet No. 163 to Original Volume No. 1 of its FERC Gas Tariff, to be effective July 1, 1986.

Midwestern states that the purpose of the filing is to reflect for its Southern System PGA rate adjustments based on (1) rate changes filed by Tennessee Gas Pipeline Company, a Division of Tenneco Inc., (2) purchases directly from Tennessee, and (3) purchases from local producer supplies.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP86-67-000]

Mountain Fuel Resources, Inc., Tariff Filing

June 3, 1986.

Take notice that on May 30, 1986, Mountain Fuel Resources, Inc. (MFR) filed, pursuant to Part 154 of the Federal Energy Regulatory Commission Regulations Under the Natural Gas Act, the revised and original tariff sheets to its FERC Gas Tariff identified on the attached Appendix.

MFR states that consistent with the requirements of Order No. 436 *et al.*, the tendered tariff sheets serve to establish, as part of MFR's FERC Gas Tariff, the rates, rate schedules, operating terms and conditions and pro forma service agreements applicable to: (1) Transportation service provided pursuant to section 311 of the Natural Gas Policy Act of 1978 (NGPA) and 18 CFR 284.102 and 284.7, and (2) transitional transportation transactions performed in accordance with 18 CFR 284.105, 284.223(g) and 284.7(b). MFR proposes that new Original Volume No. 1-A to its currently effective FERC Gas Tariff, which will incorporate new Rate Schedules T-1, T-2, and T-3, become effective July 1, 1986.

It is explained that proposed Rate Schedules T-1 and T-2 will provide for firm and interruptible transportation service, respectively, on behalf of local distribution companies or intrastate pipeline companies pursuant to NGPA section 311. MFR further explains that Rate Schedule T-3 is restricted to interruptible "grandfathered" transportation service that commenced prior to October 9, 1985, and is provided by MFR for certain existing customers.

MFR additionally states it has reached an agreement with its only sale-for-resale customer, Mountain Fuel Supply Company (MFS), concerning MFS's right to reduce its sale-for-resale maximum daily quantity and, to implement such agreement, is tendering revised rates and tariff provisions to its FERC Gas Tariff, First Revised Volume No. 1, Rate Schedule CD-1, and a new Sales Service Agreement.

MFR requests waiver of all Commission rules and regulations as may be necessary to permit the tendered tariff sheets to become effective July 1, 1986, and states that copies of the filing have been served upon all of its sales and transportation customers and all pertinent state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

Natural Gas Pipeline Co. of America, Change in FERC Gas Tariff

June 3, 1986.

Take Notice that on May 30, 1986, Natural Gas Pipeline Company of America (Natural) submitted for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the following tariff sheets to be effective June 1, 1986:

Original Sheet Nos. 5F and 5G
Second Revised Sheet No 51
First Revised Sheet Nos. 53, 54, and 56
Original Sheet Nos. 91 through 93

Natural states that the purpose of this filing was to (i) submit transportation rates pursuant to § 284.7(b)(2) of the Commission's Regulations; (ii) submit initial Rate Schedule TRT-1 (Transitional Transportation Service) governing transitional interruptible transportation service pursuant to Part 284 of the Commission's Regulations; and (iii) cancel Rate Schedules T-1, T-2, IOST, and EUT-1. Implementation of Rate Schedule TRT-1 would allow Natural to continue its existing grandfathered transportation arrangements in accordance with § 284.105.

A copy of this filing was mailed to Natural's jurisdictional sales customers, applicable transportation customers and to interested state regulatory agencies.

Any person desiring to be heard or to protect said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-82-000]

Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff

June 3, 1986.

Take notice that on May 30, 1986, Northwest Pipeline Corporation ("Northwest") submitted for filing, to be a part of its FERC Gas Tariff, Original Volume No. 1-A, and Original Volume No. 2 the following tariff sheets:

Original Volume No. 1-A

Third Revised Sheet No. 201
Original Sheet Nos. 337 through 399

Original Volume No. 2

First Revised Sheet No. 2.1
Third Revised Sheet No. 2.2
Second Revised Sheet No. 2.3
Original Sheet No. 2.4
Seventh Revised Sheet No. 3-A
First Revised Sheet No. 3-A.1

Northwest states that the purpose of this filing is to establish Rate Schedule T-6 which applies to Part 284 transportation transactions "grandfathered" under Order No. 436 *et seq.*

The proposed effective date of the tendered tariff sheets is July 1, 1986.

A copy of this filing has been served on all sales and transportation customers and affected state regulatory commissions.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE. Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

[Docket No. RP86-86-000]

Overthrust Pipeline Co.; Tariff Filing

June 4, 1986.

Take notice that on May 30, 1986, Overthrust Pipeline Company (Overthrust) filed, pursuant to Part 154 of the Federal Energy Regulatory Commission Regulations under the Natural Gas Act, the revised and original tariff sheets to its FERC Gas Tariff identified on the attached Appendix.

Overthrust states that the tendered tariff sheets serve to establish a new Rate Schedule T-1, pursuant to 18 CFR § 284.7(b). It is explained that this new rate schedule is proposed to become effective July 1, 1986, and, in accordance with the rate conditions made applicable to "grandfathered" transportation transactions by Commission Order No. 436 *et al.*, will permit the continuation of interruptible transportation service commenced by Overthrust prior to October 9, 1985. Additionally, Overthrust asks to delete a tariff sheet which is no longer applicable to the services it provides.

Overthrust requests waiver of any Commission rules and regulations necessary to permit the tendered tariff sheets to become effective July 1, 1986, and states that copies of the filing have been served upon all of its transportation customers.

Any person desiring to be heard or to protest the filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with 18 CFR §§ 385.214 and 385.211. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

Sabine Pipe Line Co.; Proposed Changes in FERC Gas Tariff

June 4, 1986.

Take notice that Sabine Pipe Line Company (Sabine) on May 30, 1986, tendered for filing its First Revised Volume No. 1, proposing changes to and superseding its FERC Gas Tariff, Original Volume No. 1, to be effective July 1, 1986. The proposed changes reflect an increase in revenues from jurisdictional transportation of

approximately $1,600,000 based on the 12 month period ending January 31, 1986. Sabine also proposes to: (1) Eliminate its cost-of-service cost formula basis of rate design; (2) adopt a volumetric rate methodology for cost classification, allocation, and rate design; (3) change its depreciation rates for its offshore transmission plant; and (4) provide open-access transportation services pursuant to FERC Order Nos. 436 and 436–A by tendering for filing initial rate schedules as part of its FERC Gas Tariff, First Revised Volume No. 1. Sabine has filed, on this same date, an abbreviated application for a blanket certificate under the provisions of § 284.221 of the Commission's regulations.

Sabine states that the principal reasons for the proposed increase are: (1) An increase in its operating and maintenance expenses, (2) an increase in its cost of capital and overall rate of return, and (3) its proposed change in depreciation rates.

Copies of the filing were served upon Sabine's customers, the Louisiana Department of Natural Resources and the Railroad Commission of Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. RP86–84–000]

Sea Robin Pipeline Co.; Compliance Tariff Filing

June 3, 1986.

Take notice that on May 30, 1986, Sea Robin Pipeline Company (Sea Robin) submitted tariff sheets in compliance with Section 284.7 of the Federal Energy Regulatory Commission's Regulations (Commission's Regulations) to be effective on July 1, 1986.

Sea Robin states that the filing of the tariff sheets is in compliance with the Commission's transportation regulations to reflect rates which will be applicable to a limited number of "grandfathered" interruptible transportation arrangements which the Commission has authorized under § 284.105 of the Regulations to continue until the earlier of contractual expiration or October 9, 1987.

Sea Robin states that its tariff sheets contain both maximum and minimum rates, and are based on costs which underlie Sea Robin's currently effective rates.

Sea Robin states that a copy of its compliance filing was mailed to each of its jurisdictional customers and to interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make any protestant a party to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP86–81–000]

Tarpon Transmission Co.; Proposed Change in FERC Gas Tariff

June 3, 1986.

Take notice that Tarpon Transmission Company ("Tarpon"), on May 28, 1986, tendered for filing First Revised Sheet No. 19 to its FERC Gas Tariff, Original Volume No. 1. Tarpon states that the purpose of the filing is to incorporate into its FERC Gas Tariff the terms of Amendment No. 3 to the Transportation Agreement dated February 15, 1977 ("Agreement") between Tarpon and its sole customer, Trunkline Gas Company ("Trunkline"). Tarpon states further that Amendment No. 3 extends the availability of the Agreement's rate redetermination provision (Article X, Section 10.5) by allowing either Tarpon or Trunkline to request a change in the unit rate utilized to determine Tarpon's monthly charge for transportation service by giving 90 days' written notice to the other prior to the end of the 10th year of the Agreement's primary term (*i.e.*, by giving 90 days notice prior to July 1, 1986). A copy of Amendment No. 3 is included in Tarpon's filing.

Tarpon requests waiver of the notice requirement of the Commission's regulations in order to allow First Revised Sheet No. 19 to become effective on May 28, 1986, the date of filing. Tarpon submits that good cause exists to grant such request because Tarpon and its only customer (Trunkline) concur in the contract amendment which underlies the proposed tariff change.

Tarpon states that copies of its filing have been served upon Trunkline.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR §§ 385.214 and 385.211. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP86–511–000]

Tennessee Gas Pipeline Co., a Division of Tenneco Inc.; Application

May 28, 1986.

Take notice that on May 22, 1986, Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP86–511–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing transportation of natural gas for Cenergy Exploration Company (Cenergy), all as more fully set forth in this application which is on file with the Commission and open to public inspection.

Tennessee proposes to transport, on an interruptible basis, up to 5,000 dt equivalent of natural gas per day, which Cenergy is said to have available for transportation from reserves in the South East Saturday Island Field, Plaquemines Parish, Louisiana, pursuant to a transportation agreement dated

May 19, 1986. Tennessee would receive the gas at the existing interconnection between the facilities of Cenergy and Tennessee at Tennessee's Meter No. 1–1764 in South East Saturday Island Field, Barataria Bay, Plaquemines Parish, Louisiana.

Tennessee would deliver the gas at (1) the existing interconnection of Creole Gas Company and Tennessee at Tennessee's Meter No. 2–0361, at the tailgate of the Ysclosksy plant, in St. Bernard Parish, Louisiana (Ysclosksy); (2) the existing interconnection between the facilities of Tennessee and Riverway Gas Pipeline Company at Tennessee's Meter No. 2–0003 in LaFourche Parish, Louisiana (Golden Meadows); and/or (3) the existing interconnection between the facilities of Tennessee and Columbia Gulf Transmission Company at Tennessee's Meter No. 1–1034 in Acadia Parish, Louisiana (Egan).

Tennessee states that it is currently transporting on behalf of Monterey Pipeline Company (Monterey), an intrastate pipeline, approximately 4,000 dt per day of casinghead and gas-well gas which Monterey pruchases from Cenergy at Cenergy's offshore statewater platform located in the South East Saturday Island Field, Plaquemines Parish, Louisiana, pursuant to Natural Gas Policy Act of 1978 section 311(a) authority.

Tennessee proposes to charge Cenergy for this transportation service the applicable quantity charge set forth below as well as the effective GRI surcharge is currently 1.32 cents per dt, if applicable:

Point of Delivery and Rate per dt

Ysclosksy—5.00 cents
Golden Meadows—4.89 cents
Egan—11.22 cents

Additionally, it is stated that Cenergy would either (1) provide to Tennessee, at no cost to Tennessee, a daily quantity of gas for Tennessee's system fuel and uses and gas lost and unaccounted for equal to the applicable percentages as listed below:

Point of Delivery and Fuel Percentage

Ysclosksy—0.46 percent
Golden Meadows—0.54 percent
Egan—0.70 percent

or (2) Tennessee may, at its sole option, elect to provide the applicable fuel quantities to Cenergy at a charge to Cenergy equal to Tennessee's actual weighted average cost of gas for the month in which service was rendered.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 12, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717–01–M

[Docket No. TA86–3–9–000,001]

Tennessee Gas Pipeline Company, a Division of Tenneco Inc.; Rate Change Under Tariff Rate Adjustment Provisions

June 3, 1986.

Take notice that on May 30, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) tendered for filing the following tariff sheets to its FERC Gas Tariff to be effective July 1, 1986:

First Revised Volume No. 1

Original Sheet Nos. 30A through 30H
First Revised Sheet Nos. 20, 21, and 23 through 30

Sixth Revised Volume No. 2

Fourth Revised Sheet No. 2AA
Third Revised Sheet No. 2DD

Tennessee states that the revised tariff sheets reflect a decrease of 15.65 cents per dth in Tennessee's Gas Rate, consisting of a negative 29.41 cents per dth Current Cost of Gas Rate Adjustment and a 13.76 cents per dth Gas Surcharge for Amortizing the Unrecovered Purchased Gas Cost Account. Tennessee also indicates that the tariff sheets set forth demand surcharges for recovering retroactive Order No. 94 payments in accord with Article VI of the Settlement Agreement (February 5, 1985) in Docket No. CP84–441, *et al.*

Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions. Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717–01–M

[Docket No. RP86–85–000]

Texas Gas Transmission Corp.; Filing

June 4, 1986.

Take notice that on May 30, 1986, Texas Gas Transmission Corporation (Texas Gas), P.O. Box 1160, Owensboro, Kentucky 42302, tendered for filing proposed changes to its FERC Gas Tariff. Such changes have been filed to comply with §§ 284.7(a) and 284.7(b)(2) of the Federal Energy Regulatory Commission's (Commission) Regulations, all as more fully set forth in the filing, which is on file with the Commission and open to public inspection.

Texas Gas currently provides transportation services under the transitional provisions of Order No. 436. Texas Gas states that, pursuant to § 284.7(b)(2) of the Commission's Regulations, Texas Gas must file rates in accordance with § 284.7(a) to be

effective not later than July 1, 1986, in order to continue providing such services after that date. Texas Gas requests waivers of all Commission's Rules and Regulations, as necessary, to permit the tendered tariff sheets to become effective on July 1, 1986.

Copies of the filing were served upon all of Texas Gas's jurisdictional customers and its affected state commissions.

Any person desiring to be heard or to protest said filing, should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Regulations. All such motions or protests should be filed by June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-86-000]

Trailblazer Pipeline Co.; Change in FERC Gas Tariff

June 3, 1986.

Take notice that on May 30, 1986, Trailblazer Pipeline Company (Trailblazer) submitted for filing Third Revised Sheet No. 4 and Original Sheet Nos. 10 and 11 as part of its FERC Gas Tariff, Original Volume No. 1, to be effective July 1, 1986.

Trailblazer states that the purpose of the filing was to (i) establish transportation rates pursuant to § 284.7(b)(2) of the Commission's Regulations; and (ii) submit initial Rate Schedule T-1 (Transitional Transportation) governing transitional interruptible transportation service provided pursuant to Part 284 of the Commission's Regulations. Implementation of Rate Schedule T-1 will allow Trailblazer to continue its existing grandfathered transportation agreements pursuant to 18 CFR 284.105.

The maximum rate Trailblazer will charge for interruptible transportation will be based on a 100% load factor of its Rate Schedule T transportation rates. The minimum rate Trailblazer will charge for interruptible transportation will be one cent per Mcf transported. Trailblazer proposes to continue to dispose of interruptible transportation revenues as provided for in Docket No. CP82-486-000.

A copy of this filing was mailed to Trailblazer's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP86-83-000]

United Gas Pipe Line Co.; Compliance Tariff Filing

June 3, 1986.

Take notice that on May 30, 1986, United Gas Pipe Line Company (United) submitted tariff sheets in compliance with § 284.7 of the Federal Energy Regulatory Commission's Regulations (Commission's Regulations) to be effective on July 1, 1986.

United states that the filing of the tariff sheets is in compliance with the Commission's transportation regulations to reflect rates which will be applicable to a limited number of "grandfathered" interruptible transportation arrangements which the Commission has authorized under § 284.105 of its Regulations to continue until the earlier of contractual expiration or October 9, 1987.

United states that its tariff sheets contain both maximum and minimum rates, reflect transportation distance factors, and are based on costs which underlie United's currently effective rates.

United states that a copy of its compliance filing was mailed to each of its jurisdictional customers and to interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make any protestant a party to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA86-4-11-000, 001]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

June 3, 1986.

Take notice that on May 30, 1986, United Gas Pipe Line Company (United) tendered for filing as part of its Federal Energy Regulatory Commission (FERC or Commission) Gas Tariff, First Revised Volume No. 1, the following tariff sheets: Seventy-Fourth Revised Sheet No. 4; Thirteenth Revised Sheet No. 4-A; Thirteenth Revised Sheet No. 4-B; and Nineteenth Revised Sheet No. 4-C. Tariff Sheets 4, 4-A and 4-B and supporting information are being filed pursuant to Sections 19, 21, 23 and 24 of United's Tariff. Tariff Sheet No. 4-C is submitted pursuant to the letter order issued by the Office fo Pipeline and Producer Regulations dated January 27, 1982 in Docket No. CP81-387-000. The proposed effective date of each preceding Tariff Sheet is July 1, 1986.

United reports that it mailed appropriate copies of the proposed Tariff Sheets and supporting data to its jurisdictional customers and to interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § 385.214 and 385.211 of this chapter. All such motions or protests should be filed on or before June 11, 1986. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-83-000]

United Gas Pipe Line Co.; Tariff Revision

June 4, 1986.

Take notice that on May 30, 1986, United Gas Pipe Line Company (United) tendered for filing Original Sheet Nos. 74-F3 and 74-F4 for inclusion in United's FERC Gas Tariff, First Revised Volume No. 1. These tariff sheets reflect revisions to the purchased gas adjustment (PGA) clause in Section 19 of the General Terms and Conditions of United's tariff.

United is proposing a new § 19.13 to its PGA to permit United, in addition to the required semi-annual PGA filings, to adjust its gas rates on two days notice to reflect known and measurable changes in its purchased gas costs.

United reports that it mailed appropriate copies of the proposed Tariff Sheets and supporting data to its jurisdictional customers and to interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of this chapter. All such motions or protests should be filed on or before June 11, 1986. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP86-82-000]

Williston Basin Interstate Pipeline Co.; Tariff Change

June 3, 1986.

Take notice that Williston Basin Interstate Pipeline Company (Williston Basin) on May 30, 1986, tendered for filing, proposed changes to its FERC Gas Tariff. Such changes have been filed to comply with §§ 284.7(a) and 284.7(b)(2) of the Commission's Regulations, all as more fully explained in the filing which is available for public inspection.

Williston Basin currently provides transportation services under the transitional provisions of Order No. 436 (grandfathered services). It is stated that, pursuant to § 284.7(b)(2) of the Commission's Regulations, Williston Basin must file rates in accordance with § 284.7(a) to be effective not later than July 1, 1986, in order to continue providing such services after that date. In this filing, Williston Basin is proposing to revise its Rate Schedule T-4 to allow it to charge rates, for its grandfathered services, in accordance with the compliance cost of service filed in Williston Basin's general rate case in Docket No. RP86-10-000, and on which its currently effective rates are based. These rates are proposed to become effective on July 1, 1986, and to remain in effect for the remaining term of all existing grandfathered services.

Copies of the filing were served upon all of Williston Basin's jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of this chapter. All such motions or protests should be filed by June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP86-82-000]

Wyoming Interstate Co., Ltd., Revised Changes in Rates

June 4, 1986.

Take notice that Wyoming Interstate Company, Ltd. (WIC), on May 30, 1986, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1

The purpose of this filing is to comply with 28 CFR 284.105 and 284.7, where the Commisson has required restated rates for transportation under "grandfathered" agreements under Order No. 436. The proposed effective date of the tariff sheets is July 1, 1986.

Copies of this filing have been served on all WIC's transportation customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before June 11, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants to the proceeding. Any person wishing to become a party must file a motion to invtervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-140075; FRL-3026-4]

Access to Confidential Business Information by Versar, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized the Versar, Inc. of Springfield, Virginia for access to information which has been submitted to EPA under sections 4, 5, 6 and 8 of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

DATE: Access to the confidential data submitted to EPA will occur no sooner than June 20, 1986.

FOR FURTHER INFORMATION CONTACT:

Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, DC 20460, Toll-free: (800-424-9065).

In Washington, DC: (554-1404).

Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: Under Contract No. 68-03-3339, Versar, 6850 Versar Center, Springfield, Virginia will conduct studies and report information to EPA that will answer questions concerning the appropriate level of treatment necessary to protect humans and aquatic life from exposure and risks caused by discharges, runoffs, and other sources of chemicals to surface waters. Versar's work under the contract will support exposure and risk assessment work performed under both TSCA and the Clean Water Act (CWA). Some tasks under this contract may require Versar to assist EPA by taking and shipping to designated agents, soil, sediment, and/or fish samples, and helping to write sampling procedures.

Pursuant to 40 CFR 2.306(j), EPA has determined that under EPA Contract No. 68-03-3339, Versar will require access to CBI submitted to EPA under sections 4, 5, 6, and 8 of TSCA to successfully perform specific examinations of water quality on selected river reaches and evaluations of toxic pollutants to surface waters. The studies required by Versar will include the collection and analyses of EPA documents as well as other data available in literature concerning chemicals and their sources to waters. Some of the information may be claimed or determined to be CBI.

EPA is issuing this notice to inform all submitters of information under sections 4, 5, 6, and 8 of TSCA that EPA may provide Versar access to these CBI materials at its facilities in Springfield, Virginia and at EPA Headquarters on a need-to-know basis. Upon completing review of the CBI materials, Versar will return all transferred materials to EPA. Clearance for access to TSCA CBI under this contract is scheduled to expire on May 18, 1987.

Versar has been authorized for access to TSCA CBI at its facilities under the EPA "Contractor Requirements for the Control and Security of TSCA Confidential Business Information" Security manual. EPA has approved Versar's security plan and has performed the required inspection of their facilities and has found them to be in compliance with the requirements of the manual.

Versar personnel will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: May 27, 1986.

Edwin F. Tinsworth,

Acting Director, Office of Toxic Substances.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared May 19, 1986 through May 23, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5076/73. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 FR 4804).

Draft EISs

ERP No. D-AFS-J82003-MT, Rating EC1, Beaverhead Nat'l Forest, Noxious Weed and Poisonous Plant Control Progam, MT. Summary: EPA endorses control of noxious weeds and supports the integrated pest management alternative described in this draft EIS. However, there are potential impacts associated with the use of chemical and biological pest controls and caution should be exercised in order to avoid damaging non-target plants or animals. EPA stresses that technical comments and recommendations provided by the Department of Agriculture, Environmental Management Division, should be carefully followed and pesticide applications must be made only by State-certified applicators or operators.

ERP No. D-AFS-J82005-MT, Rating EC1, Lewis and Clark Nat'l Forest, 1986-1990 Noxious Weed Control Program, MT. Summary: EPA supports the decision to use an integrated pest management alternative rather than selecting a strict chemical approach. EPA stresses that technical comments and recommendations provided by the Montana Department of Agriculture, Environmental Management Division, should be carefully followed and pesticide applications must be made only by State-certified applicators or operators.

EPA No. D-COE-K85058-CA, Rating EO2, Lighthouse Marine Residential and Commercial Development, Construction and Operation, Permit, CA. Summary: EPA requested a more thorough analysis

of the involved riparian habitat to determine the extent of federally classified wetlands and more information regarding how mitigation for the loss of this habitat will be accomplished. In addition, EPA expressed objections because the removal of riparian vegetation, dredging and other construction/maintenance activities could have significant adverse impacts on water quality and beneficial uses of the Sacramento River. EPA also recommended that other alternatives, including relocating or downsizing both the marina and residential units, could reduce adverse impacts and should be more fully considered. EPA requested additional discussion of groundwater impacts resulting from project construction, maintenance and future activities. EPA further requested additional analysis of impacts to air quality, particularly a more complete description of project impacts on ozone concentrations in the area.

ERP No. D1-FHW-B40041-CT, Rating EO3, CT-11 Improvements, CT-82 in Salem to I-95 in Waterford, 404 Permit, CT. Summary: EPA's major environmental objections relate to the possibility of significant impacts on drinking water resources, wetlands and water quality. EPA recommended that a supplemental EIS be prepared to correct the inadequate impact mitigation analysis contained in the draft statement.

ERP No. D-BR-K36003-CA, Rating EC2, Westland Water District, Drainage Disposal Project, Central Valley Project, CA. Summary: EPA expressed concerns primarily because of potential impacts associated with runoff and seepage of contaminated drainage water; the failure of septic tank systems; and contamination of crops with selenium, due to recycling.

ERP No. D-OSM-L01005-WA, Rating EC1, Black Diamond Petition Area, Designation of Lands Unsuitable for Surface Coal Mining Operations, WA. Summary: EPA suggested three subareas for unsuitable designation and identified Alternative A (Grant the Petition) as the environmentally preferred alternative. Denial of the unsuitability petition could result in moderate air quality impacts, long-term adverse impacts on a wetland, and noise, vibration, psychological, and health-related impacts on area residents. EPA requested that OSMRE clarify how conclusions from the NEPA analysis and petition evaluation will be integrated in the decision-making for this project.

ERP No. D-UAF-K65060-CA, Rating LO, White Point, Air Force Space Division Housing Project, Construction and Operation, Los Angeles Air Force Station, CA. Summary: EPA requested that the final EIS discuss air quality mitigation measures in more detail and whether the project is consistent with regional air quality plans.

Final EISs

ERP No. F-AFS-J65089-MT, Lolo Nat'l Forest, Land and Resource Mgmt. Plan, MT. Summary: EPA is pleased in the final EIS that projects which cannot meet State water quality standards will either be redesigned so that they meet the standards or they will be dropped. EPA believes that application of best management practices (BMPs) does not necessarily guarantee protection of water quality and stream uses. Strong water quality, watershed, and fisheries monitoring programs must be developed and maintained to assure protection of water quality and stream uses.

Regulation

ERP No. R-ASC-A99068-00, Conservation Reserve Program (CRP)—Interim Rule, 7 CFR Part 704 (51 FR 8780). Summary: EPA supports the conservation reserve program, but is concerned that its implementing regulations do not adequately incorporate water quality and beneficial use objectives. Further, the program should involve appropriate water quality and fish and wildlife agencies and should establish an effective monitoring and evaluation requirement.

Dated: June 3, 1986.

Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notices.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). In the Federal Register of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of three such PMNs and provides a summary of each.

DATES: Close of Review Period:

Y 86-149—June 9, 1986.

Y 86-150 and 86-151—June 8, 1986.

[OPTS-51625; FRL-2988-5]

Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). This notice announces receipt of thirty PMNs and provides a summary of each.

DATES: Close of Review Period:

P 86-1043 and 86-1044—August 13, 1986.
P 86-1045, 86-1046, 86-1047, 86-1048 and 86-1049—August 16, 1986.
P 86-1050, 86-1051, 86-1052, 86-1053, 86-1054, 86-1055, 86-1056, 86-1057, 86-1058, 86-1059, 86-1060, 86-1061, 86-1062, 86-1063, 86-1064, 86-1065, and 86-1066—August 17, 1986.
P 86-1067, 86-1068 and 86-1069—August 18, 1986.
P 86-1070, 86-1071 and 86-1072—August 19, 1986.

Written comments by:

P 86-1043 and 86-1044—July 14, 1986.
P 86-1045, 86-1046, 86-1047, 86-1048 and 86-1049—July 17, 1986.
P 86-1050, 86-1051, 86-1052, 86-1053, 86-1054, 86-1055, 86-1056, 86-1057, 86-1058, 86-1059, 86-1060, 86-1061, 86-1062, 86-1063, 86-1064, 86-1065 and 86-1066—July 18, 1986.
P 86-1067, 86-1068 and 86-1069—July 19, 1986.
P 86-1070, 86-1071 and 86-1072—July 20, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS-51625]" and the specific PMN number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E-201, 401 M Street, SW., Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

P 86-1043

Manufacturer. E. I. du Pont de Nemours and Company, Inc.
Chemical. (G) Monosubstituted alkoxyaminotriazine.
Use/Production. (S) Site-limited intermediate. Prod. range: Confidential.
Toxicity Data. Acute oral: 1,500 mg/kg; Irritation: Eye—Very mild; Ames test: Non-mutagenic.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by navigable waterway.

P 86-1044

Manufacturer. E.I. Pont de Nemours and Company, Inc.
Chemical. (G) Monosubstituted alkoxyaminotriazine.
Use/Production. (S) Industrial intermediate. Prod. range: Confidential
Toxicity Data. Acute oral: 980 mg/kg; Irritation: Eye—Very mild; Ames test: Non-mutagenic.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by navigable waterway.

P 86-1045

Manufacturer. Confidential.
Chemical. (G) Hydroxy ester.
Use/Production. (S) Destructive use. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1046

Manufacturer. Confidential.
Chemical. (S) Dialkyl carbamate.
Use/Production. (S) Industrial lubricant. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential
Environmental Release/Disposal. Confidential. Disposal by incineration.

P 86-1047

Importer. Ciba-Geigy Corporation.
Chemical. (S) Polyaminoamide.
Use/Import. (S) Industrial maintenance and marine coatings architectural. Import range: Confidential.
Toxicity Data. No data submitted.
Exposure. Processing: dermal, inhalation and ocular, a total of 2 workers, up to 4-8 hrs/da.
Environmental Release/Disposal. No data submitted.

P 86-1048

Manufacturer. Hach Company.
Chemical. (S) N,N-dimethylethanedithioamide.
Use/Production. (S) Industrial and commercial indicator for determination of platinum and palladium. Prod. range: 5 kg.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal and inhalation, a total of 12 workers, up to 2 hrs/da, up to 4 da/yr.
Environmental Release/Disposal. Less than 1 kg released to water. Disposal by publicly owned treatment works (POTW).

P 86-1049

Importer. Lonza Inc.
Chemical. (S) Acetic acid, cyano-2-ethoxyethyl ester.
Use/Import. (S) Material will be experimentally tested as an adhesive to many industries currently being used in medical casting material. Import range: 8-12 metric tons.
Toxicity Data. No data submitted.
Exposure. Import: dermal and inhalation, a total of 8 workers, up to 2 hrs/da, up to 5 da/yr.
Environmental Release/Disposal. Trace to 1 kg/batch released to air. Disposal by own water treatment works.

P 86-1050

Importer. Confidential.
Chemical. (S) Di(phenoxyethyl)formal.
Use/Import. (S) Industrial and commercial plasticizer for paints. Import range: 1,000-1,200 kg/yr.
Toxicity Data. Acute oral: 8.93 ml/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Distribution fatty tissue test: 1,000 mg/kg.
Exposure. Processing: a total of 10 workers.
Environmental Release/Disposal. No release.

P 86-1051

Manufacturer. Confidential.
Chemical. (G) Polyether urethane polymer.
Use/Production. (S) A protective coating for fabrics and other flexible substrates. A combining or laminating adhesive for fabrics and plastics. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 3 workers, up to 2 hrs/da, up to 12 da/yr.
Environmental Release/Disposal. Confidential.

P 86-1052

Importer. Confidential.
Chemical. (G) Siloxane, dimethyl, dihydroxyalkyl, terminated reaction product with oxepanone.
Use/Import. (G) Paint additive, open, non-dispersive use. Import range: Confidential.
Toxicity Data. Acute oral: 10.0 g/kg; Irritation: Skin—Non-irritant, Eye—Slight.
Exposure. Use: dermal and inhalation.
Environmental Release/Disposal. No data submitted.

P 86-1053

Importer. Confidential
Chemical. (G) Siloxane, dimethyl, dihydroxyalkyl, terminated reaction product with oxepanone.
Use/Import. (G) Paint additive, open, non-dispersive use. Import range: Confidential.
Toxicity Data. Acute oral: 10.0 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant.
Exposure. Use: dermal and inhalation.
Environmental Release/Disposal. No data submitted.

P 86-1054

Importer. Confidential.
Chemical. (G) Subetituted polyacrylamide.
Use/Import. (G) Non-dispersive use. Import range: 3,500-25,000 kg/yr.
Toxicity Data. Acute Oral: >5,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; EC_{50} 3 hr; 1,713 mg/1; LC_{50} 96 hr (Brachydanio rerio): 4.4 mg/1.
Exposure. Processing: dermal and ocular, a total of 2 workers/shift, 1 hr/shift.
Environmental Release/Disposal. Disposal by POTW.

P 86-1055

Manufacturer. Confidential.
Chemical. (G) Polyester urethane methacrylate blocked.
Use/Production. (S) Industrial component of radiation cure elastomeric printing stamp resin. Prod. range: 20,000-48,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: Dermal, a total of 18 workers, up to 6 hrs/da, up to 20 da/yr.
Environmental Release/Disposal. 1 to 8 kg/batch to control techlogy. Disposal by incineration.

P 86-1056

Manufacturer. Confidential.
Chemical. (G) Polyester urethane methacrylate blocked.
Use/Production. (S) Industrial component of radiation cure elastomeric printing plate resin. Prod. range: 50,000-120,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 18 workers, to 6 hrs/da, up to 50 da/yr.
Environmental Release/Disposal. 1 to 8 kg/batch to control technology. Disposal by incineration.

P 86-1057

Manufacturer. Confidential.
Chemical. (G) Poly-[(alkoxycarbonyl) alkyl]polysulfide.
Use/Productions. (G) Commercial and consumer additive for fertilizers. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1058

Manufacturer. Confidential.
Chemical. (G) Poly-(alkyl) polysulfide.
Use/Production. (G) Commercial and consumer additive for fertilizers. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1059

Manufacturer. Confidential.
Chemical. (G) Acrylate capped brominated polyether ester of benzophenonetetracarboxylic dianhydride.
Use/Production. (S) Electronic photoresist and solder mask. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1060

Manufacturer. Confidential.
Chemical. (G) Heterocyclic aminal.
Use/Production. (G) Destructive use. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1061

Manufacturer. Confidential.
Chemical. (G) Alkoxylated terephthalate glycol ester polymer.
Use/Production. (S) Industrial component for urethane foam insulating product. Prod. range: 16,000,000-28,000,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, up to 17 hrs/da, up to 2 da/yr, 250 man hrs/yr.
Environmental Release/Disposal. 5 to 10 kg/batch released to water with 10 to 30 kg/batch to control technology. Disposal by POTW.

P 86-1062

Manufacturer. The Good Year Tire and Rubber Company.
Chemical. (G) Butadiene/bound antioxidant copolymer.
Use/Production. (S) Industrial polymeric antioxidant. Prod. range: 120,000-2,721,600 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 29 workers, up to 24 hrs/da, up to 272 da/yr.
Environmental Release/Disposal. Release to air and water. Disposal by POTW.

P 86-1063

Manufacturer. Confidential.
Chemical. (G) AMPS co-polymer.
Use/Production. (G) Dispersive. Prod. range: confidenial.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1064

Importer. Rohm and Haas Company.
Chemical. (G) Alkyl methacrylate copolymer.
Use/Import. (G) Additive for petroleum oil products. Import range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Processing: dermal and ocular, a total of 3 workers, up to 8 hrs/da, up to 300 da/yr.
Environmental Release/Disposal. Disposal by solid waste disposal facility.

P 86-1065

Importer. Rohm and Haas Company.
Chemical. (G) Vinyl heterocycle alkyl methacrylate copolymer.
Use/Import. (G) Additive for petroleum oil products. Import range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Processing: dermal and ocular, a total of 3 workers, up to 8 hrs/da, up to 300 da/yr.
Environmental Release/Disposal. Disposal by solid waste disposal facility.

P 86-1066

Importer. Rohm and Haas Company.
Chemical. (G) Vinyl heterocycle alkyl methacrylate copolymer.
Use/Import. Additive for petroleum oil products. Import range: Confidential.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Processing: dermal and ocular, a total of 3 workers, up to 8 hrs/da, up to 300 da/yr.

Environmental Release/Disposal. Disposal by solid waste disposal facility.

P 86-1067

Manufacturer. Confidential.

Chemical. (G) Saturated polyester.

Use/Production. (G) Resin converted to paint for use in automotive systems. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

P 86-1068

Manufacturer. Confidential.

Chemical. (G) Cyanoacrylate ester polymer.

Use/Production. (G) Intermediate for adhesive. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

P 86-1069

Manufacturer. Confidential.

Chemical. (G) Substituted ketone.

Use/Production. (G) Destructive use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

P 86-1070

Importer. Marubeni America Corporation.

Chemical. (S) 2-Naphthalenesulfonic acid, 7,7'-[(2,4,6-trimethyl-5-sulfo-1,3-phenylene)bis[imino(6-chloro-1,3,5-triazine 4,2-diyl)imino]]bis[4-hydroxy-3-[(4-methoxy-2-sulfophenyl)azo], pentasodium salt.

Use/Import. (S) Commercial dye for cellulosic fibres. Import range: 10,000 kg/yr.

Toxicity Data. Acute oral: 5,000 mg/kg; Ames test: Negative; TLm 48 hrs (Orange medaka): 1,000 parts per million (ppm).

Exposure. Processing: dermal.

Environmental Release/Disposal. No data submitted.

P 86-1071

Importer. Marubeni America Corporation.

Chemical. (S) Benzoic acid, 2-[(2-cyanoethyl)amino]-5-[(5-nitro-2-thiazolyl)azo]-, 2-(2-methylpropoxy)ethyl ester.

Use/Import. (S) Commercial dye for polyester fibres. Import range: 10,000 kg/yr.

Toxicity Data. Acute oral: 5,000 mg/kg; Ames test: Negative; TLm 48 hrs (Orange medaka): 1,000 ppm.

Exposure. Processing: dermal.

Environmental Release/Disposal. No data submitted.

P 86-1072

Manufacturer. Confidential.

Chemical. (G) Substituted alkyl phosphine.

Use/Production. (G) Ligand for homogenous catalyst. Prod. range: Confidential.

Toxicity Data. Acute oral: 5,000 mg/kg; Acute dermal: 2,000 mg/kg; Irritation: Skin-Non-irritant, Eye-Slight.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

Dated: May 27, 1986.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 86-190, File No. 50100-CM-P-85 and File No. 50134-CM-P-85]

Contemporary Communications Corp. and Microband Corporation of America; for Construction Permits in the Multipoint Distribution Service for a New Station on Channel 2 at Buffalo, NY

Memorandum Opinion and Order

Adopted May 9, 1986.
Released May 29, 1986.
By the Common Carrier Bureau.

1. For consideration are the above-referenced applications. These applications are for construction permits in the Multipoint Distribution Service and they propose operations on Channel 2 at Buffalo, New York. The applications are therefore mutually exclusive and require comparative consideration. There are no petitions to deny or other objections under consideration.

2. Upon review of the captioned applications, we find that these applicants are legally, technically, financially, and otherwise qualified to provide the services they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

3. Accordingly, it is hereby ordered, that pursuant to section 309(e) of the Communications Act of 1934, as amended, 47 U.S.C. 309(e) and § 0.291 of the Commission's Rules, 47 CFR 0.291, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent Order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered:[1]

(a) The relative merits of each proposal with respect to efficient frequency use, particularly with regard to compatibility with co-channel use in nearby cities and adjacent channel use in the same city;

(b) The anticipated quality and reliability of the service proposed, including installation and maintenance programs; and

(c) The comparative cost of each proposal considered in context with the benefits of efficient spectrum utilization and the quality and reliability of service as set forth in issues (a) and (b).

4. It is further ordered, that Contemporary Communications Corporation, Microband Corporation of America and the Chief of Common Carrier Bureau, are made parties to this proceeding.

5. It is further ordered, that parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of § 1.221 of the Commission's Rules, 47 CFR 1.221.

6. The Secretary shall cause a copy of this Order to be published in the Federal Register.

James R. Keegan,

Chief, Domestic Facilities Division, Common Carrier Bureau.

BILLING CODE 6712-01-M

[CC Docket No. 86-191, File No. 50167-CM-P-85, and File No. 50008-CM-P-86]

Microband Corporation of America and Broadcast Data Corp.; For Construction Permits in the Multipoint Distribution Service for a New Station on Channel 2 at Birmingham, AL

Memorandum Opinion and Order

Adopted May 9, 1986.
Released May 30, 1986.
By the Common Carrier Bureau.

[1] Consideration of these factors shall be in light of the Commission's discussion in *Frank K. Spain*, 77 FCC 2d 30 (1980).

1. For consideration are the above-referenced applications. These applications are for construction permits in the Multipoint Distribution Service and they propose operations on Channel 2 at Birmingham, Alabama. The applications are therefore mutually exclusive and require comparative consideration. There are no petitions to deny or other objections under consideration.

2. Upon review of the captioned applications, we find that these applicants are legally, technically, financially, and otherwise qualified to provide the services they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

3. Accordingly, it is hereby ordered, That pursuant to section 309(e) of the Communications Act of 1934, as amended, 47 U.S.C. 309(e) and § 0.291 of the Commission's Rules, 47 CFR 0.291, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent Order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered: [1]

(a) The relative merits of each proposal with respect to efficient frequency use, particularly with regard to compatibility with co-channel use in nearby cities and adjacent channel use in the same city;

(b) The anticipated quality and reliability of the service proposed, including installation and maintenance programs; and

(c) The comparative cost of each proposal considered in context with the benefits of efficient spectrum utilization and the quality and reliability of service as set forth in issues (a) and (b).

4. It is further ordered, That Microband Corporation of America, Broadcast Data Corporation and the Chief of the Common Carrier Bureau, are made parties to this proceeding.

5. It is further ordered, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of § 1.221 of the Commission's Rules, 47 CFR 1.221.

6. It is further ordered, That any authorization granted to Broadcast Data Corporation, which is a wholly-owned subsidiary of Graphic Scanning Corporation, as a result of the comparative hearing shall be conditioned as follows:

(a) Without prejudice to reexamination and reconsideration of that company's qualifications to hold an MDS license following a decision in the hearing designated in *A.S.D. Answering Service, Inc., et al.*, FCC 82-301, released August 25, 1982, and shall be specifically conditioned upon the outcome of that proceeding.

7. The Secretary shall cause a copy of this Order to be published in the Federal Register.

James R. Keegan,

Chief, Domestic Facilities Division, Common Carrier Bureau.

BILLING CODE 6720-01-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-004177-002.

Title: Port of Seattle Terminal Agreement.

Parties:

Port of Seattle (port)

Stevedoring Services of America (SSA)

Synopsis: The proposed amendment would add a copy of Agreement No. 224-010804 between the same parties as an appendix to the basic agreement. The appendix sets forth the procedures followed by the parties to resolve disputes and apportion responsibility for claims, judgements, payments and expenses arising from injury to SSA employees which result in claim against SSA or the Port. The appendix was previously allowed to take effect on April 18, 1986. It would supersede any provision to the contrary in any existing leases, contracts or agreements between the parties. It would also apply only to personal injury claims and any future claims which relate to an event or occurrence which arises on or during the period from January 1, 1986 through December 31, 1986.

Dated: June 3, 1986.

By Order of the Federal Maritime Commission

John Robert Ewers,

Secretary.

[FR Doc. 86-12751 Filed 6-5-86; 8:45 am]

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Citizens and Southern Georgia Corporation; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.219a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for

inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commening would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 30, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Citizens and Southern Georgia Corporation,* Atlanta, Georgia; to engage *de novo* through its subsidiaries, Citizens and Southern Trust Company (Georgia), N.A., Atlanta, Georgia, Citizens and Southern Trust Company (Florida), N.A., Fort Lauderdale, Florida, and Citizens and Southern Trust Company (South Carolina), N.A., Columbia, South Carolina, in all functions or activities that may be performed by a trust company (including activities of a fiduciary, agency, or custodial nature) pursuant to § 225.25(b)(3) of the Board's Regulation Y. These activities will be conducted throughout the states where each trust is located.

Board of Governors of the Federal Reserve System, June 3, 1986.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 86-12770 Filed 6-5-86; 8:45 am]

BILLING CODE 6210-01-M

Commonwealth Bancshares Corp., et al.; Formations of; Acquisitions of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 fo the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)):

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 30, 1986.

A. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Commonwealth Bancshares Corporation,* Williamsport, Pennsylvania; to acquire 24.99 percent of the voting shares of Heritage Financial Services Corporation, Lewistown, Pennsylvania, and thereby indirectly acquire Russell National Bank, Lewistown, Pennsylvania.

2. *Neffs Bancorp, Inc.,* Neffs, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of Neffs National Bank, Neffs, Pennsylvania.

A. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *First Bancshares of Valley City, Inc.,* Valley City, North Dakota; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank of Valley City, Valley City, North Dakota.

Board of Governors of the Federal Reserve System, June 2, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Granite State Bankshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 30, 1986.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Granite State Bankshares, Inc.,* Keene, New Hampshire; to become a bank holding company by acquiring 100 percent of the voting shares of Keene Savings Bank, Keene, New Hampshire.

2. *Katahdin Bankshares, Corp.,* Patten, Maine; to become a bank holding company by acquiring 100 percent of the voting shares of Katahdin Trust Company, Patten, Maine. Comments on this application must be received not later than June 27, 1986.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *First National Corporation of Alexander City, Inc.,* Alexander City, Alabama; to acquire 100 percent of the voting shares of First Montgomery Bank, Montgomery, Alabama.

C. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First American Bank Corporation,* Elk Grove Village, Illinois; to acquire 100 percent of the voting shares of Northern Illinois Bancorp, Inc., Joliet, Illinois, and thereby indirectly acquire Louis Joliet Bank and Trust Company, Joliet, Illinois.

D. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *First State Bancorp, Inc.*, Caruthersville, Missouri; to merge with Bancshares of Hayti, Hayti, Missouri.

E. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *First Texcorp, Inc.*, Dallas, Texas; to acquire 100 percent of the voting shares of First Texas Bank—Irving, N.A., Irving, Texas.

2. *San Diego Bancshares, Inc.*, San Diego, Texas; to become a bank holding company by acquiring 99.05 percent of the voting shares of First State Bank of San Diego, San Diego, Texas.

Board of Governors of the Federal Reserve System, June 3, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

The Summit Bancorp.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 24, 1986.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *The Summit Bancorporation*, Summit, New Jersey; to engage *de novo* through its subsidiary, The Summit Mortgage Company, Inc., Summit, New Jersey, in making, servicing, and selling loans such as would be made by a mortgage company pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activites will be conducted in New Jersey.

Board of Governors of the Federal Reserve System, June 2, 1986.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on May 30, 1986.

Public Health Service

(Call Reports Clearance Officer on 202-245-2100 for copies of packages.)

Food and Drug Administration

Subject: Adverse Drug Experience Reporting (21 CFR 314.80)—Existing Collection.

Respondents: State or local governments; Businesses or for-profit; Non-profit institutions; Small businesses or organizations.

Subject: Registration of Producers of Drugs and Listing of Drugs in Commercial Distribution—Extension—(0910-0045).

Respondents: Businesses or other for-profit; Small businesses or organizations.

Office of Assistant Secretary for Health

Subject: 1987 National Medical Expenditure Survey (Screening interview for Household Survey)—NEW.

Respondents: Individuals or households.

National Institutes of Health

Subject: Research and Research Training Grant Application and Related Forms—Extension—(0925-0001).

Respondents: State or local governments; Businesses or other for-profit; Federal agencies or employees; Non-profit institutions; small businesses or organizations.

OMB Desk Officer: Bruce Artim.

Office of the Secretary

(Call Reports Clearance Officer on 202-245-6511 for copies of packages.)

Office of Inspector General

Subject: Multiple Prospective Payment Related Studies—NEW.

Respondents: Businesses or other for-profit: Non-profit institutions.

OMB Desk Officer: Judy A. McIntosh.

Copies of the above information collection clearance packages can be obtained by calling the Reports Clearance Officer on the number shown above.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address:

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503, ATTN: (Name of OMB Desk Officer).

Dated: May 30, 1986.

K. Jacqueline Holz,

Deputy Assistant Secretary for Management Analysis and Systems.

BILLING CODE 4150-04-M

Centers for Disease Control

Study of the Transmission of Human T-Lymphotropic Viruses Type III (HTLV-III) Among Prostitutes

AGENCY: Centers for Disease Control, Public Health Service, HHS.

SUMMARY: The Centers for Disease Control (CDC) has awarded Cooperative

Agreements for the Study of the Transmission of Human T-Lymphotropic Viruses Type III (HTLV-III) Among Prostitutes. Because some of the participants in the study will be incarcerated, the regulations for research involving prisoners as subjects (45 CFR 46.306(C)) apply. The regulatory requirements of 45 CFR Part 46 have been met; therefore, the CDC intends to release funds to commence the research.

FOR FURTHER INFORMATION CONTACT: James W. Curran, M.D., Director, Acquired Immunodeficiency Syndrome Program, Center for Infectious Diseases, Centers for Disease Control, 1600 Clifton Road, Atlanta, Georgia 30333.

SUPPLEMENTARY INFORMATION: A research study on the transmission of human T-Lymphotropic Viruses Type III (HTLV-III) is being conducted under authority of section 301(a) of the Public Health Service Act (42 U.S.C. 241(a)), as amended.

The objectives of the study are (1) to determine the prevalence of HTLV-III infection, as measured by HTLV-III antibody, among female prostitutes, and (2) to correlate seropositivity with behavioral characteristics among female prostitutes. For purposes of this study, a female prostitute is considered to be a woman who has provided sexual services for money or other consideration to males in the past 12 months.

Cooperative Agreements announced in the Federal Register (50 FR 30295) on July 25, 1985, for the support of this study have been awarded to five areas. In two of these areas, Miami and Los Angeles, the recipients of the cooperative agreements propose to offer participation to women who have been arrested for prostitution. For the purposes of this announcement these women are designated as prisoners. The regulatory requirements of 45 CFR Part 46 pertaining to research involving prisoners as subjects have now been met and CDC intends to release funds to commence these research activities.

Dated: June 2, 1986.

James O. Mason,

Director, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 86M-0207]

CILCO®, Inc.; Premarket Approval of VISCOAT® (Sodium Chondroitin Sulfate-Sodium Hyaluronate) (Ophthalmic Surgical Aid)

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by CILCO®, Inc., Huntington, WV, for premarket approval, under the Medical Device Amendments of 1976, of VISCOAT® (Sodium Chondroitin Sulfate-Sodium Hyaluronate) (ophthalmic surgical aid). After reviewing the recommendation of the Ophthalmic Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application.

DATE: Petitions for administrative review by July 7, 1986.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Philip J. Phillips, Center for Devices and Radiological Health (HFZ-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-8221.

SUPPLEMENTARY INFORMATION: On March 13, 1985, CILCO®, Inc., Huntington, WV 25701, submitted to CDRH an application for premarket approval of VISCOAT® (Sodium Chondroitin Sulfate-Sodium Hyaluronate). VISCOAT® (Sodium Chondroitin Sulfate-Sodium Hyaluronate) is indicated for use as an ophthalmic surgical aid in anterior segment procedures including cataract extraction and intraocular lens implantation.

On October 17, 1985, the Ophthalmic Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On April 30, 1986, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Philip J. Phillips (HFZ-460), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before July 7, 1986, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: May 27, 1986.

James S. Benson,

Deputy Director Center for Devices and Radiological Health.

[FR Doc. 86-12704 Filed 6-5-86; 8:45 am]

BILLING CODE 4160-01-M

National Institutes of Health

National Cancer Institute, Board of Scientific Counselors Division of Cancer Etiology; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Etiology on June 12–13, 1986, Building 31, C Wing, Conference Room 10, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892. The meeting will be open to the public from 1:00 p.m. to recess on June 12, and from 9:00 a.m. to adjournment on June 13, for discussion and review of the Division budget and review of concepts for grants and contracts. Attendance by the public will be limited to space available.

The Board of Scientific Counselors meeting will be closed to the public from 9:00 a.m. to approximately 1:00 p.m. on June 12, 1986, in accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, for the review, discussion and evalution of individual programs and projects conducted by the Division of Cancer Etiology. These programs, projects, and discussions could reveal personal information concerning individuals associated with the programs and projects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. David McB. Howell, Executive Secretary of the Board of Scientific Counselors, Division of Cancer Etiology, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–6927) will furnish substantive program information.

Dated: May 28, 1986.

Betty J. Beveridge,

Committee Management Officer, NIH.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F–14874–A]

Alaska Native Claims Selection; NANA Regional Corp., Inc.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1611, 1613, will be issued to NANA Regional Corporation, Inc., U.S. Survey No. 4269, lot 7, block 4, for approximately 1.57 acres. The lands involved are in the vicinity of Kiana, Alaska.

A notice of the decision will be published once a week for four (4) consecutive weeks in the TUNDRA TIMES. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271–5960.)

Any party claiming a property interest which is adversely affected by the decision shall have until July 7, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Joe J. Labay,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310–JA–M

Draft Resource Management Plan/ Environmental Impact Statement and Proposed Areas of Critical Environmental Concern for the San Juan Resource Area, Moab District, Utah

May 27, 1986.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of draft resource management plan/ environmental impact statement.

SUMMARY: The draft resource management plan/environmental impact statement (RMP/EIS) for the San Juan Resource Area, Moab District has been prepared for review and comment by the public, federal, state and local agencies, and Indian tribes. The RMP/EIS presents five land use alternatives for management of 1.8 million acres of public land in San Juan County, Utah. Several areas of critical environmental concern (ACECs) are proposed under different alternatives discussed in this document.

The purpose of the RMP is to guide management of the public lands and resources in the San Juan Resource Area, Bureau of Land Management (BLM). A second purpose is to provide a grazing EIS as ordered by the United States District Court.

A 90-day review and comment period will commence with publication of Notice of Availability in the Federal Register by the Environmental Protection Agency. A public meeting will be held July 16, 1986, from 2 to 8 p.m. at the San Juan Resource Area Office, Monticello, UT, to discuss the draft RMP/EIS. To be considered in the final RMP/EIS, comments must be received in the San Juan Resource Area office postmarked no later than Friday, September 5, 1986.

This action is announced pursuant to section 102(2)(c) of the National Environmental Policy Act of 1970, section 202(a) of the Federal Land Policy and Management Act of 1976, and 43 CFR Part 1610.

FOR FURTHER INFORMATION CONTACT: Ed Scherick, San Juan Resource Area Manager, BLM, Box 7, Monticello, UT 84535; (801) 587–2201.

SUPPLEMENTARY INFORMATION: The San Juan RMP/EIS analyzes five alternative multiple use management plans. Each plan provides management guidance for all relevant resource management programs administered by the San Juan Resource Area. Various combinations of special designations are analyzed under the different alternatives.

Alternatives Analyzed: Five alternative plans are analyzed:

1. Alternative A (no action) presents the continuation of current management.

2. Alternative B emphasizes the production of mineral resources and livestock forage.

3. Alternative C emphasizes use of the public lands for recreation, protection of wildlife habitat, and preservation of watershed values.

4. Alternative D emphasizes the preservation of large tracts of public land to protect vegetation resources.

5. Alternative E (the preferred alternative) provides for continuation of livestock grazing at current levels; protection of certain recreational opportunities, wildlife habitats and watershed values; and making public lands available for production of mineral resources.

Proposed ACECs: Sixteen areas are proposed for special management designation under various alternatives analyzed in the RMP/EIS. Special management designations analyzed were ACEC, Research Natural Area (RNA), and Outstanding Natural Area (ONA). Nine of these areas were considered for ACEC designation in at least one alternative; some were considered for RNA or ONA designation. The other seven areas were considered for ONA designation in at least one alternative.

Special management designations are summarized in the accompanying table.

Gene Nodine,

District Manager.

SPECIAL MANAGEMENT DESIGNATIONS CONSIDERED SAN JUAN RMP/EIS

Special designation area			Value protected	Resource use limitations
Spec. Des.	Acres	EIS alts.		
Bridger Jack Mesa:				
ACEC	3,280	C	Relict plant communities	No surface occupancy; no grazing; closed to ORV use.
RNA	1,760	B	Relict plant communities	No Surface occupancy (C, E) or no lease (D); no grazing; closed to ORV use.
	3,280	D, E		
Lavender Mesa:				
ACEC	640	C	Relict plant communities	No surface occupancy; no grazing; closed to ORV use.
RNA	640	B, D, E	Relict plant communities	No surface occupancy (C, E) or no lease (D); no grazing; closed to ORV use.
Alkali Ridge:				
ACEC	170,320	C, D	Cultural resources	Special conditions on use (C, E) or no surface occupancy (D); limited to ORV use.
	25,880	E		
North Abajo:				
ACEC	85,450	C, D	Cultural resources	Special conditions on use (C, E) or no lease occupancy (D); segregated from mineral entry (D); limited to ORV use (C, E) or closed to ORV use (D).
	35,880	E		
Grand Gulch:				
ACEC	4,240	C, D	Cultural resources (C, D); cultural resources/natural values (E).	No surface occupancy (C, E) or no lease (D); segregated from mineral entry; no grazing in canyon bottom; closed to ORV use (C, D) or limited to ORV use (E).
	49,730	E		
ONA	68,500	C, D	Natural values	Special conditions on use or no surface occupancy (C); no lease (D); segregated from mineral entry partially (C) or totally (D); partially limited to ORV use (C); closed to ORV use partially (C) or totally (D).
Hovenweep: ACEC	2,000	D	Cultural resources	No surface occupancy; limited to ORV use.
Dark Canyon:				
ACEC	62,040	E	Natural values	No surface occupancy; segregated from mineral entry; no grazing; closed to ORV use.
ONA	68,100	C, D	Natural values	No surface occupancy (C) or no lease (D); segregated from mineral entry; closed to ORV use.
Slickhorn Canyon: ONA	35,860	C, D	Natural values	Special conditions on use or no surface occupancy (C); no lease (D); segregated from mineral entry partially (C) or totally (D); partially limited to ORV use (C); closed to ORV use partially (C) or totally (D).
John's Canyon: ONA	17,500	C, D	Natural values	Special conditions on use or no surface occupancy (C); no lease (D); segregated from mineral entry partially (C) or totally (D); partially limited to ORV use (C); closed to ORV use partially (C) or totally (D).
Fish and Owl Canyons: ONA	40,960	C, D	Natural values	Special conditions on use or no surface occupancy (C); no lease (D); segregated from mineral entry partially (C) or totally (D); partially limited to ORV use (C); closed to ORV use partially (C) or totally (D).
Road Canyon: ONA	26,500	C, D	Natural values	Special conditions on use or no surface occupancy (C); no lease (D); segregated from mineral entry partially (C) or totally (D); partially limited to ORV use (C); closed to ORV use partially (C) or totally (D).
Lime Canyon: ONA	25,200	C, D	Natural values	Special conditions on use or no surface occupancy (C); no lease (D); segregated from mineral entry partially (C) or totally (D); partially limited to ORV use (C); closed to ORV use partially (C) or totally (D).
Mule Canyon: ONA	6,080	C, D	Natural values	Special conditions on use or no surface occupancy (C); no lease (D); segregated from mineral entry partially (C) or totally (D); partially limited to ORV use (C); closed to ORV use partially (C) or totally (D).
Arch Canyon: ONA	4,200	D	Natural values	No lease; segregated from mineral entry; closed to ORV use.
Lockhart Basin: ACEC	68,680	C, D	Scenic values	Special conditions on use (C) or surface occupancy (D); partially segregated from mineral entry (D); limited to ORV use or partially closed to ORV use (D).
Cajon Pond: ACEC	40	E	Wildlife values	Special conditions on use (C); partially closed to grazing; limited to ORV use.

BILLING CODE 4310-DQ-M

Idaho; Public Review Period for USGS/USBM "Mineral Survey Reports"; Wilderness Study Areas

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Idaho, Bureau of Land Management (BLM), is requesting the public to review combined U.S. Geological Survey (USGS) and U.S. Bureau of Mines (USBM) "Mineral Survey Reports" which have been or will be completed for preliminarily suitable Wilderness Study Areas (WSAs). If the public identifies significant differences in interpretation of the data presented in the reports or submits significant new minerals data for consideration, the Bureau of Land Management will request USGS/USBM evaluate these comments in relation to their final Mineral Survey Report. The BLM will consider the USGS/USBM evaluations as well as the Mineral Survey Report in developing final wilderness suitability recommendations. Copies of the WSA reports can be reviewed in BLM offices in Boise, Burley, Idaho Falls, Salmon, Shoshone and Coeur d'Alene.

DATE: New information will be accepted on the report enumerated in this notice until August 22, 1986.

ADDRESS: Send information on reports to: Deputy State Director for Minerals, BLM, Idaho State Office, 3380 Americana Terrace, Boise, ID 83706.

FOR FURTHER INFORMATION CONTACT: Bob DeTar or Bill LaVelle, BLM, Idaho State Office, Division of Mineral Resources, 3380 Americana Terrace, Boise, Idaho 83706, (208) 334–1169.

SUPPLEMENTARY INFORMATION: Section 603 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2785, directed the Secretary of the Interior to inventory lands having wilderness characteristics as described in the Wilderness Act of September 3, 1964, and from time to time report to the President his recommendations as to the suitability or non-suitability of each area for preservation as wilderness. The USGS and USBM are charged with conducting mineral surveys for areas that have been preliminarily recommended suitable for inclusion into the wilderness system, to determine the mineral values, if any, that may be present in such areas.

To ensure that all available minerals data are considered by the Bureau of Land Management prior to making its final wilderness suitability recommendations to the Secretary of the Interior, the State Director, Idaho is providing this public review and comment period. Usually there is a one to two year lag time between actual field work and final printing of a mineral survey report. New information may have been collected by the public during this lag time or the public may have a new interpretation of the data presented in the mineral survey reports. Any new data or new interpretations of data in the reports will be screened for its significance and validity by the Bureau of Land Management. Significant new minerals data or new interpretations of the minerals data will be forwarded to the U.S. Geological Survey and U.S. Bureau of Mines for further consideration. Evaluations received by the Bureau of Land Management from the U.S. Geological Survey and U.S. Bureau of Mines will be considered by the State Director in the final wilderness suitability recommendations.

Information requested from the public via this invitation are not limited to any specific energy or mineral resource. Information can be in the form of a letter and should be as specific as possible and include:

1. The name and number of the subject Wilderness Study Area and Mineral Survey Report.
2. Mineral(s) of interest.
3. A map or land designation by legal subdivision of the public land surveys or protracted surveys showing the specific parcel(s) of concern within the subject Wilderness Study Area.
4. Information and documents that depict the new data or reinterpretation of data.
5. The name, address, and phone number of the person who may be contacted by technical personnel of the Bureau of Land Management, U.S. Geological Survey or U.S. Bureau of Mines assigned to review the information. Geologic maps, cross sections, drill hole records and sample analyses, etc., should be included. Published literature and reports may be cited. Each comment should be limited to a specific Wilderness Study Area. All information submitted and marked confidential will be treated as proprietary data and will not be released to the Public without consent.

The following is a list of available Mineral Survey Reports by Wilderness Study Area (WSA) on which new information will be accepted.

WSA No.	Name	Report No.
[illegible]	Jerry Peak and Jerry Peak West.	MF–1468A, MF–1468B MF–1468C MF–1468D MF–1468E

Reports available for review in BLM offices will not be available for sale or removal from the office. Copies of the listed MF reports may be purchased from: Western Distribution Branch, U.S. Geological Survey, Box 25286, Federal Center, Denver, CO 80225, (303) 236–7477.

Dated: May 30, 1986.

Alan B. Tripp,

Acting Deputy State Director for Mineral Resources.

BILLING CODE 4310–GG–M

Land Tenure Adjustment Project; California Desert Plan; Amendment

AGENCY: Bureau of Land Management; Interior.

ACTION: Initiation of public scoping process for a Land Tenure Adjustment Project through a Notice of Intent to amend the California Desert Plan and initiation of a 30-day public comment period for the Planning Criteria through a Notice of Availability.

SUMMARY: Pursuant to the authorities in the Federal Land Policy and Management Act (FLPMA) of October 21, 1976 (section 206) and 43 CFR 1610.2, a 30-day public comment period is initiated to review the planning criteria for amendments to the California Desert Plan and the San Bernardino County General Plan (to include the development of a County safety overlay) as a part of a Land Tenure Adjustment Project proposed jointly by the Bureau of Land Management (BLM) Barstow and Ridgecrest Resource Areas, California Desert District, and the Department of Defense (DOD), Edwards and George Air Force Bases. The Project includes 2.5 million acres of public and private land within Kern, Los Angeles, and San Bernardino Counties. The China Lake Naval Weapons Center serves as the northern boundary of the project area with Fort Irwin Road and Highway 15 as the eastern, the Angeles National Forest as the southern, and the Tehachapi Mountains as the western boundaries.

SUPPLEMENTARY INFORMATION: The Land Tenure Adjustment Project stems from BLM concerns regarding resource management effectiveness where a checkerboard landownership pattern prevails in the Barstow Resource Area. Valuable resource—from fossils to petroglyphs to tortoise habitat to recreation areas-are essentially unprotectable and unmanageable due to the ownership/authority changing every mile. This checkerboard pattern promotes "leapfrog" development, a land use incompatible with the San Bernardino County General Plan policies of creating a logical and orderly residential pattern, directing new urban development to areas where requisite urban services are available, and supporting an essentially open, rural character of the desert.

To further complicate management, the Department of Defense has three airspace corridors (two existing and one proposed) overflying portions of the project area. These corridors include: (1) Ingress into George Air Force Base; (2) a proposed expanded Precision Impact Range Area; and (3) a supersonic/low flying test area.

A number of preliminary management issues (problems, concerns, opportunities) have been identified for the project. These issues include: (1) Landownership Pattern—the checkerboard pattern results in inefficient and costly management of the public resources as well as unavailability of County utilities and services; (2) Multiple Use Classifications—overflying DOD activities are not considered in the designation of public land under various multiple use classifications; (3) Land Use Categories—overflying DOD activities are not considered in the designation of private land under various land use categories; and (4) Public Health and Safety—no safety overlay has been developed by San

BEST COPY AVAILABLE

Bernardino County to address the impacts to public health and safety from the overflying DOD activities

In order to finalize the above issues as well as the planning criteria, the public is invited to submit written comments. Four public workshops have been scheduled to answer questions, discuss the project, and collect any comments available at that time. The workshops are scheduled from 4:00 p.m. to 8:00 p.m. for the following dates and locations in California: June 24, 1986—Quality Inn in San Bernardino at 668 Fairway Drive; June 25—Holiday Inn in Victorville at Interstate 15 and Palmdale Road; June 26—Antelope Valley Inn in Lancaster at 44055 North Sierra Highway; and June 27—Holiday Inn in Barstow at 1520 E. Main.

The planning criteria is available for review at the following locations:

California Desert District Office, 1695 Spruce Street, Riverside, California, 92507, (714) 351–6432;
Barstow Resource Area Office, 831 Barstow Road, Barstow, California, 92311, (619) 256–3565;
Ridgecrest Resource Area Office, 112 East Dolphin Street, Ridgecrest, California, 93555, (619) 375–7125;

Corrections

In FR Doc. 86–11022 appearing on page 18045 in the issue of Friday, May 16, 1986, make the following corrections:

1. In the first column, under *Parcel A*, ninth line, "South 46° 41′ 39″ " should read "South 46° 42′ 39″ ".

2. In the second column, under *Parcel B*, fifth line, "North 4°K 46′ " should read "North 4°46′ ".

3. In the third column, second line, "West" should read "East".

BILLING CODE 1505–01–M

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 303–TA–17 and 18, 701–TA–275 through 278, and 731–TA–327 through 334 (Preliminary)]

Certain Fresh Cut Flowers from Canada, Chile, Colombia, Costa Rica, Ecuador, Israel, Kenya, Mexico, the Netherlands, and Peru

AGENCY: International Trade Commission.

ACTION: Institution of preliminary countervailing duty and antidumping investigations and scheduling of a conference to be held in connection with the investigations.[1]

SUMMARY: The Commission hereby gives notice of the institution of preliminary countervailing duty investigations Nos. 303–TA–17 and 18 (Preliminary) under section 303 of the Tariff Act of 1930 (19 U.S.C. 1303) and Nos. 701–TA–275 through 278 (Preliminary) under section 703(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of certain fresh cut flowers which are alleged to be subsidized by governments of the following countries:

Canada [2] [Investigation No. 701–TA–275 (Preliminary)],
Chile [3] [Investigation No. 701–TA–276 (Preliminary)],
Israel [4] [Investigation No. 701–TA–277 (Preliminary)],
Kenya [5] [Investigation No. 303–TA–17 (Preliminary)],
The Netherlands [6] [Investigation No. 701–TA–278 (Preliminary)], and Peru [7] [Investigation No. 303–TA–18 (Preliminary)].

The Commission also gives notice of the institution of preliminary antidumping investigations Nos. 731–TA–327 through 334 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that in industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from the following countries of certain fresh cut flowers which are alleged to be sold in the United States at less than fair value:

---

[1] A prior notice of institution and scheduling of a conference was mailed to all persons on the Commission's mailing list, was made available to all those requesting copies, and was posted in the Commission on May 28, 1986. That notice incorrectly assigned the following investigation numbers: Colombia [Investigation No. 701–TA–277 (Preliminary)]; Costa Rica [Investigation No. 303–TA–17 (Preliminary)]; Ecuador [Investigation No. 303–TA–18 (Preliminary)]; Israel [Investigation No. 701–TA–278 (Preliminary)]; Kenya [Investigation No. 701–TA–279 (Preliminary)]; the Netherlands [Investigation No. 701–TA–280 (Preliminary)]; and Peru [Investigation No. 701–TA–281 (Preliminary)].

[2] Fresh cut flowers from Canada subject to investigation include miniature (spray) carnations and standard carnations, provided for in items 192.17 and 192.21, respectively, of the Tariff Schedules of the United States (TSUS).

[3] Fresh cut flowers from Chile subject to investigation include standard carnations, provided for in item 192.21 of the TSUS.

[4] Fresh cut flowers form Israel subject to investigation include miniature (spray) carnations and gerbera, provided for in items 192.17 and 192.21, respectively, of the TSUS.

[5] Fresh cut flowers from Kenya subject to investigation include miniature (spray) carnations and standard carnations, provided for in items 192.17 and 192.21, respectively, of the TSUS.

[6] Fresh cut flowers form the Netherlands subject to investigation include miniature (spray) carnations (TSUS item 192.17), and standard chrysanthemums, alstroemeria, and gerbera, provided for in item 192.21 of the TSUS.

[7] Fresh cut flowers from Peru subject to investigation include miniature (spray) carnations (TSUS item 192.17), and pompom chrysanthemums and gypsophila, provided for intem 192.21 of the TSUS.

Canada [2] [Investigation No. 731-TA-327 (Preliminary)],
Chile [3] [Investigation No. 731-TA-328 (Preliminary)],
Colombia [4] [Investigation No. 731-TA-329 (Preliminary)],
Costa Rica [5] [Investigation No. 731-TA-330 (Preliminary)],
Ecuador [10] [Investigation No. 731-TA-331 (Preliminary)],
Kenya [6] [Investigation No. 731-TA-332 (Preliminary)],
Mexico [11] [Investigation No. 731-TA-333 (Preliminary)], and Peru [7] [Investigation No. 731-TA-334 (Preliminary)].

As provided in sections 303, 703(a) and 733(a), the Commission must complete preliminary countervailing duty and antidumping investigations in 45 days, or in these cases by July 7, 1986.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and B (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: May 21, 1986.

FOR FURTHER INFORMATION CONTACT: Lawrence Rausch (202-523-0300) or Daniel Dwyer (202-523-4618), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

SUPPLEMENTARY INFORMATION:

Background

These investigations are being instituted in response to a petition filed on May 21, 1986 by Floral Trade Council, Davis, California.

Participation in the Investigations

Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than seven (7) days after publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairwoman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service List

Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names of addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), each document filed by a party to the investigation must be served on all other parties to the investigations (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Conference

The Commission's Director of Operations has scheduled a conference in connection with these investigations for 9:30 a.m. on June 13, 1986 at the U.S. International Trade Commission Building, 701 E Street NW., Washington, DC. Parties wishing to participate in the conference should contact Lawrence Rausch (202-523-0300) or Daniel Dwyer (202-523-4618) not later than June 10, 1986 to arrange for their appearance. Parties in support of the imposition of countervailing or antidumping duties in these investigations and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Written Submissions

Any person may submit to the Commission on or before June 17, 1986 a written statement of information pertinent to the subject of these investigations, as provided in § 207.15 of the Commission's rules (19 CFR 207.15). A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6)

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to sectoin 207.12 of the Commission's rules (19 CFR 207.12).

Issued: June 6, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/reporting requirements under review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements

under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the OMB reviewer, Nancy Wentzler, Telephone (202) 395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Extension

Employment Standards Administration
Miner's Claim for Benefits Under the Black Lung Act; Employment History; Miner Medical Reimbursement Form
1215-0052; CM-911; CM-911a; CM-915
On occasion
57,500 responses; 20,834 hours, 3 forms

The application form filed by the miner for benefits; the coal miner's work history, request by a miner payee for reimbursement of out of pocket covered medical expenses.

Survivor's Claim for Benefits Under the Black Lung Benefits Act
1215-0068; CM-912
On death of miner
Individuals or households
2,350 responses; 783 hr.; 1 form

A survivor of coal miner must file a claim for benefits under the Black Lung Benefits Act, as amended, in order to receive benefits. The claims and supporting documentation are revised by DCMWC claims examiners to determine the survivor's eligibility for benefits.

Survivor's Notification of Beneficiary's Death
1215-0067; CM-1089
On occasion
Individuals or households
3,000 responses; 250 hours; 1 form

The CM-1089 is used to gather information from a beneficiary's survivor to ensure that benefits due the survivor on behalf of a deceased miner a are accurate and continue.

Report of Ventilatory Study; Roentgenographic Interpretation; Roentgenographic Interpretation; Medical History and Examination for Coal Mine Workers' Pneumoconiosis; Report of Arterial Blood Gas Study
1215-0090; CM-907; CM-933; CM-933B; CM-988, CM-1159
On occasion
Non-profit institutions; Small businesses or organizations
38,500 responses; 7,70o hours; 5 forms

20 CFR Part 718 specifies that certain information relative to the medical condition of a claimant who is alleging the presence of pneumoconiosis be obtained as a routine function of the claims adjudication process. The medical specfications of the regulations have been formatted in a variety of forms to promote efficiency and accuracy in gathering the required data. These forms were designed to meet the need of establishing medical evidence.

Notice of Law Enforcement Officer's Injury or Occupational Disease; Notice of Law Enforcement Officer's Death
1215-0116; CA-721; CA-722
On occasion
Individuals or households; State or local governments; Small businesses or organizations
75 responses; 103 hours; 2 forms

The forms are used for filing claims for compensation for injury and death to non-Federal law enforcement officers under the provisions of 5 U.S.C. 8191 et seq. The forms provide the basic information needed to process the claims made under the Federal Employee's Compensation Act.

Signed at Washington, DC, this 29th day of May, 1986.

Reggie Moore,
Acting Departmental Clearance Officer.

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Burlington Industries et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identifed in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 16, 1986.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 16, 1986.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC, this 27th day of May 1986.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Job Training Partnership Act; Lower Living Standard Income Level

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of determination of lower living standard income level.

SUMMARY: The Employment and Tranining Administration is republishing the notice of revised Lower Living-Standard Income Levels (LLSILs) used in determining whether individuals meet the economically disadvantaged criteria as defined in the Job Training Partnership Act (JTPA) published at 51 FR 12752, April 15, 1986. This republication is being done to correct errors in the data on 25 selected Metropolitan Statistical Areas (Table 3) and the figures for the family size (Table 4). In computing this data we inadvertently used data for the wrong period of time. Therefore, we are hereby republishing the entire document below.

EFFECTIVE DATE: April 30, 1986.

ADDRESS: Send written comments to: Mr. Robert N. Colombo, Director, Office of Employment and Training Programs, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo. Telephone: 202-376-6093.

SUPPLEMENTARY INFORMATION: It is a purpose of the Job Training Partnership Act (JTPA) "to afford job training to those *economically disadvantaged* individuals . . . , who are in special need of such training to obtain productive employment." (Emphasis added.) JTPA Section 2; See 20 CFR 626.1(a)(2). JTPA Section 4(8) defines, for the purposes of JTPA eligibility, the term "economically disadvantaged" in part by reference to the "lower living standard income level" (LLSIL). See 20 CFR 626.4. Similar definitions of "economically disadvantaged," which also include references to the LLSIL, are provided at JTPA sections 201(b)(3) and 202(a)(3) for JTPA Title II allotment and within-State allocation purposes. See 20 CFR 629.39 and 630.1.

The LLSIL figures published in this notice shall be used to determine whether an individual is economically disadvantaged for applicable JTPA purposes.

JTPA Section 4(16) defines LLSIL as follows:

> The term "lower living standard income level" means that income level (adjusted for regional, metropolitan, urban, and rural differences and family size) determined annually by the Secretary (of Labor) based on the most recent "lower living family budget" issued by the Secretary.

The most recent lower living family budget was issued by the Secretary in the fall of 1981. Using those data, the 1981 LLSIL was determined for programs under the now-repealed Comprehensive Employment and Training Act. The four-person urban family budget estimates previously published by the Bureau of Labor Statistics (BLS) provided the basis for the Secretary to determine the LLSIL for training and employment program operators. BLS terminated the four-person family budget series in 1982, after publication of the Fall 1981 estimates.

Under the JTPA, the Employment and Training Administration (ETA), published the 1985 updates to the LLSIL in the Federal Register of June 11, 1985. (50 FR 24506.) ETA has again updated the LLSIL to reflect cost of living increases for 1986, by applying the percentage change in the December 1985 consumer price index (CPI), compared with the December 1984 CPI, to each of the June 11, 1985, LLSIL figures. Those updated figures for a family of four are listed in Table 1 below by region for both metropolitan and nonmetropolitan areas. Since eligibility is determined by family income at 70 percent of the LLSIL, pursuant to section 4(8) of JTPA, those figures are listed as well.

TABLE 1.—LOWER LIVING STANDARD INCOME LEVEL BY REGION *

Region	Updated 1986 LLSIL	70 percent of LLSIL
Northeast:		
Metropolitan	$18,580	$12,950
Nonmetropolitan	18,190	12,550
North Central:		
Metropolitan	17,920	12,540
Nonmetropolitan	17,480	12,240
South:		
Metropolitan	17,110	11,980
Nonmetropolitan	16,050	11,240
West:		
Metropolitan	18,840	13,090
Nonmetropolitan	18,010	13,310

* For ease of calculation, these figures have been rounded to the nearest ten.

Jurisdictions included in the various regions, based generally on Census

Divisions of the U.S. Department of Commerce, are as follows:

Northeast

Connecticut
Maine
Massachusetts
New Hampshire
New Jersey
New York
Pennsylvania
Rhode Island
Vermont
Virgin Islands

North Central

Illinois
Indiana
Iowa
Kansas
Michigan
Minnesota
Missouri
Nebraska
North Dakota
Ohio
South Dakota
Wisconsin

South

Alabama
American Samoa
Arkansas
Delaware
District of Columbia
Florida
Georgia
Kentucky
Louisiana
Maryland
Mississippi
North Carolina
Northern Marianas
Oklahoma
Puerto Rico
South Carolina
Tennessee
Texas
Trust Territories
Virginia

West

Arizona
California
Colorado
Idaho
Montana
Nevada
New Mexico
Oregon
Utah
Washington
Wyoming

Additionally, separate figures have been provided for Alaska, Hawaii and Guam as indicated in Table 2 below.

TABLE 2.—LOWER LIVING STANDARD INCOME LEVEL—ALASKA, HAWAII, AND GUAM *

	Updated 1986 LLSIL	70 percent of LLSIL
Alaska:		
Metropolitan	$28,550	$19,980
Nonmetropolitan	24,790	17,350
Hawaii and Guam:		
Metropolitan	23,690	16,580
Nonmetropolitan	21,940	15,360

* Rounded to the nearest ten.

Data on 25 selected Metropolitan Statistical Areas (MSAs) are also available, although the timeframes used for the updated data are not exactly the same. The updated LLSIL figures for these MSAs, and 70 percent of the LLSIL, rounded to the nearest ten, are set forth in Table 3 below.

TABLE 3.—LOWER LIVING STANDARD INCOME LEVEL—25 MSAS

MSA	Updated LLSIL	70 percent of LLSIL
Anchorage, AK	$26,050	$18,240
Atlanta, GA	17,160	12,030
Baltimore, MD	17,970	12,580
Boston, MA	19,580	13,710
Buffalo, NY	17,380	12,170
Chicago, IL/Northwestern, IN	18,410	12,890
Cincinnati, OH/KY/IN	18,340	12,840
Cleveland, OH	18,720	13,100
Dallas, Forth Worth, TX	16,960	11,870
Denver-Boulder, CO	18,400	12,880

TABLE 3.—LOWER LIVING STANDARD INCOME LEVEL—25 MSAS—Continued

MSA	Updated LLSIL	70 percent of LLSIL
Detroit, MI	17,340	12,140
Honolulu, HI	23,410	16,390
Houston, TX	16,640	11,650
Kansas City, MO/KS	17,630	12,340
Los Angeles/Long Beach/Anaheim, CA	19,280	13,480
Milwaukee, WI	18,160	12,710
Minneapolis-St. Paul, MN	17,660	12,360
New York, NY/Northeastern, NJ	18,820	13,170
Philadelphia, PA/NJ	18,150	12,710
Pittsburgh, PA	18,130	12,690
San Diego, CA	19,430	13,600
San Francisco-Oakland, CA	19,380	13,560
Seattle-Everett, WA	19,450	13,620
St. Louis, MO/IL	17,830	12,480
Washington, D.C./MD/VA	18,040	12,630

Table 4 below is a listing of each of the various figures at 70 percent of the updated 1986 LLSIL for family sizes of one to six persons. For families larger than six persons, an amount equal to the difference between the six and the five-person family income levels should be added to the six-person family income level for each additional person in the family. Where the poverty level for a particular family size is greater than the corresponding LLSIL figures, the figure is indicated in parentheses.

(Section 4(8) of JTPA defines "economically disadvantaged" as, among other things, an individual whose family income was not in excess of the higher of the poverty level or 70 percent of the LLSIL. Poverty level guidelines were transmitted to the States on April 1, 1986.)

TABLE 4.—70 PERCENT OF UPDATED 1986 LLSIL, BY FAMILY SIZE

Family Size					
One	Two	Three	Four*	Five	Six
$(4,050)	$6,830	$9,100	$11,240	$13,260	$15,510
(4,160)	6,870	9,440	11,650	13,750	16,060
(4,270)	7,000	9,610	11,870	14,010	16,360

(6,250)	10,240	14,050	17,350	20,470	23,940
(6,570)	10,780	14,770	18,240	21,520	25,170
(6,620)	10,840	14,860	18,360	21,660	25,360

*Figures provided in Tables 1–3 of this notice are for a family size of four persons. To use Table 4, the appropriate figure should be found in the family size of the *Four* column. Then one may read across the row for family sizes other than four in the appropriate columns.

Use of These Data

Based on these data, Governors should provide the appropriate figures to service delivery areas (SDAs), State Employment Security Agencies (SESAs) and employers in their States to use in determining eligibility for JTPA programs. Information may be provided by disseminating information on MSAs and metropolitan and nonmetropolitan areas within the State, or it may involve further calculations. For example, the State of New Jersey may have four or more figures: Metropolitan, nonmetropolitan, for portions of the State in the New York City MSA, and for those in Philadelphia, MSA. If an SDA includes areas that would be covered by more than one figure, the Governor may determine which is to be used. Pursuant to the JTPA regulation at 20 CFR 627.1, guidelines, interpretations, and definitions adopted by the Governor shall be accepted by the Secretary to the

extent that they are consistent with the JTPA and the JTPA regulations.

Disclaimer on Statistical Uses

It should be noted that the publication of these figures is only for the purpose of determining eligibility for applicable JTPA programs. BLS has not revised the lower living family budget since 1981, and has no plans to do so. The four-person urban family budget estimates series has been terminated. The CPI adjustments used to update the LLSIL for this publication are not precisely comparable, most notably because certain tax items were included in the 1981 LLSIL but are not in the CPI. Thus, these figures should not be used for any statistical purposes, and are valid only for eligibility determination purposes under the JTPA.

Signed at Washington, DC, this 2nd day of June, 1986.

Roger D. Semerad,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Employment Standards Administration

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the Federal Register are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 80 Regional Government Depository

Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (202) 783–3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC This 30th Day of May 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Occupational Safety and Health Administration

National Advisory Committee on Occupational Safety and Health, Full Committee Meeting

Notice is hereby given that the National Advisory Committee on Occupational Safety and Health (NACOSH) will meet on June 26, 27, 1986 in Room N–3437 ABC at the Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW., Washington, DC.

NACOSH was established under section 7(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) to advise the Secretary of Labor and the Secretary of Health and Human Services on matters relating to the administration of the Act.

The public is invited to attend these meetings. The committee will discuss general issues affecting workplace safety and health. A detailed agenda will be prepared, made publicly available and sent to members prior to the meeting. Anyone who wishes to make an oral presentation should notify the Division of Consumer Affairs before the meeting date. The request should include the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation. Oral presentations will be scheduled at the discretion of the Committee chairperson to the extent which time permits.

For additional information contact: Tom Hall, Division of Consumer Affairs, Occupational Safety and Health Administration, Room N–3637, Third Street and Constitution Avenue, NW., Washington, DC 20210. Telephone: 202–523–8151.

Official records of the meeting will be available for public inspection at the Division of Consumer Affairs.

Signed at Washington, DC this 2nd day of June 1986.

John A. Pendergrass,

Assistant Secretary.

BILLING CODE 4510-26-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[86–41]

NASA Advisory Council (NAC), Space Applications Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Applications Advisory Committee (SAAC).

DATES: Date and Time: June 23, 1986, 9 a.m. to 5 p.m.; June 24, 1986, 8:30 a.m. to 5 p.m.; and June 25, 1986, 8 a.m. to 5 p.m.

ADDRESS: National Aeronautics and Space Administration, Room Nos. as noted in the agenda below, 600 Independence Avenue, SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Dudley G. McConnell, Code E, National Aeronautics and Space Administration, Washington, DC 20546 (202/453–1420).

SUPPLEMENTARY INFORMATION: The NAC Space Applications Advisory Committee consults with and advises the Council and NASA on plans for, work in progress on, and accomplishments of NASA's Space Applications programs. This committee is chaired by Mr. Leonard Jaffe and is composed of 34 members. The committee operates both through a number of informal subcommittees and as a whole. The sessions on June 24, 1986, from 10 a.m. to 5 p.m., and June 25, 1986, from 8 a.m. to 5 p.m., of the Communications Subcommittee will be closed to the public. The Subcommittee will meet with the U.S. communications industry executives on an individual basis to gather critical information concerning industry plans for the development of advanced communications systems and technology. This information is needed to insure that NASA, in its preparation of a long range space communications plan for the United States, will develop a complementary rather than duplicative plan that will meet the needs of the U.S. industry. Often during individual meetings with an industry leader, views and plans pertaining to potential new markets, new technologies, etc., that are generally proprietary to the organization which the industry leader represents, will be discussed. Discussion of these matters in a public session would constitute release of confidential, commercial and financial information obtained from private industry. Since this meeting will be concerned throughout with matters listed in 5 U.S.C. 552b(c) (4), it has been determined that it should be closed to the public.

Type of Meeting: Open—except as noted in the agenda below.

Agenda

Full Committee

June 23, 1986, Room 226A
11 a.m.—Briefing on Space Applications Advisory Committee (SAAC) Charter, Purposes and Procedures for All New Members.
12 noon—Adjourn.
June 24, 1986, Room 226A
8:30 a.m.—Introduction of New Members. Chairperson's Remarks. Actions Requested of SAAC and subcommittees.
10 a.m.—Recess Full Committee to Convene Subcommittee Meetings.
June 25, 1986, Room 226A
11 a.m.—Wrap-up Session to Receive Subcommittee Reports.
12 noon—Adjourn.

Information Systems Subcommittee

June 23, 1986, Room 226B
9 a.m.—Planning for a 1987 Workshop on "A View From the Future."
5 p.m.—Adjourn.
June 24, 1986, Room 305 Capitol Gallery Building
10:30 a.m.—Review of Information Systems Operating Five Year Plan.
1 p.m.—Continue Workshop Planning.
5 p.m.—Adjourn.
June 25, 1986, Room 305 Capitol Gallery Building
8:30 a.m.—Update work plans for 1986/1987.
10 a.m.—Formulate Subcommittee Report.

11 a.m.—Adjourn for Recovening of the Full Committee.

Remote Sensing Subcommittee

June 23, 1986, Room 226A
1 p.m.—Establish Goals and Objectives For The Long-Range Plan for Remote Sensing Applications.
5 p.m.—Adjourn.

June 24, 1986, Room 226A
10 a.m.—Indepth Review of NASA's Remote Sensing Research Programs.
5 p.m.—Adjourn.

June 25, 1986, Room 226A
8 a.m.—Adopt Remote Sensing Goals.
9 a.m.—Adopt Next Steps on Long-Range Planning.
10 a.m.—Approve NASA/Industry Policy Paper.
11 a.m.—Adjourn for Recovening of the Full Committee.

Communications Subcommittee

June 24, 1986, Room 770 Capitol Gallery Building
10 a.m.—Closed Session For Industry Hearings.
5 p.m.—Adjourn.

June 25, 1986, Room 770 Capitol Gallery Building
8 a.m.—Closed Session for Industry Hearings.
5 p.m.—Adjourn.

Microgravity Subcommittee

June 24, 1986, Room 226B
10 a.m.—Briefing on Extended Duration Orbiter (EDO).
1 p.m.—Briefings on NASA's Plans to Measure "G-Levels" on The Shuttle.
5 p.m.—Adjourn.

June 25, 1986, Room 226B
8:30 a.m.—Update Workplans for 1986/1987.
10 a.m.—Formulate Subcommittee Report.
11 a.m.—Adjourn for Reconvening of the Full Committee.

Richard L. Daniels,
Advisory Committee Management Officer, National Aeronautics and Space Administration.
June 2, 1986.

BILLING CODE 7510-01-M

NATIONAL COMMISSION FOR EMPLOYMENT POLICY

Public Meeting

June 2, 1986.

ACTION: Notice of meeting.

SUMMARY: Under the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given of a public meeting of the National Commission for Employment Policy at the Crystal City Gateway Marriott, 1700 Jefferson Davis Highway, Arlington, Virginia 22202.

DATES: Monday, June 23, 1986—9:00 a.m. to 5:00 p.m.; Tuesday, June 24, 1986—9:00 a.m. to 5:00 p.m.

Status: the meeting will be open to the public.

Matters to be discussed: Commission members will discuss the priorities of the Commission for the next program year.

FOR FURTHER INFORMATION CONTACT: Mr. Robert V. Mahaffey, National Commission for Employment Policy, 1522 K Street, NW., Suite 300, Washington, DC 20005, (202) 724-1545.

SUPPLEMENTARY INFORMATION: The National Commission for Employment Policy is authorized by the Job Training Partnership Act (Pub. L. 97-300). The Act gives the Commission the broad responsibility of advising the President and the Congress on national employment issues. Business meetings are open to the public. Handicapped individuals wishing to attend should contact Kathy McMichael of the Commission staff so that appropriate accommodations can be made.

Copies of the Minutes of the meeting and materials prepared for it will be available for public inspection at the Commission's offices, 1522 K Street, NW., Suite 300, Washington, DC 20005.

Signed this 2nd day of June 1986.

Scott W. Gordon,
Director.

[FR Doc. 86-12817 Filed 6-5-86; 8:45 am]
BILLING CODE 4510-30-M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Humanities Panel Meetings

AGENCY: National Endowment for the Humanities, NFAH.

ACTION: Notice of Meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

Date: June 20, 1986.
Time: 8:30 a.m. to 5:00 p.m.
Room: 315

Program: This meeting will review applications in the fields of the humanities submitted to the Projects category of the Interpretive Research Program, Division of Research Programs, for projects beginning after September 1, 1986.

Date: June 23-24, 1986.
Time: 9:00 a.m to 5:00 p.m.
Room: 430

Program: This meeting will review Challenge Grants applications from small museums, submitted to the Office of Challenge Grants, for projects beginning after December 1, 1986.

Date: June 26-27, 1986.
Time: 9:00 a.m. to 5:00 p.m.
Room: 430

Program: This meeting will review Challenge Grants applications from Professional Organizations, submitted to the Office of Challenge Grants, for projects beginning after December 1, 1986.

The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applications. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506, or call (202) 786-0322.

Stephen J. McCleary,
Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

Abnormal Occurrence Report; Periodic Reports to Congress

Notice is hereby given that pursuant to the requirements of section 208 of the Energy Reorganization Act of 1974, as amended, the Nuclear Regulatory Commission (NRC) has published and issued another periodic report to Congress on abnormal occurrences (NUREG–0090, Vol. 8 No. 4).

Under the Energy Reorganization Act of 1974, which created the NRC, an abnormal occurrence is defined as "as unscheduled incident or event which the Commission (NRC) determines is significant from the standpoint of public health or safety." The NRC has made a determination, based on criteria published in the Federal Register (42 FR 10950) on February 24, 1977, that events involving an actual loss or significant reduction in the degree of protection against radioactive properties of source, special nuclear, and byproduct materials are abnormal occurrences.

This report to Congress is for the fourth calendar quarter of 1985. The report identifies the occurrences or events that the Commission determined to be significant and reportable; the remedial actions that were undertaken are also described. During the report period, there were two abnormal occurrences at the nuclear power plants licensed to operate. The first involved inoperable main steam isolation valves and the second involved management deficiencies at Fermi Nuclear Power Station. There were three abnormal occurrences at the other NRC licensees. Two involved diagnostic medical misadministrations and the other involved a therapeutic medical misadministration. There were no abnormal occurrences reported by the Agreement States.

The report also contains information updating some previously reported abnormal occurrences.

Interested persons may review the report at the NRC's Public Document Room, 1717 H Street, NW., Washington, DC or at any of the nuclear power plant Local Public Document Rooms throughout the country.

Copies or microfiche of NUREG-0090, Vol. 8, No. 4 (or any of the previous reports in this series), may be purchased by calling (202) 275–2060 or (202) 275–2171, or by writing to the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20012–7982. A year's subscription to the NUREG–0090 series publication, which consists of four issues, is also available. Documents may be purchased by check, money order, Visa, Mastercard, or charged to a GPO Deposit Account.

Copies of the report may also be purchased from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161.

Dated at Washington, DC, this 29th day of May 1986.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590–01–M

[Docket Nos. 50–456–OL 50–457–OL; ASLBP No. 79–410–03–OL]

Commonwealth Edison Co., (Braidwood Station, Unit Nos. 1 and 2); Hearing Changes

June 2, 1986.

Before Administrative Judges: Herbert Grossman, Chairman, Richard F. Cole, A. Dixon Callihan.

Please take notice that the evidentiary hearing in the matter of the Braidwood Station will move from the Circuit Court of Cook County to the College of St. Francis, in the President's Room and the Moe Room (connecting rooms), 500 North Wilcox Street, Joliet, Illinois 60435, for the weeks of June 9, 16 and 23, 1986. Thereafter, beginning with the week of June 30, 1986, it will return to the Circuit Court of Cook County.

The public is invited to attend all hearing sessions.

For the Atomic Safety and Licensing Board.

Herbert Grossman,

Chairman, Administrative Judge.

[FR Doc. 86–12763 Filed 6–5–86; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–275 and 50–323]

Pacific Gas and Electric Co.; Issuance of Amendments to Facility Operating Licenses and Final Determination of No Significant Hazards Consideration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 8 to Facility Operating License Nos. DPR–80, and Amendment No. 6 to Facility Operating License No. DPR–82, issued to Pacific Gas and Electric Company (the licensee), which revise the combined Technical Specifications for the Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2 (the facilities) located in San Luis Obispo County, California.

The amendments permit the expansion of the spent fuel storage capacity for the Diablo Canyon Nuclear Power Plant, Units 1 and 2, increasing the storage capacities from 270 to 1324 spaces for each of the two spent fuel pools. This expansion would be accomplished by reracking the existing spent fuel storage pools with new spent fuel racks composed of individual cells made of stainless steel. The new fuel storage racks will be arranged in two discrete regions within each pool. Region 1 will provide 290 poisoned cell locations which will normally be used for new fuel with an enrichment equal to or less than 4.5% U–235. Region 2 will provide 1034 unpoisoned cell locations which will provide normal storage for spent fuel assemblies with an initial enrichment equal to or less than 4.5% U–235 and meeting required burnup considerations in accordance with the amended Technical Specifications. The existing fuel storage racks have a nominal center-to-center spacing of 21 inch. The new racks will have a nominal 11 inch center-to-center spacing for both regions. The major components of the fuel racks are the fuel assembly cells, gap channels, rack base plate assembly including support legs, a girdle bar around the upper part of the rack assembly, and, in Region 1 only, neutron absorbing (poison) material Boraflex, including cover sheets. The fuel racks are designed to maintain the required subcriticality of K_{eff} equal to or less than 0.95 for Regions 1 and 2.

The letter requesting the license amendments, dated October 30, 1985 (LAR–85–13), includes the requested Technical Specification changes and the licensee's determination on significant hazards consideration. The supporting report on "Reracking of Spent Fuel Pools for Diablo Canyon Units 1 and 2" had been submitted to the staff by letter, dated September 19, 1985.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in these license amendments.

Notice of Consideration of Issuance of Amendments and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with this action was initially published in the Federal Register on January 13, 1986. (51 FR 1451), and in the bi-weekly publication on May 21, 1986 (51 FR 18609). A request

for hearing was filed by (1) Mothers for Peace on February 7, 1986, (2) Sierra Club-Santa Lucia Chapter on February 10, 1986, and (3) Consumers Organized for Defense of Environmental Safety (C.O.D.E.S.) on February 12, 1986.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from persons, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that these amendments involve no significant hazards consideration.

The basis for this determination is contained in the Safety Evaluation related to this action. Accordingly, as described above, these amendments have been issued and made immediately effective and any hearing will be held after issuance.

A separate Environmental Assessment has been prepared pursuant to 10 CFR Part 51. The Notice of Issuance of Environmental Assessment and Finding of No Significant Impact was published in the Federal Register (51 FR 19430) on May 29, 1986.

For further details with respect to the action see (1) the application for the amendments dated October 30, 1985 and additional information provided by the licensee in letters dated September 19, December 20, and December 24, 1985 and January 28 (2 letters), March 11 and April 24 (2 letters), 1986, (2) Amendment Nos. 8 and 6 to Facility Operating License Nos. DPR–80 and DPR–82, (3) the Commission's related Safety Evaluation and (4) Environmental Assessment and Notice of Issuance of Environmental Assessment and Finding of No Significant Impact. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at California Polytechnic State University Library, Documents and Maps Department, San Luis Obispo, California 93407. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of PWR Licensing-A.

Dated at Bethesda, Maryland, this 30th day of May 1986.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, PWR Project Directorate No. 3, Division of PWR Licensing-A, NRR.

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Inc.

June 2, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following securities:

Tonka Corporation
Common Stock, $0.66⅔ Par Value (File No. 7–8975)

Albertson's, Incorporated
Common Stock, $1.00 Par Value (File No. 7–8976)

James River Corporation of Virginia
Common Stock, $0.10 Par Value (File No. 7–8977)

Supermarkets General Corporation
Common Stock, $1.00 Par Value (File No. 7–8978)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 23, 1986, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 8010–01–M

[Release No. 35–24114]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

May 29, 1986.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by June 23, 1986 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit, or in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/

or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Public Service Company of New Mexico et al. (38–813)

The Public Service Company of New Mexico ("PNM"), Alvarado Square, Albuquerque, New Mexico 82158, a New Mexico corporation, and Sunbelt Mining Co., Inc. ("Sunbelt"), 1650 University Boulevard NE., Albuquerque, New Mexico 87106, a wholly owned New Mexico subsidiary of PNM, have filed with this Commission an application for an order (i) pursuant to section 3(a)(1) of the Act exempting a new holding company from provisions of the Act applicable to it as such and (ii) declaring that, upon the closing of the transactions described in the application, Sunbelt will not be an "electric utility company" under section 2(a)(3) of the Act.

PNM is engaged primarily in the production, transmission, distribution, and sale of electricity, natural gas, and water within the State of New Mexico. PNM makes off-system energy and capacity sales on a contingent basis to other utilities. None of PNM's subsidiaries is a "public utility company" as defined in section 2(a)(5) of the Act.

On December 1, 1985, the total assets of PNM and its subsidiaries, on a consolidated basis, were approximately $3,010,000,000, of which approximately $2,674,000,000 were utility assets attributable to electric and retail natural gas operations. Approximately $657,000,000 of these utility assets were attributable to PNM's investment in the Palo Verde Nuclear Generating Station ("PVNGS") and transmission facilities located in Arizona.

Sunbelt, a wholly owned subsidiary of PNM, either directly or through a subsidiary, conducts coal mining and natural gas gathering operations in New Mexico and holds substantial mineral interests in New Mexico, along with relatively minor interests in other states.

On May 20, 1986 the stockholders of PNM were asked to approve a corporate reorganization as a result of which a new holding company organized in New Mexico, would own all of the common stock of PNM. Thereafter, the stock of Sunbelt and another non-utility subsidiary and other non-utility assets would be transferred to the new holding company. PNM would continue to conduct its utility businesses without any other change in its functions or capital structure.

PNM is a 10.2% participant in PVNGS. It has sold to investors and leased back about 72% of PNM's 10.2% interest (including related common facilities) in Unit 1 of PVNGS, now in service, in transactions exempt under Rule 7(d). PNM proposes to sell its remaining 28% interest in PVNGS Unit 1 to Sunbelt, on substantially the same terms agreed upon in the earlier nonaffiliated sale/leaseback transactions. Sunbelt will purchase the interest through a trustee, which will arrange the long-term financing for the purchase. The trustee will also take actual title to the PVNGS Unit 1 interest. The trust will then lease the PVNGS Unit 1 interest back to PNM. Under the terms of the lease, neither the trustee nor Sunbelt will have any right of control over any aspect of the operation and maintenance of PVNGS Unit 1. PNM will be responsible for payment of all taxes, insurance premiums, and all other costs associated with the PVNGS Unit 1 interest. The obligation of PNM to make rental payments under the lease will be absolute and in no way based on revenue derived from power sales from PVNGS Unit 1, nor will it be contingent upon the actual operation of the facility.

Annual pre-tax lease income from rental payments to be made to Sunbelt under the proposed lease are not expected to exceed 5% of its 1985 gross revenues. Sunbelt will sell no electricity from any source whatsoever. Sunbelt's participation in the sale/leaseback is the subject of a pending application before the New Mexico Public Service Commission.

Jersey Central Power & Light Company (70–6923)

Jersey Central Power & Light Company ("JCP&L"), Madison Avenue at Punch Bowl Road, Morristown, New Jersey 07960, an electric utility subsidiary of General Public Utilities Corporation, a registered holding company, has filed a further post-effective amendment to its application in this proceeding pursuant to sections 9(a) and 10 of the Act.

By orders dated November 16, 1983, November 19, 1984, and July 30, 1985 (HCAR Nos. 23121, 23486, and 23773), JCP&L was authorized to acquire from time to time until December 31, 1989, up to $2,000,000 of obligations of its customers and to incur up to $60,000 of administrative and other related expenses pursuant to the SOLAR, HELP, and Electric Heat Conversion Programs. As a result of the great interest recently shown by its customers in participating in such energy conservation programs and the projections of future participation, JCP&L now proposes to acquire an aggregate amount of obligations of its customers for such programs through December 31, 1989, of up to approximately $15 million and will incur aggregate administrative expenses in the amount of up to approximately $200,000. Interest on the loans will range between zero percent and the prevailing market rate, depending upon the income level of the customer. The amount and term for repayment of each such loan will range up to a maximum of $6,000 and eight years, respectively.

Georgia Power Company (70–7192)

Georgia Power Company ("Georgia"), 333 Piedmont Avenue, NE., Atlanta, Georgia 30308, an electric utility subsidiary of the Southern Company, a registered holding company, has filed an amendment to its application-declaration filed with this Commission pursuant to sections 6(b) and 12(c) of the Act and Rules 42 and 50 thereunder.

A notice was issued (HCAR No. 24005, January 28, 1986) with regard to Georgia's proposal to finance certain pollution control facilities in the State of Georgia and/or to issue and sell up to $550 million of first mortgage bonds ("New Bonds"). Georgia, by amendment, now proposes that the restriction on common stock dividends and distributions to be contained in each Supplemental Indenture relating to the New Bonds be identical to that set forth in the Supplemental Indenture, dated June 1, 1984, relating to its outstanding first mortgage bonds of the 16% Series due in 2014. Thus, Georgia proposes: (i) To use March 31, 1984, rather than the respective dates of issuance of the series of the New Bonds, as the starting date for accumulation of earned surplus; and (ii) to use $302 million as the annual dividends allowance.

For the Commission, by the Division of Investment Managment, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 4910-62-M

Federal Aviation Administration

Policy on Use of Airport Improvement Program Discretionary Funds

AGENCY: Federal Aviation Administration (FAA), DOT.

POLICY: The FAA will consider a public airport sponsor's use of airport revenues to support non-aviation transportation facilities in assessing requests for Federal discretionary grant assistance available under the Airport Improvement Program (AIP) as authorized by the Airport and Airway Improvement Act of 1982 (AAIA). Such diversion of funds from airport use is viewed as evidence of the sponsor's ability to fund airport projects without discretionary aid.

The policy is not applicable to AIP apportionment funds provided to sponsors of primary commercial service airports or to airport sponsors receiving only state apportionment funds.

Background

Section 511(a)(12) of the AAIA requires that sponsors of airport development projects assure that all revenues generated by the airport, if it is a public airport, be expended for the capital or operating costs of the airport or the local airport system. This section, however, does allow airport revenues to be used for other local (non-aviation) facilities which are owned or operated by the owner or operator of the airport and directly related to the actual transportation of passengers or property. Since the demand for discretionary money available under section 507(a)(3) of the AAIA far exceeds the discretionary money available in any given year, FAA has determined that it is appropriate to consider the airport sponsor's use of airport revenues to fund non-aviation transportation facilities as evidence that the sponsor has the ability to fund

airport projects without Federal discretionary airport grant assistance.

DATE: This policy is effective immediately for AIP projects which have not yet received an allocation of funds.

FOR FURTHER INFORMATION CONTACT: Mr. Edgar M. Williams, Manager, Program Guidance Branch, APP–510, Office of Airport Planning and Programming, Federal Aviation Administration, 800 Independence Avenue, Room 619, Washington, DC 20591, Telephone: (202) 426–3857.

Issued in Washington, DC on June 2, 1986.

Paul L. Galis,

Director, Office of Airport Planning and Programming.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 5:00 p.m. on Friday, May 30, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in Banco de Ahorro, F.S.B., Mayaquez, Puerto Rico, which was closed by the Federal Home Loan Bank Board on Friday, May 30, 1986; (2) accept the bid for the transaction submitted by Banco Popular de Puerto Rico, San Juan (Hato Rey), Puerto Rico, an insured State nonmember bank; (3) approve the application of Banco Popular de Puerto Rico, San Juan (Hato Rey), Puerto Rico, for consent to purchase certain assets of an assume the liability to pay deposits made in Banco de Ahorro, F.S.B., Mayaquez, Puerto Rico, and for consent to establish the five offices of Banco de Ahorro, F.S.B. as branches of Banco Popular de Puerto Rico; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Mr. Michael Patriarca, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting purusant to subsections (c)(B), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was recessed at 5:03 p.m., and at 8:42 p.m. that same day the meeting was reconvened, by telephone conference call, at which time the Board of Directors:

(A) Adopted a resolution: (1) Making funds available for the payment of insured deposits made in The First National Bank and Trust Company of Norman, Norman, Oklahoma, which had been closed by the Senior Deputy Comptroller for Bank Supervision, Office of the Comptroller of the Currency, on Thursday, May 29, 1986, (2) accepting the bid of The Liberty National Bank and Trust Company of Oklahoma City, Oklahoma City, Oklahoma, for the transfer of the insured and fully secured or preferred deposits of the closed bank, and (3) designating The Liberty National Bank and Trust Company of Oklahoma City, Oklahoma City, Oklahoma, as the agent for the Corporation for the payment of insured and fully secured or preferred deposits of the closed bank; and

(B)(1) received bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in Bank of Columbia Falls, Columbia Falls, Montana, which was closed by the Commissioner for Financial Institutions for the State of Montana on Friday, May 30, 1986; (2) accepted the bid for the transaction submitted by First Citizens Bank National Association, Columbia Falls, Montana, a newly-chartered national bank subsidiary of Citizens Development Company, Billings, Montana; and (3) provided such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In reconvening the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Mr. Dean S. Marriott, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not required consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: June 3, 1986.

Federal Deposit Insurance Corporation.

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 9:00 a.m. on Tuesday,

June 3, 1986, the Corporation's Board of Directors determined, on motion of Chairman L. William Seidman, seconded by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of a memorandum and resolution regarding petitions to reconsider certain prohibition governing securities subsidiaries and affiliates contained in Part 337 of the Corporation's rules and regulations, entitled "Unsafe or Unsound Banking Practices."

By the same majority vote, the Board further determined that no notice earlier than May 29, 1986 of this change in the subject matter of the meeting was practicable.

The Board further determined, by the same majority vote, that Corporation business required the withdrawal from the agenda for consideration in open session and the addition to the agenda for consideration at the Board's closed meeting held at 9:30 a.m. the same day, of a summary audit report re: Trend Analysis of Liquidation Site Audit Results (memorandum dated May 14, 1986).

In voting to move this matter from open session to closed session, the Board further determined, by the same majority vote, that the public interest did not require consideration of the matter in a meeting open to public observation; that the matter could be considered in a closed meeting by authority of subsection (c)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2)); and that no earlier notice of this change in the subject matter of the meeting was practicable.

Dated: June 3, 1986.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 9:30 a.m. on Tuesday, June 3, 1986, the Corporation's Board of Directors determined, on motion of Chairman L. William Seidman, seconded by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:
Memorandum and Resolution re:
National Bank and Trust Company of Traverse City, Traverse City, Michigan

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable.

BILLING CODE 6717-01-M

6

FEDERAL RESERVE SYSTEM, BOARD OF GOVERNORS

TIME AND DATE: 2:30 p.m., Wednesday, June 11, 1986.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Proposed joint policy statement regarding basic banking services by depository institutions.
2. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Dated: June 4, 1986.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 86–12944 Filed 6–4–86; 400 pm]

FEDERAL RESERVE SYSTEM, BOARD OF GOVERNORS

TIME AND DATE: Approximately 3:30 p.m., Wednesday, June 11, 1986, following a recess at the conclusion of the open meeting.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federl Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: June 4, 1986.

James McAfee,

Associate Secretary of the Board.

Department of Labor

Employment Standards Administration

20 CFR Part 10

Claims for Compensation Under the Federal Employees' Compensation Act; Notice of Proposed Rulemaking

BEST COPY AVAILABLE

DEPARTMENT OF LABOR

Employment Standards Administration

20 CFR Part 10

Claims for Compensation Under the Federal Employees' Compensation Act

AGENCY: Employment Standards Administration, Labor.

ACTION: Notice of proposed rulemaking; request for comment.

SUMMARY: The Department of Labor proposes to revise the regulations governing the administration of the Federal Employees' Compensation Act (FECA), which provides benefits to Federal employees injured or killed in the performance of duty. In the process, regulations will be issued governing special categories of employees, sections will be amended which have proven ineffective, the terminology and usage in the existing regulations will be made current, and provisions governing the release of information (Privacy Act and Freedom of Information Act) will be updated. The chief effects of the proposed rulemaking will be to make the claims process clearer and more orderly, to standardize the application of the Federal Employees' Compensation Act to classes of employees not previously expressly covered and to make more specific the duties and responsibilities of the various parties in the claims process. Major new provisions include restricting the procedures for using COP, defining the term "subluxation," reducing monetary compensation for failure or refusal to participate in vocational rehabilitation plan development efforts, and defining the procedures for declaring and waiving overpayments.

DATE: Written comments must be submitted on or before July 21, 1986.

ADDRESS: Send written comments to Thomas M. Markey, Associate Director for Federal Employees' Compensation, Employment Standards Administration, U.S. Department of Labor, Room S–3229, Frances Perkins Building, 200 Constitution Avenue NW., Washington, DC 20210; Telephone (202) 523–7552.

FOR FURTHER INFORMATION CONTACT: Thomas M. Markey, Associate Director for Federal Employees' Compensation, Telephone (202) 523–7552.

SUPPLEMENTARY INFORMATION: The FECA provides compensation for wage loss, medical care, and vocational rehabilitation to Federal employees who are injured in the performance of their duties, or who develop illness as a result of factors of their Federal employment, as well as monetary benefits to the survivors of employees who are killed in the performance of duty or die as the result of factors of their Federal employment. The FECA was last amended in 1974, at which time some sweeping changes were made in the benefits structure. The regulations which were promulgated in 1975 to accommodate the changes have been subjected to intense scrutiny in the intervening ten years. As a result of this review, the Department of Labor has determined that many areas of the regulations would benefit from either greater definition or thorough revision.

Recognition of the problems of the FECA and its regulations has existed for years. Various agencies, including the General Accounting Office (GAO), the Department of Labor's Inspector General, the OWCP Interagency Task Force and the United States Postal Service among others, have identified deficiencies in the regulations and procedures as well as in the FECA itself, and have made recommendations and suggestions for improving the operation of the program. While many of the recommended changes require legislation, the Department has determined that in the absence of new legislation, a majority of the desired improvements can be made by revision of the existing regulations. The summary of the proposed changes which follows addresses the major areas of concern. Other changes are intended to bring the wording of the regulations into conformity with current practice or usage.

Subpart A is revised to delete reference to employees of the District of Columbia, who are no longer covered by the FECA, and to substitute the Panama Canal Commission for the Panama Canal Company and Canal Zone Government (5 U.S.C. 8146; E.O. 12215). Sections dealing with the release of records and the Privacy Act are amended to conform with the general regulatory provisions issued by the Department (29 CFR Part 70 and 70a). Section 10.5 is amended to include the meanings of words and terms commonly used but previously left undefined and to clarify terms already defined.

Subpart B is amended to make more explicit the requirements for filing claims for compensation and the responsibilities of the claimant, the employing agency and the Office of Workers' Compensation Programs (OWCP). The experience of OWCP as confirmed by investigative reports from GAO and the Office of the Inspector General and the observations of numerous employing agencies, is that the existing regulations are too vague. In addition, many provisions in the existing regulations do not accurately reflect the most desirable or expedient means of furthering a claim to adjudication. Some time frames for the submission and processing of forms have been changed to bring them into concert with Program experience under optimum conditions as observed in client agencies. The combined effects of delineating responsibilities and establishing realistic time limits will result in a faster, easier and more equitable adjudication process.

Agencies should note that sections dealing with the obligations of the injured employee and the employing agency in cases of partial disability have been expanded to accommodate the need for explicit directions for returning the injured worker to gainful employment as soon as possible. In prescribing the steps to be taken, the proposal allocates the responsibilities equitably and assures that both the claimant and the employing agency are involved in preserving the worker's position as a Federal employee while permitting the healing process to continue without detrimental effect on the employee.

There was also found to be a lack of adequate and effective sanctions when a permanently disabled employee refuses or fails to participate or continue participation in the early but necessary phases (plan development) of a directed vocational rehabilitation effort. In the early phases of the rehabilitation effort, no decision as to suitable vocational rehabilitation program has been made, no specific program has been offered, and little or no information about the claimant's aptitudes, knowledge, and skills is available to allow the Office to find that participation would increase the claimant's earning capacity. Thus, where the injured employee fails or refuses to cooperate and participate in the early phases of the rehabilitation effort, the Office's ability to apply the existing sanction (i.e., 5 U.S.C. 8113(b)) is hampered. However, to be consistent in the sanction to be applied, § 10.124 as proposed will provide that, lacking evidence to the contrary participation in a directed vocational rehabilitation effort is expected to result in a return to work with no loss of wage-earning capacity, and that where a permanently disabled employee fails or refuses to undergo vocational rehabilitation, reduction of monetary compensation will be made under 5 U.S.C. 8113(b) on that basis.

With regard to the necessary proof for continuing entitlement to benefits or augmented benefits, the sections for

both death and disability claims have been revised. For example, § 10.125 and § 10.127 as proposed would clarify the need for periodic reports of earnings and medical status in disability claims as well as for such proofs of continued entitlement as certification of school enrollment for dependent beneficiaries in death claims.

Provisions for the appellate process have been revised to make clear that there is no entitlement to a hearing on a decision of the Office if the claimant first requests a reconsideration of the claim (20 CFR 10.131, as proposed). (See Barney L. Bailey, Jr., 33 ECAB 1243.) In addition, § 10.137 as proposed defines the circumstances under which it shall be deemed that a claimant has abandoned a request for a hearing. In order to provide quicker decisions at this level of the appellate process, § 10.131 as proposed would give a claimant the opportunity to request a hearing on the written record in lieu of an oral hearing. Provisions governing subpoenas, and fees and mileage for subpoenaed witnesses have also been added (§ 10.134).

A major new provision governs the right of an employing agency to attend a hearing requested by one of its employees solely in an observer capacity (§ 10.135). In addition, § 10.140 as proposed makes more explicit the responsibility of an employing agency to submit all relevant and probative factual and medical evidence which it may possess or acquire. These changes have been made in recognition of the role of the employing agency in the claims process, both as a provider of information and as the instrumentality which bears the cost of injury claims. Furthermore, the proposed revisions provide that if an office accepts a claim which has initially been controverted by an employing agency, the office will provide the agency with the reasons for accepting the claim. Such participation will assure full development of claims without resort to adversarial proceedings.

In order to limit what is currently an open-ended process, and to encourage claimants to submit fully documented and prompt requests for reconsideration, § 10.138 as amended provides for review of a decision denying or terminating a benefit provided the application for review is filed within one year of the date of the decision.

A new §§ 10.160—10.166 dealing with the requirements for representative payment has been added in response to inquiries from oversight bodies. The proposal seeks to define the circumstances under which a representative payee may be chosen and the responsibilities of the payee for ensuring proper disbursement of monies received and for reporting to the Office on the disposition of such payments.

Subpart C dealing with Continuation of Pay (COP) as authorized by 5 U.S.C. 8118 has been significantly revised to reflect ten years' experience with a novel provision of the compensation program as well as to reflect the improved claims processing times of the Office. The time for initiating use of COP has been shortened from six months to 90 days from the date of injury. The Department has determined that the six month period was unrealistically remote in time from the occurrence of an injury to the onset of first disability for continuation of pay purposes. In a related change, the period for using COP days remaining after the first return to duty has been shortened from six months to 90 days.

Under § 10.204 as proposed, the employing agency will be authorized to terminate COP if medical evidence substantiating disability is not submitted within 10 days of the filing of a claim for COP, including such claim for recurrence of disability. COP will not be continued where an injured employee refuses suitable alternative duties nor where an employee's period of employment would otherwise be terminated.

As provided in Subpart B for periods of compensable disability, Subpart C will be amended to state explicitly the responsibilities of the claimant and the employing agency during the COP period for completion of forms, submission of evidence and the provision and acceptance of suitable employment during periods of disability for the employee's regular duties. These provisions will eliminate much uncertainty about the purpose of COP and the conditions under which it is payable. Communications between the agency and the employee will be improved, and return to duty will be facilitated.

Subpart D has been amended to incorporate the formula for determining a partially disabled employee's wage earning capacity and the basis for establishing cost-of-living increases. Neither provision is new to the program, and each reflects the practice currently in use by the Office as established either by sanction of the Employees' Compensation Appeals Board or by statute.

It should be noted that the section dealing with overpayments has been greatly expanded to inform beneficiaries of their rights to due process when an overpayment occurs. We have included the basis for requesting waiver, definitions of "equity and good conscience," and circumstances where recovery would defeat the purpose of the FECA. The effect is to bring OWCP into concert with other Federal benefits programs in its handling of overpayments.

Subpart E, which was substantially revised in May 1984 (49 FR 18976–80), is further revised to include a definition of the term "subluxation" (§ 10.400). This change has been made to provide a definition usable by both chiropractors and other physicians. Also, a time limitation on the payment of medical and related expenses submitted by injured Federal employees and medical providers has been added (§ 10.413).

Subpart F dealing with the exclusion of physicians and other providers of medical services and supplies remains unchanged.

Subpart G dealing with identification and recovery of liability by a third party remains substantially unchanged, the primary revision being made for the purposes of clarity and conformity with current usage.

Subpart H has been added, and contains provisions applicable to special classes of employees which were not covered by explicit regulations in the past. The three categories are Peace Corps Volunteers, which were designated Federal employees by the Peace Corps for the purpose of injury and disability compensation (5 U.S.C. 8142); non-Federal law enforcement officers who in certain circumstances are eligible for benefits comparable to what an injured Federal employee would receive (5 U.S.C. 8191), and Federal grand and petit jurors who are afforded the protection of the Act while engaged in certain activities in connection with their duties as jurors (5 U.S.C. 8101(1)(F); 28 U.S.C. 1877). At the present time these beneficiaries are covered solely by means of internal procedures.

The Office of Workers' Compensation Programs has studied the regulations of various other Federal agencies to ascertain how they address particular issues. Where practical, the proposed regulations have been drafted consistent with those of other agencies, especially when providing due process. We have examined the current regulations to determine whether we might best make only minor changes and have concluded that the Program and its beneficiaries would profit from a comprehensive review of all provisions. We believe that the proposed rules will accomplish the major objectives of the FECA and the Program at this time and will correct problems which have come to light since

1975 when the regulations were promulgated.

Classification—Executive Order 12291

The Department of Labor does not believe that the regulatory proposal constitutes a "major rule" under Executive Order 12291, because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in cost or prices for consumers, individual industries, Federal, state or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory analysis is required.

Paperwork Reduction Act

The information collection requirements entailed by the proposed regulations will not differ significantly from those currently in effect. No new forms are required. All forms that are referenced have been submitted previously for approval by the Office of Management and Budget where required.

Regulatory Flexibility Act

The Department believes that the rule will have "no significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Pub. L. 96-354, 81 Stat. 1164 (5 U.S.C. 605(b)). The proposed regulations apply primarily to Federal agencies and their employees. No additional burdens are being imposed on small entities, in this case, medical providers and physicians. The Under Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. Accordingly, no regulatory impact analysis is required.

List of Subjects in 20 CFR Part 10

Claims, Government employees, Archives and records, Health records, Freedom of information, Privacy, Penalties, Health profession, Workers' compensation, Employment, Administrative practices and procedures, Wages, Health facilities, Dental health, Medical devices, Health care, Lawyers, Legal services, Student, X-rays, Labor, Insurance, Kidney diseases, Lung diseases, and Tort claims.

Accordingly, it is proposed that 20 CFR Part 10 be amended as set forth below.

1. The authority citation for 20 CFR Part 10 is revised to read as follows:

Authority: 5 U.S.C. 301; Reorg. Plan No. 6 of 1950, 15 FR 3174, 64 Stat. 1263; 5 U.S.C. 8145, 8149; Secretary's Order 6-84, 49 FR 32473; Employment Standards Order 78-1, 43 FR 51466.

2. By revising the table of contents of Part 10 to read as follows:

PART 10—CLAIMS FOR COMPENSATION UNDER THE FEDERAL EMPLOYEES' COMPENSATION ACT, AS AMENDED

Subpart A—General Provisions

Introduction

Sec.
10.1 Statutory provision.
10.2 Administration of the Act and this chapter.
10.3 Purpose and scope of this part.
10.4 Applicability of other parts within this chapter.
10.5 Definitions and use of terms.

Information in Program Records

10.10 Custody of records relating to Federal Employees' Compensation Act matters.
10.11 Confidentiality of records relating to Federal Employees' Compensation Act matters.
10.12 Protection, release, inspection and copying of records.

Miscellaneous Provisions

10.20 Forms.
10.21 Waiver of compensation rights invalid.
10.22 Exclusiveness of remedy.
10.23 Penalties.

Subpart B—Notice of Injury and Claim for Compensation, Administrative Procedures

Notice of Injury or Death

10.100 How to file a notice of injury or death.
10.101 When a notice of injury or death must be given.
10.102 Report of injury by the official superior.
10.103 Report of death by the official superior.
10.104 Report of the attending physician.

Claims for Compensation

10.105 Time for filing a claim for compensation.
10.106 How to file a claim for disability compensation.
10.107 Application for augmented compensation for disability.
10.108 How to file an original claim for death benefits.
10.109 Claims for balance of schedule awards unpaid at death when death is due to other causes.

Evidence

10.110 Burden of proof.
10.111 Submission of other evidence.

Termination and Continuation of Eligibility

10.120 Report of termination of disability or return to work.
10.121 Recurrence of disability.
10.122 Claim for continuing compensation for disability.
10.123 Official superior's responsibilities in returning the employee to work.
10.124 Employee's obligation to return to work or to seek work when able.
10.125 Affidavit or report by employee of employment and earnings.
10.126 Claims for continuing compensation for death.
10.127 Continuation of compensation for a child, brother, sister, or grandchild who has reached the age of 18.
10.128 Termination of right to compensation for death; reapportionment of compensation.

Determination of Claims, Hearing and Review Procedures

10.130 Processing of claims.
10.131 Request for a hearing.
10.132 Time and place of hearing; prehearing conference.
10.133 Conduct of hearing.
10.134 Subpoenas; witness fees.
10.135 Employing agency attendance at hearings and submission of evidence.
10.136 Termination of hearing; release of decision.
10.137 Postponement; withdrawal or abandonment of request for hearing.
10.138 Review of decision.
10.139 Review by Employees' Compensation Appeals Board.
10.140 Participation in claims process by employing agency.
10.141 Representation of the Director.
10.142 Representation of claimants.
10.143 Qualification of representative.
10.144 Authority of representative.
10.145 Fees for services.
10.146 [Reserved]
10.147 [Reserved]
10.148 [Reserved]
10.149 [Reserved]
10.150 Statement relative to substantive rules.

Representative Payment

10.160 Indications for designation of a representative payee.
10.161 Selection of a payee.
10.162 Responsibilities of a representative payee.
10.163 Use of benefit payments.
10.164 Conservation and investment of benefit payments.
10.165 Termination of representation.
10.166 Accounting for benefit payments.

Subpart C—Continuation of Pay

General

10.200 Statutory provisions.

Procedures

10.201 Right to continuation of pay.
10.202 Election of annual or sick leave.
10.203 Controversion by employing agency.
10.204 Termination and forfeiture of continuation of pay.

10.205 Pay defined for continuation of pay purposes.
10.206 Agency accounting and reporting of continuation of pay.

Official Superior's and Beneficiary's Responsibilities

10.207 Official superior's responsibility in continuation of pay cases.
10.208 Recurrence of disability.
10.209 Employee's responsibilities in continuation of pay cases.

Subpart D—Payment of Compensation

Compensation Rates

10.300 Maximum and minimum compensation rates.
10.301 Temporary total disability rate.
10.302 Permanent total disability rate.
10.303 Partial disability rate.
10.304 Schedule compensation rate.
10.305 Attendant allowance.
10.306 Eligibility for death benefits and death benefit rates.
10.307 Burial and transportation benefits.

Adjustment to Benefits

10.310 Buy back of annual or sick leave.
10.311 Lump sum awards.
10.312 Assignment of claims; claims of creditors.
10.313 Dual benefits.
10.314 Cost-of-living adjustments.

Overpayments

10.320 Definitions.
10.321 Recovery of overpayments.
10.322 Waiver of recovery-defeat the purpose of the subchapter.
10.323 Waiver of recovery—against equity and good conscience.
10.324 Responsibility for providing financial information.

Subpart E—Furnishing Medical Treatment

10.400 Physician and medical services, etc. defined.
10.401 Medical treatment, hospital services, transportation, etc.
10.402 Official authorization for treatment.
10.403 Medical treatment in doubtful cases.
10.404 Emergency treatment.
10.405 Medical treatment if symptoms or disability recur.
10.406 Authority for dental treatment.
10.407 Medical examinations.
10.408 Medical referee examination.
10.409 Furnishing of orthopedic and prosthetic appliances, and dental work.
10.410 Recording and submission of medical reports.
10.411 Submission of bills for medical services, appliances and supplies.
10.412 Reimbursement for medical expenses, transportation costs, loss of wages, and incidental expenses.
10.413 Time limitation on payment of bills.

Subpart F—Exclusion of Physicians and Other Providers of Medical Services and Supplies

10.450 Exclusion for fraud and abuse: Grounds.
10.451 Automatic exclusion.
10.452 Initiation of exclusion procedures.
10.453 Requests for a hearing.
10.454 Hearings and recommended decision.
10.455 Final decision.
10.456 Effects of exclusion.
10.457 Reinstatement.

Subpart G—Cases Involving the Liability of a Third Party

10.500 Prosecution of third party action by a beneficiary.
10.501 Assignment of third party.
10.502 Refusal to assign or prosecute claim when required; effect.
10.503 Distribution of damages recovered by a beneficiary.
10.504 Distribution of damages where cause of action is assigned.
10.505 Office may require beneficiary to settle or compromise third party suit.
10.506 Official superior's responsibility in cases involving potential third party liability.
10.507 Satisfaction of the interest of the United States.

Subpart H—Special Category Employees

Peace Corps Volunteers

10.600 Definition of volunteer.
10.601 Applicability of the Act.
10.602 When disability compensation commences.
10.603 Monthly pay for compensation purposes.
10.604 Period of service as a volunteer.
10.605 Conditions of coverage while serving outside the United States and the District of Columbia.

Non-Federal Law Enforcement Officers

10.610 Definition of a law enforcement officer.
10.611 Applicability.
10.612 Conditions for eligibility.
10.613 Time for filing a claim.
10.614 How to file a notice of injury or death.
10.615 Benefits.
10.616 Computation of benefits.
10.617 Responsibilities of the claimant, the employing agency and the Office.
10.618 Consultation with Attorney General and other agencies.
10.619 Cooperation with State and local agencies.

Federal Grand and Petit Jurors

10.620 Definition of juror.
10.621 Applicability.
10.622 Performance of duty.
10.623 When disability compensation commences.
10.624 Pay rate for compensation purposes.

3. By revising § 10.1 to read as follows:

§ 10.1 Statutory provisions.

(a) The Federal Employees' Compensation Act, as amended (5 U.S.C. 8101 *et seq.*) provides for the payment of workers' compensation benefits to civilian officers and employees of all branches of the Government of the United States. The Act has been amended and extended a number of times to provide workers' compensation benefits to volunteers in the Civil Air Patrol (5 U.S.C. 8141), members of the Reserve Officer Training Corps (5 U.S.C. 8140), Peace Corps Volunteers (5 U.S.C. 8142), Job Corps enrollees and Volunteers in Service to America (5 U.S.C. 8143), members of the National Teachers Corps (5 U.S.C. 8143a), certain student employees (see 5 U.S.C. 5351, 8144), employees of the Panama Canal Commission and certain employees of the Alaska Railroad (see 5 U.S.C. 8146), certain law enforcement officers not employed by the United States (see 5 U.S.C. 8191–8193), and various other classes of persons who provide or have provided services to the Government of the United States.

(b) The Act provides for the payment of compensation for wage loss and for permanent impairment of specified members and functions of the body incurred by employees as a result of an injury sustained while in the performance of their duties in service to the United States. In addition to monetary compensation, eligible employees are entitled to receive, at reasonable expense to the United States, medical and related services made necessary by the compensable condition. In appropriate cases, vocational rehabilitation services shall be provided to eligible beneficiaries.

(c) The Act also provides for the payment of monetary compensation to specified survivors of an employee whose death is the result of an employment-related injury and for payment of certain burial expenses subject to the provisions of 5 U.S.C. 8134.

(d) Each of the types of benefits and conditions of eligibility enumerated in this section is subject to the applicable provisions of the Act and the provisions of this part. This secton shall not be construed to modify or enlarge upon the provisions of the Act.

4. By revising § 10.2(b) to read as follows:

§ 10.2 Administration of the Act and this chapter.

* * * * *

(b) In the case of employees of the Panama Canal Commission, the Federal Employees' Compensation Act is administered by the Panama Canal Commission and inquiries pertaining to such coverage should be directed to that Commission.

5. By revising § 10.3 to add a new paragraph (i) which reads as follows:

§ 10.3 Purpose and scope of this part.

* * * * *

(i) Subpart H of this part contains rules for particular groups of employees whose status requires special application of the provisions of the Act.

6. By revising § 10.4 to read as follows:

§ 10.4 Applicability of other parts within this chapter.

This revised Part 10 is applicable to Part 25 of this chapter except as modified by Part 25.

7. In § 10.5, paragraphs (a)(6), (a)(11)(iv) through (xx), (a)(12), and (a)(14) through (a)(20) are revised; paragraphs (a)(21) through (a)(28) are added; paragraph (b) is revised, and paragraphs (c) and (d) are removed to read as follows:

§ 10.5 Definitions.

(a) * * *

(6) "Benefits" or "Compensation" means the money paid or payable under the Act to the employee on account of loss of wages or loss of wage-earning capacity and to enumerated survivors on account of the employee's death, and includes any other benefits paid for from the Employee's Compensation Fund such as scheduled compensation under 5 U.S.C. 8107, medical diagnostic and treatment services supplied pursuant to the Act and this part, vocational rehabilitation services, additional money for services of an attendant or for vocational rehabilitation under 5 U.S.C. 8111, and funeral expenses under 5 U.S.C. 8134, but does not include continuation of pay as provided by 5 U.S.C. 8118.

* * * * *

(11) * * *

(iv) An individual appointed to a position on the office staff of a former President under section 1(b) of the Act of August 25, 1958 (72 Stat. 838);

(v) An individual selected pursuant to Chapter 121 of Title 28, United States Code, and serving as a petit or grand juror;

(vi) Members of the Reserve Officers Training Corps;

(vii) Civil Air Patrol Volunteers;

(viii) Peace Corps Volunteers and volunteer leaders;

(ix) Job Corps enrollees;

(x) Youth Conservation Corps enrollees;

(xi) Volunteers in Service to America;

(xii) Members of the National Teachers Corps;

(xiii) Members of the Neighborhood Youth Corps;

(xiv) Student employees as defined in 5 U.S.C. 5351;

(xv) Employees of the Panama Canal Commission;

(xvi) Certain employees of the Alaska Railroad;

(xvii) Law enforcement officers not employees of the United States and Federal law enforcement officers who are pensioned or pensionable under sections 521–535 of Title 4, District of Columbia Code;

(xviii) An individual covered under the provisions of section 105(e)(1) of Pub. L. 93–638 (Indian Self-Determination and Education Assistance Act of 1975); and,

(xix) Other persons performing service for the United States within the purview of the Act and all acts in amendment, substitution or extension thereof;

(xx) But does not include:

(A) A commissioned officer of the Regular Corps of the Public Health Service;

(B) A commissioned officer of the Reserve Corps of the Public Health Service on active duty;

(C) A commissioned officer of the Environmental Science Services Administration.

(12) "Official Superior" means officers and employees having responsibility for the supervision, direction or control of employees, or other employees of the agency designated by the employing agency to carry out the responsibilities vested in the agency under the Act and this subpart.

(13) * * *

(14) "Injury" means a wound or condition of the body induced by accident or trauma, and includes a disease or illness proximately caused by the employment for which benefits are provided under the Act. The term "injury" includes damage to or destruction of medical braces, artificial limbs, and other prosthetic devices which shall be replaced or repaired; except that eyeglasses and hearing aids shall not be replaced, repaired, or otherwise compensated for, unless the damage or destruction is incident to a personal injury requiring medical services.

(15) "Traumatic injury" means a wound or other condition of the body caused by external force, including stress or strain, which is identifiable as to time and place of occurrence and member or function of the body affected. The injury must be caused by a specific event or incident or series of events or incidents within a single work day or work shift.

(16) "Occupational disease or illness" means a condition produced by systemic infections; continued or repeated stress or strain; exposure to toxins, poisons, fumes, etc., or other continued or repeated exposure to factors or conditions of the work environment over a period of time longer than a single work day or shift.

(17) "Disability" means the incapacity, because of employment injury, to perform the duties of the position held at the time of injury.

(18) "Temporary aggravation" means that factors of employment have directly caused an underlying or pre-existing condition, disease or illness to be more severe for a definite limited period of time and thereafter leaves no greater impairment than existed prior to the employment injury.

(19) "Impairment" means any anatomic or functional abnormality or loss. A permanent impairment is any such abnormality or loss after maximum medical improvement has been achieved.

(20) "Pay rate for compensation purposes" means the employee's pay, as determined under section 8114 of the Act, at the time of injury, or at the time disability begins, or at the time compensable disability recurs if the recurrence begins more than 6 months after the injured employee resumes regular full-time employment with the United States, whichever is greater, except as otherwise determined under section 8113 of the Act with respect to any period.

(21) "Organ" means a part of the body that performs a special function, and for purposes of this part excludes the brain, heart and back.

(22) "United States Medical Officers and Hospitals" includes medical officers and hospitals of the Army, Navy, Air Force, Veterans Administration, and United States Public Health Service, and any other medical officers or hospitals designated as a United States medical officer or hospital by the Secretary.

(23) "Representative" means a person authorized by a claimant in writing to act for the claimant in connection with a claim or proceeding under the Act or this part.

(24) "Surviving spouse" means the husband or wife living with or dependent for support on a deceased employee at the time of his or her death, or living apart for reasonable cause or because of his or her desertion.

(25) "Student" means an individual under 23 years of age who has not completed 4 years of education beyond the high school level and who is regularly pursuing a full-time course of study or training at an institution which is—

(i) A school or college or university operated or directly supported by the United States, or by any State or local

government or political subdivision thereof; or

(ii) A school or college or university which has been accredited by a State or by a State-recognized or nationally recognized accrediting agency or body; or

(iii) A school or college or university not so accredited but whose credits are accepted on transfer by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an accredited institution; or

(iv) A technical, trade, vocational, business, or professional school accredited or licensed by the Federal or a State government or any political subdivision thereof providing courses of not less than 3 months duration, that prepares the individual for a livelihood in a trade, industry, vocation, or profession.

An individual continues to be a student during any interim between school years if the interim does not exceed 4 months and the individual shows to the satisfaction of the Office that he or she has a bona fide intention of continuing to pursue a full-time course of education or training during the semester or other enrollment period immediately after the interim, or during periods of reasonable duration during which, in the judgment of the Office, the individual is prevented by factors beyond his or her control from pursuing his or her education. A student whose 23rd birthday occurs during a semester or other enrollment period is deemed a student until the end of the semester or other enrollment period.

(26) "A year beyond the high school level" means—

(i) The 12-month period beginning the month after the individual graduates from high school, provided he or she has indicated an intention to continue schooling within 4 months of high school graduation, and each successive 12-month period in which there is school attendance or the payment of compensation based on student attendance, or

(ii) If the individual has indicated that he or she will not continue schooling within 4 months of high school graduation, the 12-month period beginning with the month that the individual enters school to continue his or her education, and each successive 12-month period in which there is school attendance or the payment of compensation based on student status.

(b) *Dependents and survivors.* In addition to basic disability benefits for employees the Act provides in section 8133 that certain monthly benefits shall be payable to certain enumerated survivors of employees who have died from an injury sustained in the performance of duty. Section 8110 of the Act provides that any employee who is found eligible for a basic benefit shall be entitled to have such a basic benefit augmented at a specified rate for certain persons living in the beneficiary's household or who are dependent upon the beneficiary for support. The provisions of 5 U.S.C. 8101, 8110, and 8133 defining the nature of such survivorship or dependency necessary to qualify a beneficiary for a survivor's benefit or augmented benefit shall be applicable as appropriate to the provisions of this part.

8. By revising § 10.10 to read as follows:

§ 10.10 Custody of records relating to Federal Employees' Compensation Act matters.

All records, medical and other reports, statements of witnesses and other papers relating to the injury or death of a civil employee of the United States or other person entitled to compensation or benefits from the United States under the Act and all amendments and extensions thereof, are the official records of the Office and are not records of the agency, establishment or department making or having the care or use of such records.

9. By revising § 10.11 to read as follows:

§ 10.11 Confidentiality of records relating to Federal Employees' Compensation Act matters.

Records of the Office pertaining to an injury or death are confidential, and are exempt from disclosure to the public under section 552(b)(6) of Title 5, United States Code. No official or employee of an agency, establishment or department who has investigated or secured statements from witnesses and others pertaining to a claim for benefits, or any person having the care or use of such reports, shall disclose information from or pertaining to such records to any person, except in accordance with applicable regulations (see 20 CFR 70 and 70a).

10. By adding new § 10.12 as follows:

§ 10.12 Protection, release, inspection and copying of records.

(a) The protection, release, inspection and copying of records of the Office pertaining to an injury or death shall be accomplished in accordance with the rules, guidelines and provisions contained in Part 70 and Part 70a of Title 29 of the Code of Federal Regulations and the annual notice of systems of records and routine uses as published in the Federal Register. However, since the records of the Office are contained within a government-wide system of records under the control of the Department of Labor, § 70a.1(b)(3) of Title 29 of the Code of Federal Regulations provides that the regulations of the agency in possession of such records shall govern the procedure for requesting access to, or amendment of the records, including initial determinations on such requests, while the Department of Labor regulations shall govern all other aspects of safeguarding these records established by the Privacy Act. Where request to amend such records in possession of the agency is received, the agency shall so advise the Office and shall provide the Office with a copy of any amended record.

(b) When an employee or beneficiary is prosecuting an action for damages under 5 U.S.C. 8131, records may be released as provided for in Part 70a of Title 29 of the Code of Federal Regulations.

11. By amending § 10.20(b) table by revising (11) through (14) and adding (15) to read as follows:

§ 10.20 Forms.

* * * * *

(b) * * *

(11) CA–12—Claim for Continuance of Compensation.

(12) CA–16—Authorization of Examination and/or Treatment.

(13) CA–17—Duty Status Report.

(14) CA–20—Attending Physician's Report.

(15) CA–20a—Attending Physician's Supplemental Report.

* * * * *

12. By revising § 10.23(a) to read as follows:

§ 10.23 Penalties.

(a) Any person who knowingly makes any false statement, misrepresentation, concealment of fact, or any other act of fraud to obtain compensation as provided by the Act or who knowingly accepts compensation to which that person is not entitled is subject to criminal prosecution and may, under appropriate U.S. Criminal Code provisions, be punished by a fine of not more than $10,000 or imprisonment for not more than five years, or both.

* * * * *

13. By revising § 10.100 to read as follows:

§ 10.100 How to file a notice of injury or death.

(a) *Traumatic injury.* An employee who sustains a traumatic injury which the employee believes occurred while in the performance of duty shall give written notice of the injury of Form CA–1 to the official superior. If the employee is unable to give written notice, it may be given by any person acting on the employee's behalf.

(b) *Occupational disease or illness.* An employee who has a disease or illness which the employee believes to be employment-related shall give written notice of the condition on Form CA–2 to the official superior. If the employee is unable to give written notice, it may be given by any person acting on the employee's behalf. If it is impractical to give written notice to the employee's official superior, it may be given to any official of the employing agency, or directly to the Office. Form CA–2 must be accompanied by a statement from the employee to include (1) a detailed history of the disease or illness with identification of part(s) of the body affected; (2) complete details of types of substances or conditions of employment believed responsible for the disease or illness; (3) a description of specific exposures to substances or stressful conditions including locations, frequency and duration, and (4) whether the employee ever suffered a similar condition and, if so, full details of onset, history and medical care received with names and addresses of physicians rendering treatment.

(c) *Death.* If an employee dies because of a traumatic injury believed to have been sustained in the performance of duty or because of a disease or illness believed to have been employment-related, the employee's survivor(s), or any person acting on behalf of the survivor(s), shall notify the official superior of the death. If it is impractical to give notice to the employee's official superior, it may be given to any official of the employing agency, or directly to the Office.

14. By redesignating § 10.102 as § 10.101 and revising it to read as follows:

§ 10.101 When a notice of injury or death must be given.

(a) *Traumatic injury.* Notice of a traumatic injury or death due to a traumatic injury shall be given as soon as possible but, pursuant to 5 U.S.C. 8119, no later than 30 days from the date on which the injury or death occurred. The failure to give notice within 30 days may result in a loss of compensation rights.

(b) *Occupational disease or illness.* Notice of disease or illness believed to be employment related shall be given as soon as possible but no later than 30 days from the date on which the employee was first aware, or by the exercise of reasonable diligence should have been aware, of a possible relationship between the disease or illness and the conditions or factors of employment.

(c) *Death.* In the case of death, notice shall be given as soon as possible but no later than 30 days from the date of death or the date the employee's survivor first became aware, or by the exercise of reasonable diligence should have been aware, of a possible relationship between the death and the conditions or factors of employment. The failure to give notice within 30 days may result in a loss of compensation rights.

15. By redesignating § 10.103 as § 10.102 and revising it to read as follows:

§ 10.102 Report of injury by the official superior.

(a) As soon as possible but no later than 10 working days after receipt of written notice of injury from the employee, the official superior shall submit to the Office a written report of every injury or occupational disease or illness which is likely to:

(1) Result in a medical charge against the Office;

(2) Result in disability for work beyond the day or shift of injury;

(3) Require prolonged treatment;

(4) Result in future disability;

(5) Result in permanent impairment or;

(6) Result in a continuation of pay pursuant to 5 U.S.C 8118.

Portions of Forms CA–1 or CA–2 are provided for this purpose. If the injury does not come under any of the categories enumerated in this paragraph, the Form CA–1 or CA–2 need not be submitted to the Office but shall be retained as a permanent record in the employee's personnel folder.

(b) If the official superior has reason to disagree with any particular of the injury as reported by the employee, the official superior or other agency official shall explore the circumstances of the injury and submit to the Office, at the same time as Form CA–1 or CA–2, a full written explanation specifying the areas of disagreement and the findings upon which the disagreement is based. The report may be accompanied by supporting documentation such as witness statements, medical reports or records, or any other relevant information. If written explanation in support of the disagreement is not submitted, the Office may accept as factual the report of injury made by the employee.

(c) In cases of disease or illness, Form CA–2 must be accompanied by the following from the official superior:

(1) A detailed description of the employee's duty assignments including the nature, extent and duration of exposure to fumes, chemicals, or other irritants or situations;

(2) Copies of all physical examination reports, including x-ray reports and laboratory data, on file for the employee;

(3) A record of the employee's absences from work showing the reason for the absence in each instance, if known;

(4) Statements from each co-worker who has firsthand knowledge about the employee's condition and its cause, and;

(5) The official superior's comments on the accuracy of the employee's statement required by § 10.100(b) of this part.

(d) Other reports shall be submitted by the official superior as described elsewhere in this part or as may be required by the Office.

16. By redesignating § 10.101 as § 10.103 and revising it to read as follows:

§ 10.103 Report of death by the offical superior.

If an employee dies because of a traumatic injury or a disease or illness sustained in the performance of duty, the official superior shall immediately report the death to the Office by telephone or telegram. As soon as possible but no later than 10 working days after receipt of knowledge of death, the official superior shall complete and send Form CA–6 to the Office.

17. By adding a new § 10.104 to read as follows:

§ 10.104 Report of the attending physician.

(a) In all cases reported, the employee must submit, or arrange for the submission of, a medical report to the Office from the attending physician. This report should include: dates of examination and treatment; history given by the employee; findings; results of x-rays and laboratory tests; diagnosis; course of treatment, and the physician's opinion, with medical reasons, regarding causal relationship between the diagnosed condition(s) and the factors or conditions of the employment. This report may be made:

(1) On Part B of Form CA–16;

(2) On Form CA–20 or CA–20a; or

(3) By narrative report on the physician's letterhead stationery. The report shall be submitted to the Office as soon as possible after medical examination or treatment is received. (See also § 10.204(a)(1).)

(b) Other reports shall be submitted by the attending physician as described elsewhere in this part or as may be required by the Office.

18. By revising paragraph (a) and adding paragraph (e) to § 10.105 to read as follows:

§ 10.105 Time for filing a claim for compensation.

(a) Claim for disability compensation. An injured employee is required to file a written claim for compensation within 3 years after the injury before compensation may be paid. If, however, the official superior had actual knowledge of the injury within 30 days, or if written notice was given within 30 days, compensation may be allowed regardless of whether a written claim was made within 3 years after the injury. Actual knowledge must be such as to put the official superior reasonably on notice of an on-the-job injury.

* * * * *

(e) If no claim is filed by an injured employee or by someone acting on the employee's behalf prior to his or her death, the right to claim compensation for disability other than medical expenses ceases and does not survive.

19. By revising § 10.106 to read as follows:

§ 10.106 How to file a claim for disability compensation.

(a) Whenever an employee, as a result of an injury in the performance of duty, is disabled with loss of pay for more than 3 calendar days or has a permanent impairment or serious disfigurement as described in 5 U.S.C. 8107, the official superior shall furnish the employee with Form CA–4 (occupational disease or illness) or CA–7 (traumatic injury), as appropriate, for the purpose of claiming compensation and shall advise the employee of his or her rights under the Act.

(b) The employee, upon termination of wage loss if the period of wage loss is less than 10 calendar days, or at the expiration of 10 calendar days from the date pay stops if the period of wage loss will be 10 calendar days of more, should file Form CA–4 or CA–7 with the Office or with any person designated by the Office to receive claims. The employee's official superior is so designated to receive claims on behalf of the Office. The employee, or someone acting on the employee's behalf, must complete the front of Form CA–4 or CA–7 and, unless special circumstances require otherwise, submit the form to the official superior for completion and transmission to the Office.

(c) Upon receipt of Form CA–4 or CA–7 from the employee (or from someone acting on the employee's behalf), the official superior shall complete the appropriate portions of the claim form, items 1–4 on the front of the attached Form CA–20, insert the appropriate Office address on the back thereof, detach the Form CA–20 and send it to the attending physican for completion and submission to the Office. As soon as possible, but not later than 5 working days after its receipt from the employee, the official superior shall forward the completed Form CA–4 or CA–7 to the Office.

20. By revising § 10.107 to read as follows:

§ 10.107 Application for augmented compensation.

(a) While the employee has one or more dependents as defined in 5 U.S.C. 8110, the employee's basic compensation for wage loss as provided in section 8105 or 8106(a), or for permanent impairment as provided in section 8107(a), shall be augmented as provided in section 8110. Forms CA–4 and CA–7 include an application for such augmented compensation.

(b) Augmented compensation payable while an employee has an unmarried child as defined by 5 U.S.C. 8110, which would otherwise terminate because the child reaches the age of 18, may be continued while the child is a student as defined by the Act and in § 10.5(a)(25) of this part.

(c) The Office may require an employee to submit an affidavit or statement as to any dependents, in the manner and at the times the Office specifies, in order to determine the employee's entitlement to augmented compensation. If an employee when required, fails within 30 days of the date of the request to submit such affidavit or statement, the employee's right to augmented compensation otherwise payable shall be suspended until such time as the requested affidavit or report is received, at which time augmented compensation will be reinstated retroactive to the date of suspension provided the employee is entitled to such augmented compensation.

(d) An employee augmented compensation shall promptly notify the Office of any event which would terminate the employee's continued entitlement to augmented compensation. Any checks or payments received after such event shall be returned to the Office as soon as possible. Where augmented compensation is paid by the Office beyond the date entitlement terminated, the Office shall make proper adjustment and any difference between actual entitlement and the amount already paid is an overpayment of compensation and may be recovered pursuant to 5 U.S.C. 8129.

21. By revising § 10.109 to read as follows:

§ 10.109 Claims for balance of schedule awards unpaid at death when death is due to other causes.

(a) If an employee who has sustained compensable impairment within the meaning of 5 U.S.C. 8107, and has filed a valid claim during his or her lifetime, dies from causes other than the injury which resulted in the compensable impairment before the entire amount due for the schedule was paid, a claim for the unpaid balance may be made on a form approved by the Office by the surviving spouse or child in accordance with 5 U.S.C. 8109(a)(3)(D). If there is no surviving spouse or child, then a claim for the unpaid balance may be made by any other survivors pursuant to 5 U.S.C. 8109(a)(3)(D) and benefits shall be paid in the proportions and under the conditions and in the order as follows:

(1) To the parent or parents wholly dependent for support upon the decedent in equal shares with any wholly dependent brother, sister, grandparent or grandchild;

(2) To the parent or parents partially dependent for support upon the decedent in equal shares when there are no wholly dependent brothers, sisters, grandparents or grandchildren (or other wholly dependent parent); and

(3) To the parent or parents partially dependent upon the decedent, 25 percent of the amount payable, shared equally, and the remaining 75 percent to any wholly dependent brother, sister, grandparent or grandchild (or wholly dependent parent), share and share alike.

(b) Any survivor referred to in paragraph (a) of this section must be alive to receive any payment and any such survivor shall not have a vested right to any such payment. Claims for continuation of payments under 5 U.S.C. 8109 shall be made in the manner described by § 10.126 of this subpart.

(c) The entitlement of any survivor to payment under 5 U.S.C. 8109 shall cease upon the happening of any event which would terminate such right under 5 U.S.C. 8133. The termination of such right and any necessary

reapportionment shall be governed by § 10.128 of this subpart.

(d) The disposition of any balance not paid under the foregoing paragraphs shall be made in accordance with 5 U.S.C. 8109(a)(D)(v).

22. By redesignating § 10.110 as § 10.125 and revising it to read as follows:

§ 10.125 Affidavit or report by employee of employment and earnings.

(a) While in receipt of compensation for partial or total disability, an employee may be required to submit an affidavit or other report of earnings from employment or self-employment on either a part-time of full-time basis. If an employee when required, fails within 30 days of the date of the request to submit such an affidavit or report, the employee's right to compensation for wage loss under section 8105 or 8106 is suspended until such time as the requested affidavit or report is received by the Office, at which time compensation will be reinstated retroactive to the date of suspension. If, in making an affidavit or report, an employee knowingly omits or understates any earnings or remuneration, the employee shall forfeit the right to compensation with respect to any period for which the affidavit or report was required. A false or evasive statement, omission, concealment, or misrepresentation with respect to employment or earnings in a required affidavit or report may, in addition to forfeiture, subject the employee to criminal prosecution.

(b) Where the right to compensation is forfeited, any compensation already paid for the period of forfeiture may be recovered pursuant to 5 U.S.C. 8129 by deducting the amount from compensation payable in the future. If further compensation is not payable, the compensation already paid may be recovered pursuant to 5 U.S.C. 8129 and the Federal Claims Collection Act (31 U.S.C. 952). Earnings from employment referred to in this section or elsewhere in this part means gross earnings or wages before any deductions and includes the value of subsistence, quarters, reimbursed expenses, or any other advantages received in kind as part of the wages or remuneration. In general, earnings from self-employment means a reasonable estimate of the rate of pay it would cost the employee to have someone else perform the work or duties the employee is performing. Where self-employment is in the form of a corporation, partnership, or sole-proprietorship, a lack of profits for such entity does not remove the employee's obligation to report the employment or the rate of pay.

(c) For the purpose of administering the Act, including the making of proper determinations as to an employee's entitlement to benefits, the Office may, with the written consent of the employee, obtain from the Social Security Administration wage information concerning that employee to include the names and addresses of employers for whom the employee worked during a specified period of time, the periods employed, and the gross amount of wages earned.

23. By adding a new § 10.110 to read as follows:

§ 10.110 Burden of Proof

(a) A claimant has the burden of establishing by the weight of reliable, probative and substantial evidence that the claimed condition and the disability, if any, was caused, aggravated, or adversely affected by the claimant's Federal employment. As a part of this burden, the claimant must specify the employment incident or the factors or conditions of employment to which the injury, disease or disability is attributed, and must submit rationalized medical opinion evidence, based upon a complete and accurate factual and medical background, showing causal relationship between the claimed condition and the Federal employment. The fact that a condition or disease manifests itself during a period of Federal employment by itself does not raise an inference that there is causal relationship between the two. Neither the fact that the condition or disease became manifest during a period of Federal employment, nor the belief of the claimant that the condition or disease was caused or aggravated by employment conditions or factors, is sufficient in itself to establish causal relationship.

(b) If a claimant initially submits supportive factual and/or medical evidence which is not sufficient to carry the burden of proof, the Office will inform the claimant of the defects in proof and grant at least 30 calendar days for the claimant to submit the evidence required to meet the burden of proof. Subsequent submissions of evidence still not sufficient to carry the burden of proof will not require another notification of defects. The Office may, in its discretion, undertake to develop either factual or medical evidence for determination of the claim. For example, when the claim is based on exposure to hazardous material or noise at work, or when relevant evidence is in the possession of the Federal government and not accessible to the claimant (e.g., a deactivated employing agency facility), the Office will undertake to develop the necessary evidence.

(c) Once the Office has accepted a claim and paid compensation, it has the burden, before terminating or reducing compensation, of establishing by the weight of the evidence that the disability for which compensation was paid has ceased, or that the disabling condition is no longer causally related to the employment, or that the claimant is only partially disabled, or that its initial decision was in error.

24. By revising § 10.111 to read as follows:

§ 10.111 Submission of other evidence.

The responsibilities of the official superior and the claimant to submit evidence are specified elsewhere in this part. A claimant, a person acting on the claimant's behalf, or the employing agency may submit to the Office any other evidence which is deemed relevant and pertinent to the initial and ongoing determination of the claim.

25. By revising § 10.120 to read as follows:

§ 10.120 Report of termination of disability or return to work.

In all cases reported to the Office the official superior shall notify the Office immediately upon the injured employee's return to work or termination of disability. Form CA-3 is provided for this purpose. It shall be used unless a report of termination of disability is made to the Office on Form CA-1 or CA-2, or CA-4, or CA-7 as appropriate, or in some other manner.

26. By revising § 10.121 to read as follows:

§ 10.121 Recurrence of disability.

(a) The official superior shall notify the Office if, after the employee returns to work, the original injury causes the employee to stop work again. Form CA-2a is provided for this purpose. If the original injury was not previously reported to the Office, notice of the original injury shall be made on Form CA-1 or CA-2, as appropriate, and attached when Form CA-2a is submitted. Medical reports concerning the original injury should also be attached if not previously submitted. The employee has the burden of establishing by the weight of reliable, probative and substantial evidence that the recurrence of disability is causally related to the original injury.

(b) When the employee has received medical care as a result of the

recurrence, he or she should arrange for a detailed medical report to be submitted by the attending physician. The report should include: dates of examination and treatment; history given by the employee; findings; results of x-ray and laboratory tests; diagnosis; course of treatment; the physician's opinion, with medical reasons, regarding causal relationship between the employee's condition and the original injury; work limitations or restrictions, and prognosis. The employee should also submit, or arrange for the submission of, similar medical reports for any examination and/or treatment received subsequent to returning to work following the original injury.

(c) The employee must also give the reasons for believing the recurrence of disability is related to the original injury. A statement from the employee must accompany Form CA–2a describing the employee's duties upon return to work after the original injury, stating whether there were any other injuries or illness, and giving a general description of the employee's physical condition during the intervening period. The official superior may submit comments concerning the employee's statement.

(d) If the injured employee does not return to duty prior to the date Form CA–2a is submitted to the Office, the return to duty or termination of disability shall be reported to the Office on Form CA–3 unless otherwise reported on Form CA–4 or CA–7 or Form CA–8.

(e) Claim for compensation as a result of the recurrence of disability should be made using Form CA–4 or CA–7, as appropriate, unless such form was previously filed after the original injury. If Form CA–4 or CA–7 was previously filed, compensation must be claimed using Form CA–8. A completed claim form plus a medical report on Form CA–20 or CA–20a (or in narrative form) must be submitted before compensation may be paid.

27. By revising § 10.122 to read as follows:

§ 10.122 Claim for continuing compensation for disability.

Form CA–8 is provided to claim compensation for additional periods of time after Form CA–4 or CA–7 is submitted to the Office. It is the responsibility of the employee to submit Form CA–8. Without receipt of such claim, the Office has no knowledge of continuing wage loss. Therefore, while disability continues, a claim on Form CA–8 should be submitted every 2 weeks until the employee is otherwise instructed by the Office. The employee shall complete and sign the face of the form, and the official superior shall complete the reverse side. The official superior also shall complete items 1–6 on the front of the attached Form CA–20a and insert the appropriate Office address on the back thereof, and then detach the Form CA–20a and send it to the attending physician for completion and submission to the Office. The official superior shall forward the completed Form CA–8 to the Office within 5 working days of receipt from the employee.

28. By redesignating § 10.124 as § 10.126 and revising it to read as follows:

§ 10.126 Claims for continuing compensation for death.

A beneficiary to whom an award of compensation has been made on account of an employee's death shall submit additional claims for continuing compensation to the Office once each year, or when required by the Office. Form CA–12 is provided by the Office for this purpose and will be sent to the beneficiary when an additional claim is required. If a beneficiary when required, fails within 30 days of the date of request to submit the form (or an equivalent written statement), the beneficiary's right to compensation, including compensation payable to that beneficiary for or on behalf of another (e.g., compensation payable to a widow on behalf of a child), shall be suspended until such time as the requested form or equivalent written statement is received, at which time compensation will be reinstated at the appropriate rate retroactive to the date of suspension.

29. By redesignating § 10.123 as § 10.124 and revising it to read as follows:

§ 10.124 Employee's obligation to return to work or to seek work when able.

(a) An employee whose disability has ceased and who is able to resume regular Federal employment has the obligation to do so. No further compensation for wage loss is payable once the employee has recovered from the employment injury to the extent that he or she could perform the duties of the position held at the time of injury, or earn equivalent wages.

(b) Where an employee has been advised by the employing agency in writing of the existence of specific alternative positions within the agency, the employee shall furnish the description of such alternative positions to the attending physician and inquire whether and when the employee will be able to perform such duties. Where an agency has advised the employee of its willingness to accommodate where possible the employee's work limitations and restrictions, the employee shall so advise the attending physician and request the physician to specify the limitations and restrictions imposed by the injury. The employee has the responsibility to advise the employing agency immediately of the limitations and restrictions imposed.

(c) Where an employee has been offered suitable employment (or reemployment) by the employing agency (i.e., employment or reemployment which the Office has found to be within the employee's educational and vocational capabilities, within any limitations and restrictions which pre-existed the injury, and within the limitations and restrictions which resulted from the injury), or where an employee has been offered suitable employment as a result of job placement efforts made by or on behalf of the Office, the employee is obligated to return to such employment. An employee who refuses or neglects to work after suitable work has been offered or secured for the employee has the burden of showing that such refusal or failure to work was reasonable or justified.

(d) When a permanently disabled employee who cannot return to the position held at the time of injury due to the residuals of the employment injury has recovered sufficiently to be able to perform some type of work, the employee must seek suitable work either in the Government or in private employment. Such an employee must report the efforts made to obtain suitable employment at such times and in such manner as the Office may require including the names and addresses of the persons or establishments to whom the employee has applied for work.

(e) If a partially disabled employee refuses to seek suitable work or refuses or neglects to work after suitable work has been offered to, procured by, or secured for the employee, the employee is not entitled to compensation provided by sections 8105, 8106, and 8107 of the Act.

(f) Pursuant to 5 U.S.C. 8104(a), the Office may direct a permanently disabled employee to undergo vocational rehabilitation. If an employee without good cause fails or refuses to apply for, undergo, participate in, or continue participation in a vocational rehabilitation effort when so directed, the office will, in accordance with 5 U.S.C. 8113(b), reduce prospectively the

employee's monetary compensation based on what would probably have been the employee's wage-earning capacity had there not been such failure or refusal. If an employee without good cause fails or refuses to apply for, undergo, participate in, or continue participation in the early but necessary stages of a vocational rehabilitation effort (i.e., interviews, testing, counselling, and work evaluations), the Office cannot determine what would have been the employee's wage-earning capacity had there not been such failure or refusal. It will be assumed, therefore, in the absence of evidence to the contrary, that the vocational rehabilitation effort would have resulted in a return to work with no loss of wage-earning capacity, and the Office will reduce the employee's monetary compensation accordingly. Any reduction in the employee's monetary compensation under the provisions of this paragraph shall continue until the employee in good faith complies with the direction of the Office.

30. By adding a new § 10.123 to read as follows:

§ 10.123 Employing agency's responsibilities in returning the employee to work.

(a) Upon authorization of medical care, the official superior shall advise the employee of his or her obligation to return to work as soon as possible and, with respect to alternative work, shall

(1) Advise the employee in the same manner as provided by § 10.207(b)(1); and

(2) Advise the employee of his or her responsibilities under § 10.124 of this subpart.

(b) The employing agency shall monitor the employee's medical progress and duty status by obtaining periodic medical reports. Form CA–17 is provided for this purpose.

(c) Where the employing agency is notified in writing that the attending physician has found the employee to be partially disabled, and the employee is able to:

(1) Perform in a specific alternative position which is available within the agency and for which the agency has furnished the employee with a written description of the specific duties and physical requirements, the agency shall notify the employee immediately of the date of availability. To facilitate early return to work, the agency may inform the employee of the offer and its availability by telephone, but must provide written confirmation of the offer as soon as possible thereafter.

(2) Perform restricted or limited duties, the agency shall determine whether necessary accommodation can be made, and if so, advise the employee in writing of the duties, their physical requirements and availability. To facilitate early return to work, the agency may inform the employee of the offer by telephone, but must provide written confirmation of the offer as soon as possible thereafter.

(d) Where the nature and extent of injury prohibit the employee from returning to the duties of the position held at the time of injury, and the agency is unable to accommodate the restrictions and limitations imposed on the employee by the injury, and employment is consequently terminated, the agency may, in cooperation and coordination with the Office, subsequently determine the former employee's current physical condition and offer reemployment in a position suitable to the former employee's capabilities. Such reemployment offer must be in writing and include a description of the duties of the position being offered, the physical requirements of those duties, and the date the former employee is to return to work or, in the alternative, the date by which the former employee must notify the agency of his or her decision with respect to acceptance or refusal of the reemployment offer.

(e) A complete copy of any agency offer of employment or reemployment should be sent to the Office at the same time as it is sent to the employee.

31. By adding a new § 10.127 as follows:

§ 10.127 Continuation of death compensation for a child, brother, sister or grandchild who has reached the age of 18.

Compensation payable on behalf of a child, brother, sister, or grandchild under 5 U.S.C. 8133, which would otherwise be terminated because such individual has reached 18 years of age, shall be continued if and for so long as he or she is not married and is physically or mentally incapable of self-support, or if he or she is a student as defined in § 10.5(a)(25) for so long as he or she is not married and continues as a student. An individual in receipt of compensation under the provisions of 5 U.S.C. 8133 shall furnish, when so required by the Office, proof of continuing entitlement to such compensation, including certification of school enrollment. If a beneficiary when required, fails within 30 days of the date of the request to submit such proof, the beneficiary's right to compensation shall be suspended until the requested information is received, at which time compensation will be reinstated retroactive to the date of suspension, provided the beneficiary is entitled to such compensation.

32. By adding a new § 10.128 as follows:

§ 10.128 Termination of right to compensation for death; reapportionment of compensation.

(a) When a beneficiary who is receiving compensation on account of death ceases to be entitled to such compensation by reason of death, remarrying before age 60, marrying, reaching the age of 18, ceasing to be dependent, ceasing to be student, or becoming capable of self-support, the beneficiary or someone acting on the beneficiary's behalf shall immediately notify the Office of such event. If the beneficiary, or someone acting on the beneficiary's behalf, receives a check which includes payment of compensation for any period after the date when entitlement ceased for any of the above reasons, the check shall be promptly returned to the Office. The terms marrying and remarrying include common law marriage as recognized and defined by state law in the state where the beneficiary resides.

(b) An event as described in paragraph (a) of this section which results in the termination of compensation to a beneficiary may also result in a reapportionment of the amount of compensation payable to one or more of the remaining beneficiaries. Similarly, the birth of a posthumous child of the deceased employee may also result in a reapportionment of the amount of compensation payable to other beneficiaries. The parent, or someone acting on the child's behalf, shall promptly notify the Office of the birth and submit a certified copy of the birth certificate.

33. By revising § 10.130 to read as follows:

§ 10.130 Processing of claims.

Claims for compensation for disability and death are processed by claims examiners of the Office, whose duty it is to apply the law to the facts as reported, received, or obtained upon investigation. The Federal Employees' Compensation Act, as amended, requires that a decision with respect to entitlement contain findings of fact and be based on consideration of the claim presented by the claimant, the report by his or her immediate official superior, and the completion of such investigation as the Office may deem necessary. There is no required procedure for the production of evidence but the evidence should be in written form. The final authority in the Office in the determination of a claim is

vested in the Director of the Office. The decision shall contain findings of fact and a statement of reasons. A copy of the decision, together with information as to the right to a hearing, to a reconsideration, and to an appeal to the Employees' Compensation Appeals Board, shall be mailed to the claimant's last known address. If the claimant is represented before the Office, a copy of the decision will also be mailed to such representative.

34. By revising §10.131 to read as follows:

§ 10.131 Request for a hearing.

(a) Any claimant not satisfied with a decision of the Office shall be afforded an opportunity for an oral hearing before an Office representative designated by the Director. A hearing must be requested in writing within 30 days of the date of issuance of the decision and be made to the Office set forth in the decision. A claimant is not entitled to an oral hearing if the request is not made within 30 days of the date of issuance of the decision as determined by the postmark of the request, or if a request for reconsideration of the decision is made pursuant to 5 U.S.C. 8128(a) and § 10.138(b) of this subpart prior to requesting a hearing, or if request is made for a hearing on the written record as provided in paragraph (b) of this section. At an oral hearing, the claimant shall be afforded the opportunity to present oral testimony and/or written evidence in further support of the claim.

(b) In lieu of an oral hearing, a claimant shall be afforded an opportunity for a hearing on the written record by an Office representative designated by the Director. Such a hearing will not involve oral testimony or attendance of the claimant; however, the claimant may submit any written evidence which he or she believes relevant. A hearing on the written record must be requested in writing within 30 days of the date of issuance of the decision, specify the decision and/or issue which is the subject of the request, and be made to the office set forth in the decision. A claimant is not entitled to a hearing on the written record if the request is not made within 30 days of the date of issuance of the decision as determined by the postmark of the request, or if a request for reconsideration of the decision is made pursuant to 5 U.S.C. 8128(a) and § 10.138(b) of this subpart prior to requesting a hearing on the written record. By requesting a hearing on the written record under this paragraph, the claimant waives the right to an oral hearing on the same issue. Where timely request for a hearing on the written record is received, the Office shall furnish the employing agency with a copy of the claimant's request and allow 15 days for the agency to submit any comments and/or documents which it believes relevant and material to the issue in question. Following a review of the record and any evidence submitted, the Office representative shall decide the claim and inform the claimant, the claimant's representative and the employing agency of the decision.

35. By revising § 10.132 to read as follows:

§ 10.132 Time and place of hearing; prehearing conference.

The Office representative shall set the time and place of the hearing and shall mail written notice thereof to the claimant at least 10 days prior to the hearing. When practicable, the hearing will be set at a time and place convenient for the claimant. At the request of the claimant, the Office representative may schedule a prehearing conference to further define or clarify the issues. Request for such a conference must be made to the Office representative in writing at least 5 days prior to the scheduled date of the hearing. The decision whether or not to schedule a prehearing conference shall be solely within the discretion of the Office representative.

36. By revising § 10.133(a) to read as follows:

§ 10.133 Conduct of hearing.

(a) In conducting the hearing, the Office representative shall not be bound by common law or statutory rules of evidence, by technical or formal rules of procedure, or by section 5 of the Administrative Procedures Act, but may conduct the hearing in such manner as to best ascertain the rights of the claimant. For this purpose, the representative shall receive such relevant evidence as may be adduced by the claimant and shall, in addition, receive such other evidence as the representative may determine to be necessary or useful in evaluating the claim. Evidence may be presented orally or in the form of written statements and exhibits. The hearing shall be recorded. The recording, either by magnetic tape or by transcription, shall be made a part of the case record.

* * * * *

§ 10.136 [Redesignated From § 10.137]

37. By redesignating § 10.137 as § 10.136 without revision.

38. By redesignating § 10.138 as new § 10.138 and revising it to read as follows:

§ 10.138 Review of decision.

(a) Under the discretionary authority granted by 5 U.S.C. 8128(a), the Office may review an award for or against the payment of compensation at any time on its own motion and may, as a result of that review, affirm, reverse or modify the previous decision and inform the claimant, the claimant's representative and the employing agency of the decision.

(b)(1) Under the discretionary authority granted by 5 U.S.C. 8128(a), the Office may review an award for or against the payment of compensation on application of the claimant. No formal application for review is required, but the claimant must make a written request identifying the decision and the specific issue(s) within the decision which the claimant wishes the Office to recondsider, and give the reasons why the decision should be changed. Where the decision or issue cannot be reasonably determined from the claimant's application for review, the application will be returned to the claimant for clarification without further action by the Office with respect to the application. The claimant may obtain review of the merits of the claim by—

(i) Showing that the Office erroneously applied or interpreted a point of law, or

(ii) Advancing a point of law or a fact not previously considered by the Office, or

(iii) Submitting relevant and pertinent evidence not previously considered by the Office.

(2) Any application for review of the merits of the claim which does not meet at least one of the requirements listed in subparagraphs (b)(1)(A)–(C) of this section will be denied by the Office without review of the merits of the claim. Such a denial of application is not an award for or against the payment of compensation and is not subject to review under this section or to hearing under § 10.131. Further, the Office will not review a decision denying or terminating a benefit unless the application is filed within one year of the date of that decision. Where proper application is submitted and the Office finds that merit review of the claim is warranted, the Office shall furnish the employing agency with a copy of the claimant's application for reconsideration and allow 15 days for the agency to submit any comments and/or documents which it believes relevant and material to the issue in

question. The Office shall then review the decision and any agency submission, decide the claim, and inform the claimant, the claimant's representative and the employing agency of the decision.

39. By redesignating § 10.135 as § 10.137 and revising it to read as follows:

§ 10.137 Postponement; withdrawal or abandonment of request for hearing.

(a) A scheduled hearing may be postponed or cancelled at the option of the Office, or upon written request of the claimant if the request is received by the Office at least 3 days prior to the scheduled date of the hearing and good cause for the postponement is shown. The unexcused failure of a claimant to appear at a hearing or late notice may result in the assessment of costs against such claimant.

(b) A claimant may withdraw a request for a hearing at any time by written notice to the Office representative before the hearing is held, or on the record at the hearing.

(c) A claimant who fails to appear at a scheduled hearing may request in writing within 10 days after the date set for the hearing that another hearing be scheduled. Where good cause for failure to appear is shown, another hearing will be scheduled. The failure of the claimant to request another hearing within 10 days, or the failure of the claimant to appear at the second scheduled hearing without good cause shown, shall constitute abandonment of the request for a hearing. Where good cause is shown for failure to appear at the second scheduled hearing, another hearing will be scheduled. Unless extraordinary circumstances such as hospitalization, a death in the family, or similar circumstances which prevent the claimant from appearing are demonstrated, failure of the claimant to appear at the third scheduled hearing shall constitute abandonment of the request for a hearing.

40. By redesignating § 10.134 as § 10.136 and revising it to read as follows:

§ 10.136 Termination of hearing; release of decision.

The Office representative shall fix the time within which evidence will be received and shall terminate the hearing by mailing a copy of the decision, setting forth the basis therefor, to the claimant's last known address and to the claimant's representative, if any. A copy of the decision will also be mailed to the employing agency.

41. By adding a new § 10.135 as follows:

§ 10.135 Employing agency attendance at hearings and submission of evidence.

The employing agency does not have the right to request a hearing pursuant to 5 U.S.C. 8124. However, the employing agency has an interest in the outcome of the hearing and frequently possesses information pertinent to issues raised at the hearing. Therefore, the employing agency shall be afforded the opportunity to have an agency representative in attendance at the hearing and/or to request that it receive a copy of the hearing transcript. Where the employing agency sends a representative, the representative will attend primarily in the role of an observer without the right to question the claimant or make any argument. However, since the claimant is entitled to present evidence in support of the claim, the agency representative may, upon the specific request of the claimant, be called upon by the Office representative to give oral testimony. Where the employing agency requests that it receive a copy of the hearing transcript, the agency will be allowed 15 days following release of the transcript to submit comments or additional material for inclusion in the record. Any comments or materials submitted by the agency are subject to review and comment by the claimant within 15 days following the date the Office sends any such agency submission to the claimant.

42. By adding a new § 10.134 to read as follows:

§ 10.134 Subpoenas; witness fees.

(a) When reasonably necessary for full presentation of a case, an Office hearing representative may upon his or her own motion, or upon request of the claimant, issue subpoenas for the attendance and testimony of witnesses and for the production of books, records, correspondence, papers, or other documents which are relevant and material to any matter in issue at the hearing. A claimant who desires the issuance of a subpoena shall, not less than 20 days prior to the date fixed for the hearing, file with the Office representative a written request therefor, designating the witness or documents to be produced, and describing the address and location thereof with sufficient particularity to permit such witness or documents to be found. The request for a subpoena shall state the pertinent facts which the claimant expects to establish by such witnesses or documents and whether such facts could be established by other evidence without the use of a subpoena. A subpoena issued under the provisions of this section shall be issued in the name of the Office hearing representative, and shall be served either in person by an authorized representative of the Office or by certified mail, return receipt requested, addressed to the person to be served at his or her last known principal place of business or residence. Where service is made in person by an authorized Office representative, such representative shall make an affidavit stating that he or she personally served a copy of the subpoena upon the person named therein. Where service is by certified mail, the signed returned post office receipt shall serve as proof of service.

(b) Non-government witnesses subpoenaed under this section who have submitted evidence into the case record at the request of the Office (e.g., impartial physicians, rehabilitation specialists, etc.) shall be paid the same fees and mileage as are paid for like services in the District Court of the United States where the subpoena was returnable. Fees and mileage requested by such witnesses shall be paid by the Office.

(c) Witnesses subpoenaed under this section who have submitted evidence into the case record at the request of the claimant (e.g., the claimant's attending physician), or who have not submitted evidence into the case record but have testimony which is relevant and material to the issue in question and were subpoenaed at the request of the claimant, shall be paid the same fees and mileage as are paid for like services in the District Court of the United States where the subpoena was returnable. Fees and mileage requested by such witnesses shall be paid by the claimant.

43. By revising § 10.140 to read as follows:

§ 10.140 Participation in claims process by employing agency.

Proceedings conducted with respect to claims filed under the Act are nonadversary in character. Accordingly, a claimant's employing agency shall not have the right, except as provided in Subpart C of this part, to actively participate in the claims adjudication process. However, the employing agency may, under circumstances other than that described in § 10.102(b), investigate the circumstances surrounding an injury to an employee and the extent of disability (e.g., an agency may investigate an employee's activities where it appears the employee alleging total disability may be performing other employment or may be engaging in activities which would indicate less than total disability). Further, the agency

has the responsibility to submit to the Office at any time all relevant and probative factual and medical evidence in its possession or which it may acquire through investigation or other means. All evidence submitted will be considered and acted upon by the Office as appropriate, and the Office will inform the claimant, the claimant's representative and the employing agency of such action. In those instances where an employing agency contests a claim at time of initial submission and the claim is subsequently approved, the office will notify the agency of the rationale for approving the claim.

44. By revising § 10.141 to read as follows:

§ 10.141 Representation of the Director.

The Director shall be represented in proceedings with respect to any claim conducted before the Employee's Compensation Appeals Board (ECAB) by attorneys from the Office of the Solicitor of Labor.

45. By revising § 10.144 to read as follows:

§ 10.144 Authority of representative.

A representative, appointed and qualified as provided in this part, may make or give on behalf of the claimant any request or notice relative to any proceeding before the Office under the Act, including hearing and review. A representative shall be entitled to present or elicit evidence and to make allegations as to facts and law in any proceeding affecting the claimant and to obtain information with respect to the claim to the same extent as the claimant. Notice to any claimant of any administrative action, determination, or decision, or request to any party for the production of evidence shall be sent to the representative, and the notice or request shall have the same force and effect as if it has been sent to the claimant.

46. By revising paragraphs (c) introductory text, (d), (g), (h) and (i) of § 10.145 to read as follows:

§ 10.145 Fees for services.

* * * * *

(c) In every case where a representative's fee is desired, an application for approval of the fee shall be made to the Office. The application should be made when the representative has submitted the final piece of information believed necessary for the adjudication of the claim. Each request for approval of a fee shall be accompanied by a complete itemized statement, in duplicate, describing the services rendered. Such itemization shall contain the following information:

* * * * *

(d) The representative shall arrange for the claimant to review the request for a fee and to comment as to the services provided and as to the reasonableness of the fee. The claimant's written comments should accompany the application for approval of a fee submitted to the Office.

* * * * *

(g) Any claimant aggrieved or adversely affected by an award of a fee may request a hearing or reconsideration by the Office, or may request review by the Employees' Compensation Appeals Board.

(h) A representative aggrieved or adversely affected by an award of a fee may request review by the Employees' Compensation Appeals Board.

(i) Any person who receives a fee, other consideration or gratuity on account of services rendered with respect to a claim under this part, unless approved by the Office, or who solicits employment for himself or another in respect to a case or claim under (or to be brought under) this Act shall be guilty of a misdemeanor under 18 U.S.C. 292 and upon conviction of each offense, will be punished by a fine of not more that $1,000 or imprisoned not to exceed 1 year, or both. Utilization of an escrow deposit of funds by a representative for the deposit of a client's funds, prior to approval by the Office of the representative's fee, is not considered receipt or collection of a fee by the representative; provided, the escrow deposit of funds is one made by the claimant/client into the hands of a third party to be held by that third party until receipt of the Office's approval of the representative's fee, and then delivered by the third party to the representative in accordance with the decision of the Office and the provisions of the escrow agreement.

47. By adding new § 10.160 through § 10.166 under the subheading Representative Payment under Subpart B as follows:

Representative Payment

§ 10.160 Indications for designation of a representative payee.

When the Office determines that a beneficiary is incapable of managing or directing the management of benefits either because of a mental or physical disability, or because of legal incompetence, or because the individual is under 18 years of age, the Office in its sole discretion may approve an individual designated or appointed to serve as the representative payee for funds due the eligible beneficiary.

§ 10.161 Selection of a Payee.

(a) In approving a payee, the Office shall approve the person, agency, organization or institution which, in its judgment, will best serve the interest of the beneficiary. In making its decision the Office shall consider:

(1) The relationship of the person to the beneficiary;

(2) The amount of interest that the person shows in the welfare of the beneficiary;

(3) Any legal authority the person, agency, organization or institution has to act on behalf of the beneficiary;

(4) Whether the potential payee has custody of the beneficiary;

(5) Whether the potential payee is in a position to know of and to look after the needs of the beneficiary.

(b) For beneficiaries 18 years old or older, the general order of preference subject to the provisions of paragraph (a) of this section, shall be

(1) A legal guardian, spouse or other relative who has custody of the beneficiary or who demonstrates strong concern for the personal welfare of the beneficiary;

(2) A friend who has custody of the beneficiary or demonstrates strong concern for the personal welfare of the beneficiary;

(3) A public on nonprofit agency or institution having custody of the beneficiary;

(4) A private institution operated for profit and licensed under State law which has custody of the beneficiary; and

(5) Persons other than above who are qualified to carry out the responsibilities of a payee and who are able and willing to serve as a payee for a beneficiary.

(c) For beneficiaries under age 18, the general order of preference subject to the provisions of paragraph (a) of this section shall be—

(1) A biological or adoptive parent who has custody of the beneficiary, or a legal guardian;

(2) A biological or adoptive parent who does not have custody of the beneficiary, but is contributing to the beneficiary's support and is demonstrating strong concern for the beneficiary's well-being;

(3) A biological or adoptive parent who does not have custody of the beneficiary and is not contributing toward his or her support, but is demonstrating strong concern for the beneficiary's well-being;

(4) A relative or stepparent who has custody of the beneficiary;

(5) A relative who does not have custody of the beneficiary but is contributing toward the beneficiary's support and is demonstrating concern for the beneficiary's well-being;

(6) A relative or close friend who does not have custody of the beneficiary but is demonstrating concern for the beneficiary's well-being; and

(7) An authorized social agency or custodial institution.

§ 10.162 Responsibilities of a representative payee.

A representative payee has a responsibility to—

(a) Spend or invest payments received only for the use and benefit of the beneficiary in a manner and for the purposes he or she determines to be in the best interests of the beneficiary, subject to the guidelines contained in §10.163;

(b) Notify the Office of any event that would affect the amount of benefits the beneficiary receives or the right of the beneficiary to receive benefits;

(c) Submit to the Office, upon its request, a written report accounting for the benefits received; and

(d) Notify the Office of any change in the payee's circumstances that would affect performance of the payee's responsibilities.

§ 10.163 Use of benefit payments.

To assure that the general welfare of the beneficiary is properly served, benefit payments received by a representative payee shall be used in the following manner, and in the prescribed order:

(a) Current maintenance, including costs incurred in obtaining food, shelter, clothing, medical care, and personal comfort items.

(b) Institutional care, including the customary charges made by the institution, as well as expenditures for those items which will aid in the beneficiary's recovery or release from the institution or expenses for personal needs which will improve the beneficiary's conditions while in the institution.

(c) Support of the beneficiary's legal dependents after current maintenance needs or institutional care of the beneficiary are met; and

(d) Claims of creditors only if the current and reasonably foreseeable needs of the beneficiary are met.

§ 10.164 Conservation and investment of benefit payments.

If payments either in whole or in part are not needed for any of the purposes listed in § 10.163 of this part, they shall be conserved or invested on behalf of the beneficiary in non-speculative accounts. Conserved funds should be invested in accordance with rules followed by trustees. Any investment must show clearly that the payee holds the property in trust for the beneficiary. Preferred investments for excess funds are U.S. Savings Bonds and deposits in an interest or dividend paying account in a bank, trust company, credit union, or savings and loan association which is insured under either Federal or State law. The account must be in a form which shows clearly that the representative payee has only a fiduciary and not a personal interest in the funds. The account should provide for withdrawal upon demand without penalty. The interest and dividends, as well as all other profits, which result from an investment are the property of the beneficiary and may not be considered to be the property of the payee.

§ 10.165 Termination of representation.

The services of a representative payee may be terminated when:

(a) The payee has not used the funds in the interests of the beneficiary as stipulated in this subpart;

(b) The payee has not discharged other responsibilities described in this subpart, or has not done so in a timely manner;

(c) The payee dies, wishes to be discharged from responsibility, or is unable to carry out the responsibilities of payee;

(d) The Office, after receipt of competent evidence, determines that the beneficiary is capable of managing his or her own funds; or

(e) A minor beneficiary attains majority.

§ 10.166 Accounting for benefit payments.

A representative payee is accountable for the use of benefit payments. The Office may require periodic written reports from the representative payee, and in certain cases, verification of how the funds were used. The representative payee shall keep records of how the funds were used so as to be able to furnish the following information to the Office:

(a) The amount of benefit payments on hand at the beginning of the accounting period;

(b) A description of how the benefit payments were used;

(c) An accounting of the amounts of payments which were saved or invested;

(d) The place(s) of residence of the benficiary during the accounting period; and

(e) The amount of the beneficiary's income from other sources during the accounting period so as to assist the Office in evaluating the use of the benefit payments.

48. By revising § 10.200 to read as follows:

§ 10.200 Statutory provisions.

(a) Pub. L. 93–416, approved September 7, 1974, significantly revised the Act to provide that specified employees who file a claim for a period of wage loss caused by a traumatic injury shall be entitled, under certain circumstances, to have their regular pay continued for a period not to exceed 45 days.

(b) Continuation of pay shall be considered regular income and not compensation and unlike compensation, shall be subject to all taxes and other payroll deductions applicable to regular income.

49. By revising § 10.201 to read as follows:

§ 10.201 Right to continuation of pay.

(a) An employee is not entitled to continuation of pay unless:

(1) The employee is one of the types of employees listed in § 10.5(a)(11)(i), (iii), or (v), except that an individual selected pursuant to Chapter 121 of Title 28 and serving as a petit or grand juror but who is not otherwise an employee of the United States is not entitled to continuation of pay;

(2) The employee sustains a traumatic job-related injury;

(3) The employee claims continuation of pay within 30 days of the injury on a form approved by the Secretary. Form CA–1 may be used for this purpose.

(4) The employee's disability begins within 90 days of the date of injury.

(b) An employee entitled to continuation of pay shall have regular pay continued without a break in time for a period not to exceed 45 calendar days of disability, unless the right to continuation of pay is controverted and pay is terminated under § 10.203 or is terminated under § 10.204. Where the employee stops work due to the disabling effects of the injury, the 45-day period starts with the first day or shift following the date of shift of injury during which the claimant is disabled, provided the disability begins within 90 days of the occurrence of the injury. With regard to the date of injury, the employing agency will keep the employee in a pay status for any fraction of the day or shift of injury for which the employee was disabled with no "charge" to the 45-day period. If the employee stops work for a part of a day or shift other than the day or shift of

injury, that day or shift will be considered one calendar day for the purpose of counting 45 days. If a disabled employee returns to work with duties other than the duties performed at the time of injury, continuation of pay is chargeable only when there has been a formal assignment to an established job which is normally paid at a lower salary and would otherwise result in loss of income to the employee. Continuation of pay must be charged against the employee's 45-day entitlement when, due to the effects of the injury upon the employee, (1) a personnel action has been taken to assign or detail the employee to an identified position for which a position description exists which is classified at a lower salary level than that earned by the employee when injured; or (2) a personnel action has been taken to change the employee to a lower grade, or to a lower rate of basic pay; or (3) a personnel action has been taken to change the employee to a different schedule of work which results in loss of salary or premium pay (e.g., Sunday pay or night differential) authorized for the employee's normal administrative workweek. If the employee's job-related disability continues after entitlement to continuation of pay ceases, the employee shall be entitled to receive compensation subject to the provisions of 5 U.S.C. 8117.

(c) Where an employee's pay is continued under this subpart, it shall not be terminated or interrupted as a part of a disciplinary action.

(d) The administration and interpretation of the Act, including section 8116 of the Act, is the function of the Office. While the employing agency shall make certain preliminary decisions with respect to an employee's entitlement to pay continuation under this subpart, final determinations as to such entitlement are a function of the Office.

(e) If the Office finds that the employee is not entitled to continuation of pay after it has been paid, the payments, at the employee's option, shall be charged to annual or sick leave or considered overpayments of pay under 5 U.S.C. 5584.

(f) If the Office determines that pay has been continued at an incorrect rate, the Office shall notify the employing agency and the employee of the correct rate of pay, and the employing agency shall make the necessary adjustment.

§ 10.203 [Removed]

50. By removing § 10.203.

51. By redesignating § 10.202 as § 10.203 and revising it to read as follows:

§ 10.203 Controversion by employing agency.

(a) With respect to continuation of pay under 5 U.S.C. 8118, the employing agency shall, on the basis of information submitted by the employee, or secured on investigation, controvert a claim and terminate an employee's pay only if:

(1) The disability is caused by an occupational disease or illness; or

(2) The employee is the type employee defined by § 10.5(a)(11) (ii) or (iv), or is an individual selected pursuant to Chapter 121 of Title 28 and serving as a petit or grand juror and who is not otherwise an employee of the United States;

(3) The employee is neither a citizen nor a resident of the United States or Canada; or

(4) The injury occurred off the employing agency's premises and the employee was not performing official duties; or

(5) The injury was caused by the employee's willful misconduct, or the employee's intent to kill or injure himself or herself or another person, or was proximately caused by the employee's intoxication; or

(6) A written claim for wage loss required by 5 U.S.C. 8118(a) was not filed within 30 days after the date of injury; or

(7) The employee first stopped work as a result of the injury more than 90 days following the injury; or

(8) The employee reports the injury after employment has terminated; or

(9) The employee is enrolled in the Civil Air Patrol, Peace Corps, Job Corps, Youth Conservation Corps, Work Study Programs, or another similar group.

(b) If for reasons other than those listed in paragraph (a) of this section, the agency believes the employee is not entitled to continuation of pay, the agency may controvert an employee's right to continuation of pay; however, the employee's regular pay must be continued and may not be interrupted during the 45-day period unless the controversion is sustained by the Office and the agency is so notified, or unless entitlement ceases under the provisions of § 10.204 of this subpart.

(c) To controvert a claim for continuation of pay, employing agency shall complete the appropriate section of Form CA–1 and submit detailed information in support of the controversion to the Office.

(d) If the Office determines that the employing agency has incorrectly controverted and terminated the employee's pay, the Office shall notify the agency and the employee's pay shall be continued for a period not to exceed 45 days or as otherwise directed by the Office, and the Office shall notify the agency to convert periods of sick or annual leave or leave without pay to COP.

52. By redesignating § 10.210 as § 10.202 and revising it to read as follows:

§ 10.202 Election of annual or sick leave.

An employee may use accumulated or advanced annual or sick leave instead of claiming continuation of pay; however, the time provisions of 5 U.S.C. 8117, governing the date upon which an employee's entitlement to compensation begins, do not begin to run until the use of annual or sick leave ends. The "buy back" provisions specified in § 10.310 may not be used to repurchase the leave taken while an employee was otherwise eligible for pay continuation as provided by this subpart to affect the section 8117 time provisions. An election to use annual or sick leave is not irrevocable and an employee may subsequently request continuation of pay in lieu of previously requested annual or sick leave. Where an employee is eligible, the employing agency shall continue pay prospectively effective the date of the employee's request; however, conversion and restoration of leave used prior to the date of request is within the sole discretion of the employing agency. The use of leave may not be used to delay or extend the 45-day continuation of pay period. Therefore, where previously used leave is not converted and restored, the 45 days will be counted as though the employee had been in a continuation of pay status.

53. By revising § 10.204 to read as follows:

§ 10.204 Termination and forfeiture of continuation of pay.

(a) Where pay is continued after an employee stops work due to a disabling traumatic injury, such pay shall be terminated if:

(1) Within 10 calendar days after the date the employee submits claim for continuation of pay, including such claim for a recurrence of disability, the employing agency has not received prima facie medical evidence that the employee sustain a disabling traumatic injury, except that pay shall be continued without interruption in the absence of such medical evidence if investigation shows to the official superior's satisfaction that the employee sustained a disabling traumatic injury.

Where medical evidence is received by the agency more than 10 calendar days after work stoppage, the agency shall continue the employee's pay retroactive to date of termination provided the medical evidence supports injury-related disability beyond the 10 calendar-day period. The provisions of this paragraph also apply to periods of recurrent disability as described in § 10.208; or

(2) The employing agency receives evidence that the attending physician has found the employee no longer disabled (i.e., the employee can perform the duties of the position held at the time of injury); or

(3) The employing agency receives evidence that the attending physician has found the employee to be partially disabled and the employee refuses suitable work which has been offered by the agency in accordance with § 10.207; or

(4) The employee's scheduled period of employment expires or employment is otherwise terminated, except as provided by § 10.201(c); or

(5) The employing agency receives notification from the Office that pay should be terminated; or

(6) The 45-day continuation of pay period expires.

(b) When an employee refuses to submit to or obstructs an examination required by the Office under the provisions of 5 U.S.C. 8123(a), the right to continuation of pay under this subpart may be suspended until the refusal or obstruction stops. Pay otherwise paid or payable under this subpart for the period of the refusal or obstruction may be forfeited and, where already paid, is subject to the provisions of § 10.201(e).

(c) If the Office determines that the employing agency has incorrectly terminated the employee's pay or selected an incorrect date of termination, the Office shall instruct the agency to take appropriate corrective action.

54. By revising § 10.205 to read as follows:

§ 10.205 Pay defined for continuation of pay purposes.

(a) For a full or part-time worker, either permanent or temporary, who works the same number of hours each week of the year, or each week of the period of appointment if less than one year, the weekly pay rate shall be the hourly pay rate on the date of injury multiplied by the number of hours worked each week, excluding overtime.

(b) For a part-time worker, either permanent or temporary, who does not work the same number of hours each week but who does work each week of the year, or each week of the period of appointment if less than one year, the weekly pay rate shall be the average weekly earnings established by dividing the total earnings during the one year immediately preceding the date of injury, excluding overtime, by the number of weeks worked during the one year period. For the purposes of this computation, if the employee worked only a part of a workweek, such week is counted as one week.

(c) For all WAE (when actually employed), intermittent and part-time workers, either permanent or temporary, who do not work each week of the year, or each week of the period of appointment if less than one year, the weekly pay rate shall be the average weekly earnings established by dividing the total earnings during the one year immediately preceding the date of injury, excluding overtime, by the number of weeks worked during that one year period. For the purpose of this computation, if the employee worked only a part of a workweek, such week is counted as one week. However, the average weekly earnings may not be less than 150 times the average daily wage earned in the employment during the days employed within the one year period immediately preceding the date of injury divided by 52 weeks.

(d) Premium, Sunday and holiday pay, night and shift differential, or other extra pay shall be included when computing wages for continuation of pay, but overtime pay shall not be included.

(e) Changes in pay or salary which would have otherwise occurred during the 45-day period (e.g., promotion, within-grade increase, demotion, termination of a temporary detail, etc.) are to be reflected in the continuation of an employee's pay under this subpart, and are to take effect at the time the event would otherwise have occurred.

55. By revising § 10.206(a) to read as follows:

§ 10.206 Agency accounting and reporting of continuation of pay.

(a) Pending development of a system within the Office for directly capturing and tabulating data on continuing payments to employees under 5 U.S.C. 8118, each agency and instrumentality of the United States having an employee who is in a continuation of pay status during the calendar quarter shall submit a report to the Office within 30 days after the end of each quarter (address: Director, Office of Workers' Compensation Programs, U.S. Department of Labor, Washington, DC 20210).

* * * * *

56. By revising § 10.207 to read as follows:

§ 10.207 Official superior's responsibility in continuation of pay cases.

(a) Upon receiving notice that an employee has suffered an employment-related traumatic injury, an official superior shall:

(1) Promptly authorize medical care in accordance with Subpart E of this part;

(2) Provide the employee with Form CA–1 for reporting the injury and upon receipt of the completed form, return to the employee the "Receipt of Notice of Injury";

(3) Fully advise the employee of the right to elect continuation of regular pay or use annual or sick leave, if the injury is disabling;

(4) Advise the employee that medical evidence of a disabling traumatic injury must be submitted to the official superior within 10 calendar days of the date disability begins or pay may be terminated in accordance with § 10.204(a)(1);

(5) Inform the employees whether continuation of pay will be controverted, and, if so, whether pay will be terminated and the basis for the controversion and termination of pay;

(6) Submit Form CA–1, completed by the employee and official superior, and all other available pertinent information to the Office as soon as possible, but no later than 10 work days after the official superior has received Form CA–1. If the claim is controverted, the official superior will proved explanation on Form CA–1 or in a separate narrative statement or both.

(b) Upon authorization of medical care, the official superior shall advise the employee of his or her obligation to return to work as soon as possible and;

(1) Where the agency has specific alternative positions available for partially disabled employees, the agency shall furnish the employee with a written description of the specific duties and physical requirements of those positions;

(2) Where, in addition to any specific alternative positions, the agency is willing to accommodate the limitations and restrictions imposed on the employee by the injury, shall so advise the employee; and

(3) Shall advise the employee of his or her responsibilities under § 10.209 of this subpart.

(c) The employing agency shall monitor the employee's medical progress and duty status by obtaining

periodic medical reports. Form CA–17 is provided for this purpose. Addditional information or clarification may be obtained by the agency through telephone contact with the employee's attending physician provided such contact is by a physician or nurse who is an employee of the agency.

(d) Where employing agency is notified that the attending physician has found the employee to be partially disabled, and the employee is able to:

(1) Perform one of the specific alternative positions referred to in § 10.207(b)(1), the employing agency shall notify the employee immediately of the description of the job and its physical requirements and of the date the job will be available. To facilitate early return to work, the agency may contact the employee by telephone, and provide written confirmation of availability as soon as possible thereafter. A complete copy of the offer, including the description of the duties of the job, the physical requirements and the date of availability, should be sent to the Office at the same time as it is sent to the employee.

(2) Perform restricted or limited duties referred to in § 10.207(b)(2), the employing agency shall determine whether duties suitable to the employee's limitations and restrictions are available, and if so, advise the employee in writing of the duties, their physical requirements and availability. To facilitate early return to work, the agency may contact the employee by telephone, but must provide written confirmation of the offer as soon as possible thereafter. A complete copy of any offer made to the employee should also be sent to the Office at the same time as it is sent to the employee.

57. By revising § 10.206 to read as follows:

§ 10.206 Recurrence of disability.

(a) If an employee claims a recurrence of disability, the official superior shall promptly complete Form CA–2a. The employee shall request on Form CA–2a to continue to receive regular pay or to charge the absence to sick or annual leave.

(b) Where the employee requests continuation of pay, the official superior shall continue pay if:

(1) The original claim of disability has not been denied by the Office; and

(2) Pay has not been continued for the entire 45 days; and

(3) The disability recurs within 90 days of the date the employee first returned to work following the initial period of disability.

(c) If the employee's pay has been continued for 45 days, or disability recurs more than 90 days after the employee first returns to work, the employee is entitled to compensation only, provided the claim is approved by the Office, and the employing agency may not continue regular pay. An employee who is no longer entitled to continuation of pay should file a claim for compensation on Form CA–7 or CA–8.

58. By revising § 10.209 to read as follows:

§ 10.209 Employee's responsibilities in continuation of pay cases.

(a) An employee who sustains a traumatic job-related injury, or someone acting on the employee's behalf, shall complete and submit the employee's portion of Form CA–1 to the official superior as soon as possible but no later than 30 days after the date of injury. An employee shall elect on Form CA–1 either to receive continuation of pay or use sick or annual leave while disabled for work as a result of the injury. (See § 10.201 and § 10.202.)

(b) Where the agency has advised of the existence of specific alternative positions, the employee shall furnish the description of such alternative positions to the attending physician and inquire whether and when the employee will be able to perform such duties. The employee must furnish the employing agency with a copy of the physician's response.

(c) Where the agency has advised of its willingness to accommodate where possible the employee's work limitations and restrictions, the employee shall so advise the attending physician and request the attending physician to specify the limitations and restrictions imposed by the injury. The employee has the responsibility to advise the employing agency immediately of the limitations and restrictions imposed.

(d) Where an employee has been offered duties within the limitations and restrictions imposed by the physician, the employee is obligated to return to duty. Where an employee refuses such an offer of suitable work, entitlement to continuation of pay ceases as of the effective date of availability of such work.

(e) Where the Office determines that, due to the failure of the employee to meet his or her obligations and responsibilities under this section, pay was continued beyond the date it would otherwise have terminated, the Office will advise the official superior and the employee of the period of disability which is approved, and the official superior may require the employee to resolve any overpayment in accordance with § 10.201(e) of this subpart.

(f) Where return to suitable work results in a loss of pay such as premium pay, Sunday pay, holiday pay, night or shift differential, etc., continuation of pay will be granted for the lost elements of pay (see § 10.205(d) of this subpart).

59. By revising § 10.301 to read as follows:

§ 10.301 Temporary total disability rate.

(a) Compensation based on loss of wages is payable, subject to the provisions of 5 U.S.C. 8117, after the expiration of continuation of pay as provided by Subpart C of this part or from the beginning of pay loss in all other cases.

* * * * *

60. By revising § 10.302 to read as follows:

§ 10.302 Permanent total disability rate.

When the injury causes permanent total disability, an injured employee is entitled to total disability compensation until death unless the employee is medically or vocationally rehabilitated to either full or partial earning capacity. The loss of use of both hands, both arms, both feet, or both legs, or the loss of sight of both eyes is prima facie evidence of permanent total disability. However, the presumption of permanent total disability as a result of such loss is rebuttable by evidence to the contrary, such as evidence of sustained work and earnings despite the loss. Compensation for permanent total disability is payable at the rate of 66⅔ percent of the pay rate established for compensation purposes, or at 75 percent when where is a dependent (see § 10.301(b) of this section).

61. By revising § 10.303 to read as follows:

§ 10.303 Partial disability rate.

(a) An injured employee who is unable to return to the position held at the time of injury (or to earn equivalent wages) but who is not totally disabled for all gainful employment is entitled to compensation computed on loss of wage-earning capacity. Compensation for partial disability is payable at 66⅔ percent (or at 75 percent if the employee has a dependent) of the difference between the employee's pay rate for compensation purposes and the employee's wage-earning capacity. A narrative description of the formula used by the Office to compute the compensation payable is contained in paragraph (b) of this section. In determining the compensation payable

for partial disability, an employee's wage-earning capacity is determined by the employee's actual earnings if those earnings fairly and reasonably represent the wage-earning capacity. If the actual earnings do not fairly and reasonably represent the employee's wage-earning capacity or if the employee has no actual earnings, the employee's wage-earning capacity shall be determined by the Office by selection of a job after having given due regard to the nature of the employee's injury, the degree of physical impairment, the employee's usual employment, the employee's age, the employee's qualification for other employment, the availability of suitable employment, and other factors or circumstances which may affect the employee's wage-earning capacity in his or her disabled condition. The salary of such a job shall be considered the employee's wage-earning capacity. The Office will not secure employment for the claimant in the position selected for establishing an earning capacity.

(b) For the purpose of describing the formula utilized by the Office for computing the compensation payable for partial disability, the following terms are defined: pay rate for compensation purposes is as defined in § 10.5(a)(20) of this part; current pay rate means "current" salary or pay rate for the job held at the time of injury; and earnings means the claimant's actual earnings, or the salary or pay rate of the job selected by the Office as representative of the employee's wage-earning capacity. An employee's wage-earning capacity in terms of percentage is obtained by dividing the employee's earnings by the current pay rate. The comparison of earnings and "current" pay rate for the job held at the time of injury need not be made as of the beginning of partial disability. Any convenient date may be chosen by the Office for making the comparison as long as the two wage rates are in effect on the date used for comparison. The employee's wage-earning capacity in terms of dollars is computed by multiplying the pay rate for compensation purposes by the percentage of wage-earning capacity and the resulting dollar amount is subtracted from the pay rate for compensation purposes to obtain the employee's loss of wage-earning capacity. Compensation for partial disability is payable at the rate of 66⅔ percent (or at 75 percent if the employee has a dependent) of this loss of wage-earning capacity. The compensation payable shall be increased by applicable cost-of-living adjustments.

62. By revising § 10.304 to read as follows:

§ 10.304 Schedule compensation rate.

(a) Compensation is provided for specified periods of time for the permanent loss or loss of use (referred to as impairment) of each of certain members, organs and functions of the body. Compensation for proportionate periods of time is payable for partial loss or loss of use of each member, organ or function. The compensation for scheduled awards will equal 66⅔ percent of the employee's pay or 75 percent of the pay when there is a dependent. Compensation for loss of wage-earning capacity may be paid after the schedule expires. Proper and equitable compensation not to exceed $3,500 may be paid for serious disfigurement of the face, head or neck if of a character likely to handicap a person in securing or maintaining employment.

(b) Authority is provided under 5 U.S.C. 8107(c)(22) to add other internal and external organs to the compensation schedule. Pursuant to this authority, the following is added:

	Weeks
Breast (one)	52
Kidney (one)	156
Larynx	160
Lung (one)	156
Penis	205
Testicle (one)	52
Tongue	160
